Although the Cargo Transfer/Offloading Log does provide the same type of information as the Product Transfer Report, it is a cumulative report, whereas the Product Transfer Report is a summary. To eliminate the need to transmit all of the information in the Cargo Transfer/Offloading Log, which is used only for at-sea enforcement, the Product Transfer Report requires only summary information for the week and does not require detailed data such as latitude and longitude or product listing for each transfer during the week. The Product Transfer Report can also be used to verify on-board logs and insure that they are not changed at a later date to reflect false information.

The Weekly Catch/Receipt and Production Report is for reports of catch in round weight, numbers of cartons of production, and total product weight produced for the week. Reports of catch include those by catcher vessels that are delivered to catcher/processor or mothership processor vessels. Such reports are made in behalf of the catcher vessels. The weekly report does not and is not intended to include products received from another vessel. The information on products received from another vessel is only required in the Cargo Transfer/Offloading Log and is needed so at-sea enforcement units can determine the products' origin during an inspection. The receipt of products information is not needed for inseason management and therefore is not required in the weekly reports.

2. Definition of prohibited species in the GOA FMP:

The Council proposed a new definition of prohibited species for the Gulf of Alaska to address three problems. First, FMP section 6.4.1 presently defines unallocated species as "those species and species groups which must be immediately returned to the sea by vessels operating in the groundfish fishery." However, the FMP does not clearly specify these species as prohibited, and which must be avoided, and if caught, returned to the sea with a minimum of injury.

Second, the "unallocated species" definition is not consistent with references to prohibited species elsewhere in the FMP and its implementing regulations. Section 8.3.1.1(C) of the FMP currently specifies prohibited species restrictions simply as "in accordance with existing State and Federal statutes". Separate prohibited species restrictions are specified for foreign fisheries under FMP section 8.3.2.1(B). These restrictions are more explicit about avoiding and not retaining six species groups. However, explicit language does not exist that identifies unallocated species as prohibited species. Misconstruing unallocated and prohibited species as different categories of species is possible.

Third, reliance on "other applicable law" to define which species are prohibited created a potential enforcement problem. For example, citing groundfish fishermen found to be retaining incidentally-caught king crab from the Gulf of Alaska may have been unenforceable because king crabs are not listed as prohibited species in the GOA regulations at § 672.20(e)(1) (i), (ii), and (iii). Further, in the absence of a king crab FMP, Federal regulations do not exist to restrict the catch of king crabs in the Gulf of Alaska. Thus, an offending vessel would have to be registered in Alaska for State restrictions on king crab catches to apply. If the vessel were not registered in Alaska, no other existing State or Federal statutes or regulations would be violated with respect to retention of king crabs taken in the EEZ.

The Council recommends that four categories of species or species groups in the Gulf of Alaska should be defined in the GOA FMP, one of which is prohibited species. Prohibited species include any of the species of Pacific salmon (*Oncorhynchus* spp.), steelhead trout (*Salmo gairdneri*), Pacific halibut (*Hippoglossus stenolepis*), Pacific herring (*Clupea harengus pallasi*), king crab (*Paralithodes* spp., and *Lithodes* spp.) and Tanner crab (*Chionoecetes* spp.). The other three categories are: Target species, "other species", and non-specified species. Target species include pollock, Pacific cod, flounders, sablefish, rockfish, and thornyhead rockfish. "Other species" include Atka mackerel, squid, sculpins, sharks, skates, eulachon, smelts, capelin, and octopus. "Non-specified species" are those taken incidentally in the groundfish fisheries but which are not managed by the GOA FMP. Catch records for non-specified species need not be kept.

The Council proposes that the species identified above be designated as prohibited species. It also proposes the three other species categories.

3. Other GOA FMP modifications which require regulatory changes:

Regulatory changes are proposed to § 672.20 (c) and (f) to implement changes in sections 4.2.1.1 and 4.2.3.1 of the GOA FMP, which currently invites public comments on preliminary specifications and apportionments of groundfish target quotas, prohibited species catch (PSC) limits for fully utilized groundfish species and species groups, and PSC limits for Pacific halibut, respectively, for 30 days following publication of a notice in the Federal Register. Public comments are invited for 30 days following the date of filing of the notice with the Office of the Federal Register, rather than its date of publication. This change is intended to clarify when the public comment period begins. The intent is to establish a deadline for submitting comments that is closer to the Council's deadline, which is usually reached either on or before the Council meeting when final recommendations for specifications and apportionments for a new fishing year are made.

For consistency with regulations implementing the BSAI FMP, the term target quota (TQ) has been replaced with total allowable catch (TAC) throughout the regulations. The Council recommends removal of the reserve category for certain species of groundfish, because the reserve category is no longer necessary. The relevant species are sablefish, "other rockfish", shelf demersal rockfish, and thornyhead rockfish. In 1986 and 1987, the Secretary had apportioned the reserves for these species to domestic fisheries for domestic processing (DAP) at the start of the year, since they were determined to be "fully utilized" by domestic fisheries for domestic processing (DAP) fishermen. Hence, the reserve category served no useful purpose. Reserves, therefore, shown in Table 1 of 50 CFR Part 672, are proposed to be set at twenty percent of the TAC only for pollock, Pacific cod, flounders, and "other species".

4. Regulatory changes in addition to those implementing the FMP amendments:

The Secretary proposes a regulatory change to § 672.20 explicitly to authorize reapportionments of surplus domestic annual processing (DAP) to joint venture processing (JVP). Current regulatory language at § 672.20(d) only explicitly pertains to apportionment of surplus domestic annual harvest (DAH) to total allowable level of foreign fishing (TALFF). Although previous reapportionments of excess DAP to JVP have been made, based on the implied authority of existing regulations and the Magnuson Act, the Council has concluded that such reapportionments would be less confusing to the public and the affected industry if the regulations expressly stated that authority. This proposed regulatory change is consistent with and implements existing GOA FMP text at section 5.5.2.3 (reorganized section 4.4.2) providing that "should the initial DAP exceed timely expectations of actual harvest, the Regional Director shall reapportion the excess DAP to JVP, if needed * * * ". This regulatory change, of itself, will not impact the industry since it serves only to clarify potential regulatory actions; it does not alter current management procedures, and it does not reduce amounts available to domestic processors; rather, it allows available amounts to be transferred to JVP operations only when it has been verified that DAP operators will not use their full allocations.

Classification

This proposed rule is published under section 304(a)(1) of the Magnuson Act, as amended by Pub. L. 99–659, which requires the Secretary of Commerce to publish regulations proposed by a Council within 15 days of receipt of the amendment and regulations. At this time the Secretary has not determined that the amendments that regulations would implement are consistent with the national standards, other provisions of the Magnuson Act, and other applicable law. The Secretary, in making these determinations, will take into account the data and comments received during the comment period.

The Council prepared an environemntal assessment (EA) for these amendments describing the impact on the environment as a result of this rule. A copy of the EA may be obtained from the Council at the address above and comments on it are requested. The proposed regulations establishing reserves for certain groundfish species, changing the public comment period for proposed annual specifications, changing TQ to TAC, and expressly authorizing inseason reapportionments of excess DAP to JVP are categorically excluded from the requirement to prepare an EA by NOAA Directive 02–10.

The Administrator of NOAA determined that this proposed rule is not a "major rule" requiring a regulatory impact analysis under Executive Order 12291. This determination is based on the RIR/IRFA prepared by the Council. A copy of the RIR/IRFA may be obtained from the Council at the address above.

The Council prepared an IRFA as part of the regulatory impact review which concludes that this proposed rule, if adopted, would have significant effects on small entities. These effects have been discussed in the RIR/IRFA. A copy of this analysis may be obtained from the Council at the address listed above.

This rule contains new collection-of-information requirements subject to the Paperwork Reduction Act (PRA). A requst to collect this information has been submitted to the Office of Management and Budget for review under section 3504(h) of the PRA.

The Council determined that this rule will be implemented in a manner that is consistent to the maximum extent practicable with the approved coastal zone management program of Alaska. This determination has been submitted for review by the responsible State agencies under section 307 of the Coastal Zone Management Act.

List of Subjects

50 CFR Part 611

Fisheries, Foreign fishing.

50 CFR Parts 672 and 675

Fisheries, Reporting and recordkeeping requirements.

Dated: December 15, 1987.

James E. Douglas, Jr.,

Deputy Assistant Administrator for Fisheries, National Marine Fisheries Service.

For the reasons set out in the preamble, 50 CFR Parts 611, 672, and 675 are proposed to be amended as follows:

PART 611—[AMENDED]

1. The authority citation for 50 CFR Part 611 continues to read as follows:

Authority: 16 U.S.C. 1801 *et seq.*, 16 U.S.C. 971 *et seq.*, 22 U.S.C. 1971 *et seq.*, and 16 U.S.C. 1361 *et seq.*

2. In § 611.92, paragraph (b) and Table 1 and paragraph (c)(1) heading and (c)(1)(i) are revised to read as follows:

§ 611.92 Gulf of Alaska groundfish fishery.

* * * * *

(b) *Categories of species.* Four categories of species are recognized for regulatory purposes and they are set forth in Table 1. The term "groundfish" means species in all categories except the "prohibited species" category.

(1) The term "target species" means, for purposes of this section, species that are commercially important and are generally targeted upon by the groundfish fishery. They include pollock, Pacific cod, flounders, sablefish, rockfish, and thornyhead rockfish. Records of the catch or receipt of each target species or species group must be kept.

(2) The term "other species" means, for purposes of this section, species that currently have only slight economic value and are not generally targeted upon, but which are significant components of the ecosystem or have economic potential. They include sculpins, sharks, skates, eulachon, smelts, capelin, octopus, Atka mackerel, and squid. The total allowable catch (TAC) for these species as a category is set at five percent of the combined quotas of the TACS of the target species. Records of the catch or receipt of "other species" must be kept.

(3) The term "prohibited species" means, for purposes of this section, Pacific herring (*Clupea harengus pallasi*); salmonids (*Salmonidae*); Pacific halibut (*Hippoglossus stenolepis*); king crab (*Paralithodes* spp. and *Lithodes* spp.); and Tanner crab (*Chionoecetes* spp.). Except to the extent that their harvest is authorized under other applicable law, the catch or receipt of these species must be minimized and, if caught or received, they must be returned to the sea immediately in accordance with § 611.11 of this part. Records must be maintained as required by §§ 611.9, 611.90(e)(2), and this section. Any species of fish for which there is no foreign allocation must be treated in the same manner as "prohibited species" and records must be maintained of any catches or receipts of these species, except for "non-specified species." Catches or receipts of "non-specified species" must be

treated in the same manner as "prohibited species" but records are not required of catches or receipts of these species.

(4) The term "non-specified species" means, for purposes of this section, species that are not listed in paragraphs (b) (1), (2), and (3) of this section and are not managed under authority of other fishery management plans or under authority of the International Pacific Halibut Commission. Catch records need not be kept.

TABLE 1.—CATEGORIES OF SPECIES INVOLVED IN THE GULF OF ALASKA GROUNDFISH FISHERY

Target species [1]	"Other species" [2]	Prohibited species [3]	Non-specified species [4]
Pollock, Pacific cod, flounders, sablefish, rockfish, and thornyhead rockfish.	Sculpins, sharks, skates, eulachon, smelts, capelin, octopus, Atka mackerel, and squid.	Pacific herring (*Clupea harengus pallasi*); salmonids (Salmonidae); Pacific halibut (*Hippoglossus stenolepis*); king crab (*Paralithodes* spp. and *Lithodes* spp.); Tanner crab *Chionoecetes* spp.).	All species not included in these categories.

[1] Commercially important; specific TAC applies to each species or species group; records must be maintained.
[2] The target quota for these species as a category is set at five percent of the combined target quotas of the target species. Records of the catch or receipt of "other species" must be kept.
[3] Except to the extent that their harvest is authorized under other applicable law, the catch or receipt of these species must be minimized and, if caught or received, they must be returned to the immediately in accordance with § 611.11 of this part. Records must be maintained as required by these §§ 611.9, 611.90(e)(2), and this section. Any species of fish for which there is no foreign allocation must be treated in the same manner as "prohibited species" and records must be maintained of any catches or receipts of these species, except for non-specified species.
[4] The term "non-specified species" means for purposes of this section those species that are not listed in paragraph (b) (1), (2), and (3) of this section and are not managed under authority of other fishery management plans or under authority of the International Pacific Halibut Commission. Catch records need not be kept.

(c) * * *

(1) *TACs, TALFFs, Reserves, and PSC limits.*

(i) See 50 CFR 672, Subpart B, for procedures to determine total allowable catches (TACs), domestic annual processing (DAP), joint venture processing (JVP), reserves, total allowable level of foreign fishing (TALFF), and prohibited species catch (PSC) limits. Species listed in paragraph (b)(3) and Table 1 of this section as "prohibited species", species listed in paragraph (b)(4) of this section as "non-specified species", and species for which the TALFF is zero, including species for which a PSC limit has been specified, will be treated in the same manner as prohibited species under § 611.11.

* * * * *

PARTS 672 AND 675—[AMENDED]

3. The authority citation for 50 CFR Parts 672 and 675 continues to read as follows:

Authority: 16 U.S.C. 1801 *et seq.*

4. In § 672.3, paragraph (a) is revised to read as follows:

§ 672.3 Relation to other laws.

(a) *Federal law.* For regulations governing foreign fishing for groundfish in the Gulf of Alaska, see 50 CFR 611.92; for those governing foreign fishing for groundfish in the Bering Sea and Aleutian Islands, see 50 CFR 611.93. For regulations governing fishing for groundfish in the Bering Sea and Aleutian Islands by vessels of the United States, see 50 CFR Part 675; for those governing salmon fishing off Alaska, see 50 CFR Part 674; for those governing permits and certificates of inclusion for the taking of marine mammals, see 50 CFR 216.24. For regulations governing fishing for halibut by vessels of the United States, see the regulations of the International Pacific Halibut Commission at 50 CFR 301.

* * * * *

5. In § 672.5, paragraph (a)(3)(iv) introductory text and (a)(3)(iv)(E) are revised and new paragraphs (a)(3)(iv)(G) and (a)(3)(v) are added to read as follows:

§ 672.5 Reporting requirements.

(a) * * *

(3) * * *

(iv) After notification of starting fishing by a vessel under paragraph (a)(3)(i) of this section, and continuing until that vessel's entire catch or cargo of fish has been off-loaded, the operator of that vessel must submit a weekly catch/receipt and product transfer report, including reports of zero tons caught, or received, for each weekly period, Sunday through Saturday, GMT, or for each portion of such a period. The catch/receipt and product transfer report must be sent to the Regional Director within one week fo the end of the reporting period through such means as the Regional Director will prescribe upon issuing that vessel's permit under § 672.4 of this part. This report must contain the following information:

* * * * *

(E) The number of cartons of fish product, and the estimated unit net weight, in kilograms or pounds, of a carton of processed fish by species or species group produced by that vessel during the reporting period:

* * * * *

(G) The product weight, rounded to the nearest one-tenth of a metric ton (0.1 mt) and the number of cartons transferred or off-load by product type and by species or species group.

(v) For each transfer or off-loading of fish product in the EEZ, outside the EEZ, within any State's territorial waters, or within the internal waters of any State, the operator or each fishing vessel must record, in a separate transfer log, the following information within twelve hours of the completion of the transfer or off-loading:

(A) The time and date (GMT) and location (in geographic coordinates, or if within a port, the name of the port) the transfer or off-loading began and was completed;

(B) The product weight and product type, by species or species group of all fish product transferred or off-loaded to the nearest one-tenth of a metric ton (0.1 mt);

(C) The name and permit number of the vessel receiving the product or, if off-loaded to a shoreside location, the name of the location and commercial facility receiving the product; and

(D) The intended port of destination of the receiving vessel if transferred to another vessel.

* * * * *

6. In § 672.20, paragraph (a)(2)(i) is redesignated as (a)(2)(ii), paragraph (a)(2) introductory text is revised, a new paragraph (a)(2)(i) is added, and Table 1 and paragraphs (c)(1), (d)(2) and (d)(5)(i), (e)(1), and the third sentence of (f)(2)(i) are revised to read as follows:

§ 672.20 General limitations.

(a) * * *

(2) *Total Allowable Catch (TAC).* The Secretary, after consultation with the North Pacific Fishery Management Council (Council), will specify the annual TAC for each calendar year for each target species and the "other species" category, and will apportion the TACs among DAP, JVP, reserves, and total allowable level of foreign fishing (TALFF).

(i) The sum of the TACs specified must be within the OY range of 16,000 to 800,000 mt for target species and the "other species" category. Initial reserves are established for pollock, Pacific cod, flounder, and "other species", which are equal to twenty percent of the TACs for these species or species groups.

* * * * *

TABLE 1.—INITIAL (AS OF JANUARY 1, EACH YEAR) TOTAL ALLOWABLE CATCH (TAC), DOMESTIC ANNUAL HARVEST (DAH), DOMESTIC ANNUAL PROCESSING (DAP), JOINT VENTURE PROCESSING (JVP), AND TOTAL ALLOWABLE LEVEL OF FOREIGN FISHING (TALFF), ALL IN METRIC TONS. TAC DAH+RESERVE+TALFF; DAH DAP+JVP

Species	Area [1]	Code	TAC	DAH	DAP	JVP	Reserve	TALFF
Pollock	W/C	701						
	Outside Shelikof							
	E							
	(Total)							
Pacific cod	W	702						
	C							
	E							
	(Total)							
Flounders	W	129						
	C							
	E							
	(Total)							
Sablefish	W	703					NA[2]	
	C							
	W. Yakutat							
	SE/Eastern Yakutat							
	(Total)							
Other rockfish [3]	W	849					NA[2]	
	C							
	E							
	(Total)							
Shelf demersal rockfish [4]	SEO						NA[2]	
Thornyheads	G–W	749					NA[2]	
Other sp. [5]	G–W							

[1] See Figure 1 of § 672.20 for description of regulatory area and districts.
[2] W=Western, C=Central, E=Eastern, G–W=Gulf-Wide, SE=Southeast.
[3] The category "other rockfish" includes all fish of the genus (Sebastes) except the category shelf demersal rockfish as defined in footnote 3 below and Sebastolobus (Thornyhead rockfish).
[4] Shelf demersal rockfish include Sebastes paucispinus (Bocaccio), S. nebulosus (China rockfish), S. caurinus Copper rockfish, S. malliger (Quillback rock fish), S. proiger (Redstripe rockfish), S. helvomaculatus (Rosethorn rockfish), S. brevispinis (Silvergrey rockfish), S. nigrocinctus (Tiger rockfish), S. rubberrimis (Yelloweye rockfish), S. pinningera (Canary rockfish).
[5] The category "other species" includes sculpins, sharks, skates, eulachon, smelts, octopus, Atka mackerel, and squid. The TAC is equal to 5 percent of the TACs of the target species.

* * * * *

(c) * * *

(1) *Notices of harvest limits and PSC limits.* As soon as practicable after October 1 of each year, the Secretary, after consultation with the Council, will publish a notice in the **Federal Register** specifying preliminary annual TAC, DAP, JVP, TALFF, reserve, and applicable PSC amounts for each target species, the "other species" category, and species determined to be fully utilized by the DAP fisheries. The preliminary specifications of DAP and JVP will be the amounts harvested during the previous year plus any additional amounts the Secretary finds will be harvested by the U.S. fishing industry. These additional amounts will reflect as accurately as possible the projected increases in U.S. harvesting and processing and the extent to which U.S. harvesting and processing will occur during the coming year. Public comment on these amounts will be accepted by the Secretary for 30 days after the notice is filed for public inspection with the Office of the Federal Register. The Secretary will consider timely comments and, after consultation with the Council, specify the final PSC limits and annual TAC for each target species and the "other species" category, and apportionments thereof among DAP, JVP, TALFF, and reserves. These final amounts will be published as a notice in the **Federal Register** on or about January 1 of each year. These amounts will replace the corresponding amounts for the previous year.

* * * * *

(d) * * *

(2) *Apportionment of surplus DAP to JVP and surplus DAH to TALFF.* Under paragraph (d)(5) of this section, and as soon as practicable after April 1, June 1, and August 1, and on such other dates as he determines necessary, the Secretary will apportion to JVP any part of the DAP amounts that he determines will not be processed by U.S. processors, and may apportion to TALFF any part of the DAH amounts that he determines will not be harvested by U.S. fishermen during the remainder of the year.

* * * * *

(5) * * *

(i) *General.* The Secretary, under paragraphs (d)(1) and (d)(2) of this section, may apportion to TALFF only those amounts which he determines will not be harvested by vessels of the United States during the remainder of the fishing year, and will apportion to JVP only those amounts he determines will be harvested by vessels of the United States during the remainder of the fishing year but will not be processed by U.S. processors. The amount of reserve which the Regional Director determines will be harvested by vessels of the United States may, at the discretion of the Secretary, either be apportioned to DAP or JVP, or retained in the reserves as eligible for later apportionment under paragraph (d) of this section.

* * * * *

(e) * * *

(1) Prohibited species, for the purpose of this part, are any of the species of Pacific salmon (*Oncorhynchus* spp.), steelhead trout (Salmo gairdneri), Pacific halibut (*Hippoglossus stenolepis*), Pacific herring (*Clupea harengus pallasi*), king crab (*Paralithodes* spp., and *Lithodes* spp.) and Tanner crab (*Chionoecetes* spp.) caught by a vessel regulated under this part while fishing for groundfish in the Gulf of Alaska, unless retention is authorized by other applicable law, including the regulations of the International Pacific Halibut Commission.

* * * * *

(f) * * *

(2) * * *

(i) * * * Public comments on the proposed halibut PSC limits will be accepted by the Secretary for 30 days after the notice is filed for public inspection with the Office of the Federal Register. * * *

* * * * *

PART 675—[AMENDED]

7. In § 675.5, paragraphs (a)(3)(iv) introductory text and (a)(3)(iv)(E) are revised and new paragraphs (a)(3)(iv)(G) and (a)(3)(v) are added to read as follows:

§ 675.5 Reporting requirements.

(a) * * *

(3) * * *

(iv) After notification of starting fishing by a vessel under paragraph (a)(3)(i) of this section, and continuing until that vessel's entire catch or cargo of fish has been off-loaded, the operator of that vessel must submit a weekly catch/receipt and product transfer report, including reports of zero tons caught or received, for each weekly period, Sunday through Saturday, GMT, or for each portion of such a period. The catch/receipt and product transfer report must be sent to the Regional Director within one week of the end of the reporting period through such means as the Regional Director will prescribe upon issuing that vessel's permit under § 675.4 of this part. This report must contain the following information:

* * * * *

(E) The number of cartons of product, and the unit net weight, in kilograms or pounds, or a carton of processed fish by species or species group produced by that vessel during the reporting period;

* * * * *

(G) The product weight, rounded to the nearest one-tenth of a metric ton (0.1 mt) and the number of cartons transferred or off-loaded by product type and by species or species group.

(v) For each transfer or off-loading of fish product in the EEZ, outside the EEZ, within any State's territorial waters, or within the internal waters of any State, the operator of each fishing vessel must record, in a separate transfer log, the following information within twelve hours of the completion of the transfer or off-loading:

(A) The time and date (GMT) and location (in geographic coordinates, or if within a port, the name of the port) the transfer or off-loading began and was completed;

(B) The product weight and product type, by species or species group of all fish products transferred or off-loaded to the nearest one-tenth of a metric ton (0.1 mt);

(C) The name and permit number of vessel receiving the product or, if off-loaded to a shoreside location, the name of the location and commercial facility receiving the product; and

(D) The intended port of destination of the receiving vessel if transferred to another vessel.

* * * * *

§§ 611.92, 672.20, 672.22 and 672.24 [Amended]

8. In addition to the amendments set forth above, remove the initials "TQ" and add. in their place, the initials "TAC" in the following places:

§ 611.92(c)(2)(ii)(A);

Newly redesignated § 672.20(a)(2)(ii) introductory text and (ii)(A) and (B), (b)(1), and (c)(2)(i) and (ii) and (iii)(A) and (B);

§ 672.22(a)(1)(iii), (2)(i)(B) and (iii), and (3)(vi);

§ 672.24(b)(1), (2), and (3)(i) and (ii).

DEPARTMENT OF AGRICULTURE

Rural Electrification Administration

Arizona Electric Power Cooperative, Inc.; Finding of No Significant Impact

AGENCY: Rural Electrification Administration, USDA.

ACTION: Finding of No Significant Impact.

SUMMARY: Notice is hereby given that the Rural Electrification Administration (REA), pursuant to the National Environmental Policy Act of 1969, as amended, the Council on Environmental Quality Regulations (40 CFR Parts 1500 through 1508), and REA Environmental Policy and Procedures (7 CFR Part 1794), has made a Finding of No Significant Impact (FONSI) with respect to construction of a 230 kV transmission line on single pole steel structures in Cochise County, Arizona by Arizona Electric Power Cooperative, Inc. (AEPCO).

FOR FURTHER INFORMATION CONTACT: Martin G. Seipel, Director, Southwest Area—Electric, Room 0205, South Agriculture Building, Rural Electrification Administration, Washington, DC 20250, telphone (202) 382-8848.

SUPPLEMENTARY INFORMATION: REA, in conjunction with a request for construction approval from AEPCO, required that AEPCO develop environmental support information reflecting the potential impacts of the project. The information supplied by AEPCO is contained in an Environmental Analysis (EVAL) and Addendum I to the EVAL. Included as part of its environmental review process, REA held interagency and public scoping meetings in August, 1985. The EVAL with Addendum, input from the meetings held, and input from the public and certain Federal and State agencies have been used by REA to develop its Environmental Assessment (EA). REA has concluded that the EA represents an accurate assessment of the environmental impacts of the proposed project and that the impacts are acceptable.

The proposed project consists of constructing a single circuit 230 KV transmission line within a 24.7 meter (90 ft) right-of-way (ROW) which would connect the Apache Generating Station (AGS) which is located approximately 16 km (10 mi) south of the city of Willcox with the proposed 230/69 kV San Rafael Substation which would be located near the city of Sierra Vista. The length of line varies from 60 km (37 mi) for the recommended route to 96.5 km (60 mi) for the longest alternative route. The recommended alternative is considerably shorter than the others because it would originate at the new Butterfield Tap Substation which would be constructed on the Apache to Pantano 230 kV transmission line approximately 24 km (15 mi) west of AGS. The other alternative routes would originate at the AGS switchyard. All of the alternative routes would terminate at the San Rafael Substation. The Butterfield Tap Site would require 0.81 hectare (ha) (2.0 ac) of land and the San Rafael Substation would require 0.97 ha (2.4 ac) of land.

REA has concluded that the proposed project will have no effect on wetlands, floodplains, important farmland, prime forest land or rangeland, threatened or endangered species or critical habitat, visual quality and property listed or eligible for listing in the *National Register of Historic Places*. Certain impacts resulting from the proposed project are unavoidable such as the clearing of vegetation for the ROW and crossing the San Pedro River Management Area. No other matters of environmental concern have come to REA's attention.

Alternatives examined for the proposed project included no action and upgrading existing facilities. Alternative line routes, structure types and substation sites were also evaluated. REA determined that there is a need for the new line and that constructing the new line along the recommended route is an environmentally acceptable alternative for AEPCO to maintain reliable service for present customers and provide for future load growth.

Based upon the environmental support information provided, information provided at the REA conducted scoping meetings, and public input, REA prepared an EA concerning the proposed project and its impacts. As a result of its independent evaluation, REA has concluded that approval of financing assistance enabling AEPCO to construct the proposed project would not constitute a major Federal action significantly affecting the quality of the human environment. Therefore, REA has reached a FONSI with respect to the proposed project. The preparation of an environmental impact statement is not necessary.

Copies of REA's EA, FONSI and the EVAL with Addendum can be obtained from the offices of REA in the South Agriculture Building, Room 0205, 14th and Independence Avenue SW., Washington, DC 20250 or at the office of AEPCO at 1000 South Highway 80, Benson, Arizona 85602, during regular business hours. Copies of the documents are being sent to various Federal and State agencies and will also be available for review at the offices of Sulfur Springs Valley Electric Cooperative, Inc., 316 Bartow Drive, Sierra Vista, Arizona 85635 and at public libraries in Benson, Tombstone, Sierra Vista and Pearce-Sunsites. REA will take no final action with respect to AEPCO's request for financing assistance for at least thirty (30) days after publication of this notice in the **Federal Register** and in newspapers of general circulation in Cochise County.

Any comments should be sent to REA at the address given above. All comments received during the 30-day period will be considered. This program is listed in the Catalog of Federal Domestic Assistance under No. 10.8509—Rural Electrification Loans and Loan Guarantees. For the reasons set forth in the final rule related Notice to 7 CFR Part 3015, Subpart V, this program is excluded from the scope of Executive Order 312372 which requires intergovernmental consultation with state and local officials.

Date: December 16, 1987.

Harold V. Hunter,

Administrator.

BILLING CODE 3410-15-M

Soil Conservation Service

Finding of No Significant Impact; Love Creek Watershed, DE

AGENCY: Soil Conservation Service, USDA.

ACTION: Notice of a finding of no significant impact.

SUMMARY: Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969; the Council of Environmental Quality Guidelines (40 CFR Part 1500); and the Soil Conservation Service Guidelines (7 CFR Part 650); and the Soil Conservation Service, U.S. Department of Agriculture, gives notice that an environmental impact statement is not being prepared for the Love Creek Watershed, Sussex County, Delaware.

FOR FURTHER INFORMATION CONTACT: Mr. Douglas E. Hawkins, State Conservationist, Soil Conservation Service, 9 E. Loockerman Street, Suite 207, Dover, Delaware 19901–7377, telephone (302–678–0750).

SUPPLEMENTARY INFORMATION: The environmental assessment of this federally assisted action indicates that the project will not cause significant local, regional, or national impacts on the environment.

As a result of these findings, Douglas E. Hawkins, State Conservationist, has determined that the preparation and review of an environmental impact statement are not needed for this project.

The project concerns a plan for watershed protection. The planned works of improvement include conservation tillage, terraces, grassed waterways, land use conversion, and accelerated technical assistance for land treatment.

The Notice of Finding of No Significant Impact (FONSI) has been forwarded to the Environmental Protection Agency and to various Federal, State, and local agencies and interested parties. A limited number of copies of the FONSI are available to fill single copy requests at the above address. Basic data developed during the environmental assessment are on file and may be reviewed by contacting Mr. Douglas E. Hawkins.

No administrative action on implementation of the proposal will be taken until 30 days after the date of this publication in the **Federal Register**.

(This activity is listed in the Catalog of Federal Domestic Assistance Under No. 10.904, Watershed Protection and Flood Prevention Program, and is subject to the provision of Executive Order 12372 which requires intergovernmental consultation with State and local officials)

Douglas E. Hawkins,

State Conservationist.

December 14, 1987.

DEPARTMENT OF COMMERCE

Bureau of the Census

Annual Survey of Retail Sales and Inventories; Determination

In accordance with Title 13, United States Code, sections 131, 182, 224, and 225, I have determined that various government agencies need the 1987 annual retail trade data to provide a sound statistical basis for the formation of policy and that these data also serve a variety of public and business needs. This annual survey is a continuation of similar surveys that we have conducted each year since 1951 (except 1954). It provides, on a comparable classification basis, annual sales, purchases of merchandise, accounts receivable balances, and year-end inventories for 1986 and 1987. These data are not available publicly on a timely basis from nongovernmental or other governmental sources.

The Census Bureau will require a selected sample of firms operating retail establishments in the United States (with sales size determining the probability of selection) to report in the 1987 Annual Retail Trade Survey. The sample will provide, with measurable reliability, statistics on the specified subjects.

We will furnish report forms to the firms covered by this survey and will require their submission within 20 days after receipt. Copies of the forms are available upon written request to the Director, Bureau of the Census, Washington, DC, 20233.

I have directed, therefore, that an annual survey be conducted for the purpose of collecting these data.

Dated: December 15, 1987.

John G. Keane,

Director, Bureau of the Census.

BILLING CODE 3510–07–M

Foreign-Trade Zones Board

[Order No. 388]

Resolution and Order Approving Application of Greater Cincinnati Foreign-Trade Zone, Inc., for Subzone for Honda in Shelby County, Ohio

Proceedings of the Foreign-Trade Zones Board, Washington, DC.

Resolution and Order

Pursuant to the authority granted in the Foreign-Trade Zones Act of June 18, 1934, as amended (19 U.S.C. 81a–81u), the Foreign-Trade Zones Board had adotped the following Resolution and Order:

The Board, having considered the matter, hereby orders:

After consideration of the application of the Greater Cincinnati Foreign-Trade Zone, Inc., grantee of FTZ 46, filed with the Foreign-Trade Zones Board (the Board) on February 6, 1986, requesting special-purpose subzone status for the auto and motorcycle engine manufacturing plant of Honda of America Manufacturing, Inc., in Shelby County, Ohio, adjacent to the Dayton Customs port of entry, the Board, finding that the requirements of the Foreign-Trade Zones Act, as amended, and the Board's regulations are satisfied, and that the proposal is in the public interest, approves the application.

The Secretary of Commerce, as Chairman and Executive Officer of the Board, is hereby authorized to issue a grant of authority and appropriate Board Order.

Grant of Authority To Establsih A Foreign-Trade Subzone In Shelby County, Ohio

Whereas, by an Act of Congress approved June 18, 1934, an Act "To provide for the establishment, operation, and maintenance of foreign-trade zones in ports of entry of the United States, to expedite and encourage foreign commerce, and for other purposes," as amended (19 U.S.C. 81a–81u) (the Act), the Foreign-Trade Zones Board (the Board) is authorized and empowered to grant to corporations the privilege of establishing, operating, and maintaining foreign-trade zones in or adjacent to ports of entry under the jurisdiction of the United States;

Whereas, the Board's regulations (15 CFR 400.304) provide for the establishment of special-purpose subzones when existing zone facilities cannot serve the specific use involved, and where a significant public benefit will result;

Whereas, the Greater Cincinnati Foreign-Trade Zone, Inc., grantee of Foreign-Trade Zone No. 46, has made application (filed February 6, 1986, Docket 6–86, 51 FR 7306) in due and proper form to the Board for authority to establish a special-purpose subzone at the automobile and motorcycle engine plant of Honda of America Manufacturing, Inc. (Honda), in Shelby County, Ohio, adjacent to the Dayton Customs port of entry;

Whereas, notice of said application has been given and published, and full opportunity has been afforded all interested parties to be heard; and

Whereas, the Board has found that the requirements of the Act and the Board's regulations are satisfied;

Now, therefore, in accordance with the application filed February 6, 1986, the Board hereby authorizes the establishment of a subzone at the Honda plant in Shelby County, Ohio, designated on the records of the Board as Foreign-Trade Subzone No. 46D at the location mentioned above and more particularly described on the maps and drawings accompanying the application, said grant of authority being subject to the provisions and restrictions of the Act and the Regulations issued thereunder, to the same extent as though the same were fully set forth herein, and also to the following express conditons and limitations:

Activation of the subzone shall be commenced within a reasonable time from the date of issuance of the grant, and prior thereto, any necessary permits shall be obtained from federal, state, and municipal authorities.

Officers and employees of the United States shall have free and unrestricted access to and throughout the foreign-trade subzone in the performance of their official duties.

The grant shall not be construed to relieve responsible parties from liability for injury or damage to the person or property of others occasioned by the construction, opertion, or maintenance of said subzone, and in no event shall the United States be liable therefor.

The grant is further subject to settlement locally by the District Director of Customs and the District Army Engineer with the grantee regarding compliance with their respective requirements for the protection of the revenue of the United States and the installation of suitable facilities.

In witness whereof, The Foreign-Trade Zones Board has caused its name to be signed and its seal to be affixed hereto by its Chairman and Executive Officer or his delegate at Washington, DC this 11th day of December, 1987, pursuant to Order of the Board.

Foreign-Trade Zones Board.

Gilbert B. Kaplan,

Acting Assistant Secretary of Commerce for Import Administration, Chairman, Committee of Alternates.

Attest:

John J. Da Ponte, Jr.,

Executive Secretary.

BILLING CODE 3510–DS–M

International Trade Administration

[A–475–104]

Strontium Nitrate From Italy; Final Results of Antidumping Duty Administrative Review and Revocation

AGENCY: International Trade Administration/Import Administration, Commerce.

ACTION: Notice of final results of antidumping duty administrative review and revocation.

SUMMARY: On September 8, 1987, the Department of Commerce published the preliminary results of its administrative review and intent to revoke on strontium nitrate from Italy. The review covers the only known manufacturer/exporter of this merchandise and the period June 1, 1985 through May 31, 1986.

We gave interested parties an opportunity to comment on the preliminary results. We received no comments. The final results of review are unchanged from those presented in the preliminary results, and we revoke the antidumping duty order on strontium nitrate from Italy.

DATE: EFFECTIVE DATE: December 21, 1987.

FOR FURTHER INFORMATION CONTACT: Richard P. Bruno or Robert J. Marenick, Office of Compliance, International Trade Administration, U.S. Department of Commerce, Washington, DC 20230; telephone: (202) 377–5255.

SUPPLEMENTARY INFORMATION:

Background

On September 8, 1987, the Department of Commerce ("the Department") published in the **Federal Register** (52 FR 33857) the preliminary results of its administrative review and intent to revoke the antidumping duty order on strontium nitrate from Italy (46 FR 32864, June 25, 1981). The Department has now completed that administrative review in accordance with section 751 of the Tariff Act of 1930 ("the Tariff Act").

Scope of the Review

Imports covered by the review are shipments of strontium nitrate, a chemical compound $Sr(NO_3)_2$, currently classifiable under item 421.7400 of the Tariff Schedules of the United States Annotated and under item 2834.29.20 of the Harmonized System.

The review covers the only known manufacturer/exporter, Societa Bario e Derivati S.p.A. ("SABED"), and the period June 1, 1985 through May 31, 1986.

Final Results of the Review and Revocation

We invited interested parties to comment on the preliminary results. We received no comments. The final results of review are unchanged from those presented in the preliminary results of review, and we determine that no margins exist from the period June 1, 1985 through May 31, 1986.

For the reasons set forth in the preliminary results of review and intent to revoke, we are satisfied that there is no likelihood of resumption of sales at less than fair value by SABED. Accordingly, we revoke the antidumping duty order on strontium nitrate from Italy. This revocation applies to all unliquidated entries of merchandise entered, or withdrawn from warehouse, for consumption on or after May 14, 1984, the date of our tentative determination to revoke the order.

The Department will instruct the Customs Service not to assess antidumping duties on all appropriate entries.

This administrative review, revocation, and notice are in accordance with section 751(a)(1) and (c) of the Tariff Act (19 U.S.C. 1675(a)(1) and (c)) and §§ 353.53a and 353.54 of the Commerce Regulations (19 CFR 353.53a and 353.54).

Date: December 14, 1987.

Gilbert B. Kaplan,

Acting Assistant Secretary for Import Administration.

Litharge, Red Lead and Lead Stabilizers From Mexico; Preliminary Results of Countervailing Duty Administrative Review

AGENCY: International Trade Administration/Import Administration, Commerce.

ACTION: Notice of preliminary results of countervailing duty administrative review.

SUMMARY: The Department of Commerce has conducted an

BEST COPY AVAILABLE

administrative review of the countervailing duty order on litharge, red lead and lead stabilizers from Mexico. We preliminarily determine the total bounty or grant to be *de minimis* during the period January 1, 1985 through December 31, 1986. We invite interested parties to comment on these preliminary results.

DATE: Effective Date: December 21, 1987.

FOR FURTHER INFORMATION CONTACT: Stephen Nyschot or Bernard Carreau, Office of Compliance, International Trade Administration, U.S. Department of Commerec, Washington, DC 20230; telephone: (202) 377–2786.

SUPPLEMENTARY INFORMATION:

Background

On October 21, 1986, the Department of Commerece ("the Department") published in the **Federal Register** (51 FR 37319) the final results of its last administrative review of the countervailing duty order on litharge, red lead, and lead stabilizers from Mexico (47 FR 54847, December 6, 1982). On December 8, 1986 and December 31, 1986, three Mexican exporters and the Mexican government requested, in accordance with 19 CFR 355.10, an administrative review of the order. We published the initiation of the administrative review on January 21, 1987 (51 FR 2747). The Department has now conducted that administrative review in accordance with section 751 of the Tariff Act of 1930 ("the Tariff Act").

Scope of Review

The United States has developed a system of tariff classification based on the international harmonized system of Customs nomenclature. Congress is considering legislation to convert the United States to this Harmonized System ("HS") by January 1, 1988. In view of this, we will be providing both the appropriate Tariff Schedules of the United States Annotated ("TSUSA") item numbers and the appropriate HS item numbers with our product descriptions on a test basis, pending Congressional approval. As with the TSUSA, the HS item numbers are provided for convenience and Customs purposes. The written description remains dispositive.

We are requesting petitioners to include the appropriate HS item number(s) as well as the TSUSA item number(s) in all new petitions filed with the Department. A reference copy of the proposed Harmonized System schedule is available for consultation at the Central Records Unit, Room B–099, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230. Additionally, all Customs officies have reference copies, and petitioners may contact the Import Specicalist at their local Customs office to consult the schedule.

Imports covered by this review are shipments of Mexican litharge, red lead, and lead stabilizers, which include lead compounds "not specifically provided for" ("NSPF") and pigments containings lead NSPF. Such merchandise is currently classifiable under the following TSUSA item numbers: Litharge, 473.5200; red lead, 473.5600; lead compounds NSPF, 419.0400; and pigments containing lead NSPF, 473.9000. These products are currently classifiable under HS item numbers 2824.10.00—0, 3206.49.50—2, 3212.90.00—2, 2824.20.00—2, 3206.20.00—2, 3206.30.00—1, 3207.10.00—2, 3207.30.00—1, and 3212.90.00—2. We invite comments from all interested parties on these HS classifications. The review covers the period from January 1, 1985 through December 31, 1986 and 11 programs.

Analysis of Programs

(1) FOMEX

The Fund for the Promotion of Exports of Mexican Manufactured Products ("FOMEX") is a trust of the Mexican Treasury Department, with the National Bank of Foreign Trade acting as trustee for the program. The National Bank of Foreign Trade, through financial institutions, makes FOMEX loans available at preferential rates to Mexican exporters and U.S. importers for two purposes: pre-export financing and export financing. We consider both pre-export and export FOMEX loans to confer export bounties or grants since these loans are given only on merchandise destined for export. We found that the annual interest rate for dollar-denominated FOMEX export financing ranged from 5.50 to 6.70 percent during the period of review. The annual interest rate for peso-denominated FOMEX pre-export financing was 39.60 percent to the one manufacturer of this merchandise that received such loans during the period of review. Although this manufacturer claims that these pre-export loans were not based on exports of litharge, it was not able to produce documentation supporting this assertion. Therefore, we have assumed, as the best information available, that these pre-export loans are countervailable.

We consider the benefit from loans to occur when the interest is paid. Interest on FOMEX pre-export loans is paid at maturity, and interest on FOMEX export loans is pre-paid. Accordingly, we calculated benefits from all FOMEX pre-export loans on which interest was paid during the period of review and from all FOMEX export loans that were received during the period of review.

We have sufficient information to measure effective interest rates for both peso-denominated and dollar-denominated loans during the period of review. (See final results of administrative review on fabricated automotive glass from Mexico (51 FR 44652, December 11, 1986).) To determine the effective interest rate benchmark for peso loans, we calculated the average spread between the Costo Porcentual Promedio (CPP) rates, i.e., the average cost of short-term funds to banks, and the effective rates reported by the Banco de Mexico in its monthly publication, Indicadores Economicos (I.E.), for the period 1982 through 1984, the only period for which we have I.E. rates. The effective interest rate benchmark for 1985 is the sum of this average spread and the average CPP rate for 1985. In this way, we calculated a benchmark of 86.31 percent for pre-export peso loans obtained in 1985. There were no pre-export FOMEX loans in 1986 for this merchandise.

To determine the effective interest rate benchmark for dollar loans, we used the quarterly weighted-average interest rates published in the Federal Reserve Bulletin, which were 12.85 percent in 1985 and 10.42 percent in 1986.

Three of the four know exporters of this merchandise used FOMEX loans during the period of review. Because we found that the exporters were able to tie their FOMEX export loans to exports to specific countries, we measured the benefit only from FOMEX export loans tied to U.S. shipments. We allocated each company's benefit from export loans over the value of its total U.S. shipments during each year of the period of review. Because exporters were not able to tie their FOMEX pre-export loans to exports to specific countries, we measured the benefit from all FOMEX pre-export loans. We allocated each company's benefit from pre-export loans over the value of its total export shipments. In both cases, we weight-averaged the resulting benefits by each company's proportion of total exports of this merchandise to the United States during each year of the period of review. We preliminarily determine the benefit from FOMEX to be 0.02 percent *ad valorem* for the 1985 period and 0.01 percent *ad valorem* for the 1986 period.

(2) Import Duty Reductions and Exemptions

The Mexican government grants import duty reductions and exemptions on machinery, spare parts, and tools to companies located in free zones or border areas. If the company transports the imported equipment to other areas of Mexico, it must pay the full duty. Since these reductions and exemptions are limited to companies located in specific regions of the country, we consider this program to be a domestic bounty or grant.

One firm used this program in 1985, but not in 1986. That firm used the imported equipment for producing litharge sold in Mexico and abroad. To calculate the benefit, we took the difference between the actual import duties paid and what the payment would have been absent the reduction, and allocated the result over the firm's total 1985 sales of litharge. We then weight-averaged the resulting benefit by the firm's proportion of total exports of this merchandise to the United States during 1985. We preliminarily determine the benefit from this program to be 0.02 percent ad valorem for the 1985 period and zero for the 1986 period.

(3) Other Programs

We also examined the following programs and preliminarily find that exporters of litharge, red lead, and lead stabilizers did not use them during the review period:

(A) Article 15 loans;
(B) Certificates of Fiscal Promotion (CEPROFI);
(C) State tax incentives;
(D) Fund for Industrial Development (FONEI);
(E) Guarantee and Development Fund for Medium and Small Industries (FOGAIN);
(F) Certificado de Devolucion de Impuestos (CEDI);
(G) NDP preferential discounts;
(H) Bancomext loans; and
(I) Accelerated depreciation.

Preliminary Results of Review

As a result of our review, we preliminarily determine the total bounty or grant to be 0.04 percent ad *Valorem* during the 1985 period and 0.01 percent ad *Valorem* during the 1986 period. The Department considers any rate less than 0.50 percent to be de *minimis*.

The Department intends to instruct the Customs Service to liquidate, without regard to countervailing duties, all shipments of this merchandise exported on or after January 1, 1985 and on or before December 31, 1986.

The Department also intends to instruct the Customs Service to waive cash deposits of estimated countervailing duties, as provided by section 751(a)(1) of the Tariff Act, on all shipments of this merchandise entered, or withdrawn from warehouse, for consumption on or after the date of publication of the final results of this administrative review. The deposit waiver shall remain in effect until publication of the final results of the next administrative review.

Interested parties may submit written comments on these preliminary results within 30 days of the date of publication of this notice and may request disclosure and/or a hearing within 10 days of the date of publication. Any hearing, if requested, will be held 30 days after the date of publication or the first workday afterwards. Any request for an administrative protective order must be made no later than five days after the date of publication. The Department will publish the final results of this administrative review including the results of its analysis of issues raised in any such written comments or at a hearing.

This administrative review and notice are in accordance with section 751(a)(1) of the Tariff Act (19 U.S.C. 1675(a)(1)) and 19 CFR 355.10.

Gilbert B. Kaplan,
Acting Assistant Secretary for Import Administration.

National Oceanic and Atmospheric Administration

Marine Mammals; Application for Permit; Sea Life Park (P10D)

Notice is hereby given that an Applicant has applied in due form for a Permit to take marine mammals as authorized by the Marine Mammal Protection Act of 1972 (16 U.S.C. 1361–1407), and the Regulations Governing the Taking and Importing of Marine Mammals (50 CFR Part 216).

1. Applicant: Sea Life Park, Makapuu Point, Waimanalo, Hawaii 96795.
2. *Type of Permit:* Public Display.
3. *Name and Number of Marine Mammals:* False killer whale (*Pseudorca crassidens*)—4.
4. *Type of Take:* Import from Taigi, Japan for captive maintenance.
5. *Period of Activity: 2 Years.*

The arrangements and facilities for transporting and maintaining the marine mammals requested in the above described application have been inspected by a licensed veterinarian, who has certified that such arrangements and facilities are adequate to provide for the well-being of the marine mammals involved.

Concurrent with the publication of this notice in the **Federal Register**, the Secretary of Commerce is forwarding copies of this application to the Marine Mammal Commission and the Committee of Scientific Advisors.

Written data or views, or requests for a public hearing on this application should be submitted to the Assistant Administrator for Fisheries, National Marine Fisheries Service, U.S. Department of Commerce, Washington, DC 20235, within 30 days of the publication of this notice. Those individuals requesting a hearing should set forth the specific reasons why a hearing on this particular application would be appropriate. The holding of such hearing is at the discretion of the Assistant Administrator for Fisheries.

All statements and opinions contained in this application are summaries of those of the Applicant and do not necessarily reflect the views of the National Marine Fisheries Service.

Documents submitted in connection with the above application are availble for review by interested persons in the following offices:

Office of Protected Resources and Habitat Programs, National Marine Fisheries Service, 1825 Connecticut Avenue, NW., Rm 805, Washington, DC;
Director, Southwest Region, National Marine Fisheries Service, 300 South Ferry Street, Terminal Island, California 90731–7415.

Nancy Foster,
Director, Office of Protected Resources and Habitat Programs, National Marine Fisheries Service.

BILLING CODE 3510–22–M

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

Amendment and Adjustment To Import Limits for Certain Cotton and Man-Made Fiber Textile Products Produced or Manufactured in Mexico

December 14, 1987.

The Chairman of the Committee for the Implementation of Textile Agreements (CITA), under the authority contained in E.O. 11651 of March 3, 1972, as amended, has issued the directive

published below to the Commissioner of Customs to be effective on December 22, 1987. For further information contact Janet Heinzen, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 377–4212. For information on the quota status of these limits, please refer to the Quota Status Reports which are posted on the bulletin boards of each Customs port, or call (202) 535–9481. For information on embargoes and quota re-openings, please call (202) 377–3715.

Summary

In the letter published below, the Chairman of the Committee for the Implementation of Textile Agreements directs the Commissioner of Customs to increase the import restraint limits for cotton and man-made fiber textile products in Categories 341/641 and 625, produced or manufactued in Mexico and exported during the period January 1, 1987 through December 31, 1987. AS a result, the limits for Categories 341/641 and 625, which are currently filled, will re-open.

Background

CITA directives dated November 28, 1986 (51 FR 43960) and April 7, 1987 (52 FR 12230), respectively, established import restraint limits for cotton and man-made fiber textile products in Categories 341/641 and 625, among others, produced or manufactured in Mexico and exported during the twelve-month period which began on January 1, 1987 and extends through December 31, 1987.

Under the terms of the Bilateral Cotton, Wool and Man-Made Fiber Textile Agreement of February 26, 1979, as amended and extended, between the Governments of the United States and the United Mexican States, and at the request of the Government of the United Mexican States, the current limit for Categores 341/641 is being increased for carryforward. In addition, the current minimum consultation level for Category 625 is being increased and converted to a designated consultation level.

A description of the textile categories in terms of T.S.U.S.A. numbers was published in the **Federal Register** on December 13, 1982 (47 FR 55709), as amended on April 7, 1983 (48 FR 15175), May 3, 1983 (48 FR 19924), December 14, 1983, (48 FR 55607), December 30, 1983 (48 FR 57584), April 4, 1984 (49 FR 13397), June 28, 1984 (49 FR 26622), July 16, 1984 (49 FR 29754), November 9, 1984 (49 FR 44782), July 14, 1986 (51 FR 25386), July 29, 1986 (51 FR 20768) and in Statistical Headnote 5, Schedule 3 of the *Tariff Schedules of The United States Annotated (1987).*

Adopted by the United States of the Harmonized Commodity (HCC) may result in some changes in the categorization of textile products covered by this notice. Notice of any necessary adjustments to the limits affected by adoption of the HCC will be published in the **Federal Register.**

The letter to the Commissioner of Customs and the actions taken pursuant to it are not designed to implement all of the provisions of the bilateral agreement, but are designed to assist only in the implementation of certain of its provisions.

James H. Babb,

Chairman, Committee for the Implementation of Textile Agreements.

Committee for the Implementation of Textile Agreements

December 14, 1987.

Commissioner of Customs,
Department of the Treasury,
Washington, DC 20229

Dear Mr. Commissioner: This directive amends, but does not cancel, the directives of November 28, 1986 and April 7, 1987, issued to you by the Chairman of the Committee for the Implementation of Textile Agreements, concerning imports into the United States of certain cotton, wool, and man-made fiber textile products, produced or manufactuerd in Mexico and exported during the twelve-month period which began on January 1, 1987 and extends through December 31, 1987.

Effective on December 22, 1987, the directives of November 28, 1987 and April 7, 1987 are hereby amended to include amended and adjusted limits for cotton and man-made fiber textile products in the following categories, pursuant to the terms of the Bilateral Cotton, Wool and Man-Made Fiber Textile Agreement of February 26, 1979, as amended and extended [1]

Category	2-mo. limit [1]
341/641	734,827 dozen.
625	250,000 pounds.

[1] The limits have not been adjusted to account for any imports exported after December 31, 1986.

The Committee has the Implementation of Textile Agreements has determined that these actions fall within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553.

Sincerely,

James H. Babb,

Chairman, Committee for the Implementation of Textile Agreeements.

[FR Doc. 87–29141 Filed 12–16–87; 11:14 am]

BILLING CODE 3510-DR-M

[1] The agreement provides, in part, that: (1) Specific limits and sublimits may be exceeded by swing in any agreement period; (2) these same limits may be adjusted for carryforward and carryover up to 11 percent of the applicable category limit or sublimit; and (3) administrative arrangements or adjustments may be made to resolve problems arising in the implementation of the agreement.

DEPARTMENT OF DEFENSE

Department of the Air Force

Air Force Reserve Officer Training Corps Advisory Committee; Meeting

November 30, 1987.

The Air Force Reserve Officer Training Corps (AFROTC) Advisory Committee will meet on January 26, 1988, from 8:15 a.m. to 4:30 p.m. and on January 27, 1988, from 8:15 a.m. to 12:00 p.m. at Headquarters Air Force Reserve Officer Training Corps, Building 500, Room 19, Maxwell Air Force Base (AFB), Alabama.

The AFROTC Advisory Committee meets to offer advice, views, and recommendations regarding the educational mission of AFROTC. The Committee is an external source of expertise and serves in an advisory capacity to the Commander, Air Training Command and the Commandant, AFROTC.

The meeting is open to the public.

For further information, contact: Air Force Reserve Officer Training Corps Advisory Committee, Mr. John D. Pickett, Jr., Project Officer, AFROTC/XPX, Maxwell AFB, Alabama 36112–6663, telephone (205) 293–7856.

Department of the Army

Army Science Board; Closed Meeting

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463), announcement is made of the following Committee Meeting:

Name of the Committee: Army Science Board (ASB).

Dates of Meeting: 11 and 12 January 1988.

Times of Meetings: 0800—1630 hours, 11 January 1988, 0800—1430 hours, 12 January 1988.

Place: Sandia National Lab, Albuquerque, NM.

Agenda: The Army Science Board Ad Hoc Subgroup for Tactical Applications of Directed Energy Weapons (DEW) will meet to be briefed on National labs and Air Force programs. This meeting will be closed to the public in accordance with section 552b(c) of Title 5, U.S.C., specifically subparagraph (1) thereof, and Title 5, U.S.C., Appendix 1, subsection 10(d). The classified and unclassified matters and proprietary information to be discussed are so inextricably intertwined so as to preclude opening any portion of the meeting. Contact the Army Science Board Administrative Officer, Sally Warner, for further information at (202) 695–3039 or 695–7046.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. CP88–125–000]

Request Under Blanket Authorization; Gas Gathering Corp.

December 16, 1987.

Take notice that on December 10, 1987, Gas Gathering Corporation (GGC), P.O. Box 519, Hammond, Louisiana 70404, filed in Docket No. CP88–125–000 a request pursuant to § 157.205 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205), for authorization to transport natural gas on behalf of Delta Pipeline Company (Delta), under the authorization issued in Docket No. CP86–129–000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request which is on file with the Commission and open to public inspection.

GGC states that pursuant to a gas transportation agreement dated September 30, 1987, it proposes to transport natural gas on behalf of Delta. It is further stated that although the primary term of the transportation agreement ran from September 30, 1987, through November 1, 1987, the parties have the option to continue the transaction on a month to month basis thereafter. GGC indicates that it would receive the gas in the Bayou Bouillon Field, St. Martin Parish, Louisiana and that it would redeliver the gas to Transcontinental Gas Pipe Line Corporation, for Delta's account, at the Sherburne meter station, Pointe Coupee Parish, Louisiana. GGC estimates that the volume of gas to be transported on a peak day would be 6,000 MMBtu, the volume of gas to be transported on an average day would be 2,700 MMBtu and the annual average would be 985,000 MMBtu.

It is stated that the proposed service is currently being performed pursuant to the 120-day self implementing provisions of § 284.223(a)(1) of the Regulations. GGC notes that the service was initiated October 1, 1987, on an interruptible basis under GGC's Rate Schedule IT–1 and that the transaction was reported in Docket No. ST88–405–000.

Any person or the Commission's staff may, within 45 days after issuance of the instant notice by the Commission, file pursuant to Rule 214 of the Commission's Procedural Rules (18 CFR 385.214) a motion to intervene or notice of intervention and pursuant to § 157.205 of the Regulations under the Natural Gas Act (18 CFR 157.205) a protest to the request. If no protest is filed within the time allowed therefor, the proposed activity shall be deemed to be authorized effective the day after the time allowed for filing a protest. If a protest is filed and not withdrawn within 30 days after the time allowed for filing a protest, the instant request shall be treated as an application pursuant to section 7 of the Natural Gas Act.

Lois D. Cashell,

Acting Secretary.

BILLING CODE 6717-01-M

[Docket No. RP85–177–046

Texas Eastern Transmission Corp.; ERRATA Correction to Compliance Filing

December 14, 1987.

Take notice that on December 9, 1987, Texas Eastern Transmission Corporation (Texas Eastern) tendered for filing Original Sheet Nos. 121 and 470 of its FERC Gas Tariff, Volume No. 2.

Texas Eastern states that these tariff sheets are to replace certain tariff sheets included in Appendix E of a filing that it made on November 16, 1987 to comply with orders issued by the Commission on December 19, 1986 and October 15, 1987 in this proceeding. The tariff sheets, as corrected, reflect Texas Eastern's agreement that in the event that small customers served under Rate Schedules GS and CD–2 reduce their annual contract quantities, the annual quantity entitlements of such customers will not be reduced below their newly nominated annual contract quantities.

A copy of the filing has been served upon each of Texas Eastern's jurisdictional customers.

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 214 and 211 of the Commission's Rules of Practice and Procedure. All such motions or protests should be filed on or before December 21, 1987. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the

Commission and are available for public inspection.

Lois D. Cashell,

Acting Secretary.

[Docket Nos. RP85-206-032 and RP85-206-030]

Compliance Filing; Northern Natural Gas Co.

December 15, 1987.

Take notice that on December 7, 1987, Northern Natural Gas Company, Division of Enron Corporation, tendered for filing First Revised First Substitute Second Revised Sheet No. 4g.2, which had inadvertently been omitted from its November 27, 1987 filing in Docket No. RP85-206-030.

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 214 and 211 of the Commission's Rules of Practice and Procedure (18 CFR 385.214, 385.211). All such motions or protests should be filed on or before December 22, 1987. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Any person intervening in Docket No. RP85-206-030 does not need to intervene again.

Lois D. Cashell,

Acting Secretary.

[FR Doc. 87-29161 Filed 12-18-87; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. RP85-178-024]

Filing of Refund Report; Tennessee Gas Pipeline Co., a Division of Tenneco Inc.

December 16, 1987.

Take notice that on November 5, 1987, Tennessee Gas Pipeline Company, a Division of Tenneco Inc. (Tennessee) filed its report of refunds pursuant to Article VII of the Stipulation and Agreement (April 11, 1986) in the above-referenced docket.

Tennessee states that on October 15, 1987, it refunded $86,172,512, including principal and interest, to its sales and transportation customers for the period February 1, 1986 through July 31, 1987. The refund was made in accord with section 8 of Article I of the Stipulation.

Tennessee states that copies of the refund report have been mailed to all affected state regulatory commissions and that customers were served with calculations supporting the refunds on October 15, 1987 when the refunds were made.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NW., Washington, DC 20426, in accordance with Rules 214 and 211 of the Commission's Rules of Practice and Procedure (18 CFR 385.214, 385.211). All such motions or protests must be filed on or before January 4, 1988. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717-01-M

[Docket No. RP86-32 et al.]

Conference; Williams Natural Gas Co. (Formerly Northwest Central Pipeline Corp.)

December 11, 1987.

Take notice that a conference will be convened in this proceeding on December 21, 1987, at 9:00 a.m. at the offices of the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC, for the purpose of discussing sales services to be offered in conjunction with Order No. 436/500 open access transportation services.

Williams Natural Gas Company (WNG) has indicated that it has undertaken discussions and correspondence, with its jurisdictional sales customers and others, concerning revisions to the Order No. 436 Stipulation and Agreement (and, to the extent necessary, the related applications) filed with the Commission in certain of the above-referenced dockets on July 18, 1986, to comply with the "Order Approving Contested Settlement As Modified and Conditioned" and related orders issued February 20, 1987 and the "Order Denying Rehearing and Modifying and Clarifying Order" issued November 4, 1987 in certain of the above-referenced dockets. WNG indicates that such revised Stipulation may impact WNG's general rate case filed January 23, 1987 in Docket No. RP87-33 and the related applications filed in Docket No. CP87-171, CP87-172 and CI87-239 and the proceedings in Docket Nos. TA87-3-43 and TA88-1-43.

The parties and the Commission Staff are invited to attend. Persons wishing to become parties must move to intervene pursuant to the Commission's regulations (18 CFR 385.214) and must have their motions granted.

For additional information, contact Russell Mamone (202-357-5744).

Lois D. Cashell,

Acting Secretary.

[FR Doc. 87-29061 Filed 12-18-87; 8:45 am]

BILLING CODE 6717-01-M

[Docket Nos. ER88-134-000 et al.]

Stratton Energy Associates et al.; Electric Rate and Corporate Regulation Filings

December 16, 1987.

Take notice that the following filings have been made with the Commission:

1. Stratton Energy Associates

[Docket No. ER88-134-000]

Take notice that on December 11, 1987, Stratton Energy Associates (SEA) tendered for filing with the Federal Energy Regulatory Commission (Commission), pursuant to 18 CFR 35.1 and 35.12, a proposed initial rate schedule applicable to sales at wholesale of electric energy and capacity to Central Maine Power Company (CMP) from a biomass wood-to-energy facility to be located in Stratton, Maine (Facility). This initial rate schedule is a negotiated Power Purchase Agreement for the ARS Carrabassett Power Project between SEA and CMP (Agreement) and has been designated SEA Rate Schedule No. 1.[1]

[1] The original Agreement was between ARS Group, Inc. and CMP. Under the Agreement ARS Group, Inc. may assign its rights under the Agreement, subject to CMP's written consent. ARS Group, Inc. assigned its rights under the Agreement to SEA pursuant to that certain Agreement of Assignment and Assumption dated December 5, 1986. CMP gave its written consent to the assignment pursuant to that certain Consent to Assignment and Assumption dated December 29, 1986.

SEA has given notice that the Facility is a biomass-fired small power production facility with a net electric power production capacity of 37 megawatts. The Facility was certified by the Commission as a "qualifying facility" under Section 201 and 210 of the Public Utility Regulatory Policies Act of 1978 (PURPA). *ARS Group, Inc.*, Docket No. QF86-514-000, 35 FERC ¶62.221 (May 2, 1986). As such, SEA states that the Facility is exempt from regulation under the Public Utility Holding Company Act and from certain state laws and regulations, but remains subject to the Commission's jurisdication under the Federal Power Act.

SEA requests waiver of the Commission's rule requiring that rate schedules be filed no more than one hundred-twenty (120) days prior to the date on which service is to commence under an initial rate schedule. This requirement is intended to prevent the use of stale data in developing the test period for cost-of-service based rates. Section 35.3(b) of the Commission's regulations allows the Commission to waive the one hundred-twenty (120) day notice period in appropriate circumstances. Since the rates are formula rates based on state forecasts and the buyer's costs, and do not involve SEA's costs for a particular test period, this requirement is not applicable.

SEA also seeks waiver of the Commission's regulations regarding cost-of-service documentation. The Commission has recognized, in other cases,[2] that the cost-of-service data requirements contained in § 35.12(b)(5) of its regulations are irrelevant insofar as they would require a small power producer to substantiate its cost-of-service. SEA requests this waiver on the grounds that this information is not relevant because rates are initially based on state-forecasted rates and then on the buyer's costs, and are not dependent upon the seller's costs.

SEA seeks waiver of the Commission's regulations regarding the Uniform System of Accounts prescribed for public utilities and licensees subject to the provisions of the Federal Power Act specified by 18 CFR Parts 101 and 104. Since rates are initially based upon state-forecasted rates and then upon the buyer's costs, this information and the need for uniformity in the seller's accounting systems are unnecessary. Moreover, this requirement imposes a substantial hardship and an undue burden upon SEA as it requires more detailed accounting than SEA would otherwise undertake.

SEA seeks waiver of the Commission's regulations regarding certain accounts and reports required by 18 CFR Parts 41, 50, and 141. SEA seeks this waiver of the basis that such information and reports are irrelevant because the rates under the contract are not to be determined by SEA's costs. Therefore, it is not necessary to protect the public in general by requiring strict complicance with these sections.

SEA also petitions the Commission to waive commission rules that the Commission has previously determined not to be necessarily applicable to qualifying facilities such as the SEA Facility. These include regulations regarding accounting practices, reporting requirements, annual charges, dispositions of property and consolidations, securities issuances and assumptions of liability and the holding of interlocking directorate positions as they may apply to a biomass wood-to-energy facility.

Comment-date: December 30, 1987, in accordance with Standard Paragraph E at the end of this notice.

2. Alamito Company

[Docket No. EC87-16-000]

Take notice that on December 8, 1987, Alamito Company tendered for filing an amendment to its application to request an order authorizing it to acquire preferred stock and debt securities of public utilities subject to the limitation that Alamito and its affiliates and subsidiaries shall not at any time hold, own, or possess any preferred stock or debt securities of any public utility in an amount greater than one percent of the capital stock for funded debt outstanding of the public utility subject to the provision of the Federal Power Act.

Comment date: December 30, 1987, in accordance with Standard Paragraph E at the end of this notice.

3. Black Hills Power and Light Company, an assumed business name of Black Hills Corporation

[Docket No. ER88-133-000]

Take notice that on December 10, 1987, Black Hill Power and Light Company, an assumed business name of Black Hills Corporation tendered for filing the Agreement for Transmission Service and the Common Use of Transmission Systems, dated as of January 1, 1986 (New Agreement), among Black Hills, Basin Electric Power Cooperative, Tri-County Electric Association, Inc., Black Hills Electric Cooperative, Inc., and Butte Electric Cooperative, Inc. (all cooperatives referred to as Cooperatives) in replacement of and to supersede the Contract for Electric Transmission Service dated March 12, 1975 (Former Agreement) among Black Hills and the Cooperatives, filed with the Commission and designated Black Hills Power and Light Company, Rate Schedule FPC No. 22 and Exhibit A to Rate Schedule FPC No. 22.

Black Hills requests waiver of the Commission's notice requirements to permit this rate schedule to become effective January 1, 1986, this date being the date on which service commenced.

The New Agreement provides for Black Hills to continue to render transmission service to the Cooperatives within a defined transmission area as set forth in the New Agreement, but in addition provides for the joint planning and use of the parties respective transmission systems, for a charge to be made for a Black Hills' transmission addition and for additions to the transmission system when needed and extends the term to December 31, 2020.

Copies of the filing were served upon the parties to the New Agreement, the South Dakota Public Utilities Commission, the Wyoming Public Service Commission and the Montana Public Service Commission.

Comment date: December 30, 1987, in accordance with Standard Paragraph E at the end of this notice.

4. Interstate Power Company

[Docket No. ER88-132-000]

Take notice that on December 10, 1987, Interstate Power Company tendered for filing Amendment No. 5 dated September 22, 1986 (the Amendment) to Interconnection Agreement dated May 1, 1964, as supplemented, with Commonwealth Edison Company, proposed effective on October 28, 1987, per Rule 35.11 (11 CFR 35.11), relating to interconnection points of certain electric transmission facilities between Interstate and Edison at the Quad Cities Nuclear Power Station Substation near Cordova, Rock Island County, Illinois, in which facilities Iowa-Illinois Gas and Electric Company also has an interest.

This Amendment No. 5 to the 1964 Agreement shall become effective as of October 28, 1987. On October 28, 1987, there occurred the in-service condition of Interstate's 345kV electric transmission facilities and Circuit between the Quad Cities Station Substation and its Rock Creek Substation as provided under the Facilities Connection Agreement (Quad

[2] *See, Wheelabrator Frye, Inc.*, Docket Nos. EL82-7-000 and EL82-12-000, 19 FERC ¶61,266 (1982).

Cities Substation—Rock Creek Transmission) (Interstate Power Company, Rate Schedule FERC No. 127, as supplemented) filed with the Federal Energy Regulatory Commission in October, 1986, dated September 2, 1986. Such Amendment No. 5 shall continue in effect until termination in accordance with the provisions of the May 1, 1964 Interconnection Agreement, as supplemented.

Interstate states a complete copy of the filing has been mailed to Edison, the Utilities Division of the Iowa Department of Commerce, the Illinois Commerce Commission, and the Minnesota Public Utilities Commission

Interstate states that Commonwealth has filed a Certificate of Concurrence to the Rate Schedule Supplement filed by Interstate.

Comment date: December 30, 1987, in accordance with Standard Paragraph E at the end of this notice.

5. Metropolitan Edison Company

[Docket No. ER87-34-001]

Take notice that on December 10, 1987, Metropolitan Edison Company (Met-Ed) tendered for filing pursuant to Commission Order dated June 23, 1987 revised rate sheets to reflect an agreed upon reduction in Met-Ed's rates. Met-Ed's states that the rate sheets reflect a rate reduction in the amount of $165,000 on an annual basis. Met-Ed also states that it requests waiver of the prior notice requirements of the Commission's regulations and an effective date of January 1, 1988 for the rate sheets.

Copies of the filing have been served upon all affected customers and the Pennsylvania Public Utilities Commission.

Comment date: December 30, 1987, in accordance with Standard Paragraph E at the end of this notice.

6. Southern California Edison Company

[Docket No. ER87-365-000]

Take notice that on December 10, 1987, Southern California Edision Company (Edison) tendered for filing an amendment to reflect the Tax Reform Act of 1986 in resale rates.

Copies of this filing have been served upon all parties affected by this proceeding.

Comment date: December 30, 1987, in accordance with Standard Paragraph E at the end of this document.

Standard Paragraph

E. Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All such motions or protests should be filed on or before the comment date. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a part must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Acting Secretary.

[FR Doc. 87-29183 Filed 12-18-87; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. GP87-71-000]

Railroad Commission of Texas; Preliminary Findings

Issued: December 15, 1987.

In the matter of Railroad Commission of Texas, Brown No. 1, NGPA Section 102, JD No. 80-45067 and H.E. Wilcox No. 1, NGPA Section 108, JD No. 80-44765.

On July 7, 1980, the Railroad Commission of the State of Texas (Texas) notified the Commission that it had made an affirmative determination under section 503 of the Natural Gas Policy Act of 1978 (NGPA) that gas produced from the H.E. Wilcox No. 1 well was stripper well natural gas as defined in NGPA section 108. Similarly, on July 15, 1983, Texas notified the Commission of its affirmative determination that gas produced from the Brown No. 1 well was from a new, onshore reservoir as defined in NGPA section 102(c)(1)(C). The determinations would have become final within 45 days after the Commission received notice thereof, but the Commission advised Texas and each applicant within 45 days of receiving each notice that the notice lacked sufficient information to permit Commission review of the determination, thereby tolling the 45-day period. The information that accompanied the notice regarding the stripper well determination failed to include the well's total production for the qualifying period, and to establish that the well's maximum efficient rate of flow is no more than 60 Mcf per production day. The information regarding the new, onshore well determination contained conflicts in identification of producing zones.

The Commission and Texas have repeatedly sought to obtain the information that would allow Commission review of the notices. In followup letters to the applicants sent in August 1986 and January 1987, the Commission advised that if the required information were not received, the two aforementioned determinations might be reversed and that refunds might consequently be required. No responses to those letters have been received.

Section 503 of the NGPA empowers the Commission to review a jurisdictional agency's well category determination, and requires the Commission to reverse any determination not supported by substantial evidence in the record on which the determination was made.

In Subpart B of Part 274 of its regulations, the Commission established filing requirements for applications for well category determinations, and established the minimum information requirements for a jurisdictional agency's notice of a well category determination: a copy of the application, all information required by §§ 274.201-274.208 of the Commission's regulations to be filed with the jurisdictional agency, and an explanatory statement that is sufficient to enable a person examining the notice to ascertain the basis for the determination without reference to information or data not contained therein.

Because the notices of the subject determinations have been deficient for a considerable period of time, and the applicants for the determinations have not supplied the data necessary for review of the determinations, we will, consistent with our actions in *Delta Gas Corporation*,[1] issue preliminary findings pursuant to 18 CFR 275.202(a)(1)(i) that the determinations are not supported by substantial evidence.

The Commission orders:

(A) Pursuant to § 275.202 of the Commission's regulations and section 503 of the NGPA, the Commission finds preliminarily that the determinations by Texas at issue in these proceedings are unsupported by substantial evidence in the record on which the determinations were made.

(B) Jurisdictional agencies, interested parties, or any other parties may, within 30 days after issuance of this notice, submit written comments and request an informal conference with the Commission's staff.

[1] 35 FERC ¶61,097 (1986); 36 FERC ¶61,188 (1986).

By direction of the Commission.

Lois D. Cashell,

Acting Secretary.

BILLING CODE 6717-01-M

ENVIRONMENTAL PROTECTION AGENCY

[OPTS-830027; FRL-3304-3]

Chlorendic Acid/Anhydride; Request for Records and Reports Regarding Significant Adverse Reactions

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: Notice is hereby given that EPA is requiring manufacturers, importers, processors, and distributors of chlorendic acid and chlorendic anhydride to submit records and reports of allegations that these substances cause significant adverse reactions to health or the environment. This Toxic Substances Control Act (TSCA) section 8(c) action is necessary so that health risks of exposure to chlorendic acid/anhydride can be evaluated.

DATE: Records and reports should be submitted by February 4, 1988.

FOR FURTHER INFORMATION CONTACT: Edward A. Klein, Director, TSCA Assistance Office (TS-799), Office of Toxic Substances, Environmental Protection Agency, Rm. E-543, 401 M St. SW., Washington, DC 20460, Telephone: (202) 554-1404.

SUPPLEMENTARY INFORMATION: Under the authority of section 8(c) of TSCA, chemical manufacturers, processors, importers, and distributors must maintain records of significant adverse reactions to health or the environment alleged to have been caused by chemical substances or mixtures and, upon request, submit or make the records available to the Agency. Regulations specifying these recordkeeping and reporting requirements are codified at 40 CFR Part 717. EPA can notify those responsible for reporting by letter and/or by announcing such requirements for submitting copies of records by a notice in the **Federal Register**. A **Federal Register** notice will be used when a large number of respondents is expected, or because of confidentiality claims for corporate identity.

Therefore, pursuant to 40 CFR 717.17 this notice requires the submission of records of significant adverse reactions to health or the environment alleged to have been caused by chlorendic acid (CAS No. 115-28-6) and chlorendic anhydride (CAS No. 115-27-5). This notice also requires reporting of records kept pursuant to this Part that cite as the cause of a significant adverse reaction a mixture, article, site discharge, or company process/operation that contains or involves chlorendic acid/anhydride where the significant adverse reaction could reasonably be attributed in whole or in part to such substances or a synergistic reaction of these substances in combination with another (other) substance(s).

The report shall contain the company name and address, the name and telephone number of a contact person, and at a minimum be in the form of a copy of the abstract of the allegation record that is required to be kept pursuant to 40 CFR 717.15(b)(2). Records currently on file or recorded as of publication of this notice must be submitted no later than February 4, 1988. Copies of records should bear the docket number 8cF-1287-0001 and must be submitted to:

Document Processing Center (TS-790), Rm. L-100, Office of Toxic Substances, Environmental Protection Agency, 401 M St. SW., Washington, DC 20460, ATTN: Section 8(c) Report.

Approved by the Office of Management and Budget under control number 2070-0017.

Dated: December 7, 1987.

John A. Moore,

Assistant Administrator for Pesticides and Toxic Substances.

FEDERAL COMMUNICATIONS COMMISSION

[Report No. 1696]

Petions for Reconsideration and Applications for Review of Actions in Rulemaking Proceedings; Correction

On December 16, 1987, at 52 FR 47756, the Commisison published a Public Notice (Report No. 1696) announcing the filing of petitions for reconsideration in proceedings involving the TV Table of Assignments, the FM Table of Allotments, and the Use of Certain Generally Accepted Accounting Principles in Part 32. The due date for oppositions was inadvertently omitted. That date is January 4, 1988.

William J. Tricarico,

Secretary.

BILLING CODE 6712-01-M

FEDERAL MARITIME COMMISSION

Agreement(s) Filed; Cunard Steamship Co. et al.

The Federal Maritime Commission hereby gives notice of the filing of the following agreement(s) pursuant to section 5 of the Shipping Act of 1984.

Interested parties may inspect and obtain a copy of each agreement at the Washington, DC Office of the Federal Maritime Commission, 1100 L Street NW., Room 10325. Interested parties may submit comments on each agreement to the Secretary, Federal Maritime Commission, Washington, DC 20573, within 10 days after the date of the **Federal Register** in which this notice appears. The requirements for comments are found in § 572.603 of Title 46 of the Code of Federal Regulations. Interested persons should consult this section before communicating with the Commission regarding a pending agreement.

Agreement No.: 207-009498-008.

Title: Atlantic Container Line Agreement.

Parties:

The Cunard Steam-Ship Company, plc
Incotrans BV
Compagnie Generale Maritime
Rederiaktiebolaget Soya (Soya)
Aktiebolaget Svenska Amerika Linien
Rederiaktiebolaget Transatlantic

Synopsis: The proposed amendment would expand the geographic scope of the agreement to include U.S. St. Lawrence River and Great Lakes ports and points via such ports and would specifically exclude West Coast Canadian ports. It would also set forth conditions under which Soya could carry certain wheeled and non-containerizable cargoes. It would require the unanimous consent of the parties to admit new participants to the agreement and provides for the withdrawal of any party upon two years' notice given on, or after, May 15, 1999. Further, the amendment would make certain technical and administrative changes to the agreement.

Agreement No.: 202-010268-010.

Title: Australia/Eastern U.S.A. Shipping Conference.

Parties:

Columbus Line
PACE Line

Synopsis: The proposed amendment would expand the geographic scope of the agreement to include U.S. coastal or interior points via U.S. Atlantic and Gulf ports. The parties have requested a shortened review period.

Agreement No.: 203–011153–001.
Title: Hanjin Container Lines, Ltd. Korea Shipping Corporation Facilitation Agreement.
Parties:
Hanjin Container Lines, Ltd.
Korea Shipping Corporation
Synopsis: The proposed amendment would permit the parties to lease each other space and other accommodations and facilities obtained from connecting inland carriers. The parties have requested a shortened review period.
Agreement No.: 232–011159.
Title: American Transport Line Ltd./ South Atlantic Cargo Shipping N.V. (Atlanticargo) Space Charter Agreement.
Parties:
American Transport Line, Ltd.
South Atlantic Cargo Shipping N.V. (Atlanticargo)
Synopsis: The proposed agreement would permit the parties to charter space on one another's vessels, to interchange containers and related equipment and to rationalize sailings in the trade between ports in Europe and ports in the United States. The parties have requested a shortened review period.

By Order of the Federal Maritime Commission.
Joseph C. Polking,
Secretary.
Dated: December 15, 1987.

Agreement(s) Filed; Georgia Ports Authority

The Federal Martime Commission hereby gives notice of the filing of the following agreement(s) pursuant to section 5 of the Shipping Act of 1984.

Interested parties may inspect and obtain a copy of each agreement at the Washington, DC Office of the Federal Maritime Commission, 1100 L Street NW., Room 10325. Interested parties may submit comments on each agreement to the Secretary, Federal Maritime Commission, Washington, DC 20573, within 10 days after the date of the **Federal Register** in which this notice appears. The requirements for comments are found in § 572.603 of Title 46 of the Code of Federal Regulations. Interested persons should consult this section before communicating with the Commission regarding a pending agreement.

Agreement No.: 224–010906–001.
Title Georgia Ports Authority Terminal Agreement.
Parties:
Georgia Ports Authority.
United Arab Shipping Co.
Synopsis: The proposed agreement amends the provision for charge of rental, wharfage and designated services specified in the basic agreement to provide for a single unit charge to be reflected in a separate schedule to be submitted to the Federal Maritime Commission as agreement amendments in advance of the effective date of such charges.

By Order of the Federal Maritime Commission.
Joseph C. Polking,
Secretary.

FEDERAL RESERVE SYSTEM

Marshall & Ilsley Corp.; Acquisition of Company Engaged in Permissible Nonbanking Activities

The organization listed in this notice has applied under § 225.23(a)(2) or (f) of the Board's Regulation Y (12 CFR 225.23(a)(2) or (f)) for the Board's approval under section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.21(a) of Regulation Y (12 CFR 225.21(a)) to acquire or control voting securities or assets of a company engaged in a nonbanking activity that is listed in § 225.25 of Regulation Y as closely related to banking and permissible for bank holding companies. Unless otherwise noted, such activities will be conducted through out the United States.

The application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

Comments regarding the application must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than January 8, 1988.

A. Federal Reserve Bank of Chicago (David S. Epstein, Vice President) 230 South LaSalle Street, Chicago, Illinois 60690:

1. *Marshall & Ilsley Corporation,* Milwaukee, Wisconsin; to acquire Richter Schroeder Company, Inc., Milwaukee, Wisconsin, and thereby engage in arranging commercial real estate equity financing pursuant to section 225.25(b)(14) of the Board's Regulation Y.

Board of Governors of the Federal Reserve System, December 15, 1987.
James McAfee,
Associate Secretary of the Board.

Northern Trust Corp., Application To Engage de Novo in Permissible Nonbanking Activities

The company listed in this notice has filed an application under § 225.23(a)(1) of the Board's Regulation Y (12 CFR 225.23(a)(1)) for the Board's approval under section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.21(a) of Regulation Y (12 CFR 225.21(a)) to commence or to engage *de novo,* either directly or through a subsidiary, in a nonbanking activity that is listed in § 225.25 of Regulation Y as closely related to banking and permissible for bank holding companies. Unless otherwise noted, such activities will be conducted throughout the United States.

The application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

Unless otherwise noted, comments regarding each of these applications must be received not later than January 11, 1988.

A. Federal Reserve Bank of New York (William L. Rutledge, Vice President) 33 Liberty Street, New York, New York 10045:

1. *Saban, S.A.,* Panama City, Panama; to acquire 5.05 percent of the voting shares of Republic New York Corporation, New York, New York, and thereby indirectly acquire The Williamsburgh Savings Bank, Brooklyn, New York, and Republic National Bank of New York, New York, New York.

BILLING CODE 6210-01-M

FEDERAL TRADE COMMISSION

Granting of Request for Early Termination of the Waiting Period Under the Premerger Notification Rules

Section 7A of the Clayton Act, 15 U.S.C. 18a, as added by Title II of the Hart-Scott-Rodino Antitrust Improvements Act of 1976, requires persons contemplating certain mergers or acquisitions to give the Federal Trade Commission and the Assistant Attorney General advance notice and to wait designated periods before consummation of such plans. Section 7A(b)(2) of he Act permits the agencies, in individual cases, to terminate this waiting period prior to its expiration and requires that notice of this action be published in the **Federal Register.**

The following transactions were granted early termination of the waiting period provided by law and the premerger notification rules. The grants were made by the Federal Trade Commission and the Assistant Attorney General for the Antitrust Division of the Department of Justice. Neither agency intends to take any action with respect to these proposed acquisitions during the applicable waiting period:

BILLING CODE 6750-01-M

GENERAL SERVICES ADMINISTRATION

[GSA Bulletin FPMR A-40, Supp. 26]

Federal Travel Regulations

AGENCY: Federal Supply Service, GSA.

ACTION: Notice of changes to Federal Travel Regulations.

SUMMARY: GSA has issued GSA Bulletin FPMR A-40, Supplement 26, transmitting changed pages amending the provisions of Federal Travel Regulations (FTR), FPMR 101-7, to establish a limitation on the amount which may be reimbursed for a loan origination fee, to increase the maximum dollar amount for reimbursement of allowable real estate sale and purchase expenses incident to a change of official station, and to modify the prohibition against contracting with third-party relocation companies for the provision of services similar to those offered by General Services Administration (GSA) through its travel and transportation services programs.

EFFECTIVE DATE: a. The revised provisions of the FTR, Chapter 2, Part 2-6, pertaining to reimbursement levels are effective for employees whose effective date of transfer is on or after October 1, 1987. For purposes of these regulations, the effective date of transfer is the date the employee reports for duty at the new official station.

b. The revised provisions of FTR, Part 2-12, pertaining to relocation service contracts are effective October 1, 1987.

FOR FURTHER INFORMATION CONTACT: Staff members, Regulations and Policy Division (FTS 557-1253, 557-1256, or 557-7525 (for non-FTS use AC 703)).

SUPPLEMENTARY INFORMATION: GSA, in consultation with the Office of Management and Budget, has determined that this rule is not a major rule for the purposes of Executive Order 12291 of February 17, 1981, because it is not likely to result in an annual effect on the economy of $100 million or more; a major increase in costs to consumers or others; or significant adverse effects.

GSA has based all administrative decisions underlying this rule on adequate information concerning the need for, and consequences of, this rule; has determined that the potential benefits to society from this rule outweigh the potential costs and has maximized the net benefits; and has chosen the alternative approach involving the least cost to society.

The impetus for these rule changes derives from three sources. The change dealing with certain loan fees has been formulated in response to recommendations by the General Accounting Office. The annual updates to the maximum amounts that may be reimbursed for expenses incurred by transferred employees for the sale and purchase of residences are required by 5 U.S.C. 5724a(a)(4)(B). The change allowing agencies to contract with third-party relocation companies for the administration of GSA's centralized household goods program results from experience gained utilizing third-party relocation service contracts.

Explanation of Changes

a. Paragraph 2–6.2d(1)(b) is revised to establish a general limitation of 1 percent on the amount which may be reimbursed for a loan origination fee incurred by an employee when purchasing a residence at a new official station. A higher percentage may be reimbursed if an employee shows by clear and convincing evidence that the higher rate is customary in the area of an employee's new residence and that it does not include prepaid interest, points, or a mortgage discount. The reimbursements for loan origination fees, loan assumption fees, and loan transfer fees are intended to cover a lending institution's charges for administrative-type costs involved in extending credit. However, there is no requirement for itemization of such costs within the percentage rate authorized or approved for payment.

b. Paragraph 2–6.2g(1) and (2) are amended to reflect a 1.8 percent increase in maximum reimbursements for real estate expenses. The dollar maximum for reimbursement of allowable expenses incurred for the sale of the residence at the old official station is increased from $16,873 to $17,177, and the dollar maximum for reimbursement of expenses related to purchase of a new residence at the new official station is increased from $8,437 to $8,589.

c. Paragraph 2–12.6b(1) is revised to allow agencies to incorporate GSA's centralized household goods traffic management program into their relocation service contracts to the extent that third-party service companies may administer such a program on behalf of the agency.

Accordingly, the Federal Travel Regulations are amended as follows:

Chapter 2. Relocation Allowances

1. **Authority:** Sec. 205(c), 63 Stat. 390; 40 U.S.C. 486(c); 5 U.S.C. 5707; E.O. 11609, July 22, 1971, E.O. 12466, February 27, 1984, and E.O. 12522, June 24, 1985.

Part 6. Allowances for Expenses Incurred in Connection With Residence Transactions

2. Paragraphs 2–6.2d(1)(b) and 2–6.2g are revised to read as follows:

2–6.2 *Reimbursable and nonreimbursable expenses.*

* * * * *

d. *Miscellaneous Expenses.*

(1) *Reimbursable items.* The expenses listed below are reimbursable in connection with the sale and/or purchase of a residence, provided they are customarily paid by the seller of a residence in the locality of the old official station or by the purchaser of a residence at the new official station, to the extent they do not exceed specifically stated limitations, or in the absence thereof, amounts customarily paid in the locality of the residence.

(a) * * *

(b) Loan origination fees and similar charges such as loan assumption fees and loan transfer fees. A loan origination fee is a fee paid by the borrower to compensate the lender for administrative-type expenses incurred in originating and processing a loan. Reimbursement for a loan assumption fee or a loan transfer fee or a similar charge also may be allowed, if it is assessed in lieu of a loan origination fee and reflects charges for services similar to those covered by a loan origination fee. An employee may be reimbursed for these fees in an amount not in excess of 1 percent of the loan amount without itemization of the lender's administrative charges. Reimbursement may exceed 1 percent only if the employee shows by clear and convincing evidence that: (1) The higher rate does not include prepared interest, points, or a mortgage discount; and (2) the higher rate is customarily charged in the locality where the residence is located.

* * * * *

g. *Overall limitations.* The total amount of expenses that may be reimbursed is as follows:

(1) In connection with the sale of the residence at the old official station, reimbursement shall not exceed 10 percent of the actual sale price or $17,177, whichever is the lesser amount.

(2) In connection with the purchase of a residence at the new official station, reimbursement shall not exceed 5 percent of the purchase price or $8,589, whichever is the lesser amount.

* * * * *

Part 12. Use of Relocation Service Companies

3. Paragraph 2–12.6b(1) is revised to read as follows:

2–12.6 *Form and scope of relocation service contracts*

* * * * *

b. * * *

(1) GSA has established certain travel and transportation programs that agencies are required to use. Examples are the centralized household goods traffic management program, the airline services contracts, and travel management center contracts. While similar services may be offered by relocation companies, agencies cannot use them. However, this restriction does not prohibit agencies from incorporating the GSA centralized household goods traffic management program, as a mandatory services source, into contracts with relocation service companies. Thus, relocation companies may act as third-party service firms to administer GSA's centralized household goods traffic management program on behalf of the contracting agency.

* * * * *

Dated: November 25, 1987.

T.C. Golden,

Administrator of General Services.

BILLING CODE 6820–24–M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. 76N–0366]

Provisionally and Permanently Listed Uses of FD&C Red No. 3 and its Lakes; Postponement of Final Date for Submission of Data for Specific Uses; Request for Use Data in Pet and Animal Food

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is postponing the final date for the submission of information pertaining to the sale and use of FD&C Red No. 3 and its lakes by persons interested in the continued use of this color additive (in food, drugs, and cosmetics). The new date will be February 1, 1988. This action responds to requests by manufacturers for additional time to compile and tabulate the requested information. In addition, FDA is requesting that all persons interested in the continued use of FD&C Red No. 3 and its lakes in pet and animal food products also respond to the request for information.

DATE: The new final date for the submission of specific use data for FD&C Red No. 3 and its lakes is February 1, 1988.

ADDRESS: All information is to be submitted to the Division of Food and Color Additives (HFF–330), Center for Food Safety and Applied Nutrition, Food and Drug Administration, 200 C St. SW., Washington, DC 20204.

FOR FURTHER INFORMATION CONTACT: Gerad L. McCowin, Center for Food Safety and Applied Nutrition (HFF–330), Food and Drug Administration, 200 C St. SW., Washington, DC 20204, 202–472–5676.

SUPPLEMENTARY INFORMATION: In the **Federal Register** of November 19, 1987 (52 FR 44485), FDA published a notice requesting that all persons interested in the food, drug, and cosmetic applications of FD&C Red No. 3 and its lakes to submit information pertaining to the sale and use of FD&C Red No. 3 and its lakes in these products. In that notice the agency established December 21, 1987, as the final date for submission of these data to the agency. The agency received comments from several potential respondents and trade associations requesting a postponement of the final date for submission of these data. The comments indicated that compiling the information requested will take longer than the original final date of December 21, 1987. The comments requested extensions that ranged from 30 to 60 days.

In order that respondents have the opportunity to provide the agency with information it needs, the agency is postponing the final date for the submission of use information on FD&C Red No. 3 and its lakes until February 1, 1988.

In the November 19, 1987, notice, the agency explained that the requested information will be used to assess potential exposure and to allocate (section 706(b)(8) of the Federal Food, Drug, and Cosmetic Act) the allowable safe uses of FD&C Red No. 3 if allocation is necessary and appropriate based upon the agency's evaluation of available toxicological data. The confidentiality of this and all information submitted to FDA will be maintained in accordance with 21 CFR 71.15.

In the November 19, 1987, notice, the agency inadvertently omitted specific mention of animal and pet food product applications as a class about which information is requested. FDA is hereby correcting that omission by requesting that information it requested in the November 19, 1987, notice also be submitted by persons interested in the continued use of FD&C Red No. 3 and its lakes in animal and pet food products.

Dated: December 15, 1987.

John M. Taylor,

Associate Commissioner for Regulatory Affairs.

[FR Doc. 87–29032 Filed 12–18–87; 8:45 am]

BILLING CODE 4160–01–M

National Institutes of Health

National Institute of Diabetes and Digestive and Kidney Diseases; National Diabetes Advisory Board; Meeting

Pursuant to Pub. L. 92–463, notice is hereby given of the National Diabetes Advisory Board's meeting dates which will be January 11–12, 1988. The meetings will begin at 8:30 a.m. and end at approximately 5 p.m. each day. The primary location is Marriott's Mountain Shadows Resort, 5641 East Lincoln Drive, Scottsdale, Arizona 85253. Other portions of the meeting will be held in research and health-care facilities located in the area. The primary purpose of the meeting is to discuss the Board's activities and to continue evaluation of the implementation of the long-range plan to combat diabetes mellitus. Although the entire meeting will be open to the public, attendance will be limited to space available. Notice of the meeting room will be posted in the hotel lobby.

For any further information, please contact Mr. Raymond M. Kuehne, Executive Director, National Diabetes Advisory Board, 1801 Rockville Pike, Suite 500, Rockville, Maryland 20852, (301) 496–6045. His office will provide, for example, a membership roster of the Board and an agenda and summaries of the actual meetings.

Dated: December 14, 1987.

Betty J. Beveridge,

NIH Committee Management Officer.

BILLING CODE 4140–01–M

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[UT–920–08–4121–10]

Utah, Colorado; Uinta-Southwestern Utah Federal Coal Production Region

AGENCY: Bureau of Land Management (BLM), Interior.

ACTION: Notice cancelling the Uinta-Southwestern Utah Federal Coal Production Region and opening the twenty-six county area to lease by application.

SUMMARY: On November 9, 1979, the Bureau of Land Management (BLM) established the Uinta-Southwestern Utah Federal Coal Production Region for the management of federally owned coal (44 FR 65197). Recent assessments indicate that industry interest, based on market conditions and existing potential production capacities, does not justify the federally initiated coal lease sale program procedures of 43 CFR Part 3420. In accordance with 43 CFR 3400.5, this notice decertifies the Uinta-Southwestern Utah Federal Coal Production Region. Further, this notice designates Federal coal reserves in the twenty-six county area of Utah and Colorado as open to lease by application in accordance with 43 CFR Part 3425.

EFFECTIVE DATE: January 20, 1988.

FOR FURTHER INFORMATION CONTACT: Max Nielson (801) 524–3004, Utah State Office, Bureau of Land Management, 324 South State Street, Suite 301, Salt Lake City, Utah 84111–2303.

SUPPLEMENTARY INFORMATION: The Uinta-Southwestern Utah Federal Coal Production Region was established by the Bureau of Land Management (BLM) on November 9, 1979, together with a number of other regions to implement competitive coal leasing under regulations contained in 43 CFR Part 3420. The Uinta-Southwestern Utah Region includes the following counties: In Utah—Carbon, Daggett, Duchesne, Emery, Garfield, Grand, Iron, Kane, Morgan, San Juan, Sanpete, Sevier, Summitt, Uintah, Utah, Wasatch, Washington, and Wayne. In Colorado—Delta, Garfield, Gunnison, Mesa, Montrose, Ouray, Pitkin, and San Miguel. The coal production region was estimated to contain sufficient Federal coal deposits to justify offering coal leases through the competitive leasing process set out in 43 CFR Part 3420.

A long-range regional market analysis was prepared and made available for public review and comment in

September 1987. This market analysis and the public comments were then reviewed and discussed by the Regional Coal Team (RCT) at its October 27, 1987 meeting. Based on this review, the RCT concluded that existing coal production capacity is sufficient to meet near-term regional needs. Consequently, the RCT recommended that the Uinta-Southwestern Utah Federal Coal Production Region should be decertified and that lease by application procedures should be implemented to satisfy near-term leasing needs.

The expected benefits are a substantial savings in administrative costs to both the Federal Government and the States of Utah and Colorado, while retaining a responsive leasing process for the coal industry. No additional social, economic, or environmental impacts are anticipated as a result of this change in the method of leasing. The Uinta-Southwestern Utah Regional Coal Team will fully participate in coal lease consideration in the lease by application mode. If the demand for Federal coal increases significantly, regional coal activity planning procedures can be reactivated through recertification of the Uinta-Southwestern Utah Federal Coal Production Region.

In accordance with 43 CFR 3400.5, this notice is to advise the public that the Uinta-Southwestern Utah Federal Coal Production Region is decertified, thereby declaring that the Federal coal reserves in those counties of Utah and Colorado listed above will be leased under 43 CFR Part 3425 (lease by application) rather than under 43 CFR Part 3420.

Any applications for Federal coal leasing being processed prior to this notice shall continue to be processed according to the procedures in effect at the time of applications.

Applications under 43 CFR 3425.1–5 shall be accepted by the BLM to lease Federal coal in the twenty-six counties named above. Three copies of the application shall be filed in either the Utah State Office of the BLM, 324 South State, Suite 301, Salt Lake City, Utah 84111–2303 or the Colorado State Office of the BLM, 2850 Youngfield Street, Denver, Colorado 80215–7076 (depending on the location of the application area).

Dated: December 14, 1987.

Robert F. Burford,

Director, Bureau of Land Management.

[FR Doc. 87–29132 Filed 12–18–87; 8:45 am]

BILLING CODE 4310-DQ-M

Bureau of Reclamation

Adoption of Navajo Power Marketing Plan

AGENCY: Bureau of Reclamation, Interior.

ACTION: Notice of adoption.

SUMMARY: On December 1, 1987, C. Dale Duvall, Commissioner of Reclamation, adopted a Navajo Power Marketing Plan (Plan) on behalf of the Secretary of the Interior, pursuant to section 107 of the Hoover Power Plant Act of 1984 (98 Stat. 1333) (Act). That Act provides that electrical capacity and energy associated with the United States' interest in the Navajo Generating Station which is in excess of the pumping requirements of the Central Arizona Project (CAP) and certain needs for desalting and protective pumping facilities (Navajo Surplus) shall be marketed and exchanged by the Secretary of Energy in a manner which optimizes the availability of Navajo Surplus and provides financial assistance in the timely construction and repayment of construction costs of authorized features of the CAP. The Act also provides that rates for Navajo Surplus shall not exceed levels that allow for an appropriate savings for the power contractors.

The adopted Plan, a cooperative effort among Federal, State, public, and private agencies, provides the criteria to be used in the sale and exchange of capacity and energy from Navajo determined to be surplus to the needs of CAP after the completion of the New Waddell Dam. The New Waddell Dam is a regulatory storage feature of the CAP which will allow for operating flexibility to increase winter season pumping and reduce summer season pumping, thereby providing an enhanced power resource during the peak load season of the Southwest.

At Reclamation's request, the Western Area Power Administration (Western) initiated and administered a public process to obtain comments on the Plan prior to its adoption. A notice requesting comments on the proposed Plan was published in the **Federal Register** on September 4, 1987. Western conducted a public information forum on the Plan in Phoenix, Arizona, on September 21, 1987, and a public comment forum in Phoenix, Arizona, on September 28, 1987. The period for accepting comments ended on October 5, 1987. Western received three oral comments at the public comment forum and six written comments prior to the end of the comment period. All comments supported the proposed Plan and recommended that the Plan be adopted without change as quickly as possible.

Consultation with the Secretary of Energy, the Governor of Arizona, and the Central Arizona Water Conservation District, as required by the Act, was documented by the receipt of letters concurring in the Plan from the Secretary of Energy, acting by and through the Administrator of Western, the Governor of Arizona, and the President of the Board of Directors of the Central Arizona Water Conservation District.

DATES: As provided in Part X of the Plan, it will become effective January 20, 1988.

FOR FURTHER INFORMATION CONTACT: Mr. Benedict R. Radecki, Acting Chief, Division of Power, Bureau of Reclamation, 18th and C Streets, NW., Washington, DC 20240. Phone (202) 343–4890.

SUPPLEMENTARY INFORMATION: The United States has acquired an entitlement to 24.3 percent of generation available at Navajo for use by CAP pursuant to the Colorado River Basin Project Act (32 U.S.C. 1501, *et seq.*) The CAP is a Reclamation multipurpose water resource development and management project in Arizona. During initial years of construction of the CAP, the United States entitlement to Navajo power was sold on an interim basis to various public and private utilities (Layoff). The Layoff contracts were subject to withdrawal of power as needed by the United States. Notice of final withdrawal was given to all Layoff contractors, and the Layoff contracts terminated on May 31, 1987.

Section 107(c) of the Act provides that a power marketing plan be adopted by the Secretary of the Interior to provide for the marketing and exchange of Navajo Surplus. In order to provide for the interim marketing of Navajo Surplus during the initial delivery and pump testing of the CAP and during the pre-New Waddell Dam period, an Interim Navajo Power Marketing Plan (Interim Plan) was developed and adopted by the Commissioner of Reclamation on March 17, 1986.

The adopted Plan provides that the Interim Plan will terminate upon expiration of all contracts entered into pursuant to the Interim Plan. Contracts entered into under the Interim Plan will expire upon 1 year notice given by Western subsequent to September 30, 1989; but no later than the date of initial operation of regulatory storage at New Waddell Dam.

The adopted Plan contains the criteria for the sale and exchange of Navajo Surplus, including a description of the power to be marketed, eligibility criteria, contact provisions, ratesetting procedures, and revenue collection and distribution criteria, after termination of the contracts under the Interim Plan. The ratesetting procedures in the adopted Plan were developed in order to accomplish the requirements of the Act to market and exchange Navajo Surplus at "rates [that] shall not exceed levels that allow for an appropriate saving for the contractor." The rates in the adopted Plan will provide annual revenues for repayment of costs associated with the marketing and exchange of Navajo Surplus. An additional rate component is included pursuant to section 107(d) of the Act to provide for repayment of funds advanced by CAWCD for authorized features of CAP.

National Environmental Policy Act

In compliance with the National Environmental Policy Act of 1969 (NEPA), Council on Environmental Quality regulations, and the Department of the Interior regulations for compliance with NEPA, Reclamation completed an Environmental Impact Statement on the Regulatory Storage Division, Central Arizona Project, Statement No. INT FES 84–4, February 10, 1984. The environmental impact statement describes six alternatives for the proposed construction and operation of the Regulatory Storage Division of the CAP. The alternatives described provide for CAP regulatory storage, flood control for the Salt and Gila Rivers through the Phoenix metropolitan area, and concurrent and coincident aspects of the Safety of Dams program. A No Action alternative is also described. The environmental impact statement fulfills the requirements of Executive Order 11988 (Floodplain Management) and Executive Order 11990 (Protection of Wetlands), and the requirements of the Nationwide Permit in accordance with the provisions of section 404 of the Clean Water Act.

In addition, Western prepared an environmental assessment dealing with the potential effects of the sale of Navajo Surplus at expected rates on wholesale power supply costs. As a result of these studies, Reclamation determined that the adopted Plan met the criteria for a Finding of No Significant Impact (FONSI No. LC–87–2 dated November 16, 1987). Copies of the environmental impact statement, environmental assessment, and FONSI will be made available to interested persons upon request.

Date: December 14, 1987.

C. Dale Duvall,

Commissioner.

The text of the adopted Plan is as follows:

Navajo Power Marketing Plan

I. Purpose and Scope

Section 107 of the Hoover Power Plant Act requires that a power marketing plan be developed to provide for marketing and exchanging of Navajo Surplus to provide financial assistance in the timely construction and repayment of construction costs of authorized features of the Central Arizona Project.

A. This Plan has been developed based upon data contained in the report by Reclamation entitled "Central Arizona Project Power Marketing and Water Supply Study—October 1985" to meet the requirements of the Hoover Power Plant Act and provide for the sale and Exchange of Navajo Surplus for the benefit of the Central Arizona Project as provided in section 107 of the Hoover Power Plant Act.

B. This Plan recognizes the obligation of the United States to use its entitlement to electrical capacity and energy from Navajo to provide necessary power for the pumping requirements of the Central Arizona Project and any such needs for desalting and protective pumping facilities as may be required under section 101(b)(2)(B) of the Colorado River Basin Salinity Control Act. For the purposes of this Plan, Reclamation has determined that the Navajo Surplus peaking resource identified in section V.A and V.B of this Plan is not required to meet the needs for desalting and protective pumping facilities as may be required under section 101(b)(2)(B) of the Colorado River Basin Salinity Control Act; however, the Navajo Surplus identified in section V.C will be considered in meeting these needs.

C. The Plan provides that Western, working closely with Reclamation and CAWCD, will be the primary marketing entity responsible for the sale and Exchange of Navajo Surplus in accordance with applicable Federal law and regulations. Western may utilize exchange, banking, purchase agreements, or integration with other resources to fulfill any purpose of this Plan. CAWCD will act as a marketing entity solely for the purpose of establishing and causing to be collected the Additional Rate Component.

D. This Plan sets rates and parameters for the establishment of rates, not exceeding levels that allow for an appropriate saving for the contractor, that will provide revenues from the sale and Exchange of Navajo Surplus for the purposes of: Payment of the operation and maintenance costs associated with Navajo Surplus; utilization and assignment of the revenues derived from the Additional Rate Component at least sufficient to make repayment and establish reserves for repayment of $175,000,000 (or more) of funds advanced by CAWCD to Reclamation for construction of authorized features of the Central Arizona Project pursuant to the Plan Six Cost Sharing Agreement; recovery of capital costs, including interest, of authorized features of the Central Arizona Project allocated to power; and recovery of capital costs of authorized features of the Central Arizona Project allocated to irrigation that are determined to be beyond the irrigators' ability to repay.

II. Authorities

The authorities under which this Plan is developed are: A. Federal Reclamation laws (43 U.S.C. 372 *et seq.*, and all Acts amendatory thereof or supplementary thereto); in particular, the Colorado River Basin Project Act (Pub. L. 90–537); and the Hoover Power Plant Act of 1984 (Pub. L. 98–381).

B. Rules, regulations, and agency agreements of Western and Reclamation issued or made pursuant to applicable law.

III. Definitions

The following terms wherever used herein shall have the following meanings: A. "Additional Rate Component" shall mean the rate component(s) established, charged and caused to be collected by CAWCD to recover the CAWCD Advanced to Reclamation, plus interest thereon, pursuant to section 107 of the Act and to Chapter 21, Laws of the State or Arizona, Thirty-Seventh Legislature, Second Regular Session, 1986.

B. "Authority" shall mean the Arizona Power Authority.

C. "Authority's Final Hoover Power Marketing Plan" shall mean the Arizona Power Authority's marketing plan entitled "Final Hoover Power Marketing, Post-1987" dated June 7, 1985.

D. "Central Arizona Project" or "CAP" shall mean the Reclamation multipurpose water resource development and management project in Arizona authorized by the Colorado River Basin Project Act, as amended (43 U.S.C. 1501 *et. seq.*)

E. "CAWCD" shall mean the Central Arizona Water Conservation District.

F. "CAWCD Advance to Reclamation" shall mean the advance of

$175,000,000 (or more) to Reclamation by CAWCD for authorized features of the Central Arizona Project in accordance with the Plan Six Cost Sharing Agreement.

G. "Colorado River Basin Salinity Control Act" shall mean the Colorado River Basin Salinity Control Act of 1974, as amended, (43 U.S.C. 1591 *et. seq.*)

H. "Conformed Criteria" shall mean the Conformed General Consolidated Power Marketing Criteria or Regulations for Boulder City Area Projects published in the **Federal Register** (49 FR 50583) on December 29, 1984.

I. "Date of Initial Operation" shall mean the date of initial test pumping into regulatory storage at New Waddell Dam, as determined by Reclamation.

J. "Exchange" shall mean any arrangements providing for delivery of capacity and energy to Western by an Exchange Contractor during an Operating Year and the return of such capacity and energy to the Exchange Contractor by Western from Navajo in the same Operating Year.

K. "Exchange Contractor" shall mean a contractor which enters into a Long-Term Exchange Contract.

L. "Exchange Energy Account" shall mean the record of Exchanges between Western and an Exchange Contractor.

M. "Hoover Power Plant Act" or "Act" shall mean the Hoover Power Plant Act of 1984 (Pub. L. 98–381).

N. "Hoover Schedule B Capacity and Energy" shall mean the capacity and energy from the Boulder Canyon Project described in section 105(a)(1)(B) of the Act which is available to the Authority.

O. "Hoover Schedule C Excess Energy" shall mean the energy from the Boulder Canyon Project described in section 105(a)(1)(C) of the Act which is available to the Authority.

P. "Interim Plan" shall mean the Interim Navajo Power Marketing Plan adopted by the Commissioner of Reclamation on March 17, 1986.

Q. "Layoff Contract" shall mean the contract(s) entered into as of September 30, 1969, between certain non-Federal entities and Western for the sale of the Navajo Entitlement.

R. "Long-Term Contracts" shall mean the Long-Term Peaking Sales Contracts and the Long-Term Exchange Contracts.

S. "Long-Term Peaking Sales Contract" shall mean a contract between Western and a contractor for sale of Navajo Surplus for a period of years ending September 30, 2011.

T. "Long-Term Exchange Contract" shall mean a contract between Western and an Exchange Contractor for Exchange of Navajo Surplus for a period of years ending September 30, 2011.

U. "Navajo" shall mean the Navajo Generating Station, the thermal generating power plant located near Page, Arizona, and associated transmission facilities.

V. "Navajo Entitlement" shall mean the United States entitlement of 24.3 percent of the generation from Navajo.

W. "Navajo Surplus" shall mean capacity and energy associated with the Navajo Entitlement which is in excess of the pumping requirements of the Central Arizona Project and any such needs for desalting and protective pumping facilities as may be required under section 101(b)(2)(B) of the Colorado River Basin Salinity Control Act.

X. "New Waddell Dam" or "New Waddell Reservoir" shall mean the regulatory storage facilities constructed on the Agua Fria River as a feature of the CAP.

Y. "Offpeak" shall mean those hours during a day that are not considered Onpeak.

Z. "Onpeak" shall mean the hours during a day, except Sunday, that are between 9:00 a.m. to 9:00 p.m. mountain standard time during the Summer Season.

AA. "Operating Year" shall mean the period beginning October 1 and ending September 30 of the next succeeding year.

BB. "Plan" shall mean this Navajo Power Marketing Plan.

CC. "Plan Six Cost Sharing Agreement" shall mean the agreement among the United States, the Central Arizona Water Conservation District, the Flood Control District of Maricopa County, the Salt River Project Agricultural Improvement and Power District and Salt River Valley Water Users' Association, the Arizona cities of Chandler, Glendale, Mesa, Phoenix, Scottsdale, and Tempe, the State of Arizona, and the city of Tucson for funding of Plan Six facilities of the Central Arizona Project, Arizona, and for other purposes, dated April 15, 1986, and any amendments or supplements thereto.

DD. "Reclamation" shall mean the Bureau of Reclamation, Department of the Interior.

EE. "Summer Season" shall mean the period from May 1 through September 30 of any year.

FF. "Western" shall mean the Western Area Power Administration, Department of Energy.

GG. "Winter Season" shall mean the period from October 1 through April 30 of the next succeeding year.

IV. Element

This Plan includes the following elements: A. The estimated amounts of Navajo Surplus used in devleoping this Plan were obtained from data contained in a report by Reclamation, entitled "Central Arizona Project Power Marketing and Water Supply Study—October 1985," and the "Central Arizona Project, Surplus/Shortage Pumping Power Profile (Revision No. 1)," dated October 1986, prepared by CAWCD/Arizona Department of Water Resources.

B. Optimization of Navajo Surplus will be achieved through several means: (1) Delivering maximum amounts of water from the Colorado River in the Winter Season for storage in the New Waddell Reservoir and then serving CAP water demands in the Summer Season from water previously placed in storage, and on a daily basis, delivering maximum amounts of CAP water Onpeak from the limited aqueduct storage and recharging that storage to the extent possible Offpeak, thereby making Navajo Surplus available when electrical loads in the marketing area are at their peak and thus enhancing the value of the Navajo resource; (2) CAWCD contracting with the Authority for Hoover Schedule B Capacity and Energy and CAWCD receiving Hoover Schedule B Capacity and Energy pursuant to paragraph E of this section and using it to meet CAP pumping requirements in part, (3) CAWCD contracting with the Authority for Hoover Schedule C Excess Energy and CAWCD receiving the Hoover Schedule C Excess Energy pursuant to paragraph F of this section and using it to meet CAP pumping requirements in part; and (4) using CAP and Western operating flexibility.

C. In order to enhance the value of Navajo Surplus to maximize financial assistance to CAP, the proposed CAP operation will utilize daily energy management, weekly energy management, and seasonal power management as described in paragraph B of this section. Except for scheduling adjustments to achieve operating flexibility, to the extent possible CAP pumping will be Offpeak to optimize Onpeak availability of Navajo Surplus.

D. CAP pumping will be maximized during the Winter Season, to the extent possible, within the physical and legal limitations of moving CAP water through the CAP aqueduct. Any Winter Season energy deficiencies are intended to be met through exchanges or through a combination of exchange, banking, purchase agreements or integration with other resources.

E. This Plan includes, for purposes of the Authority's Final Hoover Power Marketing Plan, the recapture of Hoover Schedule B Capacity and Energy pursuant to the Authority's Final Hoover Power Marketing Plan, as further provided for in a resolution of the Board of Directors of CAWCD which is attached hereto as Appendix A, and incorporated by reference herein, for the benefit of CAWCD: (1) after October 1, 1991, if requested by CAWCD pursuant to the provisions of Appendix A, or (2) upon the Date of Initial Operation, but (3) not later than December 31, 1994.

F. The Authority's Final Hoover Power Marketing Plan states that "the Authority intends to allocate and sell" Hoover Schedule C Excess Energy "in a manner which is consistent with such adopted [Navajo Marketing] Plan". In order to accomplish the goals of this Plan, this Plan assumes that all Hoover Schedule C Excess Energy available to the Authority will be marketed by the Authority in accordance with the Hoover C energy sales contracts dated as of April 15, 1987, as follows:

1. From June 1, 1987, until recapture of Hoover Schedule B Capacity and Energy for CAWCD is completed, to Authority contractors taking capacity and energy in a manner calculated to equalize load factors between Hoover Schedule A Capacity and Hoover Schedule B Capacity. (This provision contemplates that increasing amounts of Hoover Schedule C Excess Energy will be marketed with Hoover Schedule B Capacity as increased amounts of that capacity become available.)

2. After recapture of Hoover Schedule B Capacity and Energy has been completed, pursuant to the Authority's power sales contracts with its contractors, dated as of September 15, 1986, on the basis of a first right of refusal to Authority contractors which are then utilizing Hoover Schedule B Capacity and Energy, pro rata to the amount of capacity being taken.

3. To CAWCD, on the basis of a first right of refusal, at any time after June 1, 1987, until recapture of Hoover Schedule B Capacity and Energy has been completed, to the extent that the amount of Hoover Schedule C Excess Energy, if made available under contract with the United States to be marketed by the Authority in the current contract year (October through September), shall exceed 400 GWh, but not exceed 800 GWh. During the same period, Hoover Schedule C Excess Energy over 800 GWh shall be marketed, if available, on the basis of first right of refusal, 50 percent to CAWCD and 50 percent to other Authority contractors. Delivery pursuant to this section shall be made only at a time and to the extent that the capacity of Authority's contractors is not being utilized to generate Hoover Schedule A energy or Hoover Schedule B energy, or if other capacity is made available by Western for said delivery.

G. Termination of the Long-Term Contracts on September 30, 2011, will not terminate this Plan. So long as Navajo operates and there is Navajo Surplus, Western shall continue to market Navajo Surplus under this Plan with such amendments or revisions as may be adopted by the Secretary of the Interior, after consultation with the Secretary of Energy, CAWCD, and the Governor of Arizona and as provided by law, including the authorities set forth in section II. Contractors with Long-Term Peaking Sales Contracts and contractors with Long-Term Exchange Contracts whose contracts terminate in 2011 shall be given the first opportunity for new long-term sales contracts and new long-term exchange contracts for approximately the same amounts of power contained in the terminated contracts with available capacity and energy distributed pro rata among contractors. Such new contracts shall be entered into prior to October 1, 2007.

V. Power To Be Marketed or Exchanged

Contracts entered into pursuant to the interim Plan shall expire as follows:

(1) After consultation by Western with Reclamation and CAWCD, upon 1 year notice given by Western subsequent to September 30, 1989; but in any event, (2) after such notice as Western deems appropriate, upon the Date of Initial Operation. The Interim Plan shall terminate upon expiration of all contracts entered into pursuant to the Interim Plan. Navajo Surplus to be sold or Exchanged under this Plan consists of the following:

A. Capacity and energy will be available for sale on a long-term basis generally during the Summer Season. Capacity and energy will be available for delivery during the Summer Season and the Winter Season Onpeak and Offpeak. Capacity available for sale will be 400 MW, less the capacity used for Exchange purposes under paragraph B of this section. There will be 760 kwh of energy per year available for sale to a contractor for each kW of contract capacity.

B. A maximum of 150 MW of the 400 MW available under pargraph A of this section may be used for Exchanges on a long-term basis. Energy scheduled from an Exchange Contractor will be returned to such Exchange Contractor on a one-kWh-for-one-kWh basis under terms provided in a Long-Term Exchange Contract. There will be 760 kWh of energy per year available to an Exchange Contractor for each kW of contract capacity Exchanged.

C. Any capacity or energy not sold or Exchanged in accordance with paragraphs A and B of this section may, as determined by Western, in cooperation with CAWCD and Reclamation, be sold under appropriate long-term or short-term arrangements or integrated with the Federal system and sold by Western under arrangements developed in cooperation with CAWCD and Reclamation.

D. Any capacity or energy determined to be available under paragraph C of this section, up to 30 MW, will be made available first to Reclamation for the purposes of the Colorado River Basin Salinity Control Act.

E. Delivery of capacity and energy provided in paragraphs A and B of this section is subject to the following:

1. In the event of an outage, curtailment, or derating (or any combination thereof) of the generating capabilities at Navajo, each contractor's right to receive capacity and energy shall be as follows:

a. Capacity shall be reduced on a pro rata basis among all contractors and CAWCD.

b. Energy will be affected as follows:

(i) If the energy produced by the Navajo Entitlement is equal to or greater than an average of 3,500 GWh per year in the current and immediately prior Operating Year, then the contractor is entitled to the full 760 kWh per KW per year.

(ii) If the total energy produced by the Navajo Entitlement is less than an average of 3,500 GWh per year in the current and immediately prior Operating Year, then either (1) each contractor's right to receive energy may be reduced by Western, and if reduced, the reduction shall be on a pro rata basis among all contractors and CAWCD, or (2) at the contractor's option, energy may be scheduled to Western, on a one-for-one basis at times and amounts mutually acceptable to Western and the contractor, to replace the energy which would have otherwise been lost by pro rata reduction.

2. If in the Operating Year in which the Date of Initial Operation occurs, contract entitlements cannot be delivered, such entitlements shall be reduced among all contractors pro rata.

3. In September of each Operating Year, each Exchange Contractor shall supply Western with a schedule of proposed deliveries of energy during the Winter Season equal to the amount to which the Exchange Contractor will be entitled during the following Operating Year. Western may upon 24 hours notice cancel a day's delivery in the event that Western finds that the energy is not

needed for pumping and could not be sold at a rate higher than the Navajo Surplus energy rates described in section VIII.A.2. In the event that the Exchange Contractor, because of emergency conditions, would have to supply Exchange energy from oil-fired or gas-fired resources, the Exchange Contractor may notify Western and be relieved of its obligation under the schedule for the period of time until it is able to supply such Exchange energy without using oil-fired or gas-fired generation.

4. In the event of an outage, curtailment, or derating (or any combination thereof) of the Navajo transmission system, Western will use its best efforts to deliver Navajo Surplus to the contractors, in amounts as close to each contrctor's Navajo Surplus entitlement or pro rata share of such entitlement as possible, using the available Navajo transmission system. Upon appropriate arrangements, Westen may assist the contractors in the event of such outage, curtailment, or derating of the Navajo transmission system by arranging alternative emergency transmission service with third parties or on Western's transmission system as determiend to be available in the sole judgement of Western.

5. Each Long-Term Exchange Contract will provide for an Exchange Energy Account. It is generally intended that the account will contain a balance of energy owed to the Exchange Contractor. Under some circumstances, the balance of the Exchange Energy Account may be reversed whereby the Exchange Contractor will owe energy to Western. Under either circumstance, energy can be scheduled by the Exchange Contractor at any time for credit to his Exchange Energy Account provided Western has adequate pumping loads or sales opportunities to use the energy. It is not intended that Western would accept energy for resale when such resale would be at rates less than Navajo Surplus energy rates described in Section VIII.A.2. Energy deliveries by an Exchange Contractor to balance its Exchange Energy Account must be at times and amounts mutually acceptable to Western and to the Exchange Contractor.

6. Except as provided in paragraph 7 of this section, energy deliveries by Western under Long-Term Contracts will be scheduled at least 24 hours in advance, as mutually agreed between the contractor and Western, and such deliveries will be contingent only on the output of Navajo.

7. Capacity and energy, not scheduled at least 24 hours in advance, may be ordered by a contractor under a Long-Term Contract through appropriate dispatch channels. Such requested capacity and energy may be supplied, at Western's discretion, after coordinating with CAWCD, either through rapid pump unloading (estimated 100 percent loaded to 0 percent within 10 minutes) or from other resources available to Western. Such delivery not scheduled at least 24 hours in advance may be limited to 8 hours per day. A charge shall be assessed to a contractor as a start-up cost for each occurrence of a request for an increase in delivery not scheduled at least 24 hours in advance. The accounting for energy delivered under the provisions of this paragraph shall be identical to accounting for energy scheduled 24 hours in advance.

VI. Eligibility

Navajo Surplus will be offered for sale and Exchange in accordance with the requirements of this section.

A. Capacity and energy will be offered for sale in the following order of priority, in accordance with part IV, section A of the Conformed Criteria:

1. Federal preference entities within Arizona.
2. Federal preference entities within the Boulder City marketing area.
3. Federal preference entities in adjacent Federal marketing areas.
4. Non-preference entities in the Boulder City marketing area.

B. In the event that a potential contractor fails to place capacity and energy under contract within a reasonable period, as specified by Western and in accordance with the terms and conditions offered by Western, the amounts of capacity and energy not placed under contract will be reoffered in accordance with the order of priority specified in paragraph A of this section.

C. Arizona entities, regardless of preference status, shall have first opportunity for electrical capacity and energy Exchange rights as necessary to implement this Plan. Western, in consultation with CAWCD and Reclamation, may determine that any capacity and energy not subscribed to by Arizona entities for Exchange may be offered for long-term sale in the order of priority stated in paragraph A of this section or may be offered to non-Arizona entities for Exchange.

VII. Contract Provisions

Western, after consultation with Reclamation and CAWCD, shall enter into all power sales and Exchange contracts necessary to carry out the provisions of this Plan in selling and exchanging capacity and energy pursuant to section V. Navajo Surplus shall be marketed, and Exchange rights granted by Western on behalf of the Secretary of the Interior, under contracts consistent with this Plan and the Conformed Criteria. Contracts for sale or Exchange of Navajo Surplus made pursuant to this Plan shall include, but not be limited to, the following provisions:

A. Each Long-Term Peaking Sales Contract shall become effective upon its execution, the implementation of which, including all terms, covenants, and conditions related to delivery of capacity and energy and all appropriate payments therefore, shall begin on the first day within the Summer Season following the Date of Initial Operation. Contractors shall be given at least 60 days written notice prior to the Date of Initial Operation. If contract entitlements are reduced pursuant to section V.E.2, each contractor shall be charged only for the amount of capacity and the energy made available to the contractor in that Operating Year. Each Long-Term Peaking Sales Contract shall terminate on September 30, 2011.

B. Each Long-Term Exchange Contract shall become effective upon its execution, the implemention of which, including all terms, covenants, and conditions related to the Exchange of capacity and energy and all appropriate payments therefore, shall begin upon the Date of Initial Operation. Contractors shall be given at least 60 days written notice prior to the Date of Initial Operation. Each Long-Term Exchange Contract shall provide for an Exchange Energy Account. It is the intent of this Plan that the Exchange Energy Accounts will be balanced to zero annually. However, in the event that such balance owed Western is not reduced to zero, the Long-Term Exchange Contract shall include provisions for a carryover of such balance to the subsequent Operating Year or for payment to Western. In the event that such balance owed the Exchange Contractor is not reduced to zero, the Long-Term Exchange Contract shall include provisions for a carryover of such balance to the subsequent Operating Year to be credited against the Exchange Contractor's scheduled delivery. Prior to the Date of Initial Operation, each Exchange Contractor shall receive an estimate of the amount of capacity and energy which will be available to it during the first Operating Year, and the Exchange Contractor shall propose a schedule of Winter Season energy delivery to Western in the same amount as Reclamation's estimate of the available return of energy. If contract entitlements are reduced pursuant to section V.E.2., each Exchange Contractor shall be charged only for the amount of capacity made available to the Exchange Contractor in that Operating Year. Each Long-Term Exchange Contract shall terminate on September 30, 2011.

C. Any Long-Term Contract may, at the contractor's request, contain a provision that if the New Waddell Dam is not scheduled to be completed by a certain date the contractor may terminate the Long-Term Contract on or before a date established in the contract.

D. Contract entitlements will be measured or calculated at the 500 kV bus at the Navajo Generating Station. Capacity and energy, less losses, will be scheduled and delivered at a voltage of 500 kV to contractors at either Westwing Switchyard or McCullough Switchyard or at such other points and voltages on the Navajo system as Western and the contractor shall agree. Any necessary transmission service beyond the contractor's point(s)-of-delivery will be the responsibility of the contractor.

E. CAWCD shall be a party to contracts for the sale or Exchange of Navajo Surplus for the limited purpose of establishing and collecting the Additional Rate Component.

F. Written metering and scheduling instructions shall be agreed upon between Western and the contractor, in consultation with CAWCD and Reclamation, prior to any deliveries under this Plan. The metering and scheduling instructions shall provide the operating and accounting procedures for such deliveries. Metering and scheduling instructions are intended to implement terms of the contract, not to modify or amend it, and therefore are subordinate to the contract. The implementation shall be the responsibility of Western and the contractor. After consultation with Reclamation and CAWCD, Western and the contractor may modify these instructions, as necessary, to reflect changing power system conditions. In the event the contractor fails or refuses to execute the initial metering and scheduling instructions or any revised instructions Western determines to be necessary, Western shall develop and implement temporary instructions until initially acceptable instructions have been developed and executed by Western and the contractor.

VIII. Ratesetting Procedures

In order to accomplish the requirements of the Act to market and Exchange Navajo Surplus "for the purposes of optimizing the availability of Navajo Surplus and providing financial assistance in the timely construction and repayment of construction costs of authorized features of the Central Arizona project," and the provisions, "That rates shall not exceed levels that allow for an appropriate saving for the contractor," rates for Navajo Surplus sales and Exchanges shall be established and modified in accordance with the following provisions:

A. Long-term capacity and energy described in section V.A shall be sold at rates which will provide financial assistance in the timely repayment of the CAWCD Advance to Reclamation, plus interest thereon, and repayment of costs of authorized features of CAP to be repaid by power revenues. The following rates do not exceed a level that will allow for an appropriate saving for the contractor. The rates shall be composed of a capacity rate and an energy rate calculated in the following manner:

1. The capacity rate will be fixed for the term of the Long-Term Peaking Sales Contract at (a) the Additional Rate Component established by CAWCD, plus (b) an amount which when added to the Additional Rate Component shall total $72 per kW-year. The annual rate of $72 per kW-year shall be billed to each contractor in a monthly amount of $6 per kW based on the amount of each contractor's capacity entitlement.

2. The energy rate will be based on the actual annual operating costs associated with the Navajo Entitlement in the prior Operating Year plus a charge for Western's costs associated with Navajo. The Western charge will be based on Western's actual costs of services performed under this Plan, including appropriate administrative expenses. The annual operating costs will be determined in a similar manner as the generation operating charge, generation energy charge, and transmission operating charge in the Layoff Contracts. The energy rate will be a mills per kWh rate calculated by dividing the total costs described above by the total annual kWh available to the United States in the same Operating Year. The energy rate will be applied monthly to each kWh delivered.

B. Long-term Exchanges described in section V.B. shall be Exchanged at a one-for-one energy Exchange rate plus the following charges, which do not exceed a level that will allow for an appropriate saving for the contractor.

1. The capacity rate described in paragraph A.1 of this section.
2. A charge for Western's cost associated with Navajo as described in paragraph A.2 of this section.
3. If a balance remains in favor of Western in the Exchange Energy Account at the close of any Operating Year, Western may require a settlement of the account in cash at 115 percent of the Navajo Surplus energy rate described in paragraph A.2 of this section.

C. For capacity and energy not scheduled at least 24 hours in advance as described in section V.E.7, the charge shall be $4,000 each occurrence of a request for an increse in delivery. This charge shall be in addition to the charges for capacity and energy described in paragraphs A and B of this section.

D. Capacity and energy described in sections V.C and V.D shall be sold at rates established by Western, after consultation with CAWCD and Reclamation. Such rates may include an Additional Rate Component.

E. Because of the Act's requirements for noncost-based rates, the rates established pursuant to this Plan are not suitable to the required review of Western's rates by the Federal Energy Regulatory Commission. All rates promulgated by the Administrator of Western under this Plan shall be a final act of the Secretary of Energy and shall be subject to review pursuant to the judicial review provided by the Administrative Procedure Act (5 U.S.C. 553, *et seq.*).

IX. Revenue Collection and Distribution

Western will bill and collect in accordance with the rates and charges for the sale or Exchange of Navajo Surplus, including the Additional Rate Component for CAWCD.

A. Western shall distribute all revenues collected from the application of the rates and charges in the following manner:

1. First, revenues will be deposited into the Lower Colorado River Basin Development Fund to pay all costs of operation and maintenance determined to be associated with the sale and Exchange of Navajo Surplus, including Western's costs.

2. Second, revenues derived from the collection of the Additional Rate Component by Western for CAWCD will be paid directly to CAWCD or its nominee for repayment and establishment of reserves for repayment of the CAWCD Advance to Reclamation plus interest thereon.

3. Third, any revenues remaining will be deposited into the Lower Colorado River Basin Development Fund to repay other CAP obligations.

B. In the event that the revenues and resulting funds available to make the

BEST COPY AVAILABLE

VOL 52 ISS 244 DEC 21 1987 UMI

repayments referenced in this Plan are insufficient for that purpose, the United States shall be under no obligation, by reason of this Plan, to supply funds to make up such insufficiency or to reduce any repayment obligations referenced in this Plan.

X. Effective Date

This Plan will become effective 30 days after publication in the **Federal Register** following adoption by the Secretary of the Interior.

XI. Consultation

This Plan is deemed most acceptable in accordance with section 107(c) of the Hoover Power Plant Act as evidenced by the concurrences below from the Western Area Power Administration (Secretary of Energy), the Governor of Arizona, and the Central Arizona Water Conservation District.

Adopted:

Dated: December 1, 1987.

D. Dale Duvall,

Commissioner of Reclamation.

Concurrences:

Western Area Power Administration:

William H. Clagett,

Administrator.

The State of Arizona:

Evan Mecham,

Governor.

Central Arizona Water Conservation District:

Rod J. McMullin,

President.

Appendix A—Resolution of the Board of Directors of the Central Arizona Water Conservation District

August 6, 1987.

Whereas, the proposed Navajo Power Marketing Plan includes, for purposes of the Arizona Power Authority's Final Hoover Power Marketing Plan of June 7, 1985, the recapture of Hoover Schedule B Capacity and Energy pursuant to the Authority's Final Hoover Power Marketing Plan for the benefit of the Central Arizona Water Conservation District ("CAWCD") (1) after October 1, 1991, if requested by CAWCD pursuant to the provisions of this Resolution, or (2) upon the Date of Initial Operation, but (3) not later than December 31, 1994; and

Whereas, in order to obtain Hoover Schedule B Capacity and Energy pursuant to the Authority's Final Hoover Power Marketing Plan, CAWCD must, among other requirements, deliver a written request to the Arizona Power Authority ("Authority") to recapture Hoover Schedule B Capacity and Energy after the Secretary of the Interior adopts the Navajo Power Marketing Plan; and

Whereas, the Authority's Final Hoover Power Marketing Plan provides that, upon compliance by CAWCD with the conditions of paragraph 5 of the Summary contained in the Authority's Final Hoover Power Marketing Plan and not later than 90 days after receipt of the written request for recapture from CAWCD, the Authority will issue the notice of recapture and it is assumed that the Authority will use its best efforts to issue such notice prior to the next quarterly advance, if any, required of CAWCD by the Plan Six Cost Sharing Agreement; and

Whereas, It is necessary and desirable to further define and clarify the circumstances under which CAWCD will request and the Authority will recapture Hoover Schedule B Capacity and Energy pursuant to the Authority's Final Hoover Power Marketing Plan for the benefit of CAWCD in order to promote wide support for the final Navajo Power Marketing Plan; and

Whereas, The proposed Navajo Power Marketing Plan prepared for the consideration of the Secretary of the Interior has been presented to the Board of Directors of the CAWCD for its approval, including Appendix A which contains this Resolution; and

Whereas, To the best of the knowledge of the Board of Directors of CAWCD, this Resolution is consistent with the obligations of CAWCD's Hoover Power Sales Contract with the Authority;

Now, therefore, be it resolved, That, subject to the adoption by the Secretary of the Interior of the Navajo Power Marketing Plan ("Plan") in substantially the form presented to the Board of Directors for its consideration on this date, the Board of Directors approves the terms and conditions thereof, including but not limited to the following resolutions.

Be it further resolved, That terms used in this Resolution which are defined in the Plan shall have the meanings ascribed to them in the Plan.

Be it further resolved, That CAWCD agrees that, except as provided in the next resolved clause herein, any written request for recapture delivered to the Authority by CAWCD prior to October 1, 1992, will be delivered only after Reclamation has determined that construction of New Waddell Dam has sufficiently advanced that the Date of Initial Operation is scheduled to occur within 27 months.

Be it further resolved, That CAWCD agrees that it will not, prior to October 1, 1989, deliver a written request for recapture to the Authority. CAWCD further agrees that any written request for recapture, not occasioned by a determination by Reclamation that construction of New Waddell Dam has sufficiently advanced that the Date of Initial Operation is scheduled to occur within 27 months, will be delivered to the Authority prior to October 1, 1992 only upon the occurrence of the events described in subsections a and b as follows:

a. CAWCD has advanced to the escrow account or subaccount for New Waddell Dam called for in the Plan Six Cost Sharing Agreement, and Congress has appropriated, funds collectively equivalent to seventy-two percent (72%) or more of the current estimated construction costs of $452.6 million for New Waddell Dam or CAWCD has advanced $110 million. Funds shall be considered appropriated by Congress for New Waddell Dam if actually spent, contractually obligated, or specifically designated in a Department of the Interior request that has resulted in appropriations legislation or continuing resolution passed by Congress and signed by the President. Funds shall be considered advanced by CAWCD when deposited in the escrow account or subaccount.

b. The CAWCD Board of Directors has formally determined in its sole discretion that, in order to continue to make the payments required of CAWCD by the Plan Six Cost Sharing Agreement, it is required that CAWCD issue or cause to be issued revenue bonds. In making this determination, the CAWCD Board will take into account revenues from Interim Plan sales and Plan sales of Navajo Surplus prior to recapture, effects of any renegotiation of the CAWCD contribution schedule in the Plan Six Cost Sharing Agreement, and the oral and written comments of interested parties delivered to CAWCD at and after a public meeting called for receiving such comments. The CAWCD Board will also take into account a reasonable reserve level and not more than the $17 million currently forecast for underground storage and recovery projects. Such dollar limit is not intended to limit the CAWCD Board from considering additional expenditures for such projects from other revenue sources.

Be it further resolved, That, in the event that CAWCD fails to advance at least $110 million of the $175 million required by the Plan Six Cost Sharing Agreement by the end of the schedule defined therein, or any extension thereof under the current terms of that Agreement, or any extension thereof hereafter negotiated, or Congress and CAWCD fail to appropriate and advance funds collectively equivalent to seventy-two percent (72%) or more of the current estimated construction costs of $452.6 million for New Waddell Dam, then CAWCD agrees that its amount of recapturable Hoover Schedule B Capacity and Energy shall be reduced in each Operating Year thereafter to an amount determined by multiplying (1) the total amount of Hoover Schedule B Capacity and Energy available to the Authority in that Operating Year under the Authority's contract with Western for electric service by (2) a fraction in which the numerator is the amount of total funds of the $175 million, exclusive of interest penalties and additional contributions, actually advanced by CAWCD and withdrawn by the United States, and the denominator is $175 million. The resulting reduced amount of recapturable Hoover Schedule B Capacity and Energy is hereinafter referred to as the "Reduced Recapturable Amount." In the event of such failure after recapture has been completed or partially completed, CAWCD shall, within 30 days, tender in each Operating Year thereafter a relinquishment to the Authority of such amounts of Hoover Schedule B Capacity and Energy as are being delivered and are determined by the above formula to be in excess of the Reduced Recapturable Amount. Each such relinquishment shall take effect and remain in effect when and so long as (1) CAWCD is relieved of its financial obligations to the Authority with respect to such relinquished Hoover Schedule B Capacity and Energy as provided in CAWCD's Hoover Power Sales Contract with the Authority, dated as of September 15, 1988 (including any amendments thereof), or (2) CAWCD is satisfactorily indemnified against such financial obligations. It is the intent of this Resolution that the "Eligible Entities," as defined in CAWCD's Hoover Power Sales Contract with the Authority, shall receive such amounts of Hoover Schedule B Capacity and Energy pursuant to section 30 of CAWCD's Hoover Power Sales Contract with the Authority as to total 14.04 percent (14.04%) of the Hoover Schedule B Capacity and Energy available to CAWCD under this Resolution and CAWCD's Hoover Power Sales Contract with the Authority.

I, the undersigned, as Secretary of the Central Arizona Water Conservation District, hereby certify that the foregoing is a true and correct copy of the resolutions duly adopted by the Board of Directors of the Central Arizona Water Conservation District at a meeting thereof, duly called and held on August 6, 1987, at which a quorum was present and acting throughout. I further certify that said resolutions have not been modified or revoked since their adoption and are still in full force and effect.

Signed this 8th day of August, 1987.

Marilyn H. Ronstadt,

Secretary.

[FR Doc. 87-29074 Filed 12-18-87; 8:45 am]

BILLING CODE 4310-09-M

DEPARTMENT OF JUSTICE

[AAG/A Order No. 7-87]

Privacy Act of 1974; Notice of New System

Pursuant to the provisions of the Privacy Act of 1974 (5 U.S.C. 552a), notice is given that the Department of Justice, Special Counsel for Immigration-Related, Unfair Employment Practices (OSC), proposes to establish a new system of records entitled, "Central Index File and Associated Records, JUSTICE/OCS-001." This system is established to maintain investigatory and law enforcement records concerning charges filed with the OSC by or on behalf of persons alleging immigration-related employment discrimination. The system will also include charges filed with other law enforcement entities that have been referred to OSC pursuant to section 102 of the Immigration Reform Control Act of 1986 (8 U.S.C. 1324b) to provide relief for injured persons and to enforce the prohibition of immigration-related, unfair employment practices.

In the Proposed Rules Section of today's **Federal Register**, OSC also proposes to exempt portions of the system from subsection (c)(3) and (d) of the Privacy Act pursuant to 5 U.S.C. 552a(k)(2). The exemption is needed to protect ongoing investigations, as well as the privacy of third parties and the identities of confidential sources involved in such investigations.

Title 5 U.S.C. 552a(e) (4) and (11) provide that the public be provided a 30-day period in which to comment on the routine uses of a new system; the Office of Management and Budget (OMB), which has oversight responsibilities under the Act, requires that it be given a 60-day period in which to review the system. However, the Department has requested a waiver of the 60-day requirement.

Therefore, please submit any comments by January 20, 1988. The public, OMB and Congress are invited to send written comments to J. Michael Clark, Assistant Director, General Services Staff, Justice Management Division, Department of Justice, Room 6402, 601 D Street NW., Washington, DC 20530.

In accordance with Privacy Act requirements, the Department of Justice has provided a report on the proposed system to the Director, OMB, the President of the Senate, and the Speaker of the House of Representatives.

December 7, 1987.

Harry H. Flickinger,

Assistant Attorney General for Administration.

JUSTICE/OSC-001

SYSTEM NAME:

Central Index File and Associated Records, JUSTICE/OSC-001.

SYSTEM LOCATION:

U.S. Department of Justice, Special Counsel for Immigration-Related, Unfair Employment Practices (OSC), 1100 Connecticut Avenue, NW., Washington, DC 20036 and Federal Records Center, Suitland, Maryland 20409.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

These persons may include: Subjects of investigations, victims, potential witnesses and representatives on behalf of individuals and other correspondents on subjects directed or referred to OSC in potential or actual cases and matters of concern to OSC.

CATEGORIES OF RECORDS IN THE SYSTEM:

The system consists of (1) alphabetical indices bearing names of the individuals identified above and (2) the associated record to which the indices relate containing the general and particular records of all OSC correspondence, cases, matters, and memoranda, including but not limited to investigative reports, correspondence to and from OSC, internal memoranda, legal papers, evidentiary materials and exhibits.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

44 U.S.C. 3101; 8 U.S.C. 1324b; and 29 CFR Part 44.

PURPOSE OF THE SYSTEM:

This system has been established to maintain investigatory and law enforcement records concerning charges filed with OSC by or on behalf of individuals alleging immigration-related employment discrimination. The system also contains charges filed with other law enforcement entities that have been referred to OSC pursuant to section 102 of the Immigration Reform and Control Act of 1986 (8 U.S.C. 1324b) to provide

VOL 52 ISS 244 DEC 21 1987 UMI

relief for injured parties and to enforce prohibition of immigration-related, unfair employment practices.

Employees and officials of the Department may access the system to make decisions in the course of investigations and legal proceedings; to assist in preparing responses to correspondence from persons outside the Department; to prepare budget requests and various reports on the work product of OSC; and to carry out any other authorized internal duties.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

(1) A record relating to a possible or potential violation of law may be disseminated to the appropriate Federal, State or local agency charged with the responsibility to enforce or implement such law; (2) in the course of an investigation or litigation of a case or matter, a record may be disseminated to a Federal, State or local agency, or to an individual or organization, if there is reason to believe that such agency, individual or organization possesses information or has the expertise in an official or technical capacity to analyze information relating to the investigation, trail or hearing and the dissemination is reasonably necessary to elicit such information or expert analysis or to obtain the cooperation of a prospective witness or informant; (3) a record relating to a case or matter, or any facts derived therefrom, may be disseminated in a proceeding before a court or adjudicative body before which OSC is authorized to appear, when the United States, or any agency or subdivision thereof, is a part of litigation or has an interest in litigation and such records are determined by OSC to be arguably relevant to the litigation; (4) a record relating to a case or matter may be disseminated to an actual or potential party of litigation or the party's attorney (a) to negotiate or discuss such matters as settlement of the case or matter or (b) to conduct a formal or informal discovery proceeding; (5) a record relating to a case or matter that has been referred to OSC for investigation may be disseminated by OSC to referring agencies to notify such agency of the status of the case or matter or of any determination that has been made; (6) a record may be disseminated to the United States Commission on Civil Rights in response to its request and pursuant to 42 U.S.C. 1975d; (7) a record may be disseminated to volunteer student workers and students working under a work-study program as is necessary to enable them to perform their assigned duties; (8) information permitted to be released to the news media and the public pursuant to 28 CFR 50.2 may be made available unless it is determined that release of the specific information in the context of a particular case could reasonably be expected to constitute an unwarranted invasion of personal privacy; (9) information in the system may be disclosed as is necessary to respond to inquiries by Members of Congress on behalf of individual constituents that are subjects of OSC records; and (10) records may be disclosed to the National Archives and Records Administration and to the General Services Administration in records management inspections conducted under the authority of 44 U.S.C. 2904 and 2906.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING AND DISPOSING OF RECORDS IN THE SYSTEM: STORAGE:

Information in this system is stored on index cards, in file jackets, and on computer disks or tapes.

RETRIEVABILITY:

Entries are arranged alphabetically and are retrieved from the computer by names of the individuals covered by this system of records. Information may also be retrieved from file jackets by an assigned number appearing in the manual index.

SAFEGUARDS:

Information in manual and computer form is safeguarded and protected in accordance with applicable Department security regulations for systems of records. Only those employees with the need to know in order to perform their duties will be able to access the information. Access to records in the computer system is restricted through use of password encryption; access to both the manual and computer system is restricted by locks on storage facilities.

RETENTION AND DISPOSAL:

Records are maintained in the system while current and required for official Government use. When no longer needed on an active basis, the paper files are transferred to the Federal Records Center, Suitland, Maryland, and some records are transferred to computer tape and stored in accordance with Departmental security regulations for systems of records. A request for Records Disposition Authority is pending approval of the National Archives and Records Administration.

SYSTEM MANAGER(S) AND ADDRESS:

Special Counsel for Immigration-Related, Unfair Employment Practices, U.S. Department of Justice, Post Office Box 65490, NW, Washington, DC 20035.

NOTIFICATION PROCEDURE:

Address inquiries to the System Manager listed above.

RECORDS ACCESS PROCEDURES:

Part of this system is exempted from this requirement under 5 U.S.C. 552a(k)(2). To the extent that this system of records is not subject to exemption, it is subject to access and contest. A determination as to exemption shall be made at the time a request for access is received. A request for access shall be made in writing, with the envelope and letter clearly marked "Privacy Access Request." Include in the request the full name of the individual, his or her current address, date and place of birth, notarized signature (28 CFR 16.41(b)), the subject of the case or matter as described under "categories of records in the system," and any other information which is known and may be of assistance in locating the records, such as the name of the immigration-related employment discrimination case or matter involved, where and when the discrimination occurred, and the name of the judicial district involved. The requester will also provide a return address for transmitting the information. Access requests should be directed to the System Manager listed above.

CONTESTING RECORDS PROCEDURES:

Individuals desiring to contest or amend information should direct their request to the System Manager listed above, stating clearly and concisely what information is being contested, the reasons for contesting it, and the proposed amendment to the information.

RECORDS SOURCE CATEGORIES:

Sources of information contained in this system include the individual covered by the system and may include any agency or person who has provided (or has offered to provide) information related to the law enforcement responsibilities of OSC.

SYSTEMS EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

The Attorney General has exempted parts of this system from subsections (c)(3) and (d) of the Privacy Act pursuant to 5 U.S.C. 552a(k)(2). Rules have been promulgated in accordance with the requirements of 5 U.S.C. 553(b), (c) and (e) and have been published in the **Federal Register.**

[FR Doc. 87-2913 Filed 12-18-87; 8:45 am]
BILLING CODE 4410-01-M

[AAG/A Order No. 9-87]

Privacy Act of 1974; Notice of New System

Pursuant to the provisions of the Privacy Act of 1974 (5 U.S.C. 552a), notice is given that the Department of Justice, Special Counsel for Immigration-Related, Unfair Employment Practices (OSC), proposes to establish a new system of records entitled, "Correspondence Relating to Immigration-Related, Unfair Employment Practices from Persons Outside the Department of Justice, JUSTICE/OSC-002." The purpose of this system is to maintain records of correspondence pertaining to immigration-related employment discrimination from persons outside the Department and copies of OSC responses to the correspondence.

Title 5 U.S.C. 552a(e)(4) and (11) provide that the public be provided a 30-day period in which to comment on the routine uses of a new system; the Office of Management and Budget (OMB), which has oversight responsibilities under the Act, requires that it be given a 60-day period in which to review the system. However, the Department has requested a waiver of the 60-day requirement.

Therefore, please submit any comments by January 20, 1988. The public, OMB and Congress are invited to send written comments to J. Michael Clark, Assistant Director, General Services Staff, Justice Management Division, Department of Justice, Room 6402, 601 D Street NW., Washington, DC 20530.

In accordance with Privacy Act requirements, the Department of Justice has provided a report on the proposed system to the Director, OMB, the President of the Senate, and the Speaker of the House of Representatives.

Dated: December 7, 1987.

Harry H. Flickinger,

Assistant Attorney General for Administration.

JUSTICE/OSC-002

SYSTEM NAME:

Files on Correspondence Relating to Immigration-Related, Unfair Employment Practices from Persons Outside the Department of Justice, JUSTICE/OSC-002.

SYSTEM LOCATION:

U.S. Department of Justice, Special Counsel for Immigration-Related, Unfair Employment Practices (OSC), 1100 Connecticut Avenue, NW., Washington, D.C. 20536 and Federal Records Center, Suitland, Maryland 20409.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Individuals who communicate in writing, in person or by telephone, who are filing complaints, requests for information or action; or individuals who are providing expressions of opinion regarding immigration-related, unfair employment matters.

CATEGORIES OF RECORDS IN THE SYSTEM:

The system contains original correspondence regarding immigration-related, unfair employment matters and responses thereto. The system may also contain cover letters or notes to Department attorneys or other employees from Department personnel referring or commenting on correspondence.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

44 U.S.C. 3101; 8 U.S.C. 1324b; and 28 CFR Part 44.

PURPOSE OF THE SYSTEM:

The purpose of this system is to maintain records of correspondence pertaining to immigration-related employment discrimination from persons outside the Department and copies of the OSC responses to the correspondence.

Employees and officials of the Department may access the system to ensure proper disposition of incoming mail; to determine the status and content of responses to correspondence; to respond to inquiries from OSC personnel, Office of Legislative Affairs, and from Congressional offices regarding the status of correspondence; to prepare budget requests and various reports on the work product of OSC; and to carry out any other authorized internal duties.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

(1) A record relating to a case or matter, or any facts derived therefrom, may be disseminated in a proceeding before a court or adjudicative body before which OSC is authorized to appear, when the United States, or any agency or subdivision thereof, is a part of litigation or has an interest in litigation and such records are determined by OSC to be arguably relevant to the litigation; (2) a record relating to a case or matter may be disseminated to an actual or potential party of litigation or the party's attorney (a) to negotiate or discuss such matters as settlement of the case or matter or (b) to conduct a formal or informal discovery proceeding; (3) a record may be disseminated to volunteer student workers and students working under a work-study program as is necessary to enable them to perform their assigned duties; (4) information permitted to be released to the news media and the public pursuant to 28 CFR 50.2 may be made available unless it is determined that release of the specific information in the context of a particular case would constitute an unwarranted invasion of personal privacy; (5) information may be disclosed as is necessary to respond to inquiries by Members of Congress on behalf of individual constituents that are subjects of OSC records; and (6) records may be disclosed to the National Archives and Records Administration and to the General Services Administration in records management inspections conducted under the authority of 44 U.S.C. 2904 and 2906.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Information in the system is stored on index cards, in file jackets, and on computer disks or tapes.

RETRIEVABILITY:

Entries are arranged alphabetically and are retrieved from the computer by names of the individuals covered by this system of records. Information may also be retrieved from file jackets by an assigned number appearing in the manual index.

SAFEGUARDS:

Information in manual and computer form is safeguarded and protected in accordance with applicable Department security regulations for systems of records. Only those employees with the need to know in order to perform their duties will be able to access the information. Access to the records in the computer system is restricted by use of password encryption; access to records in both the manual and computer system is restricted by locks on storage facilities.

RETENTION AND DISPOSAL:

Citizen correspondence unrelated to matters within the jurisdiction of OSC is destroyed after appropriate disposition and within ninety days from the date of the correspondence. All other records are disposed of in accordance with General Records Schedule 14, items 3, 4, and 7.

SYSTEM MANAGER(S) AND ADDRESS:

Special Counsel for Immigration-Related, Unfair Employment Practices, U.S. Department of Justice, Post Office Box 65490, NW., Washington, DC 20035.

NOTIFICATION PROCEDURE:

Same as above.

RECORDS ACCESS PROCEDURES:

Direct the request to the system manager listed above. Clearly mark the envelope and letter "Privacy Access Request;" provide the full name and notarized signature of the individual who is the subject of the record, his/her date and place of birth, or any other identifying number or information which may assist in locating the record; and a return address.

CONTESTING RECORDS PROCEDURES:

Individuals desiring to contest or amend information should direct their request to the System Manager listed above, stating clearly and concisely what information is being contested, the reasons for contesting it, and the proposed amendment to the information.

RECORDS SOURCE CATEGORIES:

Sources of information contained in this system are the original correspondents, persons acting on behalf of original correspondents, and employees and officials of the Department responsible for the disposition of the correspondence.

SYSTEMS EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

None.

[FR Doc. 87-29130 Filed 12-16-87; 8:45 am]

BILLING CODE 4410-01-M

DEPARTMENT OF LABOR

Employment and Training Administration

Job Training Partnership Act; Annual Status Report for Titles II-A and III Programs

AGENCY: Employment and Training Administration, Labor.

ACTION: Proposed revisions to the Annual Status Report; request for comments.

SUMMARY: The Department of Labor is requesting comments on proposed changes to the Job Training Partnership Act Annual Status Report for Titles II-A and III programs. The proposed revisions extend and update the reporting system in order to provide data for improved adjustments to the new youth employability enhancement and postprogram performance standards introduced in Program Year 1988, to more adequately identify more difficult-to-serve portions of the JTPA population, and to collect information on SDA-level funding availability.

DATE: Comments must be submitted on or before January 15, 1988.

ADDRESS: Comments should be addressed to the Assistant Secretary of Labor for Employment and Training, U.S. Department of Labor, 200 Constitution Avenue NW., Washington, DC 20210. Attention: Karen Greene. Comments should also be sent to the OMB reviewer, James Mason: Telephone: (202) 395-6880; Office of Information and Regulatory Affairs, Office of Management and Budget, Room 3208, Washington, DC 20503.

FOR FURTHER INFORMATION CONTACT: Karen Greene. Telephone (202) 535-0687.

SUPPLEMENTARY INFORMATION: The Department of Labor is proposing changes in the JTPA Annual Status Report (JASR). The proposed revisions have been forwarded to the Office of Management and Budget for review pursuant to the provisions of the Paperwork Reduction Act. The Department is also publishing the proposed revisions in the Federal Register in order to obtain broad comment on the Department's intended reporting requirements for Program Year 1988. Upon completion of the OMB review, the Department will notify the JTPA system of any resulting changes or adjustments.

A. Authority and Purpose of the JTPA Annual Reporting Requirements

Reporting instructions are necessary to comply with the Job Training Partnership Act's (JTPA's) provisions regarding the Secretary's responsibilities and authority for setting performance standards and for recordkeeping and reporting as indicated below.

- Section 106—*Performance Standards.* This section directs the Secretary to prescribe standards for adult and youth programs under Title II-A and dislocated worker programs under Title III. To set performance standards, the Secretary must have data on performance. In addition, this section directs the Secretary to establish parameters within which governors may vary standards for service delivery areas (SDAs) based on local economic factors, the characteristics of the population to be served and the types of services provided. The Departmental adjustment approach, that satisfies these parameter criteria, requires data collection on those factors that have a significant effect on performance and vary sufficiently across SDAs to warrant an adjustment to standards.
- Section 165—*Reports, Recordkeeping, and Investigations.* This section requires federal grant recipients to maintain records and report information regarding program performance as specified by the Secretary. This section also requires reporting of expenditures at a level adequate to ensure statutory compliance.
- Section 160—*Administrataive Provisions.* The Secretary is directed at (d) (1) to submit an annual report to the Congress summarizing th achievements of the program. Such a report will include data on program performance.

These proposed revisions are intended to extend and update the reporting system. The justification for having reporting at the service delivery area (SDA) level has not changed since the initial establishment of the reporting requirements, namely:

- Date on program performance, participant characteristics and local economic conditions must be available at the SDA level to set standards.
- Federal reporting is the most cost effective method for collecting program performance and participant characteristics. In addition, such a system ensures the consistency of the data across SDAs.
- Without SDA-level data, objective and defensible local standards cannot be set, because the effects on performance of varying local conditions cannot be systematically predicted.

B. Reasons for the Revisions

These revisions are being proposed for several reasons:

- Whether JTPA programs are serving the more difficult-to-serve has been the subject of increasing concern. Identifying more adequately those participants with the most severe barriers to employment and adjusting the performance standards for varying levels of service to these groups will address this concern.
- Attainment of youth employment competencies is an integral part of the employability enhancement outcome. Yet, unlike other program outcomes, competency attainments are locally defined, lack comparability across SDAs and are subject to much systemwide criticism. Two changes are proposed that maintain local flexibility in prescribing specific competencies, while responding to the lack of reporting consistency: (1) Increase the number of skill areas required for reporting a competency attainment to two out of the three skill areas. This ensures that every youth counted as a competency attainment has received either basic education or job specific skills training. (2) Establish minimum criteria for reporting competency attainment in pre-employment/work maturity—the skill area subject to the most variability. (3) For clarification the seven components of a "sufficiently developed" youth employment competency system are delineated.
- Program costs and competency attainments differ widely depending on whether youth are enrolled in pre-employment/work maturity, basic skills and/or job specific skill programs. Reporting of attainments by individual skill areas will enable the Department to improve its adjustment models by accounting for differences in youth employment competency strategies.
- Whether SDAs are underexpending JTPA funds, particularly in youth programs, is an issue of statutory compliance and programmatic concern. More precise reporting of net funds available to SDAs will yield improved information on SDA-level expenditure rates.

C. Proposed Changes

The Department is proposing the following additions to the JTPA Annual Status Report:

Performance Outcomes

- Youth Placed Who Also Attained A Youth Employability Enhancement.

A subset of entered employment needed to calculate the proposed youth performance measure—the rate of employability enhancements.

- Completed Program Objectives (14–15 year olds).

A subset of employability enhancement added to document those youth who attain positive outcomes in specialized early intervention programs.

Barriers to Employment

- Minimal Work History (no job over 3 months for the same employer in last 5 years).
- Reading Skills Below the 7th Grade Level.
- Long-Term AFDC Recipient (24 or more months).

These three elements identify those harder-to-serve in the JTPA population. Research supports that serving participants with long welfare histories, little or no work experience and deficits in basic skills significantly lowers employment and average wage while raising costs.

Program Expenditures

- Total Available Federal Funds.
- Incentive Grants (Title II-A only).

Will provide the only source of sub-State allocation information necessary to analyze expenditure levels and how incentives may influence under-expenditure problems.

Youth Competency Attainment

- Attained Any Competency Area.
- Pre-Employment/Work Maturity Skills.
- Basic Education Skills
- Job Specific Skills

Will be used to develop adjustments to youth standards that account for differences in local youth employment competency programs.

The Department is proposing the following clarifications and redefinitions:

- Attained PIC-Recognized Youth Competency.

Redefined as total number of youth at termination who have demonstrated proficiency in at least two skill areas in which the terminee was deficient at enrollment.

- Follow-up earnings question.

Earnings question is split into two questions on "hours worked and hourly pay". Resulting information will be more accurate than simply inquiring about "earnings".

- Appendix B: Youth Employment Competencies.

The seven elements of a "sufficiently developed" youth employment competency system are moe fully described enabling States to monitor their local youth competency programs for procedural comparability when reporting attainments. Minimum requirements for the reporting of attainments in the pre-employment/work maturity skill area are also proposed to ensure more substantive consistency in a skill area subject to great variation within and among States.

Some changes are recommended which have no policy implications, but reduce the number of elements on the form. For example, the following three subsets of youth employability enhancements are combined into one outcome:

- Entered Non-Title II Training.
- Returned to Full-Time School.
- Completed Major Level of Education.

The method of data collection and reporting will not be changed as a result of these revisions. The data collected from these reports (1) enable the Secretary to establish performance standards at the national level, (2) allow Governors to adjust standards for SDAs and (3) provide Governors with a basis for measuring performance against the standards.

Most of the additional reporting items and redefinitions directly relate to the Department's focus on increasing service to those youth who are at risk of chronic unemployment. The proposed new youth measure allows SDAs to receive credit for statutorily mandated youth outcomes that were previously understated in the performance management system. The definitional change in the reporting of attained youth competencies not only ensures greater consistency in reporting SDA employability enhancement performance, but also addresses systemwide concern about the varying quality of youth competency training. Knowledge of reading deficiencies should lead to an increase in the provision of basic educational services as part of the current training programs. Tracking of attained competencies by individual skill areas will provide critical programmatic information that will improve furure modeling adjustments.

The remaining proposed reporting additions are participant characteristics that identify those facing serious barriers to employment. Without nationwide data, the Department is unable to document the extent to which JTPA is serving those most in need of employment and training assistance. More importantly, the optional adjustment model used by most States to set SDA performance standards cannot adequately account for the severity of client needs or the difficulty in providing service to severely disadvantaged participants. Without holding SDAs harmless for serving the most disadvantaged, there are strong incentives for programs to serve the most employable in order to exceed their standards.

D. Public Comment

In the development of these proposed revisions, meetings were held between June and October to obtain feedback from individuals from all sectors of the JTPA system regarding actual field experiences. In all, over 60 State and local policy makers, administrators, technicians and service providers, and other interested individuals participated in the various discussions held on the proposed revisions. This request for comment is another important part of that process.

The Secretary especially requests comments on whether data on additional barriers to employment (minimal work history, reading skills below the 7th grade level, and long-term AFDC recipient should be collected on every participant as part of the Federal data system.

E. Cost to the System

The changes included in this request are not expected to increase the reporting burden for SDAs, since most of

VOL 52 ISS 244 DEC 21 1987 UMI

the information is either already being collected at the local level or involves self-reporting by the participants at program entry. The possible exception is the collection of participant reading level skills below the 7th grade. The collection of participant reading skill level may involve procedures which SDAs are not currently undertaking. An estimated 25% of all JTPA participants are already being assessed for reading, either through enrollment in a classroom training program, in Title II–B where assessment for reading and math is required, or in those SDAs that require universal assessment. Programs serving students and some post high school attendees may use school records. Therefore, many participants are not expected to require assessment or contribute to additional data collection costs. Although costs of assessment may vary, using an average cost of $2.00 per test for the remaining 55% of JTPA enrollees or approximately $430,000 participants, results in an additional cost of $860,000 nationally.

F. OMB Submission

The document appended to this notice has been submitted to OMB for review under the Paperwork Reduction Act as a revision to a currently approved information collection system.

Signed at Washington, DC, this 16th day of December 1987.

Roberts T. Jones,

Acting Assistant Secretary for Employment and Training.

Appendix—JTPA Annual Status Report (JASR)

1. Purpose

The JTPA Annual Status Report (JASR) displays cumulative data on participation, termination, performance measures and the socio-economic characteristics of all terminees on an annual basis. The information will be used to determine levels of program service and performance measures. Selected information will be aggregated to provide quantitative program accomplishments on a local, State, and national basis.

2. General Instructions

The Governor will submit: (1) A combined Statewide JASR for Title II Formula and National Reserve (Column D only) and (2) for Title II–A (Columns A–C) a separate JASR for *each* designated Service Delivery Area (SDA). (A Statewide summary of these SDA data need not be submitted.) Grantees may determine whether the reports are submitted on JASR forms or as a computer printout, with data, including signature and title, date signed and telephone number, arrayed as indicated on the JASR form. If revisions are made to the JASR data after the reporting deadline, revised copies of the JASR should be submitted to DOL as soon as possible according to the required reporting procedures.

Note.—For JASR reporting purposes, Title II–A shall refer to programs operated with funds authorized under section 202(a) of the Act or otherwise distributed by the Governor under section 202(b)(3) (six percent) of the Act—incentive grants for service to the hard-to-serve and programs exceeding performance standards. Do not include data on (six percent) funds authorized under section 202(b)(3) for technical assistance. Participants and expenditures under Title I, section 123 (8%) and 124 (3%), and expenditures under Title II, section 202(b)(4) (five percent) and any participants, if applicable, are likewise excluded from the JASR.

Note.—Participant and expenditure information under Title II–B, Summer Youth Employment and Training Program (SYETP), is also excluded from the JASR.

SDAs should not terminate from Title II–A *youths* who participate in the Title II–B Summer Program unless they are not expected to return to Title II–A for further employment, training and services.

If these youths receive concurrent employment, training and/or services under both Titles II–A and II–B, they are to be considered participants in both titles for purposes of recording actual number of weeks participated, dollars expended, and other pertinent data.

If, however, these youths do not receive Title II–A employment, training and/or services while participating in Title II–B, this period is *not* to be included in the calculation of actual number of weeks participated in Title II–A at Line 30, Column C.

The reporting period begins on the starting data of each JTPA program year, as stated in section 161 of the Act. Reports are due in the national and regional offices no later than 45 days after the end of each program year. Two copies of the JASR are to be provided to: Employment and Training Administration, U.S. Department of Labor, ATTN: TSVR—Rm. S–5306, 200 Constitution Avenue NW., Washington, DC 20210.

At the same time an additional copy of the JASR it is to be provided to the appropriate Regional Administrator for Employment and Training in the DOL regional office that includes the State in which the JTPA recipient is located.

3. Facsimile of Form.

See the following page.

4. Instructions for Completing the JTPA Annual Status Report (JASR)

a. *State/SDA Name, Number and Address.* Enter the name and address of the State agency that will administer the grant recipient's program (Title III report). Enter the name, *ETA assigned SDA number* and address of the designated SDA subrecipient, as appropriate (Title II–A report).

b. *Report Period.* Enter in "From" the beginning date of the designated JTPA program year and enter in "To" the ending date of that program year.

c. *Signature and Title* (at bottom of the page). The authorized official signs here and enters his/her title.

d. *date Signed.* Enter the date the report was signed by the authorized official.

e. *Telephone Number.* Enter the area code and telephone number of the authorized official.

5. General Information

For purposes of the JASR, the Total Adults and Adults (Welfare) columns will include terminees age 22 years and older. Thus, the column breakouts are based strictly on age rather than on program strategy. The youth column will include terminees who were age 14–21 at the time of elgibility determination. The Dislocated Workers column may include adults and youth, as applicable.

Unless otherwise indicated, data reported on characteristics of terminees should be based on information collected at the time of eligibility determination.

Characteristics Information Obtained on an Individual at the Time of Elibibility Determination for the Recipient's JTPA Program Should Not be Updated When the Individual Terminates From the JTPA Program.

Column Headings

Column A *Total Adults*

This column will contain an entry for each appropriate item for *all* adult participants in Title II–A only.

Column B *Adults (Welfare)*

This column will contain an entry for each appropriate item for adult participants in Title II–A who were welfare recipients or whose family received cash payments under AFDC (SSA Title IV), General Assistance (State or local government), or the Refugee Assistance Act of 1980 (PL 96–212) at the time of JTPA eligibility determination. For reporting and performance standards purposes, exclude those individuals who receive only SSI (SSA Title XVI) from entries in Column B.

Note.—Column B is a sub-breakout of Column A; therefore, Column B should be less than or equal to Column A for each line entry.

Column C *Youth*

This column will contain an entry for each appropriate item for all participants, aged 12–21, in Title II–A only.

Column D *Dislocated Workers*

This column will contain an entry for each appropriate item for *all* participants in Title III who were determined to be eligible dislocated workers.

Note.—Columns A, B, and C apply to Title II–A only. Column D applies to Title III only. All information regarding a given participant must be entered in the same column, e.g., Column C for a youth in Title II–A.

The sum of the entries (all SDAs in a State) in Columns A and C, Item I.A., Total Participants, of the JASR should equal the entry in Column A, Item III.A.1., Total Participants, of the JSSR, for the same recipient, that includes the final quarter of the same program year. The entry in Column D, Item I.A. of the Statewide JASR for Title III should be the sum of the entries in Columns B and C, Item III.A. of the JSSR, for the same recipient, that includes the final quarter of the same program year for the same grant.

The sum of the entries (all SDAs in a State) in Column A and C, Item I.B., Total Terminations, of the JASR should equal the entry in Column A, Item III.B.1., Total Terminations, of the JSSR, for the same recipient, that includes the final quarter of the same program year. The entry in Column D, Item I.B. of the statewide JASR for Title III should be the sum of the entries in Columns B and C, Item III.B. of the JSSR, for the same recipient, that includes the final quarter of the same program year for the same grant.

Section I—Participation and Termination Summary

Section I displays the program's accomplishments in terms of the total cumulative number of participants in the program and the number and types of terminations from the program, as of the end of the reporting period.

Entries for Items I.A. and I.B. are cumulative from the beginning of the program year through the end of the reporting period.

Item I.A.—Total Participants

Enter by column the total number of participants who are or were receiving employment, training or services (except post-termination services) funded under that program title through the end of the reporting period, including both those on board at the beginning of the designated program year and those who have entered during the program year. If individuals receive concurrent employment, training and/or services under more than one title, they are to be considered participants in both titles for purposes of recording actual number of weeks participated, dollars expended, and other pertinent data.

"Participant" means any individual who has: (1) Been determined eligible for participation upon intake; and (2) started receiving employment, training, or servcies (except post-termination services) funded under the Act, following intake. Individuals who receive *only* outreach and/or intake and initial assessment services or postprogram follow-up are excluded.

Participants who have transferred from one title to another, or between programs of the same title, should be recorded as terminations from the title or program of initial participation and included as participants in the title or program into which they have transferred.

Item I.B.—Total Terminations

Enter by column the total number of participants terminated after receiving employment, training, or services (except post-termination services) funded under that program title, for any reason, from the beginning of the program year through the end of the reporting period. This item is the sum of Items I.B.1. through I.B.3.

"Termination" means the separation of a participant from a given title of the Act who is no longer receiving employment, training, or services (except post-termination services) funded under that title.

Note.—Individuals may continue to be considered as participants for a single period of 90 days after last receipt of employment and/or training funded under a given title. During the 90-day period, individuals may or may not have received services. For purposes of calculating average weeks participated, this period between "last receipt of employment and/or training funded under a given title" and actual date of termination is defined as "inactive status" and is not to be included in Line 30.

Item I.B.1.—Entered Unsubsidized Employment

Enter by column the total number of participants who, at termination, entered full- or part-time unsubsidized employment through the end of the reporting period. Unsubsidized employment means employment not financed from funds provided under the Act and includes, for JTPA reporting purposes, entry into the Armed Forces, entry into employment in a registered apprenticeship program, and terminees who became self-employed.

Item I.B.1.a.—Also Attained Any Youth Employability Enhancement

Enter the total number of youth who (1) entered unsubsidized employment, Item I.B.1., and (2) *also* attained any one of the five youth employability enhancements (as defined in Item I.B.2. below). *This item is a sub-breakout of Item I.B.1.*

Item I.B.2.—Youth Employability Enhancement Terminations

Enter the total number of youth who were terminated under one of the Youth Employability Enhancements through the end of the report period. "Youth Employability Enhancement" means an outcome for youth, other than entered unsubsidized employment, which is recognized as enhancing long-term employability and contributing to the potential for a long-term increase in earnings and employment. Outcomes which meet this requirement shall be restricted to the following: (1) Attained PIC-Recognized Youth Employment Competencies (two or more); (2) Entered Non-Title II Training; (3) Returned to Full-Time School; (4) Completed Major Level of Education; or (5) Completed Program Objectives (14–15 year olds).

Note.—For reporting purposes, *a youth shall not be counted in this item, if s/he entered unsubsidized employment,* and shall be counted in only *one* of these categories, even though more than one outcome may have been achieved.

Item I.B.2.a.—Attained PIC-Recognized Youth Employment Competencies

Enter the total number of youth who, at termination, have demonstrated proficiency as defined by the PIC in two or more of the following three skill areas in which the terminee was deficient at enrollment: pre-employment/work maturity, basic education, or job-specific skills. Competency gains must be achieved through program participation and be tracked through sufficiently developed systems that must include: quantifiable learning objectives, related curricula/training modules, pre- and post-assessment, employability planning, documentation, and certification. This item is a sub-breakout of Item I.B.2.

Note.—Termination of participants who received basic education skills and/or job specific skills training funded under 8% programs may be counted under this item as long as they were first enrolled in a youth employment competency system operated under 78% funds.

Appendix B defines the minimal structural and procedural elements of a

sufficiently developed youth employment competency system as well as the minimal requirements for ensuring consistency in the reporting of competency attainment in the pre-employment/work maturity skill area.

Item I.B.2.b.—Completed Program Objectives (14–15 year olds)

Enter the total number of youth (ages 14 and 15 only) who, at termination, had completed a program objective. This item is a sub-breakout of Item I.B.2.

Note.—For Column C, (1) Item I.B.2.b. cannot be greater than Item II.3., (2) the sum of Items I.B.2.a. and I.B.2.b. cannot be greater than Item I.B.2. and (3) Item I.B.1. plus Item I.B.2. plus Item I.B.3. must equal Item I.B.

Item I.B.3.—All Other Terminations

Enter by column the total number of participants who were terminated for reasons other than those in Items I.B.1. and I.B.2., successful or otherwise, through the end of the reporting period. *Include intertitle transfers here.*

Section II—Terminee Performance Measures Information

Section II displays performance measures/parameters information. As indicated previously, data reported on characteristics of terminees should be based on information collected at time of eligibility determination unless otherwise indicated.

Governors may develop any participant record which meets the requirements of § 629.35(c) and (d) of the JTPA regulations. The DOL/ETA *Technical Assistance Guide: The JTPA Participant Record,* dated May 1983, may be used as a reference.

Line Item Definitions and Instructions

Sex

Line 1 Male
Line 2 Female

Distribute the terminees by column according to Sex. The sum of Lines 1 and 2 in each column should equal Item I.B. in that column.

Age

Line 3 14–15
Line 4 16–17
Line 5 18–21
Line 6 22–29
Line 7 30–54
Line 8 55 and over

Distribute the terminees by column according to Age. The sum of Lines 3 through 8 in each column should equal Item I.B. in that column.

Education Status

Line 9 School Dropout
Line 10 Student
Line 11 High School Graduate or Equivalent (No Post-High School)
Line 12 Post-High School Attendee

Distribute the terminees by column according to Education Status. The sum of Lines 9 through 12 in each column should equal Item I.B. in that column.

Family Status

Line 13 Single Head of Household with Dependent(s) Under Age 18.

Enter the total number of terminees by column for whom the above Family Status Classification applies.

Race/Ethnic Group

Line 14 White (Not Hispanic)
Line 15 Black (Not Hispanic)
Line 16 Hispanic
Line 17 American Indian or Alaskan Native
Line 18 Asian or Pacific Islander

Distribute the terminees by column according to the Race/Ethnic Groups listed above. For purposes of this report, Hawaiian Natives are to be recorded as "Asian or Pacific Islander". The sum of Lines 14 through 18 in each column should equal Item I.B. in that column.

Other Barriers to Employment

Line 19 Limited English Language Proficiency
Line 20 Handicapped
Line 21 Offender
Line 22 Minimal Work History
Line 23 Reading Skills Below 7th Grade
Line 24 Long-Term AFD Recipient

Enter the total number of terminees by column for whom each of the above Other Barriers to Employment apply.

U.C. Status

Line 25 Unemployment Compensation Claimant

Enter the total number of terminees by column for whom the above Unemployment Compensation Status classification applies.

Labor Force Status

Line 26 Unemployed: 15 or More Weeks of Prior 26 Weeks
Line 27 Not in Labor Force

Enter the total number of terminees by column for whom each of the above Labor Force Status classifications apply.

Welfare Grant Information

Line 28 Welfare Grant Type: AFDC
Line 29 GA/RCA

Distribute by column the total number of adult and youth welfare terminees who, at eligibility determination, were receiving (or whose family was receiving) cash payments under AFDC (SSA Title IV), GA, General Assistance (State or local government) or RCA (Refugee Cash Assistance) of the Refugee Assistance Act of 1980 (PL 96–212). If a welfare recipient terminee (or his/her family) received AFDC cash payments, include such terminee on Line 28. A welfare recipient termineee (or his/her family) who received cash payments under GA and/or RCA, but *not* AFDC, should be included on Line 29. The sum of Lines 28 and 29 in Column B, Adults (Welfare), should equal Item I.B. in that column. The sum of Lines 28 and 29 in Column C, Youth, should be the same as or less than Item I.B. in that column.

Other Program Information

Line 30 Average Weeks Participated

Enter by column the average number of weeks of participation in the program for all terminees. Weeks of participation include the period from the date an individual becomes a participant in a given title through the date of a participant's last receipt of employment and/or training funded under that title. Exclude the period of up to 90 days during which an individual may remain in an inactive status prior to termination. Time in inactive status for all terminees should not be counted toward the actual number of weeks participated. Inactive status is defined as that period between "last receipt of employment and/or training funded under a given title" and actual date of termination. See note at Item I.B.

To calculate this entry: Count the number of days participated for each terminee, including weekends, from his/her date of entry into the program until his/her last receipt of employment and/or training. For those who receive services only, use date of last receipt of such services. Divide this result by 7. This will give the number of weeks participated for that terminee. Sum all the terminees' weeks of participation and divide the result by the number of terminees, as entered (by column) in Item I.B. This entry should be reported to the nearest whole week.

Line 31 Average Hourly Wage at Termination

Enter by column the average hourly wage at termination for the total number of terminees in Item I.B.1.

To calculate this entry: Sum the hourly wage at termination for all the terminees shown in Item I.B.1. Divide the result by the number of terminees shown in Item I.B.1.

Hourly wage includes any bonuses, tips, gratuities and commissions earned.

Line 32 Total Program Costs (Federal Funds)

Enter the total accrued expenditures, through the end of the reporting period, of the funds allocated to SDAs under section 202(a) of the Act or otherwise distributed by the Governor to SDAs under section 202(b)(3)—incentive grants for services to the hard-to-serve and programs exceeding performance standards— for Title II–A programs in Columns A and C (includes costs of services to participants aged 14–21), as appropriate, for *all* participants served. Do not include expenditures on funds authorized under section 202(b)(3) for technical assistance. Exclude expenditures under Title I sections 123 (8%) and 124 (3%) and Title II section 202(b)(4) (5%). Enter the total accrued expenditures of Title III funds received by the Governor under section 301 of the Act in Column D only, for *all* Title III participants served through the end of the reporting period. Include expenditures of Federal funds only, both Formula and Discretionary National Reserve.

Note: Entries will be made to the nearest dollar. The JASR program cost data will be compiled on an accrual basis. If the recipient's accounting records are not normally maintained on an accrual basis, the accrual information should be developed through an analysis of the records on hand or on the basis of best estimates.

The sum of the entries in Columns A and C, Line 32, Total Program Costs, of the JASR (i.e., total for the State's SDAs under Title II–A) should equal the entry in Column A, Item I.A.1., Total Program Expenditures, of the JSSR, and the entry in Column C, Line 32 of the JASR should equal the entry in Column A, Item II. of the JSSR, for the same recipient, that includes the final quarter of the same program year. The entry in Column D, Line 32, of the Statewide JASR for Title III should be the sum of the entries in Columns B and C, Item I.A. of the JSSR, for the same recipient, that includes the final quarter of the same program year for the same grant.

Line 33 Total Available Federal Funds

Enter the total Federal funds available for the Title II–A or Title III program described on this report including (1) unexpended funds carried over from previous program years, (2) funds allocated or awarded for this program year, and (3) any reallocation that *increased or decreased* the amount of funds available for expenditure through the end of this reporting period. Enter *all* Title II–A funds (Adults and Youth) in Column A and all Title III funds in Column D. Title II–A funds include those allocated to the SDA by the Governor under section 202(a) of the Act, as well as incentive grants for services to the hard-to-serve and for programs exceeding performance standards under section 202(b)(3). Exclude funds authorized under section 202(b)(3) (8%) for technical assistance to SDAs and funds received for activities under sections 123 (8%) and 124 (3%) and section 202(b)(4) (5%). Title III funds include *all* formula amounts received under section 301(a) and *all* Discretionary awards received under section 301(b).

Line 34 New Incentive Grants (Title II–A only)

Enter the total amount of *new* incentive grants funds awarded to the SDA during this reporting period for services to the hard-to-serve and for programs exceeding performance standards under section 202(b)(3). Do not include incentive grants funds awarded in previous program years that remained available for expenditure during this program year. *This line is a sub-breakout of Line 33, Total Available Federal Funds.*

Section III—Follow-up Information

Section III displays information based on follow-up data which must be collected through participant contact to determine an individual's labor force status and earnings, if any, during the 13th full calendar week after termination and the number of weeks s/he was employed during the 13-week period. Follow-up data should be collected from participants whose 13th full calendar week after termination ends during the program year (the follow-up group). Thus, follow-up will be conducted for individuals who terminate during the first three quarters of the program year and the last quarter of the previous program year.

Follow-up data will be collected for the following terminees: Title II–A adults, adult welfare recipients, and Title III dislocated workers (Columns A, B, and D). No follow-up information is required for Title II–A youth (Column C).

The procedures used to collect the follow-up data are at the discretion of the Governors. However, in order to ensure consistency of data collection and to guarantee the quality of the follow-up information, follow-up procedures must satisfy certain criteria. (See the Follow-up Guidelines included in these JASR instructions, Appendix A.)

Note. Every precaution must be taken to prevent a "response bias" which could arise because it may be easier to contact participants who were employed at termination than those who were not and because those who entered employment are more likely to be employed at follow-up. Special procedures have been developed by which SDAs and States can monitor response bias. If your response rates for those who were and were not employed at termination differ by more than 5 percentage points, the follow-up entries for the JASR must be calculated using the "Worksheet for Adjusting Follow-up Performance Measures" in the Follow-up Technical Assistance Guide. If the response rates differ by 5 percentage points or less, the following instructions for completing Lines 35–37 may be used.

Line 35 Employment Rate (At Follow-up)

Enter by column the employment rate at follow-up.

Calculate the employment rate by dividing the total number of respondents who were employed (full-time or part-time) during the 13th full calendar week after termination by the total number of respondents (i.e., terminees who completed follow-up interviews). Then multiply the result by 100. This entry should be reported to the nearest one decimal (00.0).

Line 36 Average Weekly Earnings of Employed (At Follow-up)

Enter by column the average weekly earnings of those employed (full-time or part-time) at follow-up.

Calculate the (before-tax) average weekly earnings by multiplying the hourly wage by the number of reported hours for each respondent employed at follow-up; and, if appropriate, add tips, overtime, bonuses, etc. Divide the sum of weekly earnings for all respondents employed during the 13th full calendar week after termination by the number of respondents employed at the time of follow-up. Respondents not employed at follow-up are not included in this average. This entry should be reported to the nearest whole dollar.

Weekly earnings include any wages, bonuses, tips, gratuities, commissions *and* overtime pay earned.

Line 37 Average Number of Weeks Worked in Follow-up Period

Enter by column the average number of weeks worked.

To calculate the average number of weeks worked (full-time or part-time), divide the sum of the number of weeks worked during the 13 full calendar weeks after termination for all respondents who worked, by the *total* number of all respondents, whether or not they worked any time during this 13-week follow-up period. This entry should be reported to the nearest one decimal (00.0).

Line 38 Sample size

Enter by column the size of the actual sample selected to be contacted for follow-up. (For Title III only, a *statewide* sample of dislocated workers must be selected. For Title II–A, i.e., adults and

adult welfare recipients, SDA samples must be selected.)

Note.—If oversampling was used, the sample size should include all those selected, not just the required minimum sample size. Those deceased or severely incapacitated to the point of being unable to respond at follow-up may be excluded from the sample size.

Line 39 Response Rate

Enter by column the overall response rate, i.e., the percentage of complete surveys obtained.

To calculate the overall response rate, divide the number of terminees with complete follow-up information by the total number of terminees included in the follow-up sample (Line 38) and multiply by 100. This entry should be reported to the nearest whole percent.

Note.—Complete follow-Up information consists of substantive answers to the required follow-up questions and may not include "don't know", "no answer" or "don't remember".

Section IV—Youth Employment Competency Attainment Information

Section IV displays information relevant to youth employment competency attainment as defined by the PIC. Regardless of termination type, the following data represent the total cumulative number of individuals that attained a youth employment competency in any of the three skill areas and the numbers of individuals who attained a competency in (1) pre-employment/work maturity, (2) basic education and/or (3) job specific skills.

Note.—Termination of participants who received basic education skills and/or job specific skills training funded under 8% programs may be counted under this item as long as they were initially enrolled in a youth employment competency system operated under 78% funds.

Appendix B defines the minimal structural and procedural elements of a sufficiently developed youth employment competency system as well as the minimal requirements for ensuring consistency in the reporting of competency attainment in the pre-employment/work maturity skill area.

Line 40 Attained Any Competency Area

Enter in Column C the total unduplicated number of youth terminees who were enrolled in a youth employment competency component and who attained a competency in at least one skill area.

Note.—Lines 41–43 are *not* sub-breakouts of Line 40 because one individual may attain several competencies and may be recorded *on more than one of* Lines 41–43. That individual may be recorded only once on Line 40, thus, Lines 41–43 *need not* sum to Line 40.

Line 41 Pre-Employment/Work Maturity Skills

Enter in Column C the number of youth terminees who attained a competency in the pre-employment/work maturity skill area.

Line 42 Basic Education Skills

Enter in Column C the number of youth terminees who attained a competency in the basic education skill area.

Line 43 Job Specific Skills

Enter in Column C the number of youth terminees who attained a competency in the job specific skill area.

Note: An entry of "0" on any of Lines 41–43 may indicate that the PIC has determined that a specific skill area is not necessary to become employment competent in their local labor market.

Appendix A—Follow-up Guidelines

To ensure consistent data collection and as accurate information as possible, procedures used to obtain follow-up information must satisfy the following criteria:

- Participant contact should be conducted by telephone or in person. Mail questionnaires may be used in those cases where an individual does not have a telephone or cannot be reached.
- Participant contact must occur as soon as possible after the 13th full calendar week after termination but no later than the 17th calendar week after termination.
- Data reported are to reflect the individual's labor force status and earnings during the 13th full calendar week after termination and the number of weeks she/he was employed throughout the 13-week period after termination.
- Interview questions developed by DOL (see following Exhibit) must be used to determine the follow-up information reported on the JASR. These questions are also included in the *Follow-up Technical Assistance Guide.*

Respondents must be told that responding is voluntary and that information provided by them will be kept confidential. Other questions may be included in the interview. Attitudinal questions may precede DOL questions, but questions related to employment and earnings must follow.

Exhibit—Minimum Postprogram Data Collection Questions

A. I want to ask you about the week starting on Sunday, _____, and ending on Saturday, _____, which was (last week/two/three/four weeks ago).

1. Did you do any work for pay during that week?

_____ Yes [Go to 2]
_____ No [Go to C]

2. How many hours did you work in that week?

_____ Hours

3. How much did you get paid per hour?

_____ Dollars per hour

4. How much extra, if any, did you earn from tips, overtime, bonuses, commissions, or any work you did on the side, before deductions?

_____ Dollars

B. Now I want to ask you about the entire 13 weeks from Sunday, _____, to Saturday, _____.

5. Including the week we just talked about, how many weeks did you work at all for pay during the 13-week period?

_____ Weeks [Go to end]

Alternative Questions

C. If answered "NO" to Question 1:

Now I want to ask you about the entire 13 weeks from Sunday, _____, to Saturday, _____.

6. Did you do any work for pay during that 13-week period?

_____ Yes [Go to 7]
_____ No [Go to end]

7. How many weeks did you do any work at all for pay during that 13-week period?

- Attempts must be made to contact *all* individuals unless terminee populations are large enough to use sampling.
- At least six attempts may need to be made to contact enough individuals in the follow-up group to obtain the required response rate.
- For each SDFA (Title II–A) or combined Statewide (Title III Formula and Naitonal Reserve) report (JASR), minimum response rates of 70% are required for each of the following six groups: among adults, those who entered employment at termination and those who did not enter employment at termination; among welfare recipients, those who entered employment at termination and those who did not enter employment at termination; and among dislocated workers, those who entered employment at termination and those who did not enter employment at termination. The response rate is calculated as the number of terminees with complete follow-up information divided by the total number of terminees included in the group eligible for follow-up.

Sampling Procedures

Where sampling is used to obtain participant contact information, it is necessary to have a system which ensures consistent random selection of sample participants from *all* terminees in the group requiring follow-up.

- No participant in the follow-up group may be arbitrarily excluded from the sample.
- Procedures used to select the sample must conform to generally accepted statistical practice, e.g., a table of random numbers or other random selection techniques must be used.
- The sample selected for contact must meet minimum sample size requirements indicated in Table 1.

The use of sampling will depend on whether the terminee populations are large enough to provide estimates which meet minimum statistical standards. If the number of terminees for whom follow-up is required is less than 138, sampling cannot be used. In such cases attempts must be made to contact all the appropriate terminees.

Minimum Sample Sizes for Follow-up

To determine the minimum number of terminees to be included in the follow-up sample, refer to Table 1 in the following instructions. Find the row in the left-hand column that contains the planned number of terminees for each of the groups requiring follow-up: adults, welfare recipients and dislocated workers. The required minimum sample size is given in the middle column of that row. The last column gives sampling percentages that will assure that the minimum sample size is obtained.

Note: The welfare recipients in the adult sample may be used as part of the welfare sample. In this case, an additional number of welfare recipients must be randomly selected to provide a supplemental sample large enough to meet the same accuracy requirements as other groups requiring follow-up. To determine the minimum size of this supplemental welfare sample, find the row in the left-hand column of Table 1 that contains the planned *total* number of welfare recipients requiring follow-up. From the corresponding entry in the middle column, subtract the number of welfare recipients included in the adult sample. The remainder represents the minimum size of the supplemental sample of welfare recipients required for contact.

TABLE 1.—MINIMUM SAMPLE SIZES FOR FOLLOW-UP

Number of terminees in follow-up population	Minimum sample size	Sampling percentages
1–137	All	100
138–149	137	94
150–159	143	92
160–169	148	89
170–179	154	87
180–189	159	85
190–199	164	84
200–224	175	82
225–249	185	78
250–274	194	74
275–299	202	71
300–349	217	67
350–399	228	62
400–449	240	57
450–499	250	53
500–599	265	50
600–749	282	44
750–999	302	36
1,000–1,499	325	30
1,500–1,999	338	22
2,000–2,999	352	17
3,000–4,999	364	12
5,000 or more	383	7.3

Correcting for Differences in Response Rates

Different response rates for those terminees who entered employment at termination and those who did not are expected to bias the performance estimates because those who entered employment at termination are more likely to be employed at follow-up. It is assumed that those who were employed at termination are easier to locate than those who were unemployed because the interviewer has more contact sources (e.g., name of employer). The resulting response bias can artificially inflate performance results at follow-up.

To account for this problem, separate response rates should be calculated for those who were employed at termination and for those who were not. These separate response rates should be calculated for three groups: all adult II-A terminees, welfare recipients and Title III terminees.

For each group, if the response rates of those employed at termination and those not employed differ by more than 5 percentage points, then the "Worksheet for Adjusting Follow-up Performance Measures" in the Follow-up Technical Assistance Guide must be used to correct the follow-up measures for that group.

Appendix B—PIC-Recognized Youth Employment Competencies

A. General Description of Youth Employment Competency Skill Areas

- *Pre-employment skills* include world of work awareness, labor market knowledge, occupational information, values clarification and personal understanding, career planning and decision making, and job search techniques (resumes, interviews, applications, and follow-up letters). They also encompass survival/daily living skills such as using the phone, telling time, shopping, renting an apartment, opening a bank account, and using public transportation; *and*
- *Work maturity skills* include positive work habits, attitudes, and behavior such as punctuality, regular attendance, presenting a neat appearance, getting along and working well with others, exhibiting good conduct, following instructions and completing tasks, accepting constructive criticism from supervisors and co-workers, showing initiative and reliability, and assuming the responsibilities involved in maintaining a job. This category also entails developing motivation and adaptability, obtaining effective coping and problem-solving skills, and acquiring an improved self image.
- *Basic education skills* include reading comprehension, math computation, writing, speaking, listening, problem solving, reasoning, and the capacity to use these skills in the workplace.
- *Job-specific skills*—Primary job-specific skills encompass the proficiency to perform actual tasks and technical functions required by certain occupational fields at entry, intermediate or advanced levels. Secondary job-specific skills entail familiarity with and use of set-up procedures, safety measures, work-related terminology, recordkeeping and paperwork formats, tools, equipment and materials, and breakdown and clean-up routines.

B. Sufficiently Developed Systems for Youth Employment Competencies

A sufficiently developed youth employment competency system must include the following structural and procedural elements:

1. Quantifiable Learning Objectives

- PIC-recognized competency statements that are quantifiable, employment-related, measurable, verifiable learning objectives that specify the proficiency to be achieved as a result of program participation.

Employment competencies/quantifiable learning objectives approved by the PIC as relevant to the SDA must include a description of the skills/knowledge/attitudes/behavior to be taught, the levels of achievement to be attained, and the means of measurement to be used to demonstrate competency accomplishment. The level of achievement selected should enhance the youth's employability and opportunities for postprogram employment.

2. Related Curricula, Training Modules, and Approaches

• Focused curricula, training modules, or behavior modification approaches which teach the employment competencies in which youth are found to be deficient.

Such related activities, components, or courses must encompass participant orientation, work-site supervisor/instructor/community volunteer training, and staff development endeavors as appropriate. They also must include, as appropriate, relevant agreements, manuals, implementation packages, instructions, and guidelines. A minimum duration of training must be specified which allows sufficient time for a youth to achieve those skills necessary to attain his/her learning objectives.

3. Pre-Assessment

• Assessment of participant employment competency needs at the start of the program to determine if youth require assistance and are capable of benefitting from available services.

A minimum level of need must be established before a participant is eligible to be tracked as a potential "attained PIC-recognized youth employment competency" outcome. All assessment techniques must be objective, unbiased and conform to widely accepted measurement criteria. Measurement methods used must contain clearly defined criteria, be field tested for utility and accuracy, and provide for the training/preparation of all raters/scorers.

4. Post-Assessment (Evaluation)

• Evaluation of participant achievement at the end of the program to determine if competency-based learning gains took place during project enrollment.

Intermediate checking to track progress is encouraged. All evaluation techniques must be objective, unbiased and conform to widely accepted evaluation criteria. Measurement methods used must contain clearly defined criteria, be field tested for utility and accuracy, and provide for the training/preparation of all raters/scorers.

5. Employability Development Plans [EDP]

• Employability development plans/individual education plans which use assessment results in assigning participants to appropriate learning activities/sites in the proper sequence to promote participant growth and development, remedy identified deficiencies, and build upon strengths.

Employability development planning is an interactive process between program and youth. It should be completed soon after enrollment and be updated periodically.

6. Documentation

• Maintenance of participant records and necessary reporting of competency-based outcomes to document intra-program learning gains achieved by youth.

SDAs are responsible for maintaining (1) copies of all competency statements and (2) evidence of their approval by the PIC. Program records must encompass:

(a) Pre-test/assessment documentation which substantiates deficiencies in PIC-recognized youth employment competencies at program entry;

(b) Substantiation that youth were enrolled in JTPA activities with operative curriculum and/or training modules to teach the competencies identified as deficiencies;

(c) Post-test/evaluation documentation which substantiates attainment of PIC-recognized competencies during the program period; and,

(d) A copy of the participant EDP, and copies of all certificates awarded, as well as any other documents which serve as proof of gain.

7. Certification

• Proof of youth employment competency attainment in the form of a certificate for participants who achieve predetermined levels of proficiency to use as evidence of this accomplishment to assist them in entering the labor market.

C. Guidelines for Ensuring Consistency in the Reporting of Pre-Employment/Work Maturity Skill Competencies

In order for an attainment to be reported in the area of preemployment/work maturity, at least one PIC-certified competency statement must be developed/quantified and capability/ability demonstrated in each of the following 11 core competencies—provided that at least 5 of these learning objectives were achieved during program intervention:

1. Making Career Decisions
2. Using Labor Market Information
3. Preparing Résumes
4. Filling Out Applications
5. Interviewing
6. Being Consistently Punctual
7. Maintaining Regular Attendance
8. Demonstrating Positive Attitudes/Behavior
9. Presenting Appropriate Appearance
10. Exhibiting Good Interpersonal Relations
11. Completing Tasks Effectively

Appendix C—Definitions of Terms Necessary for Completion of Reports

Employment/Training Services

Assessment—services are designed to initially determine each participant's employability, aptitudes, abilities and interests, through interviews, testing and counseling to achieve the applicant's employment related goals.

Follow-Up—is the collection of information on a terminee's employment situation at a specified period after termination from the program.

Intake—includes the screening of an applicant for eligibility to determine: (1) Whether the program can benefit the individual; (2) the employment and training activities and services which would be appropriate for that individual; (3) availability of an appropriate employment and training activity; (4) a decision on selection for participation and (5) dissemination of information on the program.

Outreach—activity involves the collection, publication and dissemination of information on program services directed toward economically disadvantaged and other individuals eligible to receive JTPA training and support services.

Youth Employability Enhancement Termination

An outcome for youth, other than entered unsubsidized employment, which is recognized as enhancing long-term employability and contributing to the potential for long-term increase in earnings and employment. The five youth employability enhancement outcomes are:

(1) Demonstrated proficiency in youth employment competencies as defined by the PIC *two or more* of the following three skill areas in which the terminee was deficient at enrollment: pre-employment/work maturity, basic education, or job-specific skills.

(2) Entered an employment/training program not funded under Title II of the JTPA.

(3) Returned to full-time school if, at time of entry, the participant was *not* attending school and had *not* obtained a high school diploma or equivalent.

(4) Completed, during enrollment, a level of educational achievement which had not been reached at entry. Levels of educational attainment are elementary, secondary, and post-secondary. Completion standards shall be governed by State standards or, at the Governor's discretion, local standards at the elementary level; shall include a high school diploma, GED Certificate or equivalent at the secondary level, and shall require a diploma or other written certification of completion at the post-secondary level. NOTE: To obtain credit, the completion of a given level of education must be included in the individual's employability development plan.

(5) Completed program objectives as defined in approved exemplary youth project plans if, at time of entry, the participant was 14 or 15 years of age.

Education Status

School Dropout—An adult or youth (aged 14–21) who is not attending school full-time and has not received a high school diploma or a GED certificate.

Student—An adult or youth (aged 14–21) who has not received a high school diploma or GED certificate and is enrolled full-time in an elementary, secondary or postsecondary-level vocational, technical, or academic school or is between school terms and intends to return to school.

High School Graduate or Equivalent (No Post-High School)—An adult or youth (age 14–21) who has received a high school diploma or GED Certificate, but who has not attended any postsecondary vocational, technical, or academic school.

Post High School Attendee—An adult or youth (aged 14–21) who has received a high school diploma or GED certificate and has attended (or is attending) any postsecondary-level vocational, technical, or academic school.

Family Status

Single Head of Household—A single, abandoned, separated, divorced or widowed individual who has responsibility for one or more dependent children under age 18.

Race/Ethnic Group

White (Not Hispanic)—A person having origins in any of the original peoples of Europe, North Africa, or the Middle East.

Black (Not Hispanic)—A person having origins in any of the black racial groups of Africa.

Hispanic—A person of Mexican, Puerto Rican, Cuban, Central or South American, or other Spanish culture or origin (including Spain), regardless of race.

Note.—Among persons from Central and South American countries, only those who are of Spanish origin, descent, or culture should be included in the Hispanic category. Persons from Brazil, Guiana, and Trinidad, for example, would be classified according to their race, and would not necessarily be included in the Hispanic category. Also, the Portugese should be excluded from the Hispanic category and should be classified according to their race.

American Indian or Alaskan Native—A person having origins in any of the original peoples of North America, and who maintains cultural identification through tribal affiliation or community recognition.

Asian or Pacific Islander—A person having origins in any of the original peoples of the Far East, Southeast Asia, the Indian subcontinent (e.g., India, Pakistan, Bangladesh, Sri Lanka, Nepal, Sikkim, and Bhutan), or the Pacific Islands. This area includes, for example, China, Japan, Korea, the Philippine Islands, and Samoa. Hawaiian natives are to be recorded as Asian or Pacific Islanders.

Other Barriers To Employment

Limited English Language Proficiency—Inability of an applicant, whose native language is not English, to communicate in English, resulting in a job handicap.

Handicapped Individual—Refer to section 4(10) of the Act. Any individual who has a physical or mental disability which for such individual constitutes or results in a substantial handicap to employment.

Note.—This definition will be used for performance standards purposes, but is not required to be used for program eligibility determination (section 4(8)(E)).

Offender—For reporting purposes, the term "offender" is defined as any adult or youth who requires assistance in overcoming barriers to employment resulting from a record of arrest or conviction (excluding misdemeanors).

Minimal Work History—An adult or youth who did not work for the same employer for longer than 3 consecutive months in the five years prior to JTPA eligibility determination.

Reading Skills Below 7th Grade Level—An adult or youth assessed as having English reading skills below the 7th grade level on a generally accepted standardized test.

Long-Term AFDC Recipient—An adult or youth welfare recipient who had received (or whose family had received) cash payments under AFDC (SSA Title IV) for any 24 or more of the 30 months prior to eligibility determination.

U.C. Status

Unemployment Compensation Claimant—Any individual who has filed a claim and has been determined monetarily eligible for benefit payments under one or more State or Federal unemployment compensation programs, and who has not exhausted benefit rights or whose benefit year has not ended.

Labor Force Status

Employed—(a) An individual who, during the 7 consecutive days prior to application to a JTPA program, did any work at all: (i) As a paid employee; (ii) in his or her own business, profession or farm, or (iii) worked 15 hours or more as an unpaid worker in an enterprise operated by a member of the family; or (b) an individual who was not working, but has a job or business from which he or she was temporarily absent because of illness, bad weather, vacation, labor-management dispute, or personal reasons, whether or not paid by the employer for time off, and whether or not seeking another job. (This term includes members of the Armed Forces on active duty, who have not been discharged or separated; participants in registered apprenticeship programs; and self-employed individuals.)

Employed Part-Time—An individual who is regularly scheduled for work less than 30 hours per week.

Unemployed—An individual who did not work during the 7 consecutive days prior to application for a JTPA program, who made specific efforts to find a job within the past 4 weeks prior to application, and who was available for work during the 7 consecutive days prior to application (except for temporary illness).

Unemployed: 15 OR MORE WEEKS OF PRIOR 26 WEEKS—An individual who is unemployed at the time of eligibility determination and has been unemployed for any 15 or more of the 26 weeks immediately prior to such determination.

Not in Labor Force—A civilian 14 years of age or over who did not work during the 7 consecutive days prior to application for a JTPA program and is not classified as employed or unemployed.

Welfare Grant Information

Welfare Recipient—An individual who receives (or whose family receives) cash payments under AFDC (SSA Title IV), General Assistance (State or local government), or the Refugee Assistance Act of 1980 (PL 96–212) at the time of JTPA eligibility determination. For reporting and performance standards purposes, *exclude* those individuals who receive only SSI (SSA Title XVI). •

Program Costs

Accrued Expenditures—The allowable charges incurred during the program year to date requiring provision of funds for: (1) goods and other tangible

property received; and (2) costs of services performed by employees, contractors, subrecipients, and other payees.

Note.—These charges do not include "resources on order", i.e., amounts for contracts, purchase orders and other obligations for which goods and/or services have not been received.

BILLING CODE 4910-08-M

NUCLEAR REGULATORY COMMISSION

[Docket No. 50-368]

Arkansas Power and Light Co.; Consideration of Issuance of Amendment to Facility Operating License and Opportunity for Prior Hearing

The United States Nuclear Regulatory Commission (the Commission) is considering issuance of an amendment to Facility Operating License No. NPF-6, issued to Arkansas Power and Light Company (the licensee), for operation of the Arkansas Nuclear One, Unit 2 located in Russellville, Arkansas.

The amendment would revise the provisions in the Technical Specifications relating to change out of the station batteries and changes in the battery tests, in accordance with the licensee's application for amendment dated September 17, 1987.

Prior to issuance of the proposed license amendment, the Commission will have made findings required by the the Atomic Energy Act of 1954, as amended (the Act) and the Commission's regulations.

By January 20, 1988, the licensee may file a request for a hearing with respect to issuance of the amendment to the subject facility operating license and any person whose interest may be affected by this proceeding and who wishes to participate as a party in the proceeding must file a written petition for leave to intervene. Request for a hearing and petitions for leave to intervene shall be filed in accordance with the Commission's "Rules of Practice for Domestic Licensing Proceedings" in 10 CFR Part 2. If a request for a hearing or petitions for leave to intervene is filed by the above date, the Commission or an Atomic Safety and Licensing Board, designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board Panel, will rule on the request and/or petition and the Secretary or the designated Atomic Safety and Licensing Board will issue a notice of hearing or an appropriate order.

As required by 10 CFR 2.714, a petition for leave to intervene shall set forth with particularity the interest of the petitioner in the proceeding, and how that interest may be affected by the results of the proceeding. The petition should specifically explain the reasons why intervention should be permitted with particular reference to the following factors: (1) The nature of the petitioner's right under the Act to be made a party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any order which may be entered in the proceedings on the petitioner's interest. The petition should also identify the specific aspect(s) of the subject matter of the proceeding as to which petitioner wishes to intervene. Any person who has filed a petition for leave to intervene or who has been admitted as a party may amend the petition without requesting leave of the Board up to fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, but such an amended petition must satisfy the specificity requirements described above.

Not later than fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, a petitioner shall file a supplement to the petition to intervene which must include a list of the contentions which are sought to be litigated in the matter, and the bases for each contention set forth with reasonable specificity. Contentions shall be limited to matters within the scope of the amendment under consideration. A petitioner who fails to file such a supplement which satisfies these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing, including the opportunity to present evidence and cross-examine witnesses.

A request for a hearing or a petition for leave to intervene shall be filed with the Secretary of the Commission, United States Nuclear Regulatory Commission, Washington, DC 20555, Attention: Docketing and Service Branch, or may be delivered to the Commission's Public Document Room, 1717 H Street, NW., Washington, DC by the above date. Where petitions are filed during the last ten (10) days of the notice period, it is requested that the petitioner or representative for the petitioner promptly so inform the Commission by a toll-free telephone call to Western Union at (800) 325-6000 (in Missouri (800) 342-6700). The Western Union operator should be given Datagram Identification Number 3737 and the following message addressed to Jose A. Calvo: Petitioner's name and telephone number; date petition was mailed; plant name; and publication date and page number of the Federal Register notice. A copy of the petition should also be sent to the Office of the General Counsel, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and to Nicholas S. Reynolds, Esq., Bishop, Liberman, Cook, Purcell and Reynolds, 1200 Seventeenth St., NW., Washington, DC 20036, attorney for the licensee.

Nontimely filings of petitions for leave to intervene, amended petitions, supplemental petitions and/or requests for hearing will not be entertained absent a determination by the Commission, the presiding officer or the Atomic Safety and Licensing Board designated to rule on the petition and/or request, that the petitioner has made a substantial showing of good cause for the granting of a late petition and/or request. That determination will be based upon a balancing of the factors specified in 10 CFR 2.714(a)(1)(i)-(v) and 2.714(d).

For further details with respect to this action, see the application for amendment dated September 17, 1987, which is available for public inspection at the Commission's Public Document Room 1717 H Street, NW., Washington, DC and at the Tomlinson Library, Arkansas Tech University, Russellville, Arkansas 72801.

Dated at Bethesda, Maryland, this 15th day of December, 1987.

[Docket No. 50-368]

Arkansas Power and Light Co.; Consideration of Issuance of Amendment to Facility Operating License and Opportunity for Prior Hearing

The United States Nuclear Regulatory Commission (the Commission) is considering issuance of an amendment to Facility Operating License No. NPF-6, issued to Arkansas Power and Light Company (the licensee), for operation of the Arkansas Nuclear One, Unit 2 located in Russellville, Arkansas.

Pursuant to 10 CFR 50.90, the licensee has proposed an amendment that would revise the provisions in the Technical Specifications relating to an increase in refueling water tank and safety injection tank boron concentration, in accordance with the licensee's application for amendment dated October 28, 1987.

Prior to issuance of the proposed license amendment, the Commission will have made findings required by the Atomic Energy Act of 1954, as amended (the Act) and the Commission's regulations.

By January 20, 1988, the licensee may file a request for a hearing with respect to issuance of the amendment to the subject facility operating license and any person whose interest may be affected by this proceeding and who wishes to participate as a party in the proceeding must file a written petition for leave to intervene. Request for a hearing and petitions for leave to intervene shall be filed in accordance with the Commission's "Rules of Practice for Domestic Licensing Proceedings" in 10 CFR Part 2. If a request for a hearing or petition for leave to intervene is filed by the above date, the Commission or an Atomic Safety and Licensing Board, designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board Panel, will rule on the request and/or petition and the Secretary or the designated Atomic Safety and Licensing Board will issue a notice of hearing or an appropriate order.

As required by 10 CFR 2.714, a petition for leave to intervene shall set forth with particularity the interest of the petitioner in the proceeding, and how that interest may be affected by the results of the proceeding. The petition should specifically explain the reasons why intervention should be permitted with particular reference to the following factors: (1) The nature of the petitioner's right under the Act to be made a party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any order which may be entered in the proceeding on the petitioner's interest. The petition should also identify the specific aspect(s) of the subject matter of the proceeding as to which petitioner wishes to intervene. Any person who has filed a petition for leave to intervene or who has been admitted as a party may amend the petition without requesting leave of the Board up to fifteen (15) days prior to the first prehearing conference scheduled in the proceedings, but such an amended petition must satisfy the specificity requirements decribed above.

Not later than fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, a petitioner shall file a supplement to the petition to intervene which must include a list of the contentions which are sought to be litigated in the matter, and the bases for each contention set forth with reasonable specificity. Contentions shall be limited to matters within the scope of the amendment under consideration. A petitioner who fails to file such a supplement which satisfies these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing, including the opportunity to present evidence and cross-examine witnesses.

A request for a hearing or a petition for leave to intervene shall be filed with the Secretary of the Commission, United States Nuclear Regulatory Commission, Washington, DC 20555, Attention: Docketing and Service Branch, or may be delivered to the Commission's Public Document Room, 1717 H Street, NW., Washington, DC by the above date. Where petitions are filed during the last ten (10) days of the notice period, it is requested that the petitioner or representative for the petitioner promptly so inform the Commission by a toll-free telephone call to Western Union at (800) 325-6000 (in Missouri (800) 342-6700). The Western Union operator should be given Datagram identification Number 3737 and the following message addressed to Jose A. Calvo; petitioner's name and telephone number; petition was mailed October 28, 1987; Arkansas Nuclear One, Unit 2 and publication date and page number of this Federal Register notice. A copy of the petition should also be sent to the Office of the General Counsel, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and the Nicholas S. Reynolds, Esq., Bishop, Lieberman, Cook, Purcell and Reynolds, 1200 Seventeenth Street, NW., Washington, DC 20036, attorney for the licensee.

Nontimely filings of petitions for leave to intervene, amended petitions, supplemental petitions and/or requests for hearing will not be entertained absent a determination by the Commission, the presiding officer or the Atomic Safety and Licensing Board designated to rule on the petition and/or request, that the petitioner has made a substantial showing of good cause for the granting of a late petition and/or request. That determination will be based upon a balancing of the factors specified in 10 CFR 2.714(a)(1)(i)-(v) and 2.714(d).

For further details with respect to this action, see the application for amendment dated October 28, 1987, which is available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, DC and at the Tomlinson Library, Arkansas Tech University, Russellville, Arkansas 72801.

Dated at Bethesda, Maryland, this 15th day of December, 1987.

BILLING CODE 7590-01-M

[Docket No. 50-368]

Arkansas Power and Light Co.; Consideration of Issuance of Amendment to Facility Operating License and Opportunity for Prior Hearing

The United States Nuclear Regulatory Commission (the Commission) is considering issuance of an amendment to Facility Operating License No. NPF-6, issued to Arkansas Power and Light Company (the licensee), for operation of the Arkansas Nuclear One, Unit 2 located in Russellville, Arkansas.

Pursuant to 10 CFR 50.90, the licensee has proposed an amendment that would revise the provisions in the Technical Specifications relating to boric acid makeup tank boron concentration reduction, in accordance with the licensee's application for amendment dated October 28, 1987.

Prior to issuance of the proposed license amendment, the Commission will have made findings required by the Atomic Energy Act of 1954, as amended (the Act) and the Commission's regulations.

By January 20, 1988, the licensee may file a request for a hearing with respect to issuance of the amendment to the subject facility operating license and any person whose interest may be affected by this proceeding and who wishes to participate as a party in the proceeding must file a written petition for leave to intervene. Request for a hearing and petitions for leave to intervene shall be filed in accordance with the Commission's "Rules of

VOL 52 ISS 244 DEC 21 1987 UMI

Practice for Domestic Licensing Proceedings" in 10 CFR Part 2. If a request for a hearing or petition for leave to intervene is filed by the above data, the Commission or an Atomic Safety and Licensing Board, designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board Panel, will rule on the request and/or petition and the Secretary or the designated Atomic Safety and Licensing Board will issue a notice of hearing or an appropriate order.

As required by 10 CFR 2.714, a petition for leave to intervene shall set forth with particularity the interest of the petitioner in the proceeding, and how that interest may be affected by the results of the proceeding. The petition should specifically explain the reason why intervention should be permitted with particular reference to the following factors: (1) The nature of the petitioner's right under the Act to be made a party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any order which may be entered in the proceeding on the petitioner's interest. The petition should also identify the specific aspect(s) of the subject matter of the proceeding as to which petitioner wishes to intervene. Any person who has filed a petition for leave to intervene or who has been admitted as a party may amend the petition without requesting leave of the Board up to fifteen (15) days prior to the first prehearing conference scheduled in the proceedings, but such an amended petition must satisfy the specificity requirements described above.

Not later than fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, a petitioner shall file a supplement to the petition to intervene which must include a list of the contentions which are sought to be litigated in the matter, and the bases for each contention set forth with reasonable specificity. Contentions shall be limited to matters within the scope of the amendment under consideration. A petitioner who fails to file such a supplement which satisfies these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing, including the opportunity to present evidence and cross-examine witnesses.

A request for a hearing or a petition for leave to intevene shall be filed with the Secretary of the Commission, United States Nuclear Regulatory Commission, Washington, DC 20555, Attention: Docketing and Service Branch, or may be delivered to the Commission's Public Document Room, 1717 H Street NW., Washington, DC by the above date. Where petitions are filed during the last ten (10) days of the notice period, it is requested that the petitioner or representative for the petitioner promptly so inform the Commission by a toll-free telephone call to Western Union at (800) 325–6000 (in Missouri (800) 342–6700). The Western Union operator should be given Datagram identification Number 3737 and the following message addressed to Jose A. Calvo; petitioner's name and telephone number; petition was mailed October 28, 1987; Arkansas Nuclear One, Unit 2 and publication date and page number of this **Federal Register** notice. A copy of the petition should also be sent to the Office of the General Counsel, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and to Nicholas S. Reynolds, Esq., Bishop, Lieberman, Cook, Purcell and Reynolds, 1200 Seventeenth Street NW., Washington, DC 20036, attorney for the licensee.

Nontimely filings of petitions for leave to intervene, amended petitions, supplemental petitions and/or requests for hearing will not be entertained absent a determination by the Commission, the presiding officer or the Atomic Safety and Licensing Board designated to rule on the petition and/or request, that the petitioner has made a substantial showing of good cause for the granting of a late petition and/or request. That determination will be based upon a balancing of the factors specified in 10 CFR 2.714(a)(1)(i)–(v) and 2.714(d).

For further details with respect to this action, see the application for amendment dated October 28, 1987, which is available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, DC and at the Tomlinson Library, Arkansas Tech University, Russellville, Arkansas 72801.

Dated at Bethesda, Maryland, this 15th day of December, 1987.

For the Nuclear Regulatory Commission.

George F. Dick, Jr.,

BILLING CODE 7590–01–M

[Docket No. 50–498]

Houston Lighting and Power Co. et al.; Consideration of Issuance of Amendment to Facility Operating License and Proposed No Significant Hazards Consideration Determination

In the matter of Houston Lighting and Power Company, City Public Service Board of San Antonio, Central Power and Light Company, and City of Austin, Texas.

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of an amendment to Facility Operating License No NPF–71, issued to Houston Lighting & Power Company, et al. (the licensee), for operation of the South Texas Project Unit 1 facility located in Matagorda County, Texas.

The amendment would increase the allowable response times for overtemperature delta-T and overpower delta-T instrumentation from 6.5 seconds to 8.0 seconds. The maximum acceptable response time is given in Table 3.3–2 of the Technical Specifications, NUREG–1255, for South Texas Project Unit 1.

This action is in response to the licensee's application for amendment dated November 12, 1987. Subsequently, on December 9, 1987, the licensee requested that this amendment request be treated as an exigent situation because without the amendment, the startup of the unit may not be able to proceed. The determination of whether or not the time response represents a constraint on startup cannot be made until tests scheduled for December 18, 1987 are completed. The licensee has stated that startup and operation at higher power levels will be delayed if the technical specification amendment is needed but not implemented in time. The staff concurs with the need to expedite the amendment process for the following reason:

The staff has examined the schedule for activities between initial criticality and commercial operation and finds that it provides for a methodical and safe power ascension program. It incorporates hold points to conduct tests and provides for NRC staff assessments. Attempts to compress the activities into a shorter period of time would compromise safe power operation. Accordingly, the staff concludes that delay in initial criticality is likely to result in a delay in eventual power operation of the facility and involves an emergency that could result in delay in start of power production. Since the amendment does not involve a significant hazards consideration, the usual 30-day notice period is being reduced to 15 days.

Before issuance of the proposed license amendment, the Commission will have made findings required by the Atomic Energy Act of 1954, as amended (the Act) and the Commission's regulations.

The Commission has made a proposed determination that the amendment request involves no significant hazards consideration. Under the Commission's regulations in 10 CFR 50.92, this means that operation of the facility in accordance with the proposed amendment would not (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety.

Resistance temperature detectors (RTDs) provide measurement of reactor coolant temperatures which are processed electronically and used in the reactor trip system. The licensee has performed analysis to determine the effect of increasing the response time from 6.5 seconds to 8 seconds. The analyses have considered the following accident scenarios shown below with the FSAR section which contains the description: 15.6.5—Large Break LOCA; 15.6.5—Small Break LOCA; 15.4.8—Rod Ejection Long Term Mass; 6.2—Containment Subcompartment and Long Term Mass and Energy Release; 15.6.3—Steam Generator Tube Rupture; 3.6—Blowdown Reactor Vessel and Loop Forces; 15.6.5—Post-LOCA Long-Term Core Cooling; 6.3.2.5—Hot Leg Switchover to Prevent Potential Boron Precipitation; 13.5.2—Emergency Response Guidelines; 15.4.2—Uncontrolled RCCA Bank Withdrawal at Power; 15.2.3—Loss of Load/Turbine Trip; 15.6.1—Inadvertent opening of a Pressurizer Safety or Relief Valve Event; 15.4.6—Uncontrolled Boron Dilution at Power; 15.1.5—Steamline Rupture at Power.

The NRC staff has evaluated the results of the above analyses and concluded that the performance of the reactor trip system would be acceptable with a RTD response time of 8.0 seconds. Based on this assessment, the requested change will not:

(1) Involve a significant increase in the probability or consequences of an accident previously evaluated because all the computed consequences meet the same acceptance criteria used in the previous review. As a result, the trip system would function in such a way as to maintain the required temperatures and pressures.

(2) Create the possibility of a new or different kind of accident from any accident previously evaluated because the technical Specifications currently in force already incorporates a major part of the time delay of 8.0 seconds. In addition, the licensee has stated that no physical modifications are involved in making this change.

(3) Involve a significant reduction in the margin of safety because the analyses show that there is minimal impact on the consequences of design basis accidents.

Accordingly, the Commission proposes to determine that this change does not involve significant hazards considerations.

If the proposed determination becomes final, an opportunity for a hearing will be published in the **Federal Register** at a later date and any hearing request will not delay the effective date of the amendment.

If the Commission decides in its final determination that the amendment does involve a significant hazards consideration, a notice of opportunity for a prior hearing will be published in the **Federal Register** and, if a hearing is granted, it will be held before any amendment is issued.

The Commission is seeking public comments on this proposed determination of no significant hazards consideration. Comments on the proposed determination may be telephone to Jose A. Calvo, Director, Project Directorate—IV, by collect call to (301) 492–7460, or submitted in writing to the Rules and Procedures Branch, Division of Rules and Records, Office of Administration, U.S. Nuclear Regulatory Commission, Washington, DC 20555. Written comments may also be delivered to Room 4000, Maryland National Bank Building, 7735 Old Georgetown Road, Bethesda, Maryland from 8:15 a.m. to 5:00 p.m. All comments received by January 5, 1988, will be considered in reaching a final determination. A copy of the application may be examined at the Commission's Public Document Room, 1717 H Street NW., Washington, DC, and at the Local Public Document Room, Wharton County Junior College, J.M. Hodges Learning Center, 911 Boling Highway, Wharton, Texas 77488 and in the Austin Public Library, 810 Guadalupe Street, Austin, Texas 78701.

Dated at Bethesda, Maryland, this 15th day of December, 1987.

For the Nuclear Regulatory Commission.

Jose A. Calvo,

Director, Project Directorate—IV, Division of Reactor Projects—III, IV, V and Special Project, Officer of Nuclear Reactor Regulation.

BILLING CODE 7590–01–M

[Docket No. 50–302]

Florida Power Corp.; Environmental Assessment and Finding of No Significant Impact

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of an exemption from the requirements of Appendix A to 10 CFR Part 50 to the Florida Power Corporation (the licensee), for the Crystal River Unit 3 Nuclear Generating Plant, located in Crystal River, Florida.

Environmental Assessment

Identification of Proposed Action

The proposed exemption would allow temporary relief from the requirements of General Design Criterion-17 (GDC–17) for the Crystal River Unit 3 Nuclear Generating Plant.

The Need for the Proposed Action

The proposed exemption is needed on a temporary basis in order to allow the diesel generators to be operated at the maximum calculated accident load, which would, in turn, permit plant operation during the next cycle until modifications could be made which would bring the plant into compliance with GDC–17.

Environmental Impact of the Proposed Action

The proposed exemption does not involve any measurable environmental impacts. The diesel generators will remain operable and, with the proposed compensatory measures, capable of performing their function. Consequently, the Commission concludes that there are no significant radiological impacts associated with the proposed exemption.

With regard to potential non-radiological impacts, the proposed exemption involves features located entirely within the restricted area as defined in 10 CFR Part 20. It does not affect non-radiological plant effluents and has no other environmental impact. Therefore, the Commission concludes that there are no significant non-radiological environmental impact associated with the proposed exemption.

Alternatives to the Proposed Action

Since the Commission has concluded there is no measurable environmental impacts associated with the proposed exemption, any alternatives with equal or greater environmental impact need not be evaluated. The principal alternative to the exemption would be to require literal compliance with GDC–17. Such action would not enhance the protection of the environment, and would result in unjustified costs to the licensee as the plant could not restart from its current refueling outage.

Alternative Use of Resources

This action does not involve the use of resources not previously considered in the Final Environmental Statement for the Crystal River Unit 3 Nuclear Generating Plant.

Agencies and Persons Consulted

The NRC staff reviewed the licensee's request and did not consult with any other agencies or persons.

Finding of No Significant Impact

Based on the foregoing environmental assessment, we conclude that the proposed action will not have a significant effect on the quality of the human environment. The Commission has, therefore, determined not to prepare an environmental impact statement for the proposed exemption.

For further details with respect to this action, see the applicatin for exemption dated December 14, 1987, which is available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, DC, and at the Crystal River Public Library, 668 NW. First Avenue, Crystal River, Florida 32629.

Dated at Bethesda, Maryland, this 15th day of December 1987.

For the Nuclear Regulatory Commission.

Harley Silver,

Acting Director, Project Directorate II–2, Division of Reactor Projects—I/II, Office of Nuclear Reactor Regulation.

[FR Doc. 87–29186 Filed 12–18–87; 8:45 am]

BILLING CODE 7590–01–M

[Docket Nos. 50–206, 50–361, and 50–362]

Southern California Edison Co., et al.; Environmental Assessment and Finding of No Significant Impact

The United States Nuclear Regulatory Commission (the Commission) is considering approval under 10 CFR 50.80 of the corporate restructuring of Southern California Edison Company (SCE), co-owner and co-licensee for the San Onofre Nuclear Generating Station (SONGS), Units 1, 2, and 3.

Environmental Assessment

Identification of Proposed Action

By letters dated August 25 and December 3, 1987, SCE advised the Commission of a proposed corporate restructuring which will result in SCE becoming a wholly-owned subsidiary of a newly-formed holding company. The holding company is referred to as "SCE Holding Company," although no formal name has yet been selected. Pursuant to the restructuring, SCE Holding Company would become the sole holder of SCE common stock and the current holders of SCE common stock would become holders of SCE Holding Company common stock on a share-for-share basis. SCE will remain as co-holder of the licenses for the three SONGS nuclear units. The Chairman of the SCE Board of Directors will continue in that capacity and will also serve as the Chairman of the Board of Directors for SCE Holding Company.

Pursuant to 10 CFR 50.80, the Commission may approve the transfer of control of a license, after notice to interested persons, upon the Commission's determination that the proposed transferee of a license is qualified to be holder of the license and the transfer of control is otherwise consistent with applicable provisions of law, regulation, and orders of the Commission. Notice of the proposed action was published in the **Federal Register** on December 9, 1987. (52 FR 46694.)

The Need for the Proposed Action

SCE stated that the purpose of the corporate restructuring is to more clearly separate SCE utility and non-utility businesses, thereby insulating utility ratepayers from any risks associated with unregulated ventures and facilitating state and federal regulatory review of utility operations. In addition, the proposed reorganization will enhance the ability of management to respond to non-utility business opportunities as they arise. This flexibility will improve the financial strength and stability of the overall corporation.

Environmental Impact of Proposed Action

The proposed corporate restructuring of SCE will not affect the management or operation of the SONGS units and will not reduce the funds available to carry out activities required by the SONGS Operating Licenses (e.g., the environmental protection programs). On this basis, the Commission concludes that there are no significant radiological or non-radiological impacts associated with the proposed action.

Alternate Use of Resources

This action involves no use of resources not previously considered in the Final Environmental Statements for the three SONGS units.

Agencies and Persons Consulted

The Commission's staff reviewed the licensee's request in consultation with the California Public Utilities Commission.

Finding of no Significant Impact

The Commission has determined not to prepare an environmental impact statement for the proposed action. Based on the foregoing environmental assessment, the Commission concludes that the proposed action will not have a significant effect on the quality of the human environment.

Dated at Bethesda, Maryland, this 16th day of December, 1987.

George M. Knighton,

Director, Project Directorate V, Division of Reactor Projects III, IV, V and Special Projects.

BILLING CODE 7590–01–M

Issuance of Director's Decision Regarding Agency Response to Chernobyl Accident

Notice is hereby given that the Director, Office of Nuclear Reactor Regulation, has issued a "Decision Pursuant to 10 CFR 2.206" concerning the petition dated May 1, 1987, filed by Mr. Thomas Carpenter on behalf of the Government Accountability Project (GAP) and others (Petitioners) requesting that the Commission take action on the basis of the accident that occurred at the Chernobyl nuclear reactor. Specifically, the Petitioners requested that the NRC suspend further licensing of nuclear facilities in the United States pending a study and report of the accident at the Chernobyl plant. Further, the Petitioners requested that the NRC (1) review the findings of the final report for the applicability of these findings to facilities licensed by the NRC, (2) request public comments on whether the record should be reopened to consider new issues raised in the final report that are material to any pending licensing proceeding or current license, and (3) evaluate the need for the corrective actions identified in the petition.

The Director, Office of Nuclear Reactor Regulation, has determined that the Petitioners' request that (1) the NRC complete a study and prepare a final report of the Chernobyl accident and (2) review the findings of the final report for applicability to currently licensed facilities or facilities under construction have, in effect, already been granted. The additional relief, beyond these items, sought by the Petitioners' request pursuant to 10 CFR 2.206 is denied. The reasons for this Decision are explained in the "Director's Decision Under 10 CFR 2.206," DD–87–21, which is available for public inspection in the Commission's Public Document Room located at 1717 H Street NW., Washington, DC. A copy of the Decision will be filed with the Secretary for the Commission's review in accordance with 10 CFR 2.206(c). As provided by this regulation, the Decision will constitute the final action of the Commission 25 days after the date of the Decision unless the Commission, on its own motion, institutes a review of the Decision within that time.

Dated at Bethesda, Maryland, this 15th day of December 1987.

For the Nuclear Regulatory Commission.

Thomas E. Murley,

Director, Office of Nuclear Reactor Regulation.

OFFICE OF THE UNITED STATES TRADE REPRESENTATIVE

Trade Policy Staff Committee; Review and Solicitation of Public Comment: International Trade Commission Public Report Assessing Economic Impact of Proposed Modifications of the List of Articles Eligible for Duty-Free Treatment Under the U.S. Generalized System of Preferences (GSP): 1987 Annual Review

As indicated in a previous notice of August 4 (52 FR 28896), the GSP Subcommittee of the Trade Policy Staff Committee hereby notifies interested parties of the opportunity to comment on the public version of the International Trade Commission (ITC) report assessing the domestic economic impact of proposed changes in the list of eligible items under the 1987 Annual Review of the Generalized System of Preferences. The report is available from the ITC by calling Louise Gillen at the Office of Industries at (202) 252–1296. The USITC is located at 500 E Street, NW., in Washington, DC. The report is also available for review by appointment at the GSP Information Center, Office of the USTR in Washington, DC; the GSP Information Center can be contacted at (202) 395–6971.

All comments concerning the ITC report should be submitted in 20 copies, in English, to the Chairman of the GSP Subcommittee, Trade Policy Staff Committee, 600 17th Street, NW., Room 517, Washington, DC 20506. Comments must be received no later than close of business on Monday, January 11, 1987. Information submitted will be subject to public inspection by appointment with the staff of the GSP Information Center, except for information granted "business confidential" status pursuant to 15 CFR 2007.7. If the document contains business confidential information, twenty copies of a nonconfidential version of the submission along with twelve copies of the confidential version must be submitted. In addition, the document containing confidential information should be clearly marked "confidential" at the top and bottom of each and every page of the document. The version that does not contain business confidential information (the public version) should also be clearly marked at the top and bottom of each and every page (either "public version" or "non-confidential").

Questions concerning the comment period or any other aspect of the GSP program may be directed to the GSP Information Center at (202) 395–6971.

Donald M. Phillips,

Chairman, Trade Policy Staff Committee.

BILLING CODE 3190–01–M

SECURITIES AND EXCHANGE COMMISSION

[File No. 22–17311]

Application and Opportunity for Hearing; M.D.C. Asset Investors Funding Corp.

December 15, 1987.

Notice is hereby given that M.D.C. Asset Investors Funding Corporation ("the Company") has filed an application ("Application"), pursuant to clause (ii) of section 310(b)(1) of the Trust Indenture Act of 1939 (hereinafter sometimes referred to as the "Act") for a finding by the Securities and Exchange Commission (the "Commission") that the trusteeship of Bankers Trust Company (the "Trustee") under an Indenture, as amended, dated August 1, 1987, providing for the issuance of mortgage collateralized bonds ("Bonds") in series ("Series"), by the Company and either Bankers Trust Company, Security Pacific National Bank or such other entity identified as such in the indenture supplements, with respect to each such Series of Bonds ("Indenture Supplements"), is not so likely to involve a material conflict of interest as to make it necessary in the public interest or for the protection of investors to disqualify the Trustee from acting as such under the aforementioned indentures.

Section 310(b) of the Act provides in part that if a trustee under an indenture qualified under the Act has or shall acquire any conflicting interest (as defined in the section), it shall, within ninety days after ascertaining that it has such conflicting interest, either eliminate such conflicting interest or resign. Subsection (1) of that section provides, with certain exceptions stated therein, that a trustee under a qualified indenture shall be deemed to have a conflicting interest if such trustee is trustee under another indenture of the same obligor. The Company alleges that:

1. Each Series of Bonds is secured by the pledge of collateral by the Company to the Trustee under such Indenture and Indenture Supplements. A default under the Indenture or Indenture Supplement for any Series of Bonds does not cause a default under the Indenture or Indenture Supplement for any other Series of Bonds.

2. Each Series of Bonds is secured by collateral which includes, *inter alia*, various mortgage-backed certificates, mortgage participation certificates, conventional mortgage loans and other mortgage loans secured by mortgages or deeds of trust on single-family residences ("Mortgage Loans"). The Application relates only to the trusteeship under the Indenture and Indenture Supplements with respect to Series of Bonds secured by mortgage collateral consisting in whole or in part of Mortgage Loans.

3. The Company intends to purchase certain general coverage insurance policies or performance bonds (such as pool insurance policies, special hazard insurance policies, mortgagor bankruptcy bonds, repurchase bonds, and performance bonds, hereinafter "General Coverage Policies") providing coverage for more than one Series of Bonds in the circumstances where the Indenture and Indenture Supplements with respect to each Series of Bonds would be under the trusteeship of the same Trustee, subject to the requirement that any such utilization will not result in a downgrading of the rating of the Bonds of any such Series by any rating agency rating such Bonds.

BEST COPY AVAILABLE

4. With respect to the General Coverage Policies, a servicer or master servicer rather than the Trustee generally will be required to present, or to cause to be presented, claims to the respective issuers of the pool insurance policy, the special hazard insurance policy and the mortgagor bankruptcy insurance. The Trustee's relationship with such policies will be limited to (i) physical custody of such insurance policies or performance bonds because they constitute part of the trust estate pledged to secure a Series of Bonds and (ii) the succession to the rights and powers of the master servicer pursuant to the terms of the master servicing agreement until a new master servicer is appointed. The Trustee will be primarily responsible for the presentment of claims under only two of the General Coverage Policies, specifically the Repurchase Bonds and the Performance Bonds.

5. In the event that General Coverage Policies are utilized to provide coverage for more than one Series of Bonds, the bondholders of each such Series of Bonds would rank *pari passu* with respect to their right to such General Coverage Policies. The Trustee, or the master servicer, as applicable, would be required either to pay such claim from amounts held or present such claim to the issuer of the policy for payment in the order in which such claim was received and under a mandatory tie-breaker system with respect to the receipt of more than one claim on the same day any one of which claims would exhaust the coverage under such General Coverage Policy.

6. The administrative efforts and expense, and the premium costs, of providing separate General Coverage Policies for each Series of Bonds is enormous and unduly burdensome both on the part of the Applicant and the issuers of such General Coverage Policies and it has become difficult to obtain General Coverage Policies for single Series Bonds. To the extent that an issuer is willing to issue a General Coverage Policy, such issuers has expressed a strong desire that any such General Coverage Policy be utilized to provide coverage for more than one Series of Bonds. To the extent that an issuer is unwilling to issue a General Coverage Policy for a Series of Bonds, the Applicant is required to make substantial cash or cash equivalent deposits partially or entirely in lieu thereof into an account or fund in order to satisfy the rating agency requirements for such Series Bonds.

7. The public interest is not well served by a requirement that results in the procurement of separate General Coverage Policies for each Series of Bonds since it is costly, economically inefficient and unduly burdensome to both the Applicant and the issuers of such General Coverage Policies and, ultimately, the purchasers of the Bonds. Addiitonally, the requirment of separate General Coverage Policies for each Series of Bonds is unnecessary for the protection of investors in that (i) the Indenture and Indenture Supplements will be structured to prevent the Trustee from being in a conflict situation as between different Series of Bonds, (ii) the statutory conflict-of-interest provisions will remain in full force in the Indenture in the event that a conflict situation ever arises, (iii) the trust estate with respect to each Series of Bonds structured as comtemplated by the Application will initially have access to an amount of coverage under the General Coverage Policies at least equal to, or in most cases greater than, the coverage that would have been provided had separate General Coverage Policies been issued, and (iv) the rating agencies have revised their standards to allow the use of General Coverage Policies as contemplated by the Application while continuing to assign such Series of Bonds their highest credit rating. The Company has waived notice of hearing, hearing and any and all rights to specify procedures under the Rule of Practice of the Commission in connection with this matter.

For detailed statement of the matters of fact and law asserted, all persons are referred to the Application as amended, which is on file at the office of the Commission in the Public Reference Room, File Number 22–17311, 450 Fifth Street NW., Washington, DC 20549.

Notice is further given that any interested person may, not later than January 11, 1988, request in writing that a hearing be held on such matter stating the nature of his interest, the reasons for such request and the issues of law or fact raised by such application which he desires to controvert, or he may request that he be notified if the Commission orders a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commisison, 450 Fifth Street, NW., Washington, 20549.

At any time after said date, the Commission may issue an order granting the application, upon such terms and conditions as the Commission may deem necessary or appropriate in the public interest and for the protection of investors, unless a hearing is ordered by the Commission. For the Commission, by the Division of Corporation Finance, pursuant to delegated autority.

Jonathan G. Katz,

Secretary.

BILLING CODE 8010–M

[Release No. 34–25201; File No. SR–NYSE–87–44]

Self-Regulatory Organizations; of Filing and Order Granting Accelerated Approval of Proposed Rule Change by New York Stock Exchange, Inc., Relating to Auxiliary Closing Procedures for Orders Relating to Expiring Stock Index Contracts

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), notice is hereby given that on December 14, 1987, the New York Stock Exchange ("NYSE" or "Exchange") filed with the Securities and Exchange Commission the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The proposed rule change adds auxiliary closing procedures for assisting in handling the order flow associated with the concurrent expiration of stock index futures, stock index options and options on stock index futures on December 18, 1987. It specifies procedures substantively identical to those used on September 18, 1987 and on several earlier expiration Fridays. Only the dates and the list of pilot stocks (due to name changes and the substitution of stocks as a consequence of changes in market weighting) has changed.

Specifically, the auxiliary procedures provide that market-at-the-close stock orders in 50 pilot stocks relating to index arbitrage positions must be received by 3:30 p.m. on December 18. The Exchange will promptly disseminate the size of substantial market order imbalances (50,000 shares or more) as of 3:30 in the pilot stocks. The procedures also ban entry of market-at-the-close orders in the pilot stocks after 3:30 p.m. unless orders (A) offset the imbalances and (B) are not for the purpose of liquidating an index arbitrage position.

The Exchange characterizes the proposed rule change as a Rule of the Board of Directors of the Exchange. The proposed rule change supersedes all other Exchange rules and policies inconsistent with it.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below and is set forth in Sections A, B, and C below.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. *Purpose*—The purpose of the proposed rule change is to comply with the request of the Commission that the Exchange repeat the June 19 closing procedures on September 18 and on subsequent concurrent expirations of stock index futures, stock index options and options on stock index futures. (*See* letter to Robert J. Birnbaum, President, NYSE, from Richard G. Ketchum, Director, SEC, dated September 16, 1987. The proposed rule change will make the procedures a rule of the Exchange.

2. *Statutory Basis*—The basis under the 1934 Act for the proposed rule change is section 6(b)(5), which requires that rules of the Exchange be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to remove impediments to and perfect the mechanism of a free and open market and, in general, to protect investors and the public interest.

B. Self-Regulatory Organization's Statement on Burden on Competition

The proposed rule change does not impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the 1934 Act.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received from Members, Participants or Others

The Exchange has not solicited, and does not intend to solicit, comments regarding the proposed rule change. The Exchange has not received any unsolicited written comments from members or other interested parties.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The Exchange requests that the proposed rule change be given accelerated effectiveness pursuant to section 19(b)(2) of the 1934 Act. Confirmation to the industry of the Exchange's intention to comply with the Commission's request that the Exchange repeat the closing procedures specified by the proposed rule change should occur as soon as possible to permit investors and firms to plan accordingly. Moreover, the procedures contain no substantive changes from the procedures used on previous expiration Fridays. Accordingly, the Exchange seeks action by the Commission in time to permit notification of interested parties well in advance of the December 18 expiration.

The Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a securities exchange, and in particular, the requirements of section 6 and the rules and regulations thereunder. The market-on-close procedures described herein have been utilized on the prior five Expiration Fridays (the quarterly expiration when stock index futures, stock index options and options on stock index futures have simultaneous expirations). These procedures were part of efforts by the Commission and the self-regulatory organizations to address stock market volatility that has been associated with certain index arbitrage trading strategies on Expiration Fridays. By requiring submission of market-at-close orders early and disseminating imbalances, the NYSE could attract contra-side interest to alleviate imbalances caused by the closing of index arbitrage positions. The procedures have proven to be operational successes, and have significantly contributed to the smooth handling of the increased order flow associated with these expirations.

The Commission finds good cause for approving this rule change prior to the thirtieth day after the date of publication of notice of filing thereof in that the Commission desires to notify market participants as soon as possible of the Exchange's, intention to repeat these procedures on the upcoming December 18, 1987 expiration. Moreover, the procedures contain no substantive changes from the procedures utilized by the NYSE on September 18 and several earlier Expiration Fridays.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that maybe withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Room, 450 Fifth Street NW., Washington, DC 20549. Copies of such filing will also be available for inspection and copying at the NYSE. All submissions should refer to the file number in the caption above and should be submitted by January 11, 1988.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Jonathan G. Katz,

Secretary.

Dated: December 16, 1987.

[FR Doc. 87–29199 Filed 12–18–87; 8:45 am]

BILLING CODE 8010–01–M

[Release No. 34–25202; File No. SR–NYSE–87–43]

Self-Regulatory Organizations; Filing and Order Granting Accelerated Approval of Proposed Rule Change by New York Stock Exchange, Inc., Relating to Auxiliary Opening Procedures for Orders Relating to Expiring Stock Index Contracts

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), notice is hereby given that on December 14, 1987, the New York Stock Exchange ("NYSE" or "Exchange") filed with the Securities and Exchange Commission the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

VOL 52 ISS 244 DEC 21 1987 UMI

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The proposed rule change adds auxiliary opening procedures for assisting in handling the order flow associated with the concurrent expiration of stock index futures, stock index options and options on stock index futures on December 18, 1987. It specifies procedures identical to those used on June 19, 1987 (SR–NYSE–87–17; Release No. 34–24596 (June 16, 1987)) and September 18, 1987 (SR–NYSE–87–30; Release No. 34–24916 (September 11, 1987)). Only the dates and the list of pilot stocks (due to name changes and the substitution of stocks as a consequence of changes in market weighting) have changed.

Specifically, the auxiliary procedures provide that stock orders relating to opening-price settling contracts must be received by 9:00 a.m. on December 18. The Exchange will promptly disseminate the size of substantial market order imbalances (50,000 shares or more) as at 9:00 in 50 pilot stocks.

The Exchange will make SuperDot available to accept orders at 7:30. The Exchange will also raise the order size eligibility for the Opening Automation Reporting Service ("OARS") to 30,099 shares—in effect, raising SuperDot's pre-opening order size parameters. The procedures confine orders relating to opening-price settling contracts to market orders and require them to be appropriately identified. The procedures also ban "limit-at-the-opening" orders and apply on December 18 the reduced waiting periods for second and subsequent price indications that the Commission recently approved.[1]

The Exchange characterizes the proposed rule change as a Rule of the Board of Directors of the Exchange. The proposed rule change supersedes all Exchange rules and policies inconsistent with it.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below and is set forth in Sections A, B, and C below.

[1] SR–NYSE–87–14 (Release No. 34–24880 (September 4, 1987)).

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. *Purpose*—The purpose of the proposed rule change is to establish procedures to augment the NYSE's regular opening procedures on December 18, 1987. The auxiliary procedures will assist in integrating stock orders relating to expiring contracts into the Exchange's opening procedures in a manner that will assure an efficient market opening in each stock as close to 9:30 a.m. as possible.

The Exchange believes that settling index contracts based upon the opening prices of the constituent stocks, and thereby permitting use of the Exchange's time-tested opening procedures, provides the best mechanism for handling the accompanying stock volume. Earlier this year, the Exchange, the Chicago Mercantile Exchange, Inc. and the New York Futures Exchange, Inc. altered or added index contracts specifying that settlement pricing will occur based upon the opening prices on expiration Fridays. They also have provided that trading in opening-price settling contracts will cease at the close on the preceding day. The Exchange anticipates that these changes will divert to the opening approximately 75 percent of the stock order flow related to expiring index contracts. The proposed rule change establishes auxiliary procedures to help accommodate the diverted order flow.

The special dissemination of a picture of substantial market order imbalances in the 50 pilot stocks as of 9:00 will provide off-Floor participants with a picture of the unique impact of the index-related orders, and will allow ample opportunity for them to react to it. Because the regular opening procedures will otherwise operate, an off-Floor participant will, as always, be able to obtain a minute-to-minute Floor picture through his Floor broker. Similarly, the pre-opening application of the ITS Plan will be in effect. Moreover, if it becomes evident that a significant change from the preceding day's closing price is in the offing, the specialist can, with the approval of a Floor Official, disseminate regular price indications over the tape as needed.

The particular purposes of several of the procedures deserves elaboration.

9:00 Cut-Off. The 9:00 cut-off for entry of stock orders relating to opening-price settling contracts assures that the upper limit of the order flow created by unwinding index-related positions is known at 9:00. The specialist can retrieve the orders in OARS at 9:00 and combine them with the manual orders, creating a complete picture of all the orders. If the picture shows an imbalance of 50,000 shares or more, he will notify off-Floor participants of the imbalance within the first several minutes after 9:00. This allows a half hour or more to react.

Preclusion of Limit-at-the-Opening Orders. Preclusion of limit-at-the-opening orders simplifies the specialist's task in opening his market. These orders cannot be entered into the electronic display book. Consequently, their acceptance would complicate the specialist's task by requiring him to keep a separate, manual tally. Customers are free to enter regular limit orders.

Applicability of Revised Price Indications Waiting Period. SR–NYSE–87–14, noted above, describes the purpose of reducing the waiting period following second and subsequent price indications.

2. *Statutory Basis*—The basis under the 1934 Act for the proposed rule change is section 6(b)(5), which requires that rules of the Exchange be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to remove impediments to and perfect the mechanism of a free and open market and, in general, to protect investors and the public interest.

B. Self-Regulatory Organization's Statement on Burden on Competition

The proposed rule change does not impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the 1934 Act.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants or Others

The Exchange has not solicited, and does not intend to solicit, comments regarding the proposed rule change. The Exchange created an ad hoc Expiration Procedures Committee consisting of its Floor Directors, other representatives from the Floor, upstairs traders and institutional brokers. The proposed rule change reflects the consensus reached by the committee. The Exchange received no written comments following either the June expiration or the September expiration concerning the procedures.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The Exchange requests that the proposed rule change be given accelerated effectiveness pursuant to section 19(b)(2) of the 1934 Act. Confirmation to the industry of the Exchange's intention to repeat the June 19 and September 18 procedures should occur as soon as possible to permit investors and firms to plan accordingly. Moreover, the procedures contain no substantive changes from the June 19 and Sepetember 18 procedures, on which there has been ample opportunity for comment. Accordingly, the Exchange seeks action by the Commission in time to permit notification of interested parties well in advance of the December 18 exemption.

The Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange, and in particular, the requirements of section 6 and the rules and regulations thereunder. The Commission believes that basing the settlement of index products on opening, as opposed to closing prices, on December 18 may help to accommodate index-related share volume. The proposed auxiliary procedures are intended to ensure that the Exchange may efficiently process sizable order flow at the open. The Commission believes that these procedures should work to reduce order imbalances at the open, and thus dampen potential volatility. In this regard, the procedures worked well during the June and September expirations and the December expiration should provide the Commission with another opportunity to assess whether these procedures are sufficient in dampening expiration volatility at the opening, or whether additional measures are necessary.

The Commission finds good cause for approving the proposed rule change prior to the thirtieth day after the date of publication of notice of filing thereof because the proposed rule change will enable the Exchange to quickly implement and notify market participants about procedures that it believes will appropriately address any index-related heightened share volume at the open on December 18, 1987.

IV. Solicitations of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all writtten statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552 will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street NW., Washington, DC 20549. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number in the caption above and should be submitted by January 11, 1988.

For the Commission, by the Division of Market Regulation pursuant to delegated authority.

Jonathan G. Katz,
Secretary.

Dated: December 16, 1987.

Applications for Certificates of Public Convenience and Necessity and Foreign Air Carrier Permits Filed During the Week Ending December 11, 1987

The following applications for certificates of public convenience and necessity and foreign air carrier permits were filed under Subpart Q of the Department of Transportation's Procedural Regulations (See 14 CFR 302.1701 *et. seq.*). The due date for answers, conforming application, or motion to modify scope are set forth below for each application. Following the answer period DOT may process the application by expedited procedures. Such procedures may consist of the adoption of a show-cause order, a tentative order, or in appropriate cases a final order without further proceedings.

Docket No. 45336

Date Filed: December 7, 1987
Due Date for Answers, Conforming Applications, or Motion to Modify Scope: January 4, 1988

Description: Application of International, S.A. pursuant to section 402 of the Act and Subpart Q of the Regulations requests a foreign air carrier permit to engage in scheduled and charter foreign air transportation of property and mail as follows: For the Dominican Republic via intermediate points as permitted to San Juan, Puerto Rico, Miami, Florida and/or New York, New York.

Docket No. 45348

Date Filed: December 8, 1987
Due Date for Answers, Conforming Applications, or Motions to Modify Scope: January 5, 1988

Description: Application of Haiti Trans Air, S.A. pursuant to section 402 of the Act and Subpart Q of the Regulations, applies for a foreign air carrier permit to engage in scheduled, non-scheduled and charter air transportation of persons, property and mail between points in Haiti, on the one hand, and Miami, Florida, and New York, New York on the other hand.

BILLING CODE 4910-62-M

Coast Guard

[CGD 11-87-06]

Vessel Certificates and Exemptions Under the International Regulations for Preventing Collisions at Sea (72 COLREGS)

AGENCY: Coast Guard, DOT.

ACTION: Notice of granting of certificates of alternative compliance to vessels.

SUMMARY: This notice lists the commercial vessel granted a Certificate of Alternative Compliance. The vessel which, due to its special construction and purpose, cannot comply fully with certain provisions of the International Regulations for Preventing Collisions at Sea (72 COLREGS) without interfering with the vessel's special functions. The intent of this notice is to allow the mariner to be aware of the listing of these commercial vessels that have been granted a Certificate of Alternative Compliance.

EFFECTIVE DATE: December 8, 1987.

FOR FURTHER INFORMATION CONTACT: LCDR F. L. McClain, Eleventh Coast Guard District Marine Safety Division, Union Bank Building Suite 709, 400 Oceangate, Long Beach, CA 90822. Telephone (213) 499-5330.

SUPPLEMENTARY INFORMATION: Under the provisions of subsection 1605(c) of Title 33 United States Code, the Coast Guard publishes, in the **Federal Register**, a listing of vessels granted Certificates of Alternative Compliance. Certificates of Alternative Compliance are based on a determination that a vessel cannot comply fully with International Rules of light(s), shape(s), and sound signal provisions without interference with the vessel's special function. The alternative allowed results in the closest possible compliance with Annex I of the 72 COLREGS. These vessels are incapable of complying with the 72 COLREGS light provisions. The following commercial vessel is not in compliance with the 72 COLREGS and has been issued a Certificate of Alternative Compliance.

Vessel and Official Number

The following vessel's sidelights are forward of the masthead light:

M/V RIG ENGINEER.....507458

Dated: December 10, 1987.

A. Bruce Baran,

Rear Admiral, U.S. Coast Guard Commander, Eleventh Coast Guard District.

BILLING CODE 4910-14-M

Federal Aviation Administration

[File Nos. FAA P-8110-2 and AC 21.17-1]

Advisory Circular Availability; Airship Design Criteria

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of Availability of Federal Aviation Administration Report Number FAA P-8110-2, "Airship Design Criteria," and Advisory Circular No. 21.17-1, "Type Certification—Airships"

SUMMARY: Federal Aviation Administration Report Number FAA P-8110-2, "Airship Design Criteria," issued November 2, 1987, provides acceptable airworthiness requirements for the type certification of conventional, near equilibrium, nonrigid airships. These Airship Design Criteria are referenced in Advisory Circular (AC) No. 21.17-1, "Type Certification—Airships" dated September 30, 1987, as an acceptable means, but not the only means, for the type certification of conventional, nonrigid airships. AC No. 21.17-1 also provides general guidance relative to airship type certification.

FOR FURTHER INFORMATION CONTACT: Mr. Lyle C. Davis, Aerospace Engineer, Policy and Procedures Branch, AWS-110, Telephone (202) 267-9583.

SUPPLEMENTARY INFORMATION: Federal Aviation Regulations (FAR) 21 was amended effective April 13, 1987, to provide procedures for the type certification and airworthiness certification of special classes of aircraft. Special classes of aircraft include gliders (including self-launching gliders), airships, and other kinds of aircraft that would be eligible for a standard airworthiness certification but for which no airworthiness standards have as yet been established as a separate part of subchapter C of the FAR. Airworthiness standards for these special classes of aircraft are designated in new FAR 21.17(b).

The FAA airship design criteria are contained in FAA document FAA P-8110-2 titled "Airship Design Criteria" dated November 2, 1987. This report contains the design requirements necessary to provide an equivalent level of safety to that prescribed in FAR 21.17(b) for special classes of aircraft. These criteria provide an acceptable certification basis for airships certificated in the normal category that have a passenger seating configuration, excluding pilot seats, of nine seats or less. For airships containing larger numbers of passengers, these criteria would require further consideration. These Airship Design Criteria are referenced in Advisory Circular (AC) No. 21.17-1, "Type Certification—Airships," dated September 30, 1987, as an acceptable means for the type certification of conventional, nonrigid airships.

AC No. 21.17-1 describes two acceptable criteria, but not the only means, for the type certification of airships that may be used by an applicant in showing compliance with new § 21.17(b) of Part 21 of the FAR. This AC also provides procedures and additional criteria necessary to obtain a U.S. type certificate for airships. Procedures are provided for other persons to develop and obtain FAA approval for their own design criteria, which may utilize all or part of the criteria specified in FAA P-8110-2.

Both the criteria specified in FAA P-8110-2 and the AC are helpful documents for persons interested in obtaining a U.S. type certificate for an airship. These criteria may be revised as the need arises. As experience is gained with U.S. airship certification programs, the FAA may consider establishing airship airworthiness standards as a separate part of the FAR.

How To Obtain Copies

Copies of FAA P-8110-2, "Airship Design Criteria" and AC No. 21.17-1, "Type Certification—Airships" may be obtained by contacting the U.S. Department of Transportation, Utilization and Storage Section, M-443.2, Room 2314, Nassif Building, Washington, DC 20590.

Issued in Washington, DC, on December 10, 1987.

Thomas E. McSweeny,

Manager, Aircraft Engineering Division, Office of Airworthiness.

BILLING CODE 4910-13-M

Intent To Prepare Environmental Impact Statement; Halls Crossing, UT

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of intent.

SUMMARY: The FAA, acting as lead agency, is issuing this notice public that Draft and Final Environmental Impact Statements (EIS) will be prepared for the siting and development of a new airport near Halls Crossing, Utah.

FOR FURTHER INFORMATION CONTACT: Mrs. Barbara Johnson, Federal Aviation Administration, Airports District Office, 10455 East 25th Avenue, Suite 301, Aurora, CO 80010. Telephone: (303) 340-5527.

SUPPLEMENTARY INFORMATION:

Proposed Action and Alternatives

The proposed action is the siting and development of a General Utility Stage I Airport near Halls Crossing, Utah. The new airport would be designed to accommodate aircraft of 12,500 or less. Potential alternatives to be evaluated include:

a. A new airport on Glen Canyon National Recreational Area in the vicinity of Halls Crossing, Utah.

b. A new airport off Glen Canyon National Recreation Area land on Bureau of Land Management land in the vicinity of Halls Crossing, Utah.

c. No-Build (continue using existing dirt airstrip at Halls Crossing as is).

d. Other reasonable and prudent alternatives which have potential.

An informational packet on the proposed action is available at the following locations:

FAA, Denver Airports District Office, 10455 East 25th Avenue, Suite 301, Aurora, CO 80010
National Park Service (NPS), Ranger Station, Halls Crossing, P.O. Box 5110, Lake Powell, Utah 84533
National Park Service (NPS), District Office, Bullfrog, P.O. Box 4304, Lake Powell, Utah 84533
Monticello Library, 66 North Main, P.O. Box 879, Monticello, Utah 84535
Bureau of Land Management, Moab District Office, 82 East Dogwood, P.O. Box 970 Moab, Utah 84532
Bureau of Land Management, San Juan Resource Area Office, 435 N. Main, Monticello, UT 84535
San Juan County Courthouse, Attn: Rick Bailey, P.O. Box 9, 117 S. Main, Monticello, Utah 84535
NPS Headquarters Building, 441 North Navajo Drive, P.O. Box 1057, Page, Arizona 86040

Scoping Process

In order to ensure that all significant issues related to the proposed action are indentified, a public participation meeting (scoping meeting) will be held to receive public input regarding the issues which the public feels should be addressed in the EIS. The meeting will be held at the following time and place:

VOL 52 ISS 244 DEC 21 1987 UMI

January 20, 1988, Wednesday, 7:00 p.m., San Juan County Courthouse, 117 S. Main, Monticello, Utah

Letters containing environmental concerns must be received by January 30, 1988, at the Federal Aviation Administration. Airports District Office, 10455 East 25th Avenue, Aurora, CO 80010, in order to be given consideration. Letters should be to the attention of Mrs. Barbara Johnson.

Approximate Release of Draft EIS: June 1988.

Approximate Release of Final EIS: August 1988.

Issued in Seattle, Washington, December 15, 1987.

Edward G. Tatum,

Manager, Airports Division.

[FR Doc. 87-29177 Filed 12-18-87; 8:45 am]

BILLING CODE 4910-13-M

Flight Service Station Closure; Salina, KS

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice.

SUMMARY: Notice is hereby given that on January 2, 1988, the Flight Service Station at Salina, Kansas will be closed. Thereafter, services to the general public at Salina, Kansas, will be provided by the Flight Service Station at Wichita, Kansas.

This information will be reflected in the next issue of the FAA Organizational Statement.

(Sec. 313(a), 72 Stat. 752; 49 U.S.C. 1354)

Issued in Kansas City, Missouri, on December 7, 1987.

Clarence E. Newbern,

Assistant Manager, Air Traffic Division.

[FR Doc. 87-29150 Filed 12-18-87; 8:45 am]

BILLING CODE 4910-13-M

DEPARTMENT OF THE TREASURY

Internal Revenue Service

Art Advisory Panel; Closed Meeting

AGENCY: Internal Revenue Service, Treasury.

ACTION: Notice of closed meeting of Art Advisory Panel.

SUMMARY: Closed meeting of the Art Advisory Panel will be held in Washington, DC.

DATE: The meeting will be held January 13, 1988.

FOR FURTHER INFORMATION CONTACT: Karen Carolan, CC:AP:V, 1111 Constitution Avenue NW., Room 2575, Washington, DC 20224, Telephone No. (202) 566-9259 (not a toll free number).

Notice is hereby given pursuant to section 10(a)(2) of the Federal Advisory Committee Act, 5 U.S.C. App. (1982), that a closed meeting of the Art Advisory Panel will be held on January 13 in Room 3029 beginning at 9:30 a.m., Internal Revenue Building, 1111 Constitution Avenue NW., Washington, DC 20224.

The agenda will consist of the review and evaluation of the acceptability of fair market value appraisals of works of art involved in federal income, estate, or gift tax returns. This will involve the discussion of material in individual tax returns made confidential by the provisions of section 6103 of Title 26 of the United States Code.

A determination as required by section 10(d) of the Federal Advisory Committee Act has been made that this meeting is concerned with matters listed in section 552b(c) (3), (4), (6), and (7) of Title 5 of the United States Code, and that the meeting will not be open to the public.

This document does not meet the criteria for significant regulations set forth in paragraph 8 of the Treasury Directive appearing in the **Federal Register** for Wednesday, November 8, 1978. (43 FR 52122.)

Lawrence B. Gibbs,

Commissioner.

BILLING CODE 4830-01-M

UNITED STATES INFORMATION AGENCY

Grants Program for Private Non-For-Profit Organizations in Support of International Educational and Cultural Activities

The United States Information Agency (USIA) announces a program of selective assistance and limited grant support to non-profit activities of United States institutions and organizations in the Private Sector. The program is designed to increase mutual understanding between the people of the U.S. and other countries and to strengthen the ties which unite our societies. The information collection involved in this solicitation is covered by OMB Clearance Number 3116-0175, entitled "A Grants Program for Private, Non-Profit Organizations in Support of International Educational and Cultural Activities," announced in the **Federal Register** June 3, 1987.

Private sector organizations interested in working cooperatively with USIA on the following concept are encouraged to so indicate:

A Security Affairs Workshop: The Role of Domestic Factors. The Office of Private Sector Programs (E/P) will assist in supporting a four-day security affairs workshop for political leaders and policy analysts from the Atlantic Alliance. The program will compare security policies among four case-study countries (the United Kingdom, the United States, West Germany, and one other nation recommended by the grantee institution) with particular emphasis on examining the domestic factors which have contributed to the formulation and/or acceptance of arms control and disarmament policies. Ideally, this workshop will take place in the United Kingdom or West Germany in May or June 1988. Participants will also include representatives from The Netherlands, Belgium, France, Spain, Portugal, Denmark and Italy.

USIA is most interested in working with organizations that show promise for innovative and cost-effective programming; and with organizations that have potential for obtaining private-sector funding in addition to USIA support. Organizations must have the substantive experties and logistical capability needed to successfully develop and conduct the above project and should also demonstrate a potential for designing programs which will have a lasting impact on their participants.

Interested organizations should submit a request for complete application materials—postmarked no later than fifteen days from the date of this notice—to the address listed below. The Office of Private Sector Programs will then forward a set of materials which contains proposal guidelines.

Office of Private Sector Programs, Bureau of Educational and Cultural Affairs, (ATTN: Initiative Programs) United States Information Agency, 301 4th Street SW., Washington, DC 20547.

Dated: December 4, 1987.

Robert Francis Smith,

Director, Office of Private Sector Programs.

BILLING CODE 8230-01-M

Sunshine Act Meetings

Federal Register

Vol. 52, No. 244

Monday, December 21, 1987

This section of the FEDERAL REGISTER contains notices of meetings published under the "Government in the Sunshine Act" (Pub. L. 94-409) 5 U.S.C. 552b(e)(3).

FEDERAL DEPOSIT INSURANCE CORPORATION

Agency Meeting

Pursuant to the provisions of the "Government in the Sunshine Act" (5 U.S.C. 552b), notice is hereby given that at 10:05 a.m. on Tuesday, December 15, 1987, the Board of Directors of the Federal Deposit Insurance Corporation met in closed session to consider: (1) Matters relating to the possible failure of certain insured banks; and (2) requests for financial assistance, pursuant to section 13(c) of the Federal Deposit Insurance Act.

In calling the meeting, the Board determined, on motion of Director C.C. Hope, Jr. (Appointive), seconded by Director Robert L. Clarke (Comptroller of the Currency), concurred in by Chairman L. William Seidman, that Corporation business required its consideration of the matters on less than seven days' notice to the public; that no earlier notice of the meeting was practicable; that the public interest did not require consideration of the matters in a meeting open to public observation; and that the matters could be considered in a closed meeting pursuant to subsections (c)(4), (c)(6), (c)(8), (c)(9)(A)(ii), and (c)(9)(B) of the "Government in the Sunshine Act" (5 U.S.C. 552b (c)(4), (c)(6), (c)(8), (c)(9)(A)(ii), and (c)(9)(B)).

Dated: December 16, 1987.

Federal Deposit Insurance Corporation.

In rule document 87-27316 beginning on page 46022 in the issue of Thursday, December 3, 1987, make the following corrections:

1. On page 46027, in the third column, in the seventh line, the first section reference should read "124.511(b)(1)(i)".

2. On page 46028, in the second column, in footnote 2, in the next to the last line, the citation should read "291c(e)(1)".

3. On page 46029, in the first column, in the eighth line, the section reference should read "§ 124.511(b)(1)(iii)(A)".

4. On the same page, in the second column, in the 29th line, "faor" should read "for".

5. On the same page, in the third column, in the first complete paragraph, in the fourth line, "an" should read "any".

6. On the same page, in the same column, in the last paragraph, in the fourth line, "oif" should read "of".

7. On page 46030, in the first column, in the first complete paragraph, in the fifth line, "for" should read "from".

8. On the same page, in the same column, in the last paragraph, in the 13th line, "facilities" should read "facility".

9. On the same page, in the second column, in the first paragraph, in the 13th line, "obligations" should read "obligation".

10. On the same page, in the third column, in the eighth line, "base levels" should read "base compliance levels".

11. On the same page, in the same column, in the first complete paragraph, in the 13th line, "prescribed" should read "prescribe"; in the 30th line, "obligation" should read "alternative"; and in the 39th line, "this" should read "thus".

12. On page 46031, in the first column, in the 14th line, "they provide" should read "they must provide".

13. On the same page, in the third column, in the ninth line, "**Federal Register**" should read "the **Federal Register**".

§ 124.502 [Corrected]

14. On page 46032, in the third column, in § 124.502(m)(2), in the 20th line, "of" should read "or".

§ 124.503 [Corrected]

15. On page 46033, in the first column, in § 124.503(b)(3)(ii), in the first line, "of justifiable" should read "of a justifiable".

§ 124.507 [Corrected]

16. On page 46035, in the first column, in § 124.507, in paragraph (b)(2)(i)(B), in the first line "apply" was misspelled, and in the fourth line, "upon application" should read "upon proper application"; in paragraph (b)(2)(iii), in the fourth line, "will be" should read "will not be"; and in paragraph (c)(2), in the first line, "*Preservice*" should read "*Postservice*".

§ 124.509 [Corrected]

17. On page 46036, in the first column, in § 124.509(d), in the second line, the section reference should read "§ 124.515".

§ 124.510 [Corrected]

18. On the same page, in the second column, in § 124.510(b), in the 14th line, the OMB control number should read "0915-0103".

§ 124.511 [Corrected]

19. On the same page, in the second column, in § 124.511, in paragraph (a) introductory text, in the first line, "that" should read "that a"; in paragraph (a)(1)(iv), in the second line, "complainants" should read "complainant"; and in paragraph (a)(3), in the 12th line, "with applicable" should read "with the applicable".

20. On the same page, in the third column, in § 124.511(b)(1)(iii), in the sixth line, "establish" should read "eligible".

§ 124.513 [Corrected]

21. On page 46038, in the first column, in § 124.513(d)(2)(i)(B), in the fourth line, "of each" should read "for each".

§ 124.514 [Corrected]

22. On the same page, in the third column, in § 124.514(d), in the next to the last line, "on" should read "or".

§ 124.515 [Corrected]

23. On the same page, in the same column, in § 124.515(a), in the 12th line, "with requirements" should read "with the requirements".

INFORMATION SECURITY OVERSIGHT OFFICE

32 CFR Part 2003

National Security Information Standard Forms

AGENCY: Information Security Oversight Office (ISOO).

ACTION: Final rule.

SUMMARY: This is an amemdment to 32 CFR 2003.20. In recent months, questions have been raised about the intended scope of the term "classifiable information," a term that has been used in the Standard Form 189, "Classified Information Nondisclosure Agreement," since it was first issued in September 1983. On August 3, and 11, 1987, ISOO published definitions of the term "classifiable information" in the **Federal Register.** These definitions were designed to clarify the meaning of this term and to demonstrate that it applies to a very narrow class of information. Subsequently, it has become evident that further clarification is desirable for purposes of alleviating concern and dispelling confusion about the actual scope of the nondisclosure obligation in regard to such information. Relevant explanatory information circulated by ISOO since August 1987 has proved useful in further clarifying the intended reach of the term "classifiable information." As a result, ISOO has determined that it would be desirable to amend its published definition to incorporate such further explanation. The revised definition does not change the substance of the term "classifiable information" in each executed nondisclosure agreement, but may, nevertheless, prove useful to a better understanding by affected employees of their nondisclosure obligations. While ISOO will include this definition in future reprints of the Standard Form 189, it is intended to apply to all editions of the Form.

EFFECTIVE DATE: December 21, 1987.

FOR FURTHER INFORMATION CONTACT: Steven Garfinkel, Director, ISOO. Telephone: (202) 535–7251.

SUPPLEMENTARY INFORMATION: This amendment to 32 CFR Part 2003 is issued pursuant to section 5.2(b)(7) of Executive Order 12356.

List of Subjects in 32 CFR Part 2003

Classified information, Executive orders, Information, National security information, Security information.

32 CFR Part 2003 is amended as follows:

PART 2003—NATIONAL SECURITY INFORMATION—STANDARD FORMS

1. The authority citation for 32 CFR Part 2003 continues to read:

Authority: Sec. 5.2(b)(7) of E.O. 12356.

Subpart B—Prescribed Forms

2. Section 2003.20(h)(1) is revised to read as follows:

§ 2003.20 Classified Information Nondisclosure Agreement: SF 189; Classified Information Nondisclosure Agreement (Industrial/Commercial/Non-Government): SF 189–A.

* * * * * *

(h) * * *

(1)(i) As used in paragraph 1 of SF 189, the term "classifiable information" refers to two categories of information only: (a) Unmarked *classified* information, including oral communications; and (b) *unclassified* information that meets the standards for classification and is in the process of a classification determination. "Classifiable information" does *not* refer to currently unclassified information that may be subject to possible classification at some future date, but is not currently in the process of a classification determination. Therefore, the only circumstances under which a party to SF 189 might violate its terms by disclosing *unclassified* information are when a party knows, or reasonably should know, that such information is in the process of a classification determination and requires interim protection as provided in section 1.1(c) of Executive Order 12356 or any other statute of Executive order that requires interim protection for certain unclassified information while a classifiction determination is pending.

(ii) A party to SF 189 may be liable for disclosing "classifiable information" only if: (a) He or she knows that the unmarked information is classified, or meets the standards for classification and is in the process of a classification determination, whether the unauthorized disclosure is willful or negligent; or (b) he or she should know that the unmarked information is classified, or meets the standards for classification and is in the process of a classification determination, in which case the unauthorized disclosure is negligent. In no instance could a party to SF 189 be liable for violating its nondisclosure provisions by disclosing unmarked information when, at the time of the disclosure, there was no basis to suggest, other than pure speculation, that the information was classified or in the process of a classification determination.

* * * * * *

Dated: December 16, 1987.

Steven Garfinkel,

Director, Information Security Oversight Office.

DEPARTMENT OF EDUCATION

Office of Special Education and Rehabilitative Services

Secondary Education and Transitional Services for Handicapped Youth Program

AGENCY: Department of Education.

ACTION: Notice of final annual funding priorities.

SUMMARY: The Secretary announces final annual funding priorities for the Secondary Education and Transitional Services for Handicapped Youth Program to ensure effective use of funds and to direct funds to areas of identified need during fiscal year 1988.

EFFECTIVE DATE: These final funding priorities take effect either 45 days after publication in the **Federal Register** or later if Congress takes certain adjournments. If you want to know the effective date of these annual funding priorities, call or write the Department of Education contact person.

FOR FURTHER INFORMATION CONTACT: Edward Wilson, Secondary Education and Transitional Services Branch, Office of Special Education Programs. Department of Education, 400 Maryland Avenue, SW. (Switzer Building, Room 3096—M/S 2313), Washington, DC 20202. Telephone: (202) 732–1121.

SUPPLEMENTARY INFORMATION: The Secondary Education and Transitional Services for Handicapped Youth Program is authorized by section 628 of Part C of the Education of the Handicapped Act (20 U.S.C. 1425), as amended by Pub. L. 99–457. This program supports research, development, demonstration, evaluation, and other types of projects that: (1) Strengthen and coordinate activities to assist in the transition to postsecondary education, vocational training, competitive employment, continuing education, or adult services for handicapped youth; (2) stimulate the improvement and development of programs for secondary special education; and (3) stimulate the improvement of the vocational and life skills of handicapped students to enable them to be better prepared for transition to adult life and services.

These final annual funding priorities target: (1) Projects for youth with severe handicaps to be prepared for and placed in supported work prior to their leaving school, and (2) projects to improve existing tracking systems for youth who complete or leave secondary education and to improve secondary education practices based on continued analysis of outcome data.

Summary of Comment and Response

A notice of proposed annual funding priorities was published in the **Federal Register** on September 10, 1987 (52 FR 34370). The public was given thirty days in which to comment. One comment was received from a professional organization in response to the notice of proposed annual funding priorities. The comment and the Department's response are summarized below:

Comment: One commenter expressed concern that projects funded under Priority (1), "Training and employment models for youth with severe handicaps" would be limited if focused only on severely handicapped youth and if supported employment models were the only outcome desired.

Response: No change has been made. This priority has been designed to develop school-based models for preparing and placing severely handicapped youth in supported employment. This priority is intended to stimulate the development of an educational option that is not generally made available by public schools.

Priorities

In accordance with the Education Department General Administrative Regulations (EDGAR) at 34 CFR 75.105(c)(3), the Secretary will give an absolute preference to applications addressing the following priorities:

(a) Priority 1: Training and Employment Models For Youth With Severe Handicaps

This priority supports school and community based projects for youth with severe handicaps to be prepared for and placed in supported work prior to leaving school. Models funded under this competition are expected to emphasize the following: (1) Collaboration with employers and measurement of employer satisfaction; (2) program evaluation with outcome measures to determine initial and continuing employment status; (3) working relationships between education agencies and supported work efforts at the State and/or local level; and (4) working partnerships with families that demonstrate a commitment to maximizing independence. The outcome of these models is to place youth with severe handicaps in supported employment. Supported employment must include paid employment in integrated work settings and ongoing support from adult service agencies.

(b) Priority 2: Secondary and Transition Services Follow-Up/Follow-Along Projects

This priority supports school and community-based projects to improve tracking systems for youth who complete or leave secondary programs and to revise curriculum and/or program options based on continued analysis of outcome data. Models funded under this competition are expected to emphasize the following: (1) A commitment to enhance existing procedures for a follow-up/follow-along system for all youth who complete or leave secondary education, and (2) revision of existing program options to improve outcomes for youth with handicaps completing or leaving school. Placement status of youth in the community must be the performance standard used to target these outcomes.

Program Authority: 20 U.S.C. 1425.

(Catalog of Federal Domestic Assistance No. 84.158; Secondary Education & Transitional Services Programs for Handicapped Persons)

Dated: December 4, 1987.

William J. Bennett,

Secretary of Education.

DEPARTMENT OF EDUCATION

[CFDA No. 84.128H]

Invitation of Applications for New Awards Under the Vocational Rehabilitation Service Projects for American Indians With Handicaps Program for Fiscal Year 1988

Purpose: This program supports projects that provide vocational rehabilitation services to American Indians with handicaps who reside on Federal and State reservations. Governing bodies of Indian tribes and consortia of such bodies located on Federal and State reservations may apply for these grants.

Deadline for Transmittal of Applications: March 31, 1988.

Applications Available: January 25, 1988.

Available Funds: $804,000.

Estimated Range of Awards: $180,000 to $220,000.

Estimated Average Size of Awards: $200,000.

Estimated Number of Awards: 4.

Project Period: 12 Months to 36 Months.

Applicable Regulations: (a) Regulations governing the Vocational Rehabilitation Service Projects for American Indians with Handicaps Program (34 CFR Part 369 and 371); and (b) the Education Department General Administrative Regulations (EDGAR), 34 CFR Parts 74, 75, 77, and 78.

For Applications or Information Contact: Frank S. Caracciolo, Office of Developmental Programs, Rehabilitation Services Administration, U.S. Department of Education, 400 Maryland Avenue SW., Room 3320 Switzer Building, MS 2312, Washington, DC 20202. Telephone: (202) 732–1340.

Program Authority: 29 U.S.C. 750.

Dated: December 15, 1987.

Madeleine Will,

Assistant Secretary for Special Education and Rehabilitative Services.

Department of Education

National Institute on Disability and Rehabilitation Research; Final Funding Priorities for Fiscal Year 1988; Notice

VOL 52 ISS 244 DEC 21 1987 UMI

DEPARTMENT OF EDUCATION

National Institute on Disability and Rehabilitation Research; Final Funding Priorities for Fiscal Year 1988

AGENCY: Department of Education.

ACTION: Notice of final funding priorities for fiscal year 1988.

SUMMARY: The Secretary of Education announces final funding priorities for research activities to be supported under the Rehabilitation Engineering Center (REC) program of the National Institute on Disability and Rehabilitation Research (NIDRR) in fiscal year 1988.

EFFECTIVE DATE: These priorities take effect either 45 days after publication in the Federal Register or later if Congress takes certain adjournments. If you want to know the effective date of these priorities, call or write the Department of Education contact person.

FOR FURTHER INFORMATION CONTACT: Betty Jo Berland, National Institute on Disability and Rehabilitation Research (Telephone: (202) 732-1139). Deaf and hearing-impaired individuals may call (202) 732-1198 for TTY services.

SUPPLEMENTARY INFORMATION: Authority for the Rehabilitation Engineering Center program of NIDRR is contained in section 204(b)(2) of the Rehabilitation Act of 1973, as amended. Under this program, awards are made to public and private agencies and organizations including institutions of higher education, Indian tribes, and tribal organizations. NIDRR can make awards for up to sixty months.

NIDRR supports a program of Rehabilitation Engineering Centers (RECs) that conduct coordinated programs of advanced research of an engineering or technological nature. RECs work to develop systems for the exchange of technical and engineering information and to improve the distribution of technological devices and equipment to individuals with handicaps. Each REC must be located in a clinical rehabilitation setting and is encouraged to collaborate with institutions of higher education.

Each REC conducts a program of research, scientific evaluation, and training that advances the state of the art in technology or its application; contributes substantially to the solution of rehabilitation problems; and becomes an acknowledged center of excellence in a given subject area. RECs are encouraged to develop practical applications for their research through scientific evaluation activities that validate their findings as well as related findings of other centers. RECs generally conduct training programs to disseminate and encourage utilization of new rehabilitation engineering knowledge through such means as development of or contribution to undergraduate and graduate texts and curricula, in-service training, continuing education, and the distribution of information and appropriate technology. Each REC must ensure that all training and information materials developed by the Center are presented in several formats that will be accessible to individuals with various types of sensory and mobility impairments.

NIDRR regulations authorize the Secretary to establish research priorities by reserving funds to support particular research activities (see 34 CFR 353.32). NIDRR will conduct, not later than three years after the establishment of any REC, one or more reviews of the activities and achievements of the Center, to include review by peers. Continued funding depends at all times on satisfactory performance and accomplishment in accordance with the provisions of 34 CFR 75.253.

NIDRR published a Notice of Proposed Priorities in the Federal Register on August 21, 1987 at 52 FR 31730. NIDRR received some comments on these proposed priorities. While many of the comments made good suggestions, NIDRR believes that the meritorious suggestions are either encompassed or implied in the scope of the priorities as proposed. Therefore, no changes were made to the priorities as proposed. A summary of the comments and the Secretary's responses to them is included at the end of this notice.

The publication of these final priorities does not bind the Federal Government to fund projects in any of these areas. Funding of particular projects depends on the availability of funds and on the number and quality of the applications that are received in response to the priorities. The closing date notice for these Centers was published on August 24, 1987 in the Federal Register. The closing date was October 30, 1987. Prospective applicants were advised to base their applications on the proposed priorities. As the closing date has passed, NIDRR is no longer soliciting applications in this program.

Final Priorities (1)

Improved Wheelchair and Seating Design

Nearly one million Americans with handicaps use wheelchairs as their primary means of mobility. These individuals need wheelchairs that are safer, more reliable, more durable, more versatile, and adaptable to personal requirements if they are to achieve their full potentials for independent and productive lives. Current wheelchair frames are often unstable or fragile, and the chairs are not suitable for different terrains or in all vocational, educational, recreational, or independent living settings that are important for complete community integration of individuals who use wheelchairs. Wheelchair power systems are short-term, and practical backup power systems are needed. Disabled individuals need control systems for powered wheelchairs that are durable and reliable, and can be adapted for easy use by persons with different types of functional limitations.

Wheelchair seating systems are critical for the sustained use of wheelchairs. Many disabled individuals are able to return to work, school, or community living in wheelchairs, if they have customized seating that provides appropriate support for soft tissues and for posture.

A critical element of any Center to be supported under this priority will be the involvement of disabled individuals and their families in the planning, implementation, and evaluation of the Center's activities. An REC in wheelchair development must emphasize the development of practical products and include opportunities for cooperation with industry in the various stages of product development, testing, and marketing. The Center must develop a knowledge base on the current state-of-the-art in wheelchair and seating design, maintain an information base in its area of expertise, and provide technical assistance to rehabilitation counselors, clinicians, and other providers of rehabilitation technology services. A Center in this area must make particular efforts to establish linkages with Independent Living Centers, spinal cord injury centers, and brain injury centers to obtain needs assessments and evaluations of its products.

An absolute priority is announced for an REC in this area to:

- Conduct a survey of wheelchair sale/repair establishments to assess the frequency and type of malfunctions of commercially marketed manual and electric wheelchairs and establish a research program which focuses on developing wheelchairs which do not exhibit the defects found in the survey;
- Develop new designs for both manual and powered wheelchairs that are safer and more reliable, taking into account the needs of disabled individuals of all ages;

- Develop innovative designs for manual wheelchairs that are stronger and more durable, and test the potential use of new, lightweight materials;
- Design wheelchairs that are suitable for a variety of employment and independent living activities and adaptable for various environments;
- Develop new wheelchair power systems to provide longer-lasting and more reliable power, and secondary power sources;
- Develop new wheelchair controls with appropriate back-up systems that are reliable, manageable, and adaptable;
- Design and develop cost-effective customized seating systems which will provide appropriate individual support, and also develop modular seating systems which can be used in wheelchairs as well as on other suitable bases;
- Develop training materials and provide training for rehabilitation clinicians and for wheelchair users, family members, and personal attendants in the appropriate prescription and use of wheelchairs and seating;
- Provide a resource for training of engineers and scientists in rehabilitation engineering, by hosting guest investigators from other RECs, public agencies, and private industry, or by designating Center staff for temporary assignments with other RECs; and
- Conduct two state-of-the-art studies, one on manual wheelchairs and one on electric wheelchairs.

Prosthetics and Orthotics

Several million individuals have impaired limb or spinal functions that can be ameliorated by appropriate use of effective technological devices and systems. These systems include orthoses that are implanted to replace or supplement body systems and prostheses that are attached to trunk or limbs to extend functional capacity. These types of devices are needed for disabled persons of all ages.

Existing devices and systems are often cumbersome, uncomfortable, expensive, of limited capacity, or insufficiently versatile for use in the necessary range of educational, vocational, and independent living settings. However, the state-of-the-art in such fields as electronics, materials development, computer-assisted design, and computer-assisted manufacture is sufficiently advanced to support the development of prosthetic and orthotic devices that are more reliable, adaptable, comfortable, and affordable, and provide greater enhancement of function.

A critical element of any Center to be supported under this prioirity will be the involvement of disabled individuals and their families in the planning, development, and review of the work of the Center. A Center in this area must serve as a national resource for information on prosthetics, orthotics, and robotics; and maintain a database on the results of research in this area. The Center must participate in the development of a system of professional exchange of researchers and clinicians with other relevant RECs, research projects sponsored by NIDRR or other agencies, Independent Living Centers, and private industry.

An absolute priority is announced for an REC in this area to:

- Conduct a program of research and development in the application of computer-aided design and computer-aided manufacture to produce improved prosthetic and orthotic devices of all types;
- Develop applications for new and improved materials (stronger, lightweight, more durable, tissue compatible) in the fabrication of prostheses and orthoses;
- Develop design criteria for prosthetic and orthotic devices intended to improve functioning in all joints;
- Evaluate current techniques for prescribing and fitting prostheses and orthoses and the accompanying control mechanisms, and develop standard procedures based on principles of biomechanics and functional requirements for the devices;
- Develop materials and provide training to clinicians, disabled consumers, rehabilitation practitioners, prosthetists and orthotists, and other relevant parties in the prescription, use, maintenance, and assessment of these aids and devices;
- Develop linkages with sources for the manufacture and distribution of these devices to assure that the most appropriate devices are prescribed, used, and evaluated; and
- Conduct at least one state-of-the-art study on prosthetics and orthotics.

Transportation Systems for Persons with Disabilities

Individuals with disabilities are often further handicapped by the inaccessibility of public transportation and the inadequacy of adaptations for personal licensed vehicles. Many persons with disabilities could live independently in the community, increase their vocational and earning potential, and participate in a full-range of educational and recreational activities if they had greater personal mobility for travel in local and distant areas. Disabled individuals of all ages share the need for improved transportation systems to enhance their personal mobility.

There are no standards for the adaptation of personal vehicles to accommodate disabled individuals as drivers or passengers. Adaptations may compromise the structural stability and safety of the vehicles, may not provide safe and rapid exit from the vehicle or easy boarding, and may include control devices that are ineffective, unsafe, or otherwise inadequate. Seating systems and systems for securing wheelchairs in the vehicles are often unsafe and ineffective. Individuals with hearing deficits need alerting systems to facilitate safer driving.

Mass transit systems are often unsafe or inaccessible for those with mobility, cognitive, and sensory impairments. Again, safe and secure seating and wheelchair anchoring systems, emergency exit systems, and signal systems to promote the mobility of sensory impaired individuals are needed to make public transportation more accessible to persons with disabilities.

Any Center to be supported under this priority must provide for the substantial involvement of disabled persons and their families in the planning, implementation, and assessment of Center activities, especially in the assessment of needs, the nomination of products to be tested, and the evaluation of devices and systems. An REC in this area must provide for linkages with other appropriate agencies involved in the provision or regulation of public and private transportation and with private sector sources to promote the manufacture, distribution, and testing of new devices and systems. The center should serve as a national resource for information on vehicular adaptations and modifications of mass transit systems.

An absolute priority is announced for an REC to:

- Evaluate existing devices to provide safe seating and secure tie-downs for wheelchairs in both automobiles and mass transit vehicles, and develop and test new devices and systems;
- Design, develop, and test methods to provide access to and exit from personal vehicles while maintaining the structural integrity of the vehicle;
- Design, develop, and test control systems to enable persons with disabilities to drive automobiles, assuring that the control systems do not compromise the vehicle's compliance with standards set by the Society of Automotive Engineers and the United States Department of Transportation;

• Design, develop, and test safety devices such as emergency systems for use in exiting vehicles after accidents or power failures; alerting devices for hearing impaired drivers; and guidance systems to enable individuals with visual, hearing, or cognitive deficits to safely use mass transit;

• Develop materials and provide training to engineers; disabled drivers; personal attendants; rehabilitation counselors; operators of public transportation, taxicabs, and livery services; and other appropriate individuals in the adaptation and use of safe devices;

• Serve as a center of excellence in the topic, providing for the exchange of experts with industry, other public agencies, and other research and engineering centers; and

• Conduct at least one state-of-the-art study each in the areas of mass transit and personal licensed vehicles.

Evaluation of Rehabilitation Technology

Many assistive devices and other rehabilitation technologies are rarely prescribed by clinicians and are even less frequently used by persons with disabilities. Often, these devices have not been adequately tested, nor have professional and consumer responses to them been assessed. Inventors, designers, developers, or manufacturers may not have the capability to design or conduct adequate product tests. In some instances, the techniques for measurement and testing are themselves inadequate and the development and refinement of assessment methods is a prerequisite to product evaluation.

NIDRR believes that appropriate evaluation of rehabilitation technology is necessary to ensure the safety, utility, practicality, and appropriateness of devices for persons with disabilities. Adequate assessment will also increase the frequency with which clinicians make appropriate prescriptions and consumers make effective use of new technologies.

A critical element of any Center to be funded in response to this priority will be the involvement of disabled individuals in the planning, implementation, and review of the Center's activities, and specifically in the process of selecting technologies to be tested and specifying certain consumer-oriented performance criteria. A center in this area must serve as a national resource for information on establishing evaluation standards and the results of evaluation studies.

An absolute priority in announced for an REC to:

• Design and develop performance criteria and protocols for testing rehabilitation devices for the purpose of evaluating the effectiveness of the devices to restore, replace or supplement function;

• Provide a resource for technical assistance on the adaptation and implementation of evaluation protocols for product developers and manufacturers in both the private and public sectors to increase the frequency and improve the quality of product evaluation;

• Conduct direct evaluations of selected new or untested rehabilitation technologies to assess the effectiveness of the device;

• Advance the state-of-the-art in technology evaluation by developing, testing, or refining measurement methods and standard evaluation protocols;

• Develop and disseminate to service providers and disabled persons information on both testing methods and the results of tests performed by or in conjunction with the Center, assuring that all information packages are accessible to individuals with various types of disabilities;

• Provide opportunities for professional development through the temporary exchange of staff with other RECs, other government agencies such as the National Science Foundation (NSF), private industry, or other relevant organizations; and

• Conduct at least one comprehensive study of the state-of-the-art study in an important area of product evaluation, and serve as a national resource on evaluation of rehabilitation technology.

Quantification of Human Physical Performance

Effective rehabilitation is dependent on the reliable and valid measurement of changes in physical performance at various stages of the rehabilitation process. Failure to accurately assess physical capacities can lead to years of ineffective treatment.

Technological capability exists to support the development of accurate diagnostic instruments. Accurate initial diagnosis is a prerequisite to the prescription of appropriate therapeutic interventions. Measures of change in physical performance permit the assessment of rehabilitation outcomes and the redirection of treatment regimens when necessary. Such assessments are important to all aspects of physical restoration, vocational rehabilitation, and preparation for independent living. An REC in this area should capitalize on existing technologies to develop preciae instrumentation to measure baseline values of physical capability prior to rehabilitation and to track changes in performance subsequent to therapeutic intervention(s).

A critical element of any Center to be established under this priority will be the involvement of disabled individuals and family members in the planning and conduct of the Center's activities, particularly in reviewing the consumer acceptability of the various instruments and tests. The center will serve as a repository of knowledge and information on quantification of human performance.

An absolute priority is announced for an REC to:

• Design and develop safe, reliable, easy-to-use, accurate, and affordable instruments to measure active and passive range of motion and strength in the extremities and trunk;

• Design and develop instruments to measure neuromuscular system functions (i.e. spasticity) and test the effects of treatment interventions such as surgery, orthoses, exercise, functional electrical stimulation (FES), and others, on neuromuscular performance and restoration of function;

• Develop and test complete assessment systems to accurately evaluate the full range of physical performance at various stages of the rehabilitation process;

• Prepare and disseminate instructional packages in the use of new measurement instruments, and provide direct and indirect training for rehabilitation clinicians in the use of these instruments; and

• Provide for the advancement of knowledge in this area by conducting at least one state-of-the-art study in quantification of human performance and participate in time-limited professional exchange programs with NSF, National Institutes of Health (NIH), other RECs, or other appropriate agencies.

Augmentative Communication Devices

The inability to communicate in easily understood language isolates an individual and renders education, employment, or social interaction extremely difficult. The loss of effective speech can result from a birth anomaly, childhood disease, trauma, cancer, stroke, and a variety of other neurological disorders. Recent developments in systems for synthetic speech and speech recognition indicate a potential to assist communications through technology. However, existing systems are slow and difficult to operate, yield unrealistic speech, and

cannot produce print output with speed or accuracy.

An REC in this area should extend the current state of technology, develop a thorough knowledge base on the subject and serve as a national resource for information on communication devices. A critical element of any Center to be supported in this priority area will be the involvement of disabled individuals and their families in the planning, conduct, and review of all activities of the Center.

An absolute priority is announced for an REC to:

• Develop communication devices that improve the speed and accuracy of voice or print outputs;

• Develop methods and interface devices to enable individuals with a wide range of disabling conditions and functional impairments to use these augmentative communication systems;

• Develop appropriate materials for dissemination of information about augmentative communications technology to clinicians, educators, counselors, and persons with disabilities, assuring that the materials are accessible in appropriate media for individuals with all types of functional limitations;

• Provide training and technical assistance to individuals with disabilities, their family members and attendants, rehabilitation practitioners and educators on the selection, use, and maintenance of systems that augment communications;

• Develop and implement appropriate strategies to involve manufacturers and distributors in the process of making useful devices available to disabled persons;

• Provide opportunities for exchange of engineers and scientists with other RECs, NSF, NIH, National Aeronautics and Space Administration (NASA), or other appropriate sources; and

• Conduct at least one state-of-the-art study on a significant aspect of augmentative communication devices.

Technologies to Promote "Hearing" in Deaf and Hearing Impaired Individuals

Individuals who are hearing impaired due to conductive, sensorineural, mixed, or central hearing deficits may benefit from the use of comfortable and effective hearing aids. Hearing aid technology has advanced significantly in recent years, and the state-of-the-art is such that substantial further improvements can now be made in the amplification, filtering, and frequency responses to improve the quality of the sound perceived by the user.

Deaf individuals can benefit from technologies which convert sound into tactile or visual signals. These technologies include vibrotactile devices, alarm lights and other instrumental alerts. Improved hearing aids and other devices must be developed for all age groups, and for persons with multiple handicaps, in order to facilitate education, employment, and independent living.

An REC to further develop these technologies must include deaf and hearing impaired individuals and their family members in planning and conducting its activities, must maintain an information resource in the subject, and must interface with manufacturers and distributors to promote widespread dissemination of the latest technologies. The center should serve as a national resource for information on technologies for hearing impaired individuals.

An absolute priority is announced for an REC to:

• Develop performance standards, and evaluate selected hearing aid systems for quality of amplification, frequency response, and filtration systems in clinical as well as laboratory environments;

• Design and develop new hearing aid systems that are reliable, affordable, attractive, and produce an improved quality of sound;

• Design and develop new technologies to recognize and reproduce sounds from various sources, using alternative sensory signals such as light, vibration, or tactile stimuli;

• Design and develop new, reliable alerting systems to provide deaf and hearing impaired individuals with warnings of emergencies of hazardous conditions;

• Design and develop diagnostic and prescriptive instruments and criteria to facilitate the appropriate use of these new technologies by deaf and hearing impaired individuals;

• Develop information and training materials in various media that are accessible to people with all types of disabilities, and provide training to disabled individuals and family members, clinicians, educators, counselors, third-party payers, programs for the elderly, Independent Living programs, and industry in the selection, use and maintenance of optimum technologies for "hearing"; and

• Conduct at least one state-of-the-art study on hearing aid technology and one on alternate technologies for deaf persons, and participate in the exchange of engineers and researchers with other RECs, NSF, NIH, industry, or service agencies.

Functional Electrical Stimulation

Electrical stimulation is commonly used as a rehabilitation tool with people who have neurological impairments, spinal cord injuries, scoliosis, and other medical problems. Functional Electrical Stimulation (FES) is probably best known to the public for the work that has been done over the past twenty-five years to restore limited standing and ambulation to spinal cord injured patients. However, while these experiments have received widespread media attention, FES has a much broader application in treating people experiencing a variety of neuromuscular, musculoskeletal, and other medical problems. Potential beneficiaries of FES include individuals with neuromuscular or idiopathic spinal deformities; persons with prosthetic joints; individuals with cerebral lesions due to stroke or head injury; and persons with urinary incontinence, as well as those with spinal cord injuries.

The current challenge is to develop and refine technology to extend the application of FES to other types of impairments, to improve electrodes and implantation to make FES devices more practical to use, to increase the value of FES in spinal cord injury, and to evaluate and disseminate the technology.

A critical element of any Center to be funded in response to this priority will be the involvement of disabled individuals in the planning, conduct, and evaluation of Center activities. The centers will participate in the exchange of engineers and scientists with other research and development institutions. The center must emphasize the development of practical products, and must cooperate with industry to promote manufacture, distribution, and evaluation of FES systems.

An absolute priority is announced for an REC to:

• Develop and maintain a comprehensive information base on FES, disseminating materials in accessible format to persons with disabilities, clinicians, Independent Living programs, counselors, third-party payers, and others, and coordinate the collation of research data and product information from other Centers or projects studying FES.

• Design, develop, and evaluate FES devices and systems, including personal controls for activation and feedback, to promote standing and walking for individuals with lower extremity neuromuscular impairments;

• Design, develop and evaluate improved devices and intervention

VOL
52
ISS
244
DE
21
1987
UMI

systems to increase hand and arm function in individuals with upper extremity impairments;

• Design, develop, and test external orthotic devices to improve the function, safety, and reliability of FES systems for both upper and lower extremities;

• Design and develop FES and hybrid FES/orthotic systems to stabilize trunk musculature or correct trunk deformities; and

• Conduct comprehensive state-of-the-art studies in several significant aspects of functional electrical stimulation.

Modifications to Jobs, Worksites, and Educational Settings

Disabled individuals can have significantly more employment options and educational opportunities if worksites and classrooms are modified and tasks are restructured to accommodate functional limitations. Current technology can support effective modifications to work stations, work equipment, classrooms, laboratories, auxiliary locations (such as cafeterias, lockers, or recreation areas), and improved access to all areas of schools or workplaces. Site modification is a particularly valuable approach to assisting employees and students who acquire disabilities to remain in their occupations.

The restructuring the jobs and job tasks can enable individuals with various types of functional limitations to perform tasks and jobs they would otherwise be unable to manage. These adaptations may include changing the sequence of tasks, automating parts to some tasks, coverting signals from light to sound or vice-versa, or modifying taks to utilize new tools or other technological developments.

A critical element of any Center to be supported under this priority will be the involvement of disabled individuals in the planning, conduct, and assessment of Center activities, including but not limited to, the clinical testing of proposed modifications. An REC in this area must serve as a national resource of information on the subject; must see that its findings are incorporated in other relevant databases; and must provide an opportunity for the exchange of engineers, industrial psychologists, scientists, and rehabilitation practitioners with other RECs, state rehabilitation agencies, industry, rehabilitation facilities, and other relevant resources. The Center must also develop appropriate linkages with industry—as both employers of disabled individuals and as manufacturers of adaptive equipment—to ensure that adaptations are available and used.

An absolute priority is announced for an REC to:

• Develop criteria and standards for effective modifications to school and work sites, and document the most effective means for adapting different types of environments;

• Design and develop technologies to mechanize and automate parts of production systems to enable disabled persons to perform job or educational tasks, and develop systems to reorganize tasks;

• Develop information and training programs on the use of these modifications, and provide training to disabled individuals, employers, educators, independent living programs, rehabilitation counselors, and other engineers or scientists; and

• Conduct one or more state-of-the-art studies on modifications to jobs, worksites and educational settings.

Access to Computers and Electronic Equipment

Persons with disabilities constitute a significant potential market for computers, peripherals, and other electronic devices. Disabled persons have at minmum the same needs to use computers and other electronic equipment for work, education, or independent living, as do persons without disabilities. In addition, disabled persons may have specialized uses for computers and electronic equipment to replace or extend functional abilities. However, such equipment (both hardware and software) is often inaccessible to individuals with various types of functional impairments. Computer inaccessibility may result from software reliance on visual, sound, or spoken commands, color coding, or performing two or ore functions simultaneously. Hardware switches or operating keys may be physically or visually inaccessible to individuals with disabilities.

There is evidence that manufacturers are interested in making equipment accessible, but they often do not find it cost-effective to develop the necessary adaptations to accommodate the compete range of functional impairments that may be present in potential users. NIDRR proposes to support a Center to design and develop alternative access systems for standard computers and electronic devices. A critical element of such a Center will be the involvement of disabled individuals in planning, conducting, and reviewing the activities of the Center, including in the assessment of needs and the evaluation of Center products. The Center must participate in the exchange of experts with other RECs, private industry, and other appropriate public and private agencies.

An absolute priority is announced to an REC to:

• Design and develop performance criteria for accessible computer hardware and software and other electronic devices;

• Investigate the feasibility of a standard keyboard transfer function using a serial port, to enable disabled persons to access standard computers with personal interface devices;

• Design, develop, and test new interface aids to accommodate various specific functional impairments of persons with brain injury, language disorders, upper extremity disorders, spinal injuries, sensory deficits, and other disabling conditions;

• Establish effective linkages with manufacturers and distributors of standard computers to assure testing, acceptance, and incorporation of design modifications;

• Develop and disseminate accessible informational materials and training programs to make manufacturers, distributors, disabled persons, educators, rehabilitation counselors, and others, aware of the availability of and able to use computer access systems; and

• Conduct at least one state-of-the-art study on access to computers and electronic equipment.

Low Back Pain

Low back pain is a common disabling condition, leading to lost work time and costly health care, and seriously impairing the quality of the lives of affected individuals. Diagnosed low back pain accounts for ten percent of all reported chronic conditions and is the most frequent cause of activity limitation in persons under age sixty-four. There are over one million adults disabled by low back pain, and the incidence of temporary disability is another million per year. It is estimated that low back injuries account for one-fifth of workers' compensation awards, and are among the more costly types of claims.

A critical element of any Center to be funded under this priority is the involvement of disabled individuals in planning, conducting, and reviewing all Center activities. Such a Center must become a national repository of information on the topic area; and must provide for the exchange of scientists and engineers with other RECs, NSF, NIH, NASA, or other relevant sources. In particular, this Center must interface with other NIDRR research endeavors in spinal cord injury, prosthetics and orthotics, custom seating designs, and worksite modification.

An absolute priority is announced for an REC to:

• Identify risk factors for low back pain and develop intervention strategies which reduce the incidence of low back pain;

• Develop accurate measurement tools to assess the factors that contribute to low back pain;

• Study the use and effectivenes of currently available orthotic devices in the treatment of low back pain, and design and evaluate new orthotic devices;

• Evaluate the effectiveness of current interventions (movement, manipulation, and exercise) to reduce or eliminate low back pain;

• Assess persons not effectively treated by current intervention techniques to determine specific characteristics which predict therapeutic outcomes;

• Develop worksite modifications to reduce or eliminate low back injury, pain from injury, and lost work time;

• Develop accessible information and training materials on the latest technologies for amelioration of low back pain for clinicians, disabled persons, third-party payers, vocational counselors and employers; and

• Conduct at least one state-of-the-art study on low back pain.

Rehabilitation Technology Transfer

A major effort is required to ensure that disabled individuals receive and use the appropriate technological devices. Advances in the development of rehabilitation technology frequently are not reflected in the manufacturing, distribution, prescription, purchase, and use of appropriate technology.

Barriers to optimum use may result from lack of market knowledge, concerns about product liability, lack of incentives for production, lack of qualified technology service providers, or lack of awareness of resources to finance rehabilitation technology purchases. NIDRR proposes to establish a major effort to stimulate the production and marketing of technologies, enhance rehabilitation technology service delivery networks, elevate the qualifications of technology service providers, and assist in making new research knowledge available for existing technology data bases addressing consumers and professionals.

A critical element of any Center to be funded under this priority is the involvement of disabled individuals in planning, conducting, and reviewing all Center activities. Such a Center must become a national repository of information on techniques of technology transfer and training technologists, and must provide for the exchange of scientists and engineers with other RECs, NSF, NIH, NASA, or other relevant sources.

This Center must interface with other NIDRR research endeavors in technology, and will assist in the provision of knowledge derived from technology research to existing consumer-oriented data bases. This Center must work closely with private industry, and with the Regional Rehabilitation Continuing Education Program (RRCEP) and other training resources to promote the adoption of improve training for rehabilitation technologists. This Center will need to propose and develop productive linkages with the new REC on Technology Evaluation and also with the two Centers that NIDRR is establishing pursuant to the Rehabilitation Act Amendments of 1986 to disseminate rehabilitation technology.

An absolute priority is announced for an REC in this area to:

• Investigate issues of product safety and product liability as barriers to the development and manufacture of rehabilitation technology;

• Investigate existing service delivery systems for rehabilitation technology in order to design and test an improved national network for delivery of rehabilitation technology;

• Develop and test accessible training materials and packages, arrange for the adoption of new training programs, and develop criteria to assess qualifications of rehabilitation technologists, in order to ensure that services to individuals with handicaps include expert technology consultation and products;

• Conduct market studies to assess the needs and characteristics of potential user populations, to stimulate production and distribution of products, and to identify resources to finance purchase of technologies by individuals with disabilities;

• Collate information from other RECs and other sources to provide reliable input on technology to data bases, such as ABLEDATA, serving consumers, service providers, and manufacturers; and

• Conduct at least one state-of-the-art study in each of the areas of technology distribution and training of technologists.

Analysis of Comments and Changes

In response to the Secretary's invitation in the Notice of Proposed Priorities, fifty-two parties submitted comments on the proposed regulations. An analysis of the comments and the changes in the regulations since publication of the notice of proposed priorities follows.

Substantive issues are grouped according to those that are applicable generally to all or most priorities, and those that are applicable to individual priorities. The general comments are discussed first, followed by those that pertain to specific priorities. Technical and other minor changes—and changes the Secretary is not legally authorized to make under the applicable statutory authority—are not addressed.

Inclusion of Individuals With Cognitive Impairments in Various Priorities

Comments: One commenter suggested that individuals with cognitive impairments, including mental retardation, are often overlooked as potential consumers of technology, and urged that individuals with these disabilities be included as providers of input and feedback for the Centers and for the evaluation of technology.

Discussion: The Secretary believes that the priorities as stated imply that the Centers must involve individuals with all types of disabilities, as appropriate, in Center activities. NIDRR intends that all Centers achieve this goal and will address this issue in grant negotiations and program monitoring.

Changes: None.

General Involvement of RECs with Clinicians

Comments: Several commenters noted that RECs should work closely with clinicians, including physical, occupational, and speech therapists, teachers, nurses, counselors, physicians, and others, in the assessment of technology needs and the evaluation of products.

Discussion: The Secretary agrees that this is an important component of all Centers and that clinicians and disabled consumers are the major sources of input and feedback. However, this is implied within the priorities as stated.

Changes: None.

Inclusion of Reference to Individuals with Communication Impairments

Comments: One commenter recommended that each priority should mention specifically that individuals with speech, hearing, and communicative disorders are among the target populations.

Discussion: The Secretary expects that Centers will address the needs of all appropriate disability target populations. However, the Secretary

prefers not to list all disability groups, but to advise prospective applicants generally that appropriate target groups should not be overlooked.

Changes: None.

Number of Centers and Funding Levels

Comments: Several commenters suggested that the Secretary should also invite comments on the proposed number of Centers and funding levels for the Centers.

Discussion: Proposed priorities are announced for comment because they have a quasi-regulatory effect in that they impose programmatic constraints on prospective applicants that are not explicitly stated in legislation. Funding levels are target estimates, and funding estimates are not considered to be regulatory actions, since the legislation does not imply any funding level or funding range for these projects. The Secretary is, however, pleased to consider comments on funding levels or other issues independent of this public comment process.

Changes: None.

Emphasis on Very Young and Elderly Populations

Comments: One commenter stated the priorities should place emphasis on the technology needs of disabled persons under three years and over sixty-five years of age.

Discussion: The current priorities do not preclude an applicant from focusing on any age group, and the mandate of NIDRR clearly includes these two age groups.

Transportation Systems

Comments: One commenter suggested that the priority on transportation systems should be broadened to include research on driver evaluations and techniques for matching equipment to disabled individuals.

One commenter suggested that the Center on Transportation systems should address the development of wheelchair batteries that are more suitable for airline travel than current wet cell or dry cell batteries.

One commenter recommended that the priority on transportation systems address policy issues in mass transit, such as elimination of barriers and public participation in policy development.

One commenter suggested that the priority on transportation systems should include increased emphasis on psychological and cognitive factors associated with the use of mass transit or personal licensed vehicles.

Discussion: The Secretary agrees that driver evaluation and equipment prescription are important issues and notes that applicants are not precluded from addressing these issues in their approach to the priority as stated. NIDRR also will consider adopting priorities for research and development projects in these areas.

Similarly, prospective applicants may address the need for research on more transportable battery power systems under the present priority; however, the Secretary does not believe that all applicants should be required to address the development of batteries.

The Secretary does not believe the policy issues or issues of cognitive problems in the use of transportation technology would be addressed most effectively in the context of an Engineering Center. Instead, NIDRR encourages prospective applicants to consider addressing these issues, as well as those of driver evaluation, equipment prescription, and transportable batteries, through discrete grants in the Field-Initiated and Innovation competitions.

Changes: None.

Quantification of Human Performance

Comments: One commenter recommended that the priority on Quantification of Human Physical Performance should include assessment of the cognitive demands that assistive devices place on their users.

Several commenters stated that additional aspects of physical performance, such as speed, accuracy, endurance, steadiness, and coordination should be included in the priority for an REC in quantification of human physical performance.

Discussion: The Secretary agrees that assessment of cognitive needs is an important issue. However, NIDRR believes that this issue should be addressed through one or more discrete projects directed specifically to this issue. Thus, NIDRR will consider developing priorities for research and demonstration projects in this area. Interested parties are also reminded that they may apply for Field-Initiated Research grants to conduct studies of this topic.

The current priority states that the Center should develop technology to improve the evaluation of "the full range of physical performance", and thus includes the specific factors mentioned by commenters.

Changes: None.

Functional Electrical Stimulation

Comments: One commenter recommended that peripheral vascular disease be included among the disabilities to be addressed by the Center on functional electrical stimulation.

Discussion: NIDRR believes that this is an important issue that will require specialized expertise and effort. Accordingly, NIDRR is considering announcing a priority for a specific project in this area in the near future.

Changes: None.

Low Back Pain

Comments: One commenter suggested that the REC on low back pain should be required to evaluate acupuncture as a current therapeutic technique.

Discussion: The current priority does not preclude a Center from scientifically evaluating acupuncture. However, NIDRR does not believe that all applicants should be required to evaluate this modality. NIDRR suggests that interested prospective applicants consider submitting a Field-Initiated Research application in this area.

Changes: None.

Augmentative Communication Devices

Comments: One commenter suggested that the priority on augmentative communication devices should include the development of systems that allow equal access by individuals who are speech or hearing impaired and deaf-blind persons to emergency response systems.

One commenter recommended that the priorities include an emphasis on the impact of the telecaption decoder on English language development among people who are prelingually deaf.

Discussion: The Secretary agrees that emergency response systems that are effective for speech-and-hearing-impaired and deaf-blind persons are a needed development. However, NIDRR has already made plans to address this issue through the Small Business Innovative Research (SBIR) program.

Similarly, it could be useful to study the effect of telecaption decoders on language development and other factors in persons who are prelingually deaf. However, NIDRR intends to address this issue through separate priorities in the SBIR program or through discrete research grants.

Changes: None.

Wheelchair Development

Comments: One commenter suggested that the priority on wheelchair development should include a greater focus on seating and on studies of wheelchair performance in a real environment.

Discussion: The secretary believes that the issues included in the priority are important and need to be addressed.

At the same time, applicants are not precluded from adding topics or focusing their applications on other key issues, as long as all requirements of the priority are addressed. NIDRR reminds interested parties that there are other programs, including Field-Initiated Research (FIR), Innovation Grants, and SBIR, under which such research could be pursued.

Changes: None.

(20 U.S.C. 761a, 762)

(Catalog of Federal Domestic Assistance No. 84.133E, National Institute on Disability and Rehabilitation Research)

Dated: December 4, 1987.

William J. Bennett,

Secretary of Education.

ENVIRONMENTAL PROTECTION AGENCY

[FRL-3303-2]

Agency Information Collection Activities Under the Office of Management and Budget Review

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: Section 3507(a)(2)(B) of the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 *et seq.*) requires the Agency to publish in the **Federal Register** a notice of proposed information collection requests (ICRs) that have been forwarded to the Office of Management and Budget (OMB) for review. The ICR describes the nature of the solicitation and the expected impact, and where appropriate includes the actual data collection instrument. The following ICR is available for review and comment.

FOR FURTHER INFORMATION CONTACT: Carla Levesque at EPA, (202) 382-2740 (FTS 382-2740).

SUPPLEMENTARY INFORMATION:

Office of Pesticides and Toxic Substances

Title: Toxic Chemical Release Inventory Reporting Form—Title III (EPA ICR #1363)

Abstract: Under section 313, of SARA Title III, owners and operators of facilities in SIC Code 20–39 that manufacture, process or use chemicals [from a list of 309 individual chemicals and 20 additional categories) in excess of threshold quantities must complete a toxic chemical release inventory form and file it with the Administrator of the EPA and the appropriate State authorities annually, beginning July 1, 1988.

EPA must publish a toxic chemical release form for reporting releases, and must maintain a data base containing the collected information, for general use by the public.

Respondents: Manufacturers, Processors, and Users (SIC Code 20–39) Having more than 10 Employees.

Estimated Burden: 13,017,417 hours.

Frequency of Collection: Annually.

Comments on the abstracts on this notice may be sent to:

Carla Levesque, U.S. Environmental Protection Agency, Office of Standard and Regulation (PM–223), Information and Regulatory Systems Division, 401 M St., SW, Washington, DC 20460

and

Marcus Peacock, Office of Management and Budget, Office of Information and Regulatory Affairs, New Executive Office Building (Room 3010), 726 Jackson Place, NW., Washington, DC 20503.

Date: December 18, 1987.

Daniel Florino,

Director, Information Regulatory Systems Division.

LIST OF PUBLIC LAWS

Last List December 18, 1987

This is a continuing list of public bills from the current session of Congress which have become Federal laws. It may be used in conjunction with "P L U S" (Public Laws Update Service) on 523–6641. The text of laws is not published in the **Federal Register** but may be ordered in individual pamphlet form (referred to as "slip laws") from the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402 (phone 202–275–3030).

H.J. Res. 425/Pub. L. 100–193

Making further continuing appropriations for the fiscal year ending September 30, 1988, and for other purposes. (Dec. 16, 1987; 101 Stat. 1310; 1 page) Price: $1.00

CFR CHECKLIST

This checklist, prepared by the Office of the Federal Register, is published weekly. It is arranged in the order of CFR titles, prices, and revision dates.

An asterisk (*) precedes each entry that has been issued since last week and which is now available for sale at the Government Printing Office.

New units issued during the week are announced on the back cover of the daily **Federal Register** as they become available.

A checklist of current CFR volumes comprising a complete CFR set, also appears in the latest issue of the LSA (List of CFR Sections Affected), which is revised monthly.

The annual rate for subscription to all revised volumes is $595.00 domestic, $148.75 additional for foreign mailing.

Order from Superintendent of Documents, Government Printing Office, Washington, DC 20402. Charge orders (MSA, MasterCard, CHOICE, or GPO Deposit Account) may be telephoned to the GPO order desk at (202) 783-3238 from 8:00 a.m. to 4:00 p.m. eastern time, Monday–Friday (except holidays).

Title	Price	Revision Date

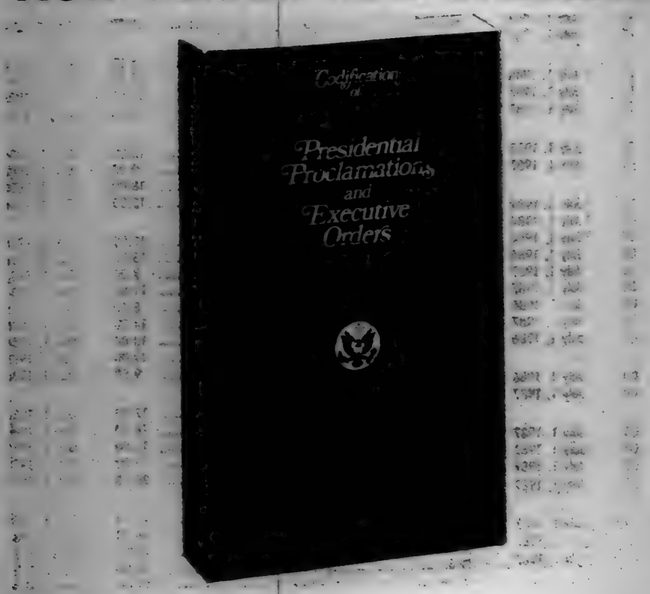
[1] Because Title 3 is an annual compilation, this volume and all previous volumes should be retained as a permanent reference source.

[2] No amendments to this volume were promulgated during the period Apr. 1, 1980 to March 31, 1987. The CFR volume issued as of Apr. 1, 1980, should be retained.

[3] No amendments to this volume were promulgated during the period July 1, 1985 to June 30, 1986. The CFR volume issued as of July 1, 1985 should be retained.



[4] The July 1, 1985 edition of 32 CFR Parts 1–189 contains a note only for Parts 1–39 inclusive. For the full text of the Defense Acquisition Regulations in Parts 1–39, consult the three CFR volumes issued as of July 1, 1984, containing these parts.

[5] The July 1, 1985 edition of 41 CFR Chapters 1–100 contains a note only for Chapters 1 to 49 inclusive. For the full text of procurement regulations in Chapters 1 to 49, consult the eleven CFR volumes issued as of July 1, 1984 containing these chapters.

[6] No amendments to this volume were promulgated during the period Oct. 1, 1985 to Sept. 30, 1986. The CFR volume issued as of Oct. 1, 1985 should be retained.

New edition now available....

For those of you who must keep informed about **Presidential Proclamations and Executive Orders,** there is a convenient reference source that will make researching these documents much easier.

Arranged by subject matter, this edition of the *Codification* contains proclamations and Executive orders that were issued or amended during the period January 20, 1961, through January 20,1985, and which have a continuing effect on the public. For those documents that have been affected by other proclamations or Executive orders, the codified text presents the amended version. Therefore, a reader can use the *Codification* to determine the latest text of a document without having to "reconstruct" it through extensive research.

Special features include a comprehensive index and a table listing each proclamation and Executive order issued during the 1961-1985 period—along with any amendments—an indication of its current status, and, where applicable, its location in this volume.

Published by the Office of the Federal Register, National Archives and Records Administration

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers for $340.00 per year, or $170.00 for 6 months in paper form, or $188.00 per year, or $94.00 for six months in microfiche form, payable in advance. The charge for individual copies is $1.50 for each issue, or $1.50 for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402, or charge to your GPO Deposit Account or VISA or Mastercard.

There are no restrictions on the republication of material appearing in the **Federal Register**.

How To Cite This Publication: Use the volume number and the page number. Example: 52 FR 12345.

Rules and Regulations

Federal Register
Vol. 52, No. 245
Tuesday, December 22, 1987

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

DEPARTMENT OF AGRICULTURE

Farmers Home Administration

7 CFR Parts 1924 and 1944

Revision and Redesignation; Planning and Performing Site Development Work; Correction

AGENCY: Farmers Home Administration, USDA.

ACTION: Correction to final rule.

SUMMARY: The Farmers Home Administration corrects a final rule published on May 22, 1987 at 52 FR 19282 with an effective date of June 22, 1987. Several amendments incorrectly identified the removed text. The intended effect of this action is to correctly identify the removed text so it will not be carried over into the revised regulation.

EFFECTIVE DATE: December 22, 1987.

FOR FURTHER INFORMATION CONTACT: James A. Weibel, Senior Loan Officer, Single Family Housing Processing Division, Farmers Home Administration, USDA, Room 5346, South Agriculture Building, Washington, DC 20250. Telephone (202) 382–1485.

SUPPLEMENTARY INFORMATION: In the final rule published on Friday, May 22, 1987, Amendment 4 to Part 1924, Subpart A, and amendments 17 and 18 to Subpart E of Part 1944, were incomplete in the wording of the amendatory language. Amendment No. 4 changed a reference in § 1924.5(d)(2). Amendment No. 17 changed a reference in § 1944.212(p)(3). Amendment No. 18 changed a reference in paragraph (c)(1) and in the introductory text of paragraph (d)(1) of § 1944.222.

Therefore, the **Federal Register** of May 22, 1987 (52 FR 19282) is corrected as follows:

1. On page 19283, third column, line 4 of Amendment No. 4, insert "Exhibit A of" in the parenthesis before the word "FmHA".

2. On page 19302, in the first column, in line 5 of Amendment No. 17, change the parenthetical phrase to read "(FmHA Instructions 1924–A and 424.5)."

3. On page 19302, in the first column, in the 6th line, under Amendment No. 18, change the parenthetical phrase to read, "(FmHA Instruction 1924–A and 424.5)."

Date: December 16, 1987.

Vance L. Clark,
Administrator, Farmers Home Administration.

[FR Doc. 87–29292 Filed 12–21–87; 8:45 am]
BILLING CODE 3410–07–M

SMALL BUSINESS ADMINISTRATION

13 CFR Part 125

Procurement Automated Source System

AGENCY: Small Business Administration.

ACTION: Final rule.

SUMMARY: The Small Business Administration (SBA) is hereby amending its regulations establishing a schedule of fees for services provided in conjunction with the Procurement Automated Source System.

EFFECTIVE DATE: January 1, 1988.

FOR FURTHER INFORMATION CONTACT: Robert J. Moffitt, Deputy Associate Administrator for Procurement Assistance, 1441 L Street NW., Room 600, Washington, DC 20416, (202) 653–6535.

SUPPLEMENTARY INFORMATION: The Small Business Administration maintains the Procurement Automated Source System (PASS) through a private contractor and allows small and large businesses and Government agencies direct access to the system by use of a PASS identification number (PASS ID). Formerly SBA charged direct access users only $24 an hour for on-line time.

Because direct access PASS users receive a valuable benefit and the system is expensive to operate, the SBA is establishing a schedule of fees that is more reflective of the cost and value of on-line PASS use in § 125.10(b). The schedule will charge non-SBA PASS users $50 per hour of PASS usage, and each PASS ID holder will be charged a minimum monthly fee of $50 which will be offset against its first hour of PASS usage. The rate of $50 per hour is supported by a recent cost analysis of PASS time. Each PASS user is entitled to two copies of the PASS User Guide for each PASS ID it uses. There will also be a charge for extra copies of the PASS User Guide and other materials.

With implementation of a fee schedule, the private contractor will be responsible for billing non-SBA direct access users quarterly. Direct access users include nongovernmental organizations and Government agencies.

The Notice of Proposed Rulemaking (NPRM) concerning PASS fees was published in the **Federal Register** on August 25, 1987, with a 30-day comment period. SBA received three comment letters. Two of the commenters expressed the view that $50 per hour for PASS use was too high and would be a deterrent to future use and, therefore, the per hour price should remain at $24. The third commenter objected to the implementation of a monthly minimum charge. That commenter suggested that the SBA either refrain altogether from implementing a monthly minimum charge or, in the alternative, exempt not-for-profit educational institutions from such minimum charge.

SBA has carefully considered these comments. For the reasons set forth above, we have chosen to retain the $50 per hour charge and the $50 monthly minimum charge, however. SBA believes that such fees are neither unreasonable nor unduly burdensome, either for profitmaking or for not-for-profit organizations. The increase in charges is required by the continuing increase in the costs of operating the PASS system.

Such charges are still well below any comparable commercial system and well below the actual costs of operation. Moreover, this is the first time PASS fees have been increased since 1981. Such fees comport with the President's stated policy that users of government services should pay a portion of the costs of such services.

The final rule is virtually identical to the proposed rule published on August 25, 1987, with minor changes in the language to improve clarity. The term "nongovernmental organizations" has been substituted for "large commercial firms" to clarify that the PASS system is available to not-for-profit institutions as well as to for-profit businesses. The language describing the hourly and

minimum charges has been revised to clarify that fractions of an hour over and above the first hour of PASS use will be charged on a pro rata basis. Finally, the word "monthly" in reference to user billing has been changed to "quarterly" to reflect current billing practices.

Compliance With Executive Order 12291, The Regulatory Flexibility Act (5 U.S.C. 601, et seq.), and the Paperwork Reduction Act (44 U.S.C. Ch. 35)

Executive Order 12291

For the purposes of E.O. 12291, SBA has determined that this final rule is not a major rule because it will not have an annual effect on the economy of $100 million or more; or cause a major increase in costs for consumers, individuals, industries, Federal, State, or local government agencies, or geographic regions; or have significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of U.S.-based businesses to compete with foreign-based businesses in domestic or export markets.

Regulatory Flexibility Act

For purposes of the Regulatory Flexibility Act (5 U.S.C. 601, *et seq.*), SBA certifies that this rule will not have a significant economic impact on a substantial number of small entities. The vast majority of entities potentially affected by this rule would not be considered small for purposes of the Regulatory Flexibility Act.

Paperwork Reduction Act

This rule will not impose any reporting or recordkeeping requirements which would be subject to the Paperwork Reduction Act, 44 U.S.C. ch. 35.

List of Subjects in 13 CFR Part 125

Government procurement, Small business, Technical assistance.

For reasons set forth above, Title 13, Part 125 of the Code of Federal Regulations, is amended as follows:

PART 125—[AMENDED]

1. The authority citation for Part 125 is revised to read as follows:

Authority: Secs. 5(b)(6), 8 and 15 of the Small Business Act, 72 Stat. 384, as amended (15 U.S.C. 631. *et seq.*), 31 U.S.C. 9701, 9702, 96 Stat. 1051).

§ 125.10 [Redesignated as § 125.11]

2. Section 125.10 is redesignated as § 125.11.

§ 125.9 [Redesignated as § 125.10 and Amended]

3. Section 125.9(i) is redesignated as § 125.10, Procurement Automated Source System (PASS) and amended by redesignating the third through ninth sentences as paragraph (a) "Inclusion in PASS," and by adding a new paragraph (b) to read as follows:

§ 125.10 [Amended]

* * * * *

(b) *Access to PASS.* Government agencies and nongovernmental organizations that provide substantial prime contracting and/or subcontracting opportunities to small business firms may be provided direct access to PASS if they so desire. All those with direct access to PASS (Pass users) will receive an identification number (PASS ID) and will be charged $50 per hour for PASS usage with a minimum monthly charge of $50 per PASS ID. Each fraction of an hour over and above the first hour will be charged on a pro rata basis. All users will be billed quarterly, and all fees will be paid directly to the private contractor selected by SBA to operate PASS. The contractor will bill SBA on a monthly basis for the operation of PASS in accordance with the current contract provisions minus any fees it collects from non-SBA users. Each PASS ID entitles a direct access user to two PASS User Guides at no charge. Additional copies of the User Guides and copies for anyone without a PASS ID can be purchased from SBA or the contractor for $25 each. The on-line usage fee, User Guide fee and any other related fee may be changed by SBA from time to time as required to reflect increased costs. Any fee change will be effective upon publication of a notice in the **Federal Register**.

Dated: December 7, 1987.

James Abdnor,

Administrator.

[FR Doc. 87-29246 Filed 12-21-87; 8:45 am]

BILLING CODE 8025-01-M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 87-NM-161-AD; Amdt. 39-5815]

Airworthiness Directives; Boeing Model 747 Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment amends an existing airworthiness directive (AD), applicable to certain Boeing Model 747 series airplanes, which requires inspection and replacement, as necessary, of the nacelle strut midspar fuse pins. This action amends the applicability and is prompted by the discovery by the manufacturer that three additional airplanes may have had the older style fuse pins installed as an option in production. This condition, if not corrected, could result in failure of the pin and separation of the engine from the airplane.

EFFECTIVE DATE: January 19, 1988.

ADDRESSES: The applicable service information may be obtained from the Boeing Commercial Airplane Company, P.O. Box 3707, Seattle, Washington 98124. This information may be examined at FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or Seattle Aircraft Certification Office, FAA, Northwest Mountain Region, 9010 East Marginal Way South, Seattle, Washington.

FOR FURTHER INFORMATION CONTACT: Mr. Dan R. Bui, Airframe Branch, ANM-120S; telephone (206) 431-1919. Mailing address: FAA, Northwest Mountain Region, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168.

SUPPLEMENTARY INFORMATION: The FAA issued AD 86-22-01, Amendment 39-5437 (51 FR 36002; October 8, 1986), to require periodic inspection, or replacement, of older style nacelle strut midspar fuse pins to prevent their failure by fatigue initiated by corrosion. Failure of a pin can lead to separation of the affected engine from the airplane.

This amendment is prompted by the discovery by the manufacturer that three airplanes, which may have had the older style fuse pins installed as an option in production, were not included in the effectivity of Boeing Service Bulletin 747-54-2063, Revision 4, dated June 6, 1986, which was referenced in the applicability statement of AD 86-22-01.

The FAA has reviewed and approved Revision 5 to Boeing Service Bulletin 747-54-2063, dated September 24, 1987, which adds three foreign-operated airplanes to the effectivity of the service bulletin.

The aforementioned additional airplanes are not registered in the United States. However, the FAA has determined it is necessary to amend the existing AD to add the additional airplanes because, in accordance with existing provisions of the bilateral airworthiness agreements, the FAA must issue the AD to advise foreign regulatory agencies of an unsafe condition that may exist or develop on affected foreign-registered airplanes.

Because this amendment in no way changes the substantive requirements of the existing AD, and because the change in applicability of the existing AD does not affect any U.S. operator, the FAA has determined that notice and public procedure hereon are unnecessary, and good cause exists for making this amendment effective in less than 30 days.

For this reason, the FAA has determined that this regulation is not considered to be major under Executive Order 12291 or significant under DOT Regulatory Policies and Procedure (44 FR 11034; February 26, 1979); and it is further certified under the criteria of the Regulatory Flexibility Act that this rule will not have a significant economic impact, positive or negative, on a substantial number of small entities.

List of Subjects in CFR Part 39

Aviation safety, Aircraft.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends § 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13) as follows:

PART 39—[AMENDED]

1. The authority citation for Part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983); and 14 CFR 11.89.

§ 39.13 [Amended]

2. By amending AD 86-22-01, Amendment 39-5437 (51 FR 36002; October 8, 1986), by revising the applicability statement to read as follows:

BOEING: Applies to Model 747 series airplanes, listed in Boeing Service Bulletin 747-54-2063, Revision 5, dated September 24, 1987, certificated in any category. Compliance required as indicated, unless previously accomplished.

This amends AD 86-22-01, Amendment 39-5437.

This amendment becomes effective January 19, 1988.

Issued in Seattle, Washington, on December 15, 1987.

Wayne J. Barlow,

Director, Northwest Mountain Region.

[FR Doc. 87-29249 Filed 12-21-87; 8:45 am]

BILLING CODE 4910-13-M

14 CFR Part 71

[Airspace Docket No. 87-AWP-30]

Revision to Window Rock, AZ, Transition Area

AGENCY: Federal Aviation Administration, DOT.

ACTION: Correction to final rule.

SUMMARY: An error was noted in the final rule regarding revision to Window Rock, AZ transition area that was published in the **Federal Register** on November 19, 1987, (52 FR 44377) (Airspace Docket No. 87-AWP-30). This action corrects that error.

EFFECTIVE DATE: 0901 UTC, January 14, 1988.

FOR FURTHER INFORMATION CONTACT: Frank Torikai, Airspace and Procedures Branch, Air Traffic Division, Federal Aviation Administration (FAA), 15000 Aviation Boulevard, Lawndale, California 90261, telephone (213) 297-1648.

SUPPLEMENTARY INFORMATION:

History

Federal Register document 87-26666, published on November 19, 1987, revised the description of the Window Rock, AZ, transition area. An error was discovered in the geographical description of the revised transition area and this action corrects that error.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certifed that this rule, when promulgated, will not have a significant impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 71

Aviation Safety, Transition area.

Adoption of the Correction

Accordingly, pursuant to the authority delegated to me, **Federal Register** Document (87-26666), as published in the **Federal Register** on November 19, 1987, is corrected as follows:

Window Rock, AZ [Revised]

By removing "to lat. 35°31'07" N., long. 109°58'32" N.," and substituting "to lat. 35°31'07" N., long. 109°58'32" W.,".

Issued in Los Angeles, California, on December 3, 1987.

Jacqueline L. Smith,

Manager, Air Traffic Division, Western-Pacific Region.

[FR Doc. 87-29251 Filed 12-21-87; 8:45 am]

BILLING CODE 4910-13-M

14 CFR Part 71

[Airspace Docket No. 87-ASW-33]

Establishment of Transition Area; Berclair, TX

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This final rule will establish a transition area at Berclair, TX. The development of a standard instrument approach procedure (SIAP) by the Department of Navy to the Navy Auxiliary Landing Field (NALF) located at Goliad Airport, Berclair, TX, has made this action necessary. The intended effect of this action is to provide adequate controlled airspace for aircraft executing the SIAP to Goliad NALF. Coincident with this action, the airport status will change from visual flight rules (VFR) to instrument flight rules (IFR).

EFFECTIVE DATE: 0901 UTC, March 10, 1988.

FOR FURTHER INFORMATION CONTACT: Bruce C. Beard, Airspace and Procedures Branch, Air Traffic Division, Southwest Region, Department of Transportation, Federal Aviation Administration, Fort Worth, TX 76193-0530, telephone (817) 624-5561.

SUPPLEMENTARY INFORMATION:

History

On August 14, 1987, the FAA proposed to amend Part 71 of the Federal Aviation Regulations (14 CFR Part 71) by establishing a transition area at Berclair, TX (52 FR 32562).

Interested persons were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. No comments objecting to the proposal were received. Except for editorial changes, this amendment is that proposed in the notice. Section 71.181 of Part 71 of the Federal Aviation Regulations was republished in Handbook 7400.6C, dated January 2, 1987.

The Rule

This amendment to Part 71 of the Federal Aviation Regulations will establish a 700-foot transition area to be located at Goliad NALF, Berclair, TX. The development by the Department of Navy of an SIAP serving the Goliad NALF has necessitated the action. The effect of this action will provide adequate controlled airspace for aircraft executing this SIAP. Coincident with this action, the airport status will change from VFR to IFR.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" and DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 71

Aviation safety, Transition areas.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me, Part 71 of the Federal Aviation Regulations (14 CFR Part 71) is amended as follows:

PART 71—[AMENDED]

1. The authority citation for Part 71 continues to read as follows:

Authority: 49 U.S.C. 1348(a), 1354(a), 1510; E.O. 10854; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983); 14 CFR 11.69.

§ 71.181 [Amended]

2. Section 71.181 is amended as follows:

Berclair, TX [New]

That airspace extending upward from 700 feet above the surface within an 8.5-mile radius of the Goliad NALF (latitude 28°36'30" N., longitude 97°36'33" W.), within 4 miles each side of the 315° radial of the Goliad TACAN (latitude 28°37'25" N., longitude 97°37'30" W.), and extending from the 8.5-mile radius area to 11.5 miles northwest of the airport; excluding that portion that coincides with the Beeville, TX, Transition Area.

Issued in Forth Worth, TX, on December 2, 1987.

Larry L. Craig,

Manager, Air Traffic Division, Southwest Region.

[FR Doc. 87-29252 Filed 12-21-87; 8:45 am]

BILLING CODE 4910-13-M

14 CFR Part 97

[Docket No. 25497; Amdt. No. 1363]

Standard Instrument Approach Procedures; Miscellaneous Amendments

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment establishes, amends, suspends, or revokes Standard Instrument Approach Procedures (SIAPs) for operations at certain airports. These regulatory actions are needed because of the adoption of new or revised criteria, or because of changes occurring in the National Airspace System, such as the commissioning of new navigational facilities, addition of new obstacles, or changes in air traffic requirements. These changes are designed to provide safe and efficient use of the navigable airspace and to promote safe flight operations under instrument flight rules at the affected airports.

DATES: *Effective:* An effective date for each SIAP is specified in the amendatory provisions.

Incorporation by reference—approved by the Director of the Federal Register on December 31, 1980, and reapproved as of January 1, 1982.

ADDRESSES: Availability of matters incorporated by reference in the amendment is as follows:

For Examination—

1. FAA Rules Docket, FAA Headquarters Building, 800 Independence Avenue SW., Washington, DC 20591;
2. The FAA Regional Office of the region in which the affected airport is located; or
3. The Flight Inspection Field Office which originated the SIAP.

For Purchase—

Individual SIAP copies may be obtained from:

1. FAA Public Inquiry Center (APA-200), FAA Headquarters Building, 800 Independence Avenue SW., Washington, DC 20591; or
2. The FAA Regional Office of the region in which the affected airport is located.

By Subscription—

Copies of all SIAPs, mailed once every 2 weeks, are for sale by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

FOR FURTHER INFORMATION CONTACT: Donald K. Funai, Flight Procedures Standards Branch (AFS-230), Air Transportation Division, Office of Flight Standards, Federal Aviation Administration, 800 Independence Avenue SW., Washington, DC 20591; telephone (202) 267-8277.

SUPPLEMENTARY INFORMATION: This amendment to Part 97 of the Federal Aviation Regulations (14 CFR Part 97) prescribes new, amended, suspended, or revoked Standard Instrument Approach Procedures (SIAPs). The complete regulatory description of each SIAP is contained in official FAA form documents which are incorporated by reference in this amendment under 5 U.S.C. 552(a), 1 CFR Part 51, and § 97.20 of the Federal Aviation Regulations (FARs). The applicable FAA Forms are identified as FAA Forms 8260-3, 8260-4, and 8260-5. Materials incorporated by reference are available for examination or purchase as stated above.

The large number of SIAPs, their complex nature, and the need for a special format make their verbatim publication in the **Federal Register** expensive and impractical. Further, airmen do not use the regulatory text of the SIAPs, but refer to their graphic depiction on charts printed by publishers of aeronautical materials. Thus, the advantages of incorporation by reference are realized and publication of the complete description of each SIAP contained in FAA form document is unnecessary. The provisions of this amendment state the affected CFR (and FAR) sections, with the types and effective dates of the SIAPs. This amendment also identifies the airport, its location, the procedure identification and the amendment number.

This amendment to Part 97 is effective on the date of publication and contains separate SIAPs which have compliance dates stated as effective dates based on related changes in the National Airspace System or the application of new or revised criteria. Some SIAP amendments may have been previously issued by the FAA in a National Flight Data Center (FDC) Notice to Airmen (NOTAM) as an emergency action of immediate flight safety relating directly to published aeronautical charts. The circumstances which created the need for some SIAP amendments may require making them effective in less than 30 days. For the remaining SIAPs, an effective date at least 30 days after publication is provided.

Further, the SIAPs contained in this amendment are based on the criteria contained in the U.S. Standard for Terminal Instrument Approach Procedures (TERPs). In developing these SIAPs, the TERPS criteria were applied to the conditions existing or anticipated at the affected airports. Because of the close and immediate relationship between these SIAPs and safety in air commerce, I find that notice and public procedure before adopting these SIAPs is unnecessary, impracticable, and contrary to the public interest and, where applicable, that good cause exists for making some SIAPs effective in less than 30 days.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. For the same reason, the FAA certifies that this amendment will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Issued in Washington, DC, on December 11, 1987.

Robert L. Goodrich,

Director of Flight Standards.

Adoption of The Amendment

Accordingly, pursuant to the authority delegated to me, Part 97 of the Federal Aviation Regulations (14 CFR Part 97) is amended by establishing, amending, suspending, or revoking Standard Instrument Approach Procedures, effective at 0901 G.M.T. on the dates specified, as follows:

PART 97—[AMENDED]

1. The authority citation for Part 97 continues to read as follows:

Authority: 49 U.S.C. 1348, 1354(a), 1421, and 1510; 49 U.S.C. 106(g) (revised, Pub. L. 97-449, January 12, 1983; and 14 CFR 11.49(b)(2)).

§§ 97.23, 97.25, 97.27, 97.29 97.31, 97.33 and 97.35 [Amended]

By amending: § 97.23 VOR, VOR/DME, VOR or TACAN, and VOR/DME or TACAN; § 97.25 LOC, LOC/DME, LDA, LDA/DME, SDF, SDF/DME; § 97.27 NDB, NDB/DME; § 97.29 ILS, ILS/DME, ISMLS, MLS, MLS/DME, MLS/RNAV; § 97.31 RADAR SIAPs; § 97.33 RNAV SIAPs; and § 97.35 COPTER SIAPs, identified as follows:

BILLING CODE 4910-13-M

Office of the Secretary

14 CFR Parts 234 and 255

[Docket No. 44827 Amdt. Nos. 234-3 and 255-5]

Airline Service Quality Performance

AGENCY: Office of the Secretary, DOT.

ACTION: Interim final rule; request for comments.

SUMMARY: In response to a request from the Air Transport Association (ATA), the Department is amending its rule on airline service quality performance to allow computerized reservations system (CRS) vendors 10 days, instead of 5 days, to include in their CRS displays the flight delay and cancellation information submitted by the participating carriers. The Department also is amending the on-time performance code portion of Part 255 to require participating carriers to assign a letter code to flights scheduled to operate three times or less during a month in their reports to CRS vendors. These changes are effective immediately to give carriers sufficient time to make adjustments; however, comments are requested on them and changes may be made later in response to comments. In addition, a reply to a question posed by Pan American World Airways (Pan Am)

VOL 52 ISS 245 DEC 22 1987 UMI

is discussed and appended to this document for information purposes.

DATES: This amendment is effective on December 22, 1987. Comments should be filed in Docket 44827 and received no later than January 6, 1988.

ADDRESS: Documentary Services Division, C–55, U.S. Department of Transportation, 400 7th Street SW., Room 4107, Washington, DC 20590. Six copies should be submitted. Commenters should include a self-addressed postcard if they desire notification of receipt of their comments by the Department.

FOR FURTHER INFORMATION CONTACT: Sam Whitehorn or Gwyneth Radloff, at 400 7th Street, SW., Washington, DC 20590, (202) 366–9307; Barry Molar, at the above address or by phone at (202) 366–9285; Shelton Jackson, at the above address or by phone at (202) 366–5397; or Robin Caldwell, at the above address or by phone at (202) 366–9059.

SUPPLEMENTARY INFORMATION: By a final rule published in the **Federal Register** on September 9, 1987, the Department of Transportation (DOT or Department) added a new Part 234, which requires 14 air carriers to submit certain flight performance data to the Department each month for public dissemination, and to CRS vendors for incorporation into their primary schedule and availability displays. The information provided to vendors must be in the form of a single-digit on-time performance code summarizing each flight's monthly performance as reported in the data submitted to DOT. The carriers must deliver their monthly summary codes to their CRS vendors by the fifteenth day of the following month. The final rule also amended 14 CFR 255.4 to require CRS vendors to include that information on their primary schedule and availability displays within 5 days after receiving it. In addition, the carriers must provide this information to consumers, upon request, through the carriers' ticketing or reservations agents.

ATA Request

In an October 2, 1987 letter to DOT, the Air Transport Association (ATA) requested a permanent waiver of the 5-day display requirement in § 255.4(e)(1) in favor of a 10-day period. ATA stated that the most efficient mechanism for transmitting the on-time performance codes is for the carriers to insert them as an additional data element in the tapes they submit to the vendors to update their CRS schedules. The rule's monthly deadlines for submitting and displaying the summary codes preclude easy integration into the existing process for updating the CRS schedule displays, since CRS vendors generally arrange their loading dates during low usage periods for their computer systems, which usually occur on weekends. These loading dates are arranged a year or more in advance.

Because of the varying lead times needed by carriers and the use of weekends, data submitted, for example, on the 15th of any month, particularly if it falls on a Thursday or Friday, may not be loaded by a vendor until the following weekend (the 24th or 25th) to accommodate the preparation and loading schedules of the carriers, third party transmitters and the vendors. Consequently, ATA believes that, although vendors usually will achieve a shorter turn-around time, a 10 day period will give them the flexibility they need to mesh the requirements of the rule with existing industry practice, without incurring the unnecessary costs of creating an independent reporting system for this data. A copy of the ATA letter has been placed in Docket 44827.

We believe that ATA's request has merit. In developing the disclosure rule, we sought to minimize the impact of the requirements on the carriers and maximize the usefulness of the information provided to consumers. Amending the rule will not affect the usefulness of the data to consumers, and any possible adverse impact of delaying the availability of the next month's data to consumers for an extra 5 days will be minimal. It also should eliminate the costs to carriers of creating and maintaining a separate updating system to accommodate our rule.

In addition, ATA pointed out that § 255.4(e)(1) does not reflect the involvement of third parties in the transmission of the data to the CRS vendors, although the preamble recognized their role. ATA asks that third parties be mentioned in that section. We have made this technical change. ATA also asked the Department to clarify the meaning of "within" and "less than" 15 minutes. We addressed this definition in the Reporting Directive issued by the DOT's Research and Special Programs Administration, Office of Aviation Information Management (OAIM) on October 5, 1987.

De Minimis Flight Codes

The Department also is amending the on-time performance code requirements. In response to questions posed by two carriers with respect to compliance with Parts 234 and 255, we are requiring that carriers assign the letter "U" as the code for any flight scheduled to operate three times or less during a month in their report to CRS vendors. This change recognizes that if a flight has a small number of operations in one month, the delay rate may be somewhat misleading to consumers. This may be particularly true where a carrier adds a flight with only a few operations during a holiday period. A minimal number of operations may be an unreliable basis for indicating the on-time performance of that particular flight when its on-time performance code is displayed the next month. Therefore, number codes for these flights shall not be reported by carriers for CRS display purposes. This is consistent with the treatment of new flights, which are given the letter code "N". Carriers must continue to submit on-time performance data on these flights to the Department.

We therefore are amending 14 CFR 255.4(e)(1) to extend the 5-day deadline to 10 days to accommodate the existing system for updating schedules and to include a reference to third parties.

In addition, we are amending § 234.8 (a) and (b)(4) to require carriers to assign the letter code "U" to any flight that operates three times or less during a month in their reports to CRS vendors.

Pan Am Request

In an October 20 letter to DOT, Pan American, who was not signatory to ATA's request, stated that it supports the ATA request if DOT clarifies the CRS vendors' obligation to load each month's on-time performance data for all carriers, including the vendors own data, at the same time. Pan American believes that carriers that are also vendors will be able to manipulate the timing of loading of their on-time performance data to place themselves in the most favorable competitive position. Pan American urges the Department to issue an information directive clarifying the vendors, obligation to load all of a month's data at the same time and further suggests that a specific date be set for loading, *e.g.*, the third Saturday of the following month.

On November 4, 1987, American Airlines sent DOT a letter that supported the ATA request and called Pan Am's concern unfounded, because 14 CFR 255.4(d) requires a vendor to apply the same standards of care and timeliness to loading information concerning other carriers as it applies to the loading of its own data. Our reply to Pan Am's letter stressed that DOT's current rules explicitly prohibit these actions by carrier/vendors.

Copies of Pan Am's letter, American's letter and our reply have been placed in the docket.

Procedural Matters

While we are adopting the 10-day and "U" provisions immediately, we request comments on them. Our decision to make this change now is predicated on the impending requirements of Parts 234 and 255 for carriers to provide on-time performance data to vendors and for vendors to load and display the data in CRS's. These requirements take effect during the month of December; to avoid any confusion, immediate adoption is required. If comments demonstrate a need for a subsequent change, we will do so.

Under section 553(d) of the Administrative Procedure Act, the Department finds good cause to issue this final rule without prior notice and opportunity for comment. The amendment relieves a restriction and will enable CRS vendors to meet the CRS display requirements of the rule and integrate the required data into their current system for updating information. Immediate adoption will give carriers submitting data to CRS vendors, or to a third party for transmission to the vendors, sufficient time to make the necessary adjustments; notice and comment procedures would not permit this.

The Department has determined that this rule is not major within the meaning of Executive Order 12291 or significant under the Department's regulatory policies and procedures. This amendment will make only minor changes that will ease implementation of the CRS display requirement. A regulatory evaluation was prepared in developing the initial rule and is available in the docket. Therefore, no further evaluation is necessary. I certify that this rule will not have a significant economic impact on a substantial number of small entities for the purposes of the Regulatory Flexibility Act. None of the affected certificated air carriers or CRS vendors are small businesses within the meaning of the Act. The Department also has concluded that this rule will not have a significant impact on the environment under the National Environmental Policy Act. The rule does not impose any additional paperwork reporting requirements.

List of Subjects

14 CFR Part 234

Advertising, Air carriers, Consumer protection, Reporting requirements, Travel agents.

14 CFR Part 255

Advertising, Air carriers, Air transportation-foreign, Antitrust, Consumer protection, Essential air service, Travel agents.

Issued in Washington, DC, on December 11, 1987.

Jim Burnley,

Secretary of Transportation.

For the reasons set forth in the preamble, the Department amends Title 14, Chapter II, Subchapter A of the Code of Federal Regulations as follows:

PART 234—AIRLINE SERVICE QUALITY PERFORMANCE REPORTS

1. The authority for Part 234 continues to read:

Authority: 49 U.S.C. 1302, 1324, 1374, 1377 and 1381; 5 U.S.C. 553(e) and 14 CFR 302.38.

2. Section 234.8(a) is amended by revising the second sentence to read as follows:

§ 234.8 Calculation of on-time performance codes.

(a) * * * The calculations shall be performed for each reportable flight, except those scheduled to operate three times or less during a month. * * *

3. Section 234.8(b)(4) is revised to read as follows:

(b) * * *

(4) In the case of a new flight, carriers shall assign a performance code consisting of the letter "N." A flight that is not a new flight shall be assigned the performance code calculated for the flight that it replaces, even if the two flights do not have the same flight number. In the case of a flight scheduled to operate three times or less during a month, carriers shall assign a performance code consisting of the letter "U."

* * * * *

PART 255—CARRIER-OWNED COMPUTER RESERVATION SYSTEMS

1. The authority of Part 255 continues to read:

Authority: 49 U.S.C. 1302, 1324, 1374, 1381, 1389 and 1502.

2. Section 255.4(e)(1) is revised to read as follows:

§ 255.4 Display of information.

* * * * *

(e) * * *

(1) Within 10 days after receiving the information from participating carriers or third parties, each vendor shall include in all primary schedule and availability displays the on-time performance code for each nonstop flight segment and one-stop or multi-stop single plane flight, for which a participating carrier provides a code.

* * * * *

Editorial Note: This Appendix will not appear in the Code of Federal Regulations.

Mr. David M. O'Connor,
Special Counsel, Government and International Affairs, Pan American World Airways, Inc., 1660 L Street, NW., Washington, DC 20036.

Dear Mr. O'Connor: Thank you for your letter of October 20, 1987, requesting clarification of the procedures for loading the new on-time flight performance codes into CRS vendor flight displays, as required by our recent Airline Service Quality Rule.

You have asked whether our new rule would permit a carrier vendor to incorporate its own flight performance codes into its CRS on a different schedule than that used for other carriers. You suggest that the vendors, under the rule, could load their own data as early as the first of the month or as late as the 20th of the month. This flexibility then could give such vendors an advantage over other carriers in certain circumstances. You claim that this flexibility contravenes the Department's intention to provide consumers with simple, straightforward information on each flight's on-time performance. To address this potential problem, you suggest that a specific date be used for all loading of data or that the loading be done in accordance with a set schedule for the vendors and other carriers.

Under 14 CFR 255.4(d)(1), vendors are required to apply the same standards of care and *timeliness* to loading information concerning other carriers as to the loading of their own data. This provision clearly would prohibit the types of actions you view as possible. The Department would be concerned if vendors appeared to be loading their own data and other carriers' during different time periods, or if the loading dates fluctuated from month to month. We trust that all of the carriers subject to the rule are aware of this potential problem and will not hesitate to bring it to our attention. In addition, as you note, our recent rule does not envision providing vendors with the opportunity to manipulate the loading of data to provide themselves with a more favorable position *vis-a-vis* their competitors. If such circumstances do arise, the Department has ample authority to address the situation under the CRS rules and section 411 of the Federal Aviation Act.

We do not see a need to set a specific date for loading the on-time performance codes, although our rule requires that the data be available on CRS screens within 5 days of receipt by the vendor. (As you note, the Air Transport Association has asked that vendors be given 10 days to load the data.) The rule does provide some flexibility in an effort to minimize costs to the carriers and vendors.

Sincerely,

Matthew V. Scocozza,
Assistant Secretary for Policy and International Affairs.

BILLING CODE 4910–62–M

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

18 CFR Part 2

[Docket No. RM87-36-001, et al.]

Interpretation of Comprehensive Plans Under Section 3 of the Electric Consumers Protection Act

Issued: December 16, 1987.

AGENCY: Federal Energy Regulatory Commission, DOE.

ACTION: Order granting rehearing solely for the purpose of further consideration.

SUMMARY: On October 20, 1987, the Federal Energy Regulatory Commission (Commission) issued a final rule (Order No. 481), published at 52 FR 39905 (October 26, 1987), interpreting a state or Federal "comprehensive plan" under section 3(b)(4) of the Electric Consumers Protection Act of 1986. In this order, the Commission grants rehearing of its decision solely for the purpose of further consideration.

EFFECTIVE DATE: December 16, 1987.

FOR FURTHER INFORMATION CONTACT: Thomas J. Lane, Office of the General Counsel, Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, (202) 357-8530.

SUPPLEMENTARY INFORMATION:

Before Commissioners: Martha O. Hesse, Chairman; Anthony G. Sousa, Charles G. Stalon, Charles A. Trabandt and C. M. Naeve.

On October 20, 1987, the Commission issued a final rule (Order No. 481) interpreting a state or a Federal "comprehensive plan" under section 3(b)(4) of the Electric Consumers Protection Act of 1986.[1]

Pursuant to 18 CFR 385.713 (1987), the Commission has received six timely requests for rehearing in this proceeding.[2] In order to review more fully the arguments raised, the Commission grants rehearing of the order solely for the purpose of further consideration. This order is effective on the date of issuance. This action does not constitute a grant or denial of the requests on their merits in whole or in part.

Pursuant to Rule 713(d) of the Commission's Rules of Practice and Procedure (18 CFR 385.713(d) (1987), no answers to the requests for rehearing will be entertained by the Commission.

Lois D. Cashell,

Acting Secretary.

[Docket No. RM87-6-000; Order No. 487]

Fees for Hydroelectric Project Applications to Reimburse Fish and Wildlife Agencies

Issued: December 16, 1987.

AGENCY: Federal Energy Regulatory Commission, DOE.

ACTION: Final rule.

SUMMARY: The Federal Energy Regulatory Commission (Commission) is establishing fees to be paid by certain hydroelectric license or exemption applicants to reimburse fish and wildlife agencies for their costs in setting mandatory terms and conditions for those projects.

EFFECTIVE DATE: This rule is effective January 21, 1988.

FOR FURTHER INFORMATION CONTACT: Thomas J. Lane, Office of the General Counsel, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, (202) 357-8530.

SUPPLEMENTARY INFORMATION:

Before Commissioners: Martha O. Hesse, Chairman; Anthony G. Sousa, Charles G. Stalon, Charles A. Trabandt and C. M. Naeve.

I. Introduction

The Federal Energy Regulatory Commission (Commission) is adopting new regulations governing applications from hydroelectric licenses and exemptions to implement section 7(c) of the Electric Consumers Protection Act of 1986 (ECPA),[1] which amended section 30 of the Federal Power Act (FPA).[2] The rule requires hydroelectric license and exemption applicants for projects that are required to meet the terms and conditions of fish and wildlife agencies under section 30(c) of the FPA to reimburse those agencies for any reasonable costs incurred in setting terms and conditions to protect fish and wildlife resources. The fish and wildlife agencies to be reimbursed under the rule are the U.S. Department of Commerce, National Marine Fisheries Service (NMFS), the U.S. Department of the Interior, United States Fish and Wildlife Service (USFWS) and the state agency responsible for fish and wildlife resources.

II. Background

ECPA was enacted on October 16, 1986. Section 7(c) of ECPA amended section 30 of the FPA to add a new section 30(e). The new section requires the Commission to establish fees that will be adequate to reimburse fish and wildlife agencies for any reasonable costs incurred in connection with studies or reviews they carry out in establishing terms and conditions pursuant to section 30(c) of the FPA.[3]

This fee provision applies to applicants for projects "required to meet the terms and conditions set by fish and wildlife agencies under [section 30(c) of the FPA]".[4] Projects within the scope of FPA section 30(c) must meet the terms and conditions that the USFWS, NMFS, and state fish and wildlife agencies each determine are appropriate for the protection of fish and wildlife resources.[5] The terms and conditions established by these agencies are commonly referred to as "mandatory terms and conditions."

Prior to ECPA, two categories of applicants were subject to the terms and conditions of fish and wildlife agencies under FPA section 30(c). These were applicants for exemptions from licensing under section 30 of the FPA (conduit exemptions) and applicants for exemptions from licensing requirements under sections 405 and 408 of the Public Utility Regulatory Policies Act of 1978 (PURPA) (5-MW exemptions).[6] Section 8(a) of ECPA amended section 210 of PURPA to establish a third category of applicants subject to these terms and conditions. This new section states that projects located at new dams or diversions must "[meet] the terms and conditions set by fish and wildlife agencies under the same procedures as provided for under section 30(c) of the Federal Power Act" in order to be eligible for benefits under section 210 of PURPA (PURPA benefits).[7] Therefore, in addition to conduit exemption applicants and 5-MW exemption applicants, license applicants seeking PURPA benefits for projects located at new dams or diversions are now within the mandatory terms and conditions requirement of section 30(c) of the FPA.

Section 8(b) of ECPA, however, excepts four classes of projects located at a new dam or diversion seeking PURPA benefits from having to meet terms and conditions under section 30(c) of the FPA. These are: (1) Projects for which the application was filed and accepted before ECPA's enactment; [8] (2) projects for which an application was filed before ECPA's enactment but accepted for filing within three years after enactment; [9] (3) projects for which the application was filed after ECPA's enactment but before April 16, 1988, if the applicant can successfully demonstrate that it had committed "substantial monetary resources" relating to the filing of an acceptable application before the date of enactment; [10] and (4) projects located at a Government dam at which non-Federal hydroelectric development is permissible.[11] The fee requirement of section 30(e) of the FPA therefore does not apply to new dam or diversion license applicants seeking PURPA benefits that fall within these four classes, since these applicants are excepted from having to meet terms and conditions under FPA section 30(c). Regarding exemptions, however, section 8(c) of ECPA states that "[n]othing in this Act shall affect the application of section 30(c) of the Federal Power Act to any exemption issued after the enactment of this Act." Pursuant to section 8(c) of ECPA, therefore, no new dam or diversion exemption applicant seeking PURPA benefits is exempted from having to meet the terms and conditions of fish and wildlife agencies under FPA section 30(c).[12]

To implement the fee requirement in ECPA, the Commission, on March 18, 1987, published a notice of proposed rulemaking (NOPR).[13] Twenty-five commenters responded to the NOPR.[14] In response to requests from the NMFS and USFWS, the Commission also held a public hearing on the NOPR on June 15, 1987.[15]

III. Discussion

A. Overview

Under this rule, a prospective new dam or diversion license applicant must inform each fish and wildlife agency in writing whether it will seek PURPA benefits. Similarly, a prospective exemption applicant must notify each fish and wildlife agency that it will seek an exemption from licensing. Within the comment period during the second stage consultation process, [16] a fish and wildlife agency will provide an applicant with an estimate of the costs it will incur in setting mandatory terms and conditions for the proposed project. An agency may provide a potential applicant with updated cost estimates. When the application is filed, an applicant must file this most recent estimate with the Commission along with a cash payment of 50 percent of the estimated fees or a bond for 100 percent of the estimated fees. If an applicant does not pay the appropriate amount or post a bond, its application will be rejected.

Within 60 days after the date for setting mandatory terms and conditions, or 60 days after an application is withdrawn, rejected or dismissed, a fish and wildlife agency must file with the Commission a final statement of costs for determining mandatory terms and conditions. After receiving this statement, the Commission will submit a bill to the applicant stating any amounts to be paid by, or refunded to, the applicant.

Any amounts owed must be paid within 45 days after the bill is issued. Similarly, the Commission will notify the Treasury to refund any overpayments within 45 days from the date of the bill. The Commission will not grant a license or exemption until the applicant pays the full amount of fees owed.

Disputes concerning the bill must be submitted within 45 days from the date the bill is issued. A disputing applicant has the burden of proof in showing that an agency's cost statement is unreasonable. However, the agency must provide, upon request, the applicant and the Commission with any documentation supporting its cost statement. The Director of the Office of Hydropower Licensing (OHL) will determine the reasonableness of a disputed cost statement in writing. This decision is appealable to the Commission.

B. General Comments

Generally, commenters support the Commission's efforts to implement the fees requirement contained in ECPA.[17] Some commenters argue that the Commission did not adequately consult with interested Federal and state agencies prior to issuing the NOPR.[18] They further argue that the proposed fee system is administratively and fiscally unworkable and should be withdrawn so that the Commission can consult with interested agencies prior to issuing new proposed regulations.

The Commission disagrees. The Commission staff met with representatives of the USFWS and NMFS prior to issuing the NOPR. A public hearing was also held on the NOPR. To the extent that certain agencies express concerns regarding the mechanics of receiving reimbursements, the Commission believes that these administrative issues can be resolved outside of this rulemaking.[19]

[2] 16 U.S.C. 823a (1982).

[3] This new section 30(e) of the FPA states:

> [t]he Commission, in addition to the requirements of section 10(e), shall establish fees which shall be paid by an applicant for a license or exemption for a project that is required to meet the terms and conditions set by fish and wildlife agencies under subsection (c). Such fees shall be adequate to reimburse the fish and wildlife agencies referred to in subsection (c) for any reasonable costs incurred in connection with any studies or other reviews carried out by such agencies for purposes of compliance with this section. The fees shall, subject to annual appropriations Acts, be transferred to such agencies by the Commission for use solely for purposes of carrying out such studies and shall remain available until expended.

[4] *Id.*

[5] Prior to the amendment by ECPA, section 30(c) of the FPA authorized only the USFWS and state fish and wildlife agencies to set mandatory terms and conditions. Section 7(b) of ECPA amended section 30(c) of the FPA to include NMFS as an agency with mandatory conditioning authority.

Commission staff will work closely with these agencies to resolve these matters.

C. Applicability of ECPA Fees

The NOPR proposed that fees would be charged for applications filed either before or after ECPA's enactment to reimburse any agency costs incurred after ECPA. The final rule does not adopt this proposed provision. In this rule, fees will apply only to applications filed after the effective date of this rule for costs incurred after this rule's effective date. The Commission is adopting the proposal in response to several commenters that argue that it would be unfair to subject applicants to fees retroactively.[20] Furthermore, the Commission believes that, in order to arrange for any necessary funding, a potential applicant must know, in advance, what fee liability will attach when the application is filed.

The NOPR proposed that fees would apply only if a license or exemption application was actually filed. Several commenters argue that agencies should be reimbursed for some or all of their costs even if an application is never subsequently filed.[21]

The Commission emphasizes that ECPA specifically states that fees are to be paid by "applicants." The Commission believes that Congress would have specifically so stated if it had intended that fees would apply to those individuals who never file an application. In fact, Congress did not provide for this type of fee.

The U.S. Department of the Interior suggests that if the final rule does not expand the definition of "applicant", the Commission should require developers to undergo what are now pre-filing consultations after they submit a formal application. However, the purpose of those consultations is to determine whether a project is feasible and to what extent fish and wildlife studies are necessary. Therefore, the Commission declines to adopt this suggestion.

Some commenters argue that costs incurred after a license or exemption is issued, such as monitoring, compliance and enforcement costs, should also be reimbursed.[22] As with costs incurred if no application is filed, the Commission does not believe that reimbursement for these activities was intended by ECPA. Also, requiring reimbursement of monitoring, compliance and enforcement costs would impose an open-ended obligation on licensees and exemptees. Licensees and exemptees would never be able to determine their costs liability throughout the life of the project. This would place an inordinate burden on developers, particularly small developers.

The New York Department of Environmental Consideration (New York) states that since the NOPR proposed that an applicant could indicate that it would seek PURPA benefits after the initial stage of consultation, a fish and wildlife agency learning later of such an intent would have to reconstruct the record of its expenditures. The Commission recognizes that in these circumstances, an agency may have to reconstruct a record of review costs in order to support a request for reimbursement. The Commission does not believe that this requirement is unreasonably burdensome. The Commission will permit the agency to assess reasonable costs incurred to develop this cost reconstruction and include them in the agency's cost statement.

The NOPR proposed to reimburse only those costs that were incurred in the process of establishing mandatory terms and conditions. Several commenters argue that costs not specifically related to setting mandatory terms and conditions should also be reimbursable,[23] including costs related to "other environmental concerns" provided for under section 210 of PURPA.[24] ECPA clearly states, however, that only fish and wildlife review and study costs are eligible for reimbursement. Therefore, the Commission will allow reimbursement only for costs incurred in the process of setting mandatory terms and conditions.

Washington Fisheries suggests that the definition of a fish and wildlife agency should be expanded to include Indian tribes that participate in the consultation and review process in establishing terms and conditions. The Commission disagrees. While Indian tribes may perform functions similar to a state agency in this area, ECPA specifically provides for reimbursement only for state and Federal agencies.

D. Procedures for Implementing ECPA Fees

1. Fee Schedules

In the NOPR, the Commission proposed that agencies would be reimbursed for the actual costs they incurred in performing reviews and studies. Some commenters argue that, instead of actual costs, the Commission should establish a standard filing fee or estimated schedule of payments.[25] They suggest that the Commission establish a fee ceiling so that applicants would know the limits of their fees liability. Furthermore, they reason that estimates of actual fees do not provide an applicant with adequate notice of its potential liability.

The Commission does not believe that it is appropriate at this time to establish a representative fee structure to fully reimburse all the various fish and wildlife agencies for their actual costs of reviews and studies. The costs incurred by the agencies for a given project in one state may be appreciably different from those in another. For example, states with a large number of pending proposals can spread their administrative costs over all these projects. On the other hand, states that consider only a few applications would incur greater unit costs for studies and reviews. Also, the need for certain types of studies may be more common in some states than in others, allowing states conducting more studies to spread their costs over a greater number of projects. Since the Commission does not believe that it can establish a workable fee schedule at this time, it will not establish a fee ceiling in this proceeding. However, as the Commission gains experience in these matters, it will consider whether standard fees or a fee ceiling might be appropriate. For the present, the Commission believes that the cost estimates provided by /the agencies during the pre-filing consultation process should normally provide an applicant with a reasonable assessment of its fees liability. Therefore, an artificial fee ceiling is not necessary to provide adequate notice of potential liability.

2. Pre-Payment of Estimated Costs

In the NOPR, the Commission proposed that an applicant would pay, when it files its application, 50 percent of the costs the agencies estimated they will incur at the second stage of consultations.[26] Several commenters argue that this up-front payment is unduly burdensome.[27] By contrast, Washington Fisheries suggests that 75 percent of the estimated costs is more appropriate. The Small Business Administration (SBA) suggests that as an alternative to this cash payment, an applicant should be allowed to use another mechanism to guarantee payment, such as a surety bond, letter of credit, or corporate guarantee.

In response to SBA's comments, the Commission will allow an applicant to post an unlimited term surety bond for 100 percent of the estimated costs as an alternative to the 50 percent cash payment proposed in the NOPR. The Commission is requiring that a bond be from a company that is on the Department of the Treasury's (Treasury) list of approved surety companies. Approved companies are listed in Treasury's Circular 570, which is published every year in the **Federal Register**. If a company providing a bond is subsequently deemed to be unacceptable pursuant to Treasury's regulations, the applicant must acquire a new bond from an approved company. The Commission is permitting the use of bonds, since they would decrease the financial burden on the applicant, while guaranteeing payment to the agencies.

The NOPR proposed that an estimate would be based on an amount developed in the second stage of consultations. However, the Commission believes that if an agency bases the amount on its most recent cost estimate, the cash payment or the bond will more closely approximate an agency's final costs. The regulations require an applicant to file copies of the most recent cost estimates provided by the agencies together with the cash payment or bond when it files its application.

The SBA also suggests that the Commission modify the 50 percent payment requirement, on a case-by-case basis, if an applicant cannot supply a bond. The Commission recognizes that this might reduce the burden on individual applicants. However, as the Commission explained in the NOPR, the reason for requiring this 50 percent payment is to assure that an agency's total costs will be reimbursed. The Commission believes that to allow applicants to pay less than this amount would not meet that objective. Moreover, to involve the Commission in these individual determinations without having an application on file for reference would not be administratively feasible.

3. Filing Deadlines

In the NOPR, the Commission proposed to require an agency to submit a bill to the Commission 45 days after it establishes mandatory terms or conditions or 45 days after an application was withdrawn, rejected or dismissed. In response to several commenters that argue that the 45-day limit was inadequate,[28] the Commission is extending the 45-day period to 60 days. Furthermore, an agency may request, in writing, additional time for submitting these cost statements.[29] However, an agency that does not submit a cost statement or extension request within the prescribed time period waives its right to collect fees for that project.

The NOPR proposed that fish and wildlife agencies would be required to submit mandatory terms and conditions for new dams and diversions seeking PURPA benefits within 60 days after the Commission issues a notice accepting the application for filing.[30] Some commenters argue that the 60-day period is inadequate.[31]

The 60-day period for setting mandatory terms and conditions for new dam and diversion projects proposed in the NOPR reflects current Commission practice. The Commission currently provides agencies 60 days to establish mandatory terms and conditions for projects proposed for exemption from licensing.[32] Therefore, the Commission believes that 60 days is sufficient time to allow an agency to establish terms and conditions for a new dam or diversion project. The Commission will consider, however, an agency's written request for an extension of time to set terms and conditions.

The Commission also is not adopting a suggestion of Washington Game that the Commission notify state agencies 20 days prior to the end of the application comment period. In the Commission's experience state agencies already receive public notices routinely. For the Commission to provide a second notice would be redundant and unnecessarily burdensome.

4. Cost Estimate Procedures

The National Hydropower Association argues that agencies should be required to inform both the applicant and the Commission if it appears at any time that an agency's initial or revised cost estimate would be substantially exceeded. The Commission recognizes that an inaccurate estimate might greatly prejudice an applicant. Therefore, in order to keep an applicant informed of its cost liability, the final rule requires agencies to notify a potential applicant or applicant and the Commission if the agency expects that its initial or revised cost estimate would be exceeded by more than 25 percent.

The commenter also suggests that the Commission should provide applicants with semi-annual statements of accrued reimbursable costs in order to further apprise an applicant of its fees liability. The Commission does not believe that it is necessary to establish such a system. An applicant can request this information directly from the agency.

Several commenters request that the final rule make clear that an agency's initial cost estimate could be modified as reviews and studies progress.[33] The Commission emphasizes that all estimated costs can be revised as the agency acquires better data on a specific project. However, it is requiring that the amount of the bond posted or cash payment made by an applicant when it files an application to be based on the agency's most recent cost estimate before the application is filed.

5. Review Procedures

In the dispute resolution procedures outlined in the NOPR, an applicant would be required to pay any undisputed amounts to the Commission within 45 days after the final bill was issued to the applicant by the Commission. The final rule adopts a different approach. In order to ensure that an agency's costs are reimbursed and to prevent spurious appeals, the final rule requires a disputing applicant to pay the full amount of the bill, subject to refund, pending the outcome of any dispute resolution proceedings.

Several commenters suggest that, when the Director of OHL makes a determination as to the reasonableness of agency costs or necessity of studies and reviews, the Director must support any decision in writing.[34] The final rule adopts this suggestion.

Several commenters disagree with the proposal in the NOPR to allow the Director of OHL to review agency cost statements disputed by applicants.[35]

These commenters argue that the agencies alone should determine what studies are necessary. They state that it is the agency's responsibility, not the Commission's, to establish the scope of the studies. They argue that since fish and wildlife agencies establish terms and conditions, it is not appropriate for the Commission to disallow these types of expenditures on the basis that certain studies were unnecessary.

The Commission disagrees. ECPA specifically provide that fish and wildlife agencies should be reimbursed "for any reasonable costs" in performing studies and reviews. Since the Commission is responsible for establishing fees to reimburse "reasonable costs," it necessarily has the authorty to determine whether the costs submitted by agencies are reasonable. The Commission has a statutory obligation under ECPA to ensure that agencies are not unreasonable in making their cost statements and study requirements under FPA section 30(c). The Commission however, will give due weight to the agencies expertise and judgment in making these determinations. Therefore, the Director of OHL is granted the authority to review the cost statements submitted by agencies, if disputed by the applicants. This review may be based on documentation submitted by the agency as well as the applicant. In determining whether the costs submitted are reasonable, the Director of OHL will consider such factors as (1) whether the time spent reviewing the project was reasonable, (2) whether the costs submitted were in line with the time spent reviewing the project and Federal expenditure guidelines, (3) whether the studies completed were duplicative, or not reasonable considering the fish and wildlife resources affected by the proposed project, and (4) whether the costs were not necessary to set terms and conditions for that project.

Some commenters state that the dispute resolution procedures in the NOPR improperly placed the burden of proof on the agencies, rather than the contesting applicant.[36] In the final rule, the Commission is placing the burden on the applicant to show that an agency's cost are unreasonable. However, the Commission recognizes that the agency has the documentation that an applicant would need to make this showing. Therefore, the final rule requires the agency to supply the disputing applicant or the Commission with the documentation necessary to support its costs statement.

Washington Game requests that the Commission define what "reasonable costs" are. Similarly, New York recommends that the final rule describe the types of studies and project review activities that are reimbursable.

While the final rule establishes general guidelines for review of an agency's costs, the Commission cannot adequately define all the costs that can be termed reasonable in a generic rulemaking because it cannot enumerate all of the studies and reviews that an agency may deem reimburseable. Instead, it will rely on agencies to interpret the statute and submit cost statements for those costs they believe should be chargeable.

Wisconsin and the National Hydropower Association suggest that as part of any review of reasonableness, the Director of OHL consider factors other than those enumerated in the NOPR. The Commission does not believe it is necessary to specify all of the evidence that can be submitted in a cost dispute. If an applicant wishes to introduce the intial estimate as part of the record in a dispute proceeding, it may do so.

Several commenters express a concern that they might not have an opportunity to appeal a decision of the Director of OHL that certain cost were not reimbursable.[37] The Commission emphasizes that any decision by the Director of OHL may be appealed to the full Commission.[38]

The National Wildlife Federation suggests that the final rule establish specific time frames in which the Director of OHL must act to review costs disputed by applicants and make payments to the agencies. The Commission declines to do so since to establish review deadlines may force premature decisions in instances where additional analysis is required to reach an informed decision. The Commission will act as expeditiously as possible in making any payments to the agencies.

Long Lake states that under 31 U.S.C. 3711(a)(2) the Commission cannot compromise a claim of more than $20,000.[39] To make sure that disputed proceedings involve amounts less than $20,000, the commenter suggests that the Director of OHL only consider the amount of fees in dispute, not the total amount for which the applicant may be liable. However, the dispute resolution proceedings in this rule establish an applicant's fee liability. This is the amount of the claim the United States has against the applicant, not a "compromise" of that claim within the meaning of 31 U.S.C. 3711(a)(2).

6. ECPA Fees and FPA Section 10(e) Charges

The NOPR proposed that any fees collected by the NMFS and USFWS would be deducted from the annual charges assessed against hydroelectric licensees under section 10(e) of the FPA.[40] These annual charges reimburse the Federal government for the costs of administering Part I of the FPA. The Commission is clarifying that, the USFWS and NMFS must deduct any fees paid into their Treasury accounts in a given year from the amount they submit to the Commission when they report their annual costs under Part I of the FPA. These agencies file an annual report to the Commission to enable the Commission to determine the annual charges the Commission assesses against licensees, pursuant to section 10(e) of the FPA.

The U.S. Department of the Interior and the U.S. Department of Commerce request that the Commission clarify the difference between cost reimbursement under FPA section 10(e) and the fees collected under this rule.

Under FPA section 10(e), the Commission establishes annual charges that are assessed against licensees to reimburse the entire Federal Government's cost in administering Part I of the FPA. These charges are paid into the Commission's treasury account and are used to offset the Commission's appropriations.

By contrast, fees charged and collected under this rule are to reimburse specific agencies for work performed on specific projects. Fees will be deposited in a suspense account until the entire fee on a specific project is collected. Fees paid in full will be reported to the Treasury Department in the receipt account designated by the USFWS and the NMFS to receive these amounts. Fees collected to reimburse state agencies will be sent from the suspense account to the appropriate state agency.

[36] *See e.g.*, National Wildlife Federation.

[37] *See e.g.*, National Wildlife Federation.

[38] 18 CFR 385.1902 (1987).

[39] 31 U.S.C. 3711(a)(2) (1982) states that "[t]he head of an executive or legislative agency * * * may compromise a claim of the Government of not more than $20,000 (excluding interest) that has not been referred to another executive or legislative agency for further collection action." For claims exceeding this amount, the authority to accept any compromise rests solely with the Department of Justice. 4 CFR 103.1(b) (1987).

[40] 16 U.S.C. 803(e) (1982).

7. Cost Reimbursement Procedure

The Commission believes it is important to clarify its role in collecting study and review costs on behalf of the fish and wildlife agencies. While the Commission will attempt to collect these fees, it will not be liable to any agency for amounts that are not collected. If the total amount collected on behalf of several agencies is not sufficient to meet all of the agencies' costs, the amount the Commission does collect will be distributed to the agencies on a *pro rata* basis, with one exception. That is, if an agency's final cost statement is greater than its most recent statement to the applicant at the time of filing, the difference between the estimate and the final costs will not be reimbursed to that agency until any amounts owed to the other agencies have been paid.

Long Lake asks whether the fees assessed under the rule are to be treated as a debt to the United States. Long Lake suggests that the final rule incorporate debt collection provisions into the Commission's regulations.

The Commission considers these fees to be debts to the Federal government and therefore subject to the debt collection provisions contained in 31 U.S.C. 3711 and 4 CFR Parts 103 and 104. Since the Commission is bound by these provisions, it believes that it is not necessary to incorporate them into its regulations.

New York argues that the final rule should include specific provisions for reimbursements of costs from each competing applicant at a proposed site. The Commission does not believe additional regulations are necessary. This situation is already accommodated in the regulations proposed and adopted in this final rule.

The U.S. Department of the Interior argues that the proposed billing procedures are inconsistent with its procedures; that the proposed reimbursement procedures are unworkable; and that the USFWS cannot commence work on a project without advance payment of all the estimated review and study costs. Instead of the reimbursement procedures outlined in the NOPR, the commenter proposed an alternative mechanism.

The Commission believes, however, that it is not possible to fashion a rule that can take into account all of the internal procedures of the various fish and wildlife agencies. The Commission also declines to adopt the commenter's alternative proposal since, among other reasons, the commenter's proposal requires a potential applicant to pay, in full, the estimated review and study costs even if an application is never subsequently filed and includes payments for review and study costs after a license or exemption is issued.

E. Miscellaneous Issues

The final rule adopts a suggestion that the definitions of "cost statement" and "supporting documentation" in the NOPR be merged [41] since the terms are essentially the same.

The NOPR proposed that a potential new dam or diversion license applicant would be required to notify resource agencies, at the initial stage of consultation, if it intended to seek PURPA benefits. The Commission adopts the U.S. Department of Interior's suggestion that this notice must be in writing, with a copy to the Commission.

Long Lake argues that the NOPR implied that a state agency would not be reimbursed if it was unable to establish terms and conditions. The Commission did not intend this result. The Commission clarifies that an agency would be reimbursed for its costs even if it is unable to set terms or conditions.

The National Wildlife Federation and the U.S. Department of the Interior state that in the NOPR, the definition of "mandatory terms and conditions" did not refer to ECPA or to the Fish and Wildlife Coordination Act [42] and suggest that the Commission include a reference to these statutes in the definition of "mandatory terms and conditions." The Commission does not believe such a reference is necessary because the definition proposed in the NOPR is adequate to describe the types of reviews and studies for setting terms and conditions that are reimbursable.

IV. Regulatory Flexibility Act

The Regulatory Flexibility Act (RFA) [43] generally requires a description and analysis of a final rule that will have a significant economic impact on a substantial number of small entities.[44] Specifically, if an agency promulgates a final rule under the Administrative Procedure Act [45], a final RFA analysis must contain (1) a statement of the need for an objective of the rule, (2) a summary of the issues raised by the public comments in response to any initial regulatory flexibility analysis, and the agency response to those comments, and (3) a description of significant alternatives to the rule consistent with the stated objectives of the applicable statute that the agency considered and ultimately rejected.

The broad purpose of the RFA is to ensure more careful and informed agency consideration of rules that may significantly affect small entities and to encourage analysis of these rules as well as the agency's consideration of alternative approaches that may better resolve any unnecessary costly or adverse effects on small entities.

In this preamble, the Commission presents its reasons for this agency action, its objectives, and the legal basis for this rulemaking. As discussed, the rule establishes fees to be paid to the Commission by hydroelectric applicants to reimburse Federal and state fish and wildlife agencies for the costs of reviews and studies in establishing mandatory terms and conditions under section 30(e) of the FPA. The rule does not duplicate, overlap or conflict with any other relevant Federal rule.

This rule would affect applicants for:

1. Projects exempt from licensing under section 30 of the FPA (conduit exemptions);
2. Projects exempt from licensing under section 405 or 408 of PURPA (5–MW exemptions); and
3. Certain projects at new dams and diversions seeking benefits under section 210 of PURPA.

In 1986, there were 17 applications filed for conduit exemptions, 39 applications filed for 5–MW exemptions, and 33 applications filed for PURPA benefits at new dams or diversions. Of these applications the Commission estimates that 90 percent were filed by small entities under the definition in the RFA.[46]

The Commission realizes that the proposed fee requirement may have a significant impact on a substantial number of small entities. If a proposal may have significant economic impact on a substantial number of small entities, section 603(c) of the RFA requires the Commission to discuss significant alternatives to the proposal.

The NOPR specifically requested comments as to how to reduce the economic impact on small entities. The final rule adopts a suggestion that will significantly reduce this burden. In the final rule, an applicant may post a surety bond in lieu of paying 50 percent

[45] *Id.* at section 553.

[46] The RFA defines a small entity as a small business, small organization or small governmental jurisdiction. Small businesses are defined under the Act as for-profit enterprises which are independently owned and operated and are not dominant in their field

VOL 52 ISS 245 DEC 22 1987 UMI

of the estimated review and study costs upon filing an application.

Additionally, the Commission could consider reducing or eliminating fees for small entities. However, in establishing the fees in this rule, the Commission is implementing the mandate of Congress in ECPA that fish and wildlife agencies be reimbursed for the costs of reviews or studies incurred in certain types of hydroelectric projects. Therefore, the Commission believes that in this rulemaking, it has met the purposes of the RFA given the constraints set by ECPA.

V. Paperwork Reduction Act Statement

The information collection provisions in this final rule are being submitted to the Office of Management and Budget (OMB) for its approval under the Paperwork Reduction Act [47] and OMB's regulations.[48] Interested persons can obtain information on the information collection provisions in this rule by contracting the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, (Attention: Ellen Brown (202) 357-5311). Comments on the information collection provisions can be sent to the Office of Information and Regulatory Affairs of OMB, New Executive Office Building, Washington, DC 20503 (Attention: Desk Officer for the Federal Energy Regulatory Commission).

VI. Effective Date

This final rule is effective January 21, 1988. If OMB has not approved this final rule by the effective date of this rule, the effective date of the rule will be suspended. In case of such suspension, the Commission will issue a public notice to that effect.

List of Subjects

18 CFR Part 4

Electric power, Reporting and recordkeeping requirements.

18 CFR Part 11

Electric power, Reporting and recordkeeping requirements.

18 CFR Part 375

Authority delegations (Government agencies), Seals and insignia, Sunshine Act.

In consideration of the foregoing, the Commission amends Parts 4, 11, and 375, Chapter I Title 18, Code of Federal Regulations, as set forth below.

Lois D. Cashell,
Acting Secretary.

PART 4—LICENSES, PERMITS, EXEMPTIONS, AND DETERMINATION OF PROJECT COSTS

1. The authority citation in Part 4 is revised to read as follows:

Authority: Federal Power Act, 16 U.S.C. 791a–825r, as amended by the Electric Consumers Protection Act of 1986, Pub. L. No. 99–495; Public Utility Regulatory Policies Act of 1978, 16 U.S.C. 2601–2645 (1982), Department of Energy Organization Act, 42 U.S.C. 7101–7352 (1982); EO 12009, 3 CFR 142 1978 Comp. p. 142.

2. In § 4.30, paragraph (b)(9) is revised to read as follows:

§ 4.30 Applicability and definitions.

(b) * * *

(9) "Fish and wildlife agencies" means that the United States Fish and Wildlife Service, the National Marine Fisheries Service, and any state agency with administrative management over fish and wildlife resources of the state or states in which a small conduit hydroelectric power project, or a qualifying hydroelectric small power production facility, as defined in § 292.203(c) of this chapter, is or will be located.

* * * * *

3. In § 4.32, paragraph (c)(4) is added to read as follows:

§ 4.32 Acceptance for filing or rejection.

* * * * *

(c) * * *

(4) For an application for a license seeking benefits under section 210 of the Public Utility Regulatory Policies Act of 1978, as amended, for a project that would be located at a new dam or diversion, circulate the public notice issued for the application under paragraph (c)(2)(i) of this section to interested agencies at the time the applicant is notified that the application is accepted for filing. If a particular agency does not comment within 60 days from the date of issuance of the notice, that agency will be presumed to have no comment on or objection to the license requested. Any comments submitted by a fish and wildlife agency must include any specific terms or conditions that the agency has determined are necessary to prevent loss of, or damage to, fish and wildlife resources or otherwise to carry out the provisions of the Fish and Wildlife Coordination Act, except those terms or conditions that may be included in Exhibit E of the license application.

* * * * *

4. In § 4.38, paragraph (a) is amended by adding a new sentence to the end of the paragraph to read as follows:

§ 4.38 Pre-filing consultation requirements.

(a) * * * An applicant for an exemption from licensing or an applicant for a license seeking benefits under section 210 of the Public Utility Regulatory Policies Act, as amended, for a project that would be located at a new dam or diversion must, in addition to meeting the requirements of this section, comply with the consultation requirements in § 4.301.

* * * * *

5. A new Subpart M, consisting of §§ 4.300 through 4.305, is added to read as follows:

Subpart M—Fees Under Section 30(c) of the Act

Sec.
4.300 Purpose, definitions, and applicability
4.301 Notice to fish and wildlife agencies and estimation of fees prior to filing.
4.302 Fees at filing.
4.303 Post-filing procedures.
4.304 Payment.
4.305 Enforcement.

§ 4.300 Purpose, definitions, and applicability.

(a) *Purpose.* This subpart implements the amendments of section 30 of the Federal Power Act enacted by section 7(c) of the Electric Consumers Protection Act of 1986 (ECPA). It establishes procedures for reimbursing fish and wildlife agencies for costs incurred in connection with applications for an exemption from licensing and applications for licenses seeking benefits under section 210 of the Public Utility Regulatory Policies Act of 1978, as amended, for a project that would impound or divert the water of a natural watercourse by means of a new dam or diversion.

(b) *Definitions.* For the purposes of this subpart—

(1) "Cost" means an expenditure made by a fish and wildlife agency:

(i) On or after the effective date of this regulation for an application filed on or after the effective date of this regulation; and

(ii) Directly related to setting mandatory terms and conditions for a proposed project pursuant to section 30(c) of the Federal Power Act.

(2) "Cost statement" means a statement of the total costs for which a fish and wildlife agency requests reimbursement including an itemized schedule of costs including, but not limited to, costs of fieldwork and testing, contract costs, travel costs, personnel costs, and administrative and overhead costs.

(3) "Mandatory terms and conditions" means terms and conditions of a license or exemption that a fish and wildlife agency determines are appropriate to prevent loss of, or damage to, fish and wildlife resources pursuant to section 30(c) of the Federal Power Act.

(4) "New dam or diversion license applicant" means an applicant for a license for a project that would impound or divert the water of a natural watercourse by means of a new dam or diversion, as defined in section 210(k) of the Public Utility Regulatory Policies Act of 1978, as amended.

(5) "PURPA benefits" means benefits under section 210 of the Public Utility Regulatory Policies Act of 1978, as amended.

(6) "Section 30(c) application" means an application for an exemption from licensing or a new dam or diversion license application seeking PURPA benefits.

(c) *Applicability.* Except as provided in paragraph (d) of this section, this subpart applies to:

(1) Any application for exemption filed on or after the effective date of these regulations for costs incurred by fish and wildlife agencies after the effective date of these regulations;

(2) Any new dam or diversion license application seeking PURPA benefits filed on or after April 16, 1988;

(3) Any new dam or diversion license application seeking PURPA benefits filed after the effective date of this regulation, but before April 16, 1988, if the applicant fails to demonstrate in a monetary resources petition filed with the Commission pursuant to § 292.208 of this chapter that, before October 16, 1986, it had committed substantial monetary resources directly related to the development of the proposed project and to the diligent and timely completion of all requirements of the Commission for filing an acceptable application; and

(4) Any new dam or diversion license application seeking PURPA benefits filed after the effective date of this regulation, if the application is not accepted for filing before October 16, 1989.

(d) *Exceptions.* (1) This subpart does not apply to any new dam or diversion license application seeking PURPA benefits if the moratorium described in section 8(e) of ECPA is in effect. The moratorium will end at the expiration of the first full session of Congress following the session during which the Commission reports to Congress on the results of the study required under section 8(d) of ECPA.

(2) This subpart does not apply to any new dam or diversion license application seeking PURPA benefits for a project located at a Government dam, as defined in section 3(10) of the Federal Power Act, at which non-Federal hydroelectric development is permissible.

§ 4.301 Notice to fish and wildlife agencies and estimation of fees prior to filing.

(a) *Notice to agencies*—(1) *New dam or diversion license applicants.* During the initial stage or pre-filing agency consultation under § 4.38(b)(1), a prospective new dam or diversion license applicant must inform each fish and wildlife agency consulted in writing with a copy to the Commission whether it will seek PURPA benefits.

(2) *Exemption applicants.* During the initial stage of pre-filing agency consultation under § 4.38(b)(1), a prospective exemption applicant must notify each fish and wildlife agency consulted that it will seek an exemption from licensing.

(b) *Estimate of fees.* Within the comment period provided in § 4.38(b)(2)(iv), a fish and wildlife agency must provide a prospective section 30(c) applicant with a reasonable estimate of the total costs the agency anticipates it will incur to set mandatory terms and conditions for the proposed project. An agency may provide an applicant with an updated estimate as it deems necessary. If an agency believes that its most recent estimate will be exceeded by more than 25 percent, it must supply the prospective applicant or applicant with a new estimate and submit a copy to the Commission.

§ 4.302 Fees at filing.

(a) *Filing requirement.* A section 30(c) application must be accompanied by a fee or a bond, together with copies of the most recent cost estimates provided by fish and wildlife agencies pursuant to § 4.301(b).

(b) *Amount.* The fee required under paragraph (a) of this section must be in an amount equal to 50 percent of the most recent cost estimates provided by fish and wildlife agencies pursuant to § 4.301(b). In lieu of this amount, an applicant may provide an unlimited term surety bond from a company on the Department of Treasury's list of companies certified to write surety bonds. Applicants bonded by a company whose certification by the Department of the Treasury lapses must provide evidence of purchase of another bond from a certified company. A bond must be for an amount no less than 100 percent of the agencies' most recent cost estimates pursuant to § 4.301(b).

(c) *Failure to file.* The Commission will reject a section 30(c) application if the applicant fails to comply with the provisions of paragraphs (a) and (b) of this section.

§ 4.303 Post-filing procedures.

(a) *Submission of cost statement*—(1) *Accepted applications.* Within 60 days after the last date for filing mandatory terms and conditions pursuant to § 4.32(c)(4) for a new dam or diversion license application seeking PURPA benefits, § 4.93(b) for an application for exemption of a small conduit hydroelectric facility, or § 4.105(b)(1) for an application for case-specific exemption of a small hydroelectric power project, a fish and wildlife agency must file with the Commission a cost statement of the reasonable costs the agency incurred in setting mandatory terms and conditions for the proposed project. An agency may request, in writing, along with any supporting documentation an extension of this 60-day period.

(2) *Rejected, withdrawn or dismissed applications.* The Director of the Office of Hydropower Licensing (Director) will, by letter, notify each fish and wildlife agency if a section 30(c) application is rejected, withdrawn or dismissed. Within 60 days from the date of notification, a fish and wildlife agency must file with the Commission a cost statement of the reasonable costs the agency incurred prior to the date the application was rejected, withdrawn, or dismissed. An agency may submit a written request for an extension of this 60-day period along with any supporting documentation.

(b) If an agency has not submitted a cost statement or extension request within the time provided in paragraph (a)(2) of this section, it waives its right to receive fees for that project pursuant to this subpart.

(c) *Billing.* After the Commission receives a cost statement from all fish and wildlife agencies as required by paragraph (a) of this section, the Commission will bill the section 30(c) applicant. The bill will show:

(1) The cost statement submitted to the Commission by each fish and wildlife agency;

(2) Any amounts already paid by the applicant pursuant to § 4.302; and

(3)(i) The amount due, if the amount already paid by the applicant pursuant to § 4.302 is less than the total of all the cost statements; or

(ii) The amount to be refunded to the applicant, if the amount already paid by

BEST COPY AVAILABLE

VOL 52 ISS 245 DEC 22 1987 UMI

the applicant pursuant to § 4.302 is more than the total of all the cost statements.

(d) Within 45 days from the date of a bill issued under paragraph (b) of this section, a section 30(c) applicant must pay in full to the Commission any remaining amounts due on the cost statements regardless of whether any of these amounts are in dispute.

(e) *Dispute procedures*—(1) *When to dispute.* Any dispute regarding the reasonableness of any fish and wildlife agency cost statement must be made within 45 days from the date of a bill issued under paragraph (b) of this section.

(2) *Assessment of disputed cost statements* The burden of showing that an agency's cost statement is unreasonable is on the applicant. However, a fish and wildlife agency must supply the disputing applicant and the Commission with the documentation necessary to support its cost statement. The Director of the Office of Hydropower Licensing will determine the reasonableness of a disputed fish and wildlife agency cost statement. The Director's decision will be in writing. The Director will notify the disputing applicant and the fish and wildlife agency of the decision by letter. Any decision of the Director may be appealed by either party pursuant to 18 CFR 385.1902. In deciding whether or not a disputed cost statement is reasonable, the Director will review the application, the disputed cost statement and any other documentation relating to the particular environmental problems associated with the disputing applicant's proposed project. The Director will consider such factors as:

(i) The time the fish and wildlife agency spent reviewing the application;

(ii) The proportion of the cost statement to the time the fish and wildlife agency spent reviewing the application;

(iii) Whether the fish and wildlife agency's expenditures conform to Federal expenditure guidelines for such items as travel, per diem, personnel, and contracting; and

(iv) Whether the studies conducted by the agency, if any, are duplicative, limited to the proposed project area, unnecessary to determine the impacts to or mitigation measures for the particular fish and wildlife resources affected by the proposed project, or otherwise unnecessary to set terms and conditions for the proposed project.

(3) *Unreasonable cost statements.* If the Director determines that a disputed fish and wildlife agency cost statement is unreasonable, the disputing applicant and the fish and wildlife agency will be afforded 45 days from the date of notification to attempt to reach an agreement regarding the reimbursable costs of the agency. If the disputing applicant and the fish and wildlife agency fail to reach an agreement on the disputed cost statement within 45 days from the date of notification, the Director will determine the costs that the agency should reasonably have incurred.

(f) *Refunds.* (1) If the amount paid by a section 30(c) applicant under § 4.302 exceeds the total amount of the cost statements submitted by fish and wildlife agencies under paragraph (a) of this section, the Commission will notify the Treasury to refund the difference to the applicant within 45 days from the date of the bill issued to the applicant under paragraph (b) of this section.

(2) If the amount paid by a section 30(c) applicant exceeds the amount determined to be reasonable by the Director pursuant to paragraph (d)(2) of this section, the Commission will notify the Treasury to refund the difference to the applicant within 45 days of the resolution of all dispute proceedings.

§ 4.304 Payment.

(a) A payment required under this subpart must be made by check payable to the United States Treasury. The check must indicate that the payment is for "ECPA Fees."

(b) If a payment required under this subpart is not made within the time period prescribed for making such payment, interest and penalty charges will be assessed. Interest and penalty charges will be computed in accordance with 31 U.S.C. 3717 and 4 CFR Part 102.

(c) The Commission will not issue a license or exemption, unless the applicant has made full payments of any fees due under § 4.303(c).

§ 4.305 Enforcement

(a) The Commision may take any appropriate action permitted by law if a section 30(c) applicant does not make a payment required under this subpart. The Commission will not be liable to any fish and wildlife agency for failure to collect any amounts under this subpart.

(b) If the Commission is unable to collect the full amount due by a section 30(c) applicant on behalf of more than one agency, the amount the Commission does collect will be distributed to the agencies on a *pro-rata* basis except if an agency's cost statement is greater than its most recent estimate to the applicant under § 4.301(b), then the difference between the estimate and the cost statement will not be reimbursed until any amounts owed to other agencies have been paid.

PART 11—[AMENDED]

6. The authority citation for Part 11 is revised to read as follows:

Authority: Federal Power Act, 16 U.S.C. 791a–825r (1982); Department of Energy Organization Act, 42 U.S.C. 7101–7352 (1982); EO 12009, 3 CFR 1978 Comp., p. 142.

7. In § 11.1, paragraph (f) is added to read as follows:

§ 11.1 Costs of administration

* * * * *

(f) In making their annual reports to the Commission on their costs in administering Part I of the Federal Power Act, the United States Fish and Wildlife Service and the National Marine Fisheries Service are to deduct any amounts that were deposited into their Treasury accounts during that year as reimbursements for conducting studies and reviews pursuant to section 30(e) of the Federal Power Act.

PART 375—THE COMMISSION

8. The authority citation for Part 375 continues to read as follows:

Authority: Electric Consumers Protection Act of 1986, Pub. L. 99–495; Department of Energy Organization Act, 42 U.S.C. 7101–7352, EO 12009, 3 CFR 1978 Comp., p. 142; Administrative Procedure Act, 5 U.S.C. 553; Federal Power Act, 16 U.S.C. 791–828c, as amended; Natural Gas Act, 15 U.S.C. 717–717w, as amended; Natural Gas Policy Act of 1978, 15 U.S.C. 3361 *et seq.*; Public Utility Regulatory Policies Act of 1978, 16 U.S.C. 2601 *et seq.*, as amended.

9. In § 375.314, paragraph (ff) is added to read as follows:

§ 375.314 Delegations to the Director of the Office of Hydropower Licensing.

* * * * *

(ff) Pass upon the reasonableness of disputed agency cost statements pursuant to § 4.303(d) of this chapter.

BILLING CODE 6717–01–M

---

18 CFR Parts 154, 270, 273, 375 and 381

[Docket No. RM86–14–000; Order No. 483]

Revisions to the Purchased Gas Adjustment Regulations; Suspension of Effective Date

December 16, 1987.

AGENCY: Federal Energy Regulatory Commission DOE.

ACTION: Final Rule; Notice of Suspension of Effective Date of Order.

SUMMARY: On November 10, 1987, the Federal Energy Regulatory Commission (Commission) issued a final rule in Docket No. RM86–14–000. (52 FR 43854 (Nov. 17, 1987)). This notice suspends the rule's effective date of December 17, 1987, for 30 days in order to provide the Office of Management and Budget (OMB) additional time to review the final rule's information collection provisions.

EFFECTIVE DATE: The final rule in this docket is effective January 29, 1988.

FOR FURTHER INFORMATION CONTACT: Andrew S. Katz, Office of the General Counsel, Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, Phone: (202) 357–8020.

SUPPLEMENTARY INFORMATION: Pursuant to its regulations, OMB has requested additional time to review the information collection provisions in Order No. 483, Revisions to the Purchased Gas Adjustment Regulations.[1] The Commission, therefore, suspends the effective date of Order No. 483 until January 29, 1988.

Lois D. Cashell,
Acting Secretary.

BILLING CODE 6717–01–M

[1] Vermont's original comments supported the rule. It later rescinded its support.

[2] The comments by the Department of the Interior, Fish and Wildlife Service, and the Office of Environmental Project Review are substantially similar and the two are jointly referred to as the U.S. Department of the Interior in the preamble.

DEPARTMENT OF THE TREASURY

Internal Revenue Service

26 CFR Parts 1 and 602

[T.D. 8168]

Income Taxes; Limitation on Deduction for Nonbusiness Interest: Personal Interest

AGENCY: Internal Revenue Service, Treasury.

ACTION: Temporary regulations.

SUMMARY: This document contains temporary regulations relating to the treatment of personal interest and the treatment and determination of qualified residence interest. The text of the temporary regulations set forth in this document also serves as the text of the proposed regulations for the notice of proposed rulemaking on this subject in the Proposed Rules section of this issue of the **Federal Register**. Changes to the applicable tax law were made by the Tax Reform Act of 1986. The regulations affect taxpayers other than corporations who have paid or accrued personal interest during a taxable year, and taxpayers who have paid or accrued interest on debt secured by a principal or second residence.

DATES: The regulations are effective for taxable years beginning after December 31, 1986.

FOR FURTHER INFORMATION CONTACT: Sharon L. Hall of the Legislation and Regulations Division, Office of Chief Counsel, Internal Revenue Service, 1111 Constitution Avenue NW., Washington, DC 20224 (Attention: CC:LR:T) (202) 566–3288 (not a toll-free call).

SUPPLEMENTARY INFORMATION:

Background

This document amends the Income Tax Regulations (26 CFR Part 1) and the Table of OMB Control Numbers (26 CFR Part 602) to provide rules under section 163(h) of the Internal Revenue Code of 1986. Section 163(h) was added to the Code by section 511(b) of the Tax Reform Act of 1986 (Pub. L. 99–514, 100 Stat. 2246).

Explanation of Statutory Provisions

Section 163(h)(1) provides that in the case of a taxpayer other than a corporation, no deduction shall be allowed under Chapter 1 of the Internal Revenue Code for personal interest paid or accrued during the taxable year. Section 163(h)(2) defines personal interest as any interest otherwise allowable as a deduction under Chapter 1 of the Internal Revenue Code other than (a) interest paid or accrued on indebtedness properly allocable to the conduct of a trade or business (other than the trade or business of performing services as an employee), (b) investment interest, (c) interest taken into account under section 469 in computing income or loss from a passive activity, (d) qualified residence interest, or (e) interest payable under section 6601 on any unpaid portion of the tax imposed by section 2001 for the period during which an extension of time for payment of such tax is in effect under section 6163, 6166 or 6166A (as in effect before its repeal by the Economic Recovery Tax Act of 1981).

Section 163(h)(3) defines qualified residence interest as interest paid or accrued on debt that is secured by a qualified residence at the time such interest is paid or accrued. Under section 163(h)(3)(B), however, interest expense constitutes qualified residence interest only to the extent that the underlying debt, when added to the principal balance of all other debt previously secured by the qualified residence, does not exceed the lesser of (a) the fair market value of the qualified residence, or (b) the sum of the taxpayer's basis in the qualified residence (adjusted only by the cost of any improvements) plus the amount of

[1] *See* 5 CFR 1320.12 (1987).

VOL 52 ISS 245 DEC 22 1987 UMI

qualified indebtedness (secured medical and educational debt). Section 163(h)(3)(C) provides that for purposes of this limitation the taxpayer's basis in the qualified residence shall not be less than the principal balance of debt incurred prior to August 16, 1986, and secured by the qualified residence on August 16, 1986. Section 163(h)(3)(D) provides that, except as provided in regulations, any determination with respect to the limitation on the amount of qualified residence interest shall be made at the time the debt is incurred.

Qualified indebtedness is defined in section 163(h)(4) as debt secured by a qualified residence which is incurred after August 16, 1986, to pay for certain medical and educational expenses, which are paid or incurred within a reasonable period of time before or after such debt is incurred.

Section 163(h)(5) defines qualified residence as the principal residence of the taxpayer and one other residence designated by the taxpayer.

Explanation of Regulatory Provisions

The regulations adopt an annual test to determine whether a taxpayer's debt secured by a qualified residence ("secured debt") exceeds the section 163(h)(3)(B) limitation on qualified residence interest. An annual approach was chosen rather than a test applied only at the time a debt is incurred because an annual approach takes account of reductions in the principal balance of secured debt and, therefore, removes the incentive to refinance a secured debt in order to redetermine the limitation. Moreover, an annual test accounts more appropriately for lines of credit, the balance of which may fluctuate from year to year.

The regulations apply the annual test by comparing the section 163(h)(3)(B) limitation with the average principal balance of the debt during the taxable year. The average balance was selected over the principal balance of the debt on a particular day during the year (such as the first day of the year or the day on which the principal balance is the highest) because the average balance more accurately reflects the amount of debt outstanding over the course of the year and is more closely associated with the amount of interest paid.

Under the regulations, a taxpayer's basis in a residence (the "adjusted purchase price") is determined as of the end of each year, instead of at the time a debt is incurred. By providing for determination of the adjusted purchase price at the end of each year, the regulations permit a taxpayer to apply a single overall limitation to all secured debts, rather than a separate limitation for each debt. In addition, the use of an end-of-year adjusted purchase price permits taxpayers to take advantage of increases in the adjusted purchase price due to home improvements without the need to refinance debt.

In contrast, however, the regulations generally require the fair market value of the residence to be determined as of the time a debt is incurred. Limiting the fair market value determination to the date a debt is incurred will minimize controversy between taxpayers and the Service because the residence's fair market value with respect to any particular debt will be determined only once and because an independent appraisal ordinarily is conducted in connection with arm's length lending transactions.

In the case of a qualified residence that is real property, the regulations provide an irrebuttable presumption that the fair market value is no less than the adjusted purchase price of the residence as of the end of the current taxable year. This presumption further reduces controversy between taxpayers and the Service over fair market value. It is believed that, in a broad range of circumstances, fair market value will in fact be at least as great as the adjusted purchase price.

These simplifications permit a taxpayer to determine whether all interest expense on secured debt is qualified residence interest by comparing the sum of the average balances for the taxable year of all secured debt to the adjusted purchase price determined as of the end of the year. If this sum is less than the adjusted purchase price, all of the interest paid or accrued on the secured debt is qualified residence interest. If the combined average balance exceeds the adjusted purchase price, the taxpayer must determine the amount of qualified residence interest using either the "simplified method" or the "exact method." (A taxpayer may use a different method for each qualified residence in each taxable year.)

Under the simplified method, the amount of qualified residence interest is determined by miltiplying the total interest paid or accrued on all of the debt secured by a qualified residence by a fraction, the numerator of which is the adjusted purchase price and the denominator of which is the combined average balance. Any disallowed interest is treated as personal interest, the deduction for which is phased out over the period 1987 through 1990.

If a taxpayer wishes to take advantage of qualified indebtedness (secured medical and educational debt) or wishes to trace interest expense on secured debt to expenditures other than personal expenditures, the taxpayer must use the exact method. Under the exact method, the amount of qualified residence interest is determined on a debt-by-debt basis by comparing each debt to the applicable debt limit determined for that debt. If the average balance for any debt is less than its applicable debt limit, all of the interest paid or accrued on that debt is qualified residence interest. If the average balance exceeds its applicable debt limit, only a portion of the interest on the debt is qualified residence interest. The treatment of the remaining interest on the debt is determined by the use of the proceeds of the debt. If, for example, the proceeds of the debt were used to purchase investment assets, the remaining interest is investment interest subject to section 163 (d).

The applicable debt limit for any debt is determined in two steps. First, the taxpayer determines the lesser of (a) the fair market value of the residence at the time the debt was secured, and (b) the sum of the adjusted purchase price (determined as of the end of the taxable year) plus the amount of qualified indebtedness for that debt and for all previously secured debt. Second, the taxpayer subtracts the average balance (or, if less, the applicable debt limit) of all previously secured debts from the amount so determined.

The regulations provide guidance on the determination of the amount of qualified indebtedness (*i.e.*, the amount of debt used to pay for qualified medical and educational expenses). If at least 90 percent of the proceeds of a secured debt are used to pay for qualified medical and educational expenses, the amount of qualified medical and educational expenses, the amount of qualified indebtedness is the average balance of the debt. If less than 90 percent of the proceeds of a secured debt are used to pay for such expenses, the amount of qualified indebtedness is the lesser of the average balance of the debt or the amount used to pay such expenses, reduced by principal payments on the debt in prior taxable years. The regulations provide rules for determining whether proceeds of a debt are used to pay for qualified medical or educational expenses. In general, a taxpayer may treat proceeds as being so used if medical or educational expenditures are made within 90 days before or after the date a debt is incurred. A taxpayer may also treat proceeds as being used to pay for such expenditures if the debt is traceable to such expenditures under the tracing rules provided in § 1.163–8T.

The regulations also provide guidance regarding the determination of the aggregate outstanding principal amount of debt which was incurred on or before August 16, 1986 and secured by the qualified residence before August 16, 1986, (*i.e.*, the amount of grandfathered debt). In general, in any year, the grandfathered amount of such debt is the average balance of the debt during the taxable year. The regulations also permit a debt incurred to refinance a grandfathered debt to itself be treated as a grandfathered debt. In cases where the taxpayer has borrowed new amounts after August 16, 1986, on a grandfathered debt or refinanced a grandfathered debt with a larger debt, the regulations provide appropriate limits on the grandfathered amount.

The regulations require that in order to be considered secured by a qualified residence, a debt must be secured by an instrument that makes the interest of the debtor in the qualified residence specific security for the payment of the debt and that is recorded in accordance with applicable State law. The regulations provide that a debt will be considered to be secured notwithstanding the fact that under an applicable State or local homestead law or other debtor protection law in effect on August 16, 1986, the security interest is ineffective or the enforceability of the security interest is restricted. This provision, which is consistent with provisions contained in pending technical corrections legislation, is intended to allow the benefit of the mortgage interest deduction despite state law impediments to securing mortgage debt. A taxpayer may elect to treat a debt that is secured by a qualified residence as if it were not secured by the residence.

The regulations provide guidance regarding the definition of a residence for purposes of section 163(h). They provide generally that a residence includes a house, condominium, cooperative, mobile home, boat or similar property which provides basic living accommodations, including sleeping space and toilet and cooking facilities. Additionally, if a portion of a residence is not used for residential purposes (*e.g.*, a room used as a home office), that portion does not qualify as a residence. In such cases, the taxpayer must allocate the fair market value and basis in the property (but not the average balance or interest on the debt) between the portion of the property used as a residence and the portion not so used.

Special Analyses

The Commissioner of Internal Revenue has determined that this temporary rule is not a major rule as defined in Executive Order 12291 and that a Regulatory Impact Analysis therefore is not required. A general notice of proposed rulemaking is not required by 5 U.S.C. 553 for temporary regulations. Accordingly, the temporary regulations do not constitute regulations subject to the Regulatory Flexibility Act (5 U.S.C. chapter 6).

The collection of information requirements contained in this regulation have been approved by the Office of Management and Budget (OMB) under section 3507 of the Paperwork Reduction Act.

Drafting Information

The principal author of these regulations is Sharon L. Hall of the Legislation and Regulations Division of the Office of Chief Counsel, Internal Revenue Service. However, personnel from other offices of the Internal Revenue Service and Treasury Department participated in developing the regulations, on matters of both substance and style.

Reporting and recordkeeping requirements.

Amendments to the Regulations

For the reasons set out in the preamble, Title 26, Chapter 1, Subchapter A, Part 1 and Part 602 of the Code of Federal Regulations is amended as set forth below.

PART 1—[AMENDED]

Paragraph 1. The authority for Part 1 is amended by adding the following citation:

Authority: 26 U.S.C. 7805. * * * Section 1.163–9T also issued under 26 U.S.C. 163 (h) (3) (D). * * *

Par. 2. The following new §§ 1.163–9T and 1.163–10T are added immediately after § 1.163–8T.

§ 1.163–9T Personal interest (temporary).

(a) *In general.* No deduction under any provision of Chapter 1 of the Internal Revenue Code shall be allowed for personal interest paid or accrued during the taxable year by a taxpayer other than a corporation.

(b) *Personal interest*—(1) *Definition.* For purposes of this section, personal interest is any interest expense other than—

(i) Interest paid or accrued on indebtedness properly allocable (within the meaning of § 1.163–8T) to the conduct of trade or business (other than the trade or business of performing services as an employee),

(ii) Any investment interest (within the meaning of section 163(d)(3)),

(iii) Any interest that is taken into account under section 469 in computing income or loss from a passive activity of the taxpayer,

(iv) Any qualified residence interest (within the meaning of section 163(h)(3) and § 1.163–10T), and

(v) Any interest payable under section 6601 with respect to the unpaid portion of the tax imposed by section 2001 for the period during which an extension of time for payment of such tax is in effect under section 6163, 6166, or 6166A (as in effect before its repeal by the Economic Recovery Tax Act of 1981).

(2) *Interest relating to taxes*—(i) *In general.* Except as provided in paragraph (b)(2)(iii) of this section, personal interest includes interest—

(A) Paid on underpayments of individual Federal, State or local income taxes and on indebtedness used to pay such taxes (within the meaning of § 1.168–8T), regardless of the source of the income generating the tax liability;

(B) Paid under section 453(e)(4)(B) (interest on deferred tax resulting from certain installment sales) and section 1291(c) (interest on deferred tax attributable to passive foreign investment companies); or

(C) Paid by a trust, S corporation, or other pass-through entity on underpayments of State or local income taxes and on indebtedness used to pay such taxes.

(ii) *Example.* A, an individual, owns stock of an S corporation. On its return for 1987, the corporation underreports its taxable income. Consequently, A underreports A's share of that income on A's tax return. In 1989, A pays the resulting deficiency plus interest to the Internal Revenue Service. The interest paid by A in 1989 on the tax deficiency is personal interest, notwithstanding the fact that the additional tax liability may have arisen out of income from a trade or business. The result would be the same if A's business had been operated as a sole proprietorship.

(iii) *Certain other taxes.* Personal interest does not include interest—

(A) Paid with respect to sales, excise and similar taxes that are incurred in connection with a trade or business or an investment activity;

(B) Paid by an S corporation with respect to an underpayment of income tax from a year in which the S corporation was a C corporation or with respect to an underpayment of the taxes

imposed by sections 1374 or 1375, or similar provision of State law; or

(C) Paid by a transferee under section 6901 (tax liability resulting from transferred assets), or a similar provision of State law, with respect to a C corporation's underpayment of income tax.

(3) *Cross references.* See § 1.163–8T for rules for determining the allocation of interest expense to various activities. See § 1.163–10T for rules concerning qualified residence interest.

(C) *Effective date*—(1) *In general.* The provisions of this section are effective for taxable years beginning after December 31, 1986. In the case of any taxable year beginning in calendar years 1987 through 1990, the amount of personal interest that is nondeductible under this section is limited to the applicable percentage of such amount.

(2) *Applicable percentages.* The applicable percentage for taxable years beginning in 1987 through 1990 are as follows:

1987: 35 percent
1988: 60 percent
1989: 80 percent
1990: 90 percent

§ 1.163–10T Qualified residence interest (temporary).

(a) *Table of contents.* This paragraph (a) lists the major paragraphs that appear in this section 1.163–10T.

(a) Table of contents.
(b) Treatment of qualified residence interest.
(c) Determination of qualified residence interest when secured debt does not exceed the adjusted purchase price.
(1) In general.
(2) Examples.
(d) Determination of qualified residence interest when secured debt exceeds adjusted purchase price—Simplified method.
(1) In general.
(2) Treatment of interest paid or accrued on secured debt that is not qualified residence interest.
(3) Example.
(e) Determination of qualified residence interest when secured debt exceeds adjusted purchase price—Exact method.
(1) In general.
(2) Determination of applicable debt limit.
(3) Example.
(4) Treatment of interest paid or accrued with respect to secured debt that is not qualified residence interest.
(i) In general.
(ii) Example.
(iii) Special rule of debt is allocated to more than one expenditure.
(iv) Example.
(f) Special rules.
(1) Special rules for personal property.
(i) In general.
(ii) Example.
(2) Special rule for real property.
(i) In general.
(ii) Example.
(g) Selection of method.
(h) Average balance.
(1) Average balance defined.
(2) Average balance reported by lender.
(3) Average balance computed on a daily basis.
(i) In general.
(ii) Example.
(4) Average balance computed using the interest rate.
(i) In general.
(ii) Points and prepaid interest.
(iii) Examples.
(5) Average balance computed using average of beginning and ending balance.
(i) In general.
(ii) Example.
(6) Highest principal balance.
(7) Other methods provided by the Commissioner.
(8) Anti-abuse rule.
(i) [Reserved.]
(j) Determination of interest paid or accrued during the taxable year.
(1) In general.
(2) Special rules for cash-basis taxpayers.
(i) Points deductible in year paid under section 461(g)(2).
(ii) Points and other prepaid interest described in section 461(g) (1).
(3) Examples.
(k) Determination of adjusted purchase price and fair market value.
(1) Adjusted purchase price.
(i) In general.
(ii) Adjusted purchase price of a qualified residence acquired incident to divorce.
(iii) Examples.
(2) Fair market value.
(i) In general.
(ii) Examples.
(3) Allocation of adjusted purchase price and fair market value.
(l) [Reserved.]
(m) Grandfathered amount.
(1) Substitution for adjusted purchase price.
(2) Determination of grandfathered amount.
(i) In general.
(ii) Special rule for lines of credit and certain other debt.
(iii) Fair market value limitation.
(iv) Examples.
(3) Refinancing of grandfathered debt.
(i) In general.
(ii) Determination of grandfathered amount.
(4) Limitation on terms of grandfathered debt.
(i) In general.
(ii) Special rule for nonamortizing debt.
(iii) Example.
(n) Qualified indebtedness (secured debt used for medical and educational purposes).
(1) In general.
(i) Treatment of qualified indebtedness.
(ii) Determination of amount of qualified indebtedness.
(iii) Determination of amount of qualified indebtedness for mixed-use debt.
(iv) Example.
(v) Prevention of double counting in year of refinancing.
(vi) Special rule for principal payments in excess of qualified expenses.
(2) Debt used to pay for qualified medical or educational expenses.
(i) In general.
(ii) Special rule for refinancing.
(iii) Other special rules.
(iv) Examples.
(3) Qualified medical expenses.
(4) Qualified educational expenses.
(o) Secured debt.
(1) In general.
(2) Special rule for debt in certain States.
(3) Time at which debt is treated as secured.
(4) Partially secured debt.
(i) In general.
(ii) Example.
(5) Election to treat debt as not secured by a qualified residence.
(i) In general.
(ii) Example.
(iii) Allocation of debt secured by two qualified residences.
(p) Definition of qualified residence.
(1) In general.
(2) Principal residence.
(3) Second residence.
(i) In general.
(ii) Definition of residence.
(iii) Use as a residence.
(iv) Election of second residence.
(4) Allocations between residence and other property.
(i) In general.
(ii) Special rule for rental of residence.
(iii) Examples.
(5) Residence under construction.
(i) In general.
(ii) Example.
(6) Special rule for the time-sharing arrangements.
(q) Special rules for tenant-stockholders in cooperative housing corporations.
(1) In general.
(2) Special rule where stock may not be used to secure debt.
(3) Treatment of interest expense of the cooperative described in section 216(a)(2).
(4) Special rule to prevent tax avoidance.
(5) Other definitions.
(r) Effective date.

(b) *Treatment of qualified residence interest.* Except as provided below, qualified residence interest is deductible under section 163(a). Qualified residence interest is not subject to limitation or otherwise taken into account under section 163(d) (limitation on investment interest), section 163(h)(1) (disallowance of deduction for personal interest), section 263A (capitalization and inclusion in inventory costs of certain expenses) or section 469 (limitations on losses from passive activities). Qualified residence interest is subject to the limitation imposed by section 263(g) (certain interest in the case of straddles), section 264(a) (2) and (4) (interest paid in connection with certain insurance), section 265(a)(2) (interest relating to tax-exempt income), section 266 (carrying charges), section 267(a)(2) (interest with respect to transactions between related taxpayers) section 465 (deductions limited to amount at risk), section 1277 (deferral of interest deduction allocable to accrued market discount), and section 1282 (deferral of interest deduction allocable to accrued discount).

(c) *Determination of qualified residence interest when secured debt does not exceed adjusted purchase price*—(1) *In general.* If the sum of the average balances for the taxable year of all secured debts on a qualified residence does not exceed the adjusted purchase price (determined as of the end of the taxable year) of the qualified residence, all of the interest paid or accrued during the taxable year with respect to the secured debts is qualified residence interest. If the sum of the average balances for the taxable year of all secured debts exceeds the adjusted purchase price of the qualified residences (determined as of the end of the taxable year), the taxpayer must use either the simplified method (see paragraph (d) of this section) or the exact method (see paragraph (e) of this section) to determine the amount of interest that is qualified residence interest.

(2) *Examples.*

Example (1). T purchases a qualified residence in 1987 for $65,000. T pays $6,500 in cash and finances the remainder of the purchase with a mortgage of $58,500. In 1988, the average balance of the mortgage is $58,000. Because the average balance of the mortgage is less than the adjusted purchase price of the residence ($65,000), all of the interest paid or accrued during 1988 on the mortgage is qualified residence interest.

Example (2). The facts are the same as in example (1), except that T incurs a second mortgage on January 1, 1988, with an initial principal balance of $2,000. The average balance of the second mortgage in 1988 is $1,900. Because the sum of the average balance of the first and second mortgages ($59,900) is less than the adjusted purchase price of the residence ($65,000), all of the interest paid or accrued during 1988 on both the first and second mortgages is qualified residence interest.

Example (3). P borrows $50,000 on January 1, 1988 and secures the debt by a qualified residence. P pays the interest on the debt monthly, but makes no principal payments in 1988. There are no other debts secured by the residence during 1988. On December 31, 1988, the adjusted purchase price of the residence is $40,000. The average balance of the debt in 1988 is $50,000. Because the average balance of the debt exceeds the adjusted purchase price ($10,000), some of the interest on the debt is not qualified residence interest. The portion of the total interest that is qualified residence interest must be determined in accordance with the rules of paragraph (d) or paragraph (e) of this section.

(d) *Determination of qualified residence interest when secured debt exceeds adjusted purchase price—Simplified method*—(1) *In general.* Under the simplified method, the amount of qualified residence interest for the taxable year is equal to the total interest paid or accrued during the taxable year with respect to all secured debts multiplied by a fraction (not in excess of one), the numerator of which is the adjusted purchase price (determined as of the end of the taxable year) of the qualified residence and the denominator of which is the sum of the average balances of all secured debts.

(2) *Treatment of interest paid or accrued on secured debt that is not qualified residence interest.* Under the simplified method, the excess of the total interest paid or accrued during the taxable year with respect to all secured debts over the amount of qualified residence interest is personal interest.

(3) *Example.* R's principal residence has an adjusted purchase price on December 31, 1988, of $105,000. R has two debts secured by the residence, with the following average balances and interest payments:

Debt	Date secured	Average balance	Interest
Debt 1	June 1983	$80,000	$8,000
Debt 2	May 1987	40,000	4,800
Total		120,000	12,800

The amount of qualified residence interest is determined under the simplified method by multiplying the total interest ($12,800) by a fraction (expressed as a decimal amount) equal to the adjusted purchase price ($105,000) of the residence divided by the combined average balances ($120,000). For 1988, this fraction is equal to 0.875 ($105,000/$120,000). Therefore, $11,200 ($12,800 × 0.875) of the total interest is qualified residence interest. The remaining $1,600 in interest ($12,800–$11,200) is personal interest, even if (under the rules of § 1.163–8T) such remaining interest would be allocated to some other category of interest.

(e) *Determination of qualified residence interest when secured debt exceeds adjusted purchase price—Exact method*—(1) *In general.* Under the exact method, the amount of qualified residence interest for the taxable year is determined on a debt-by-debt basis by computing the applicable debt limit for each secured debt and comparing each such applicable debt limit to the average balance of the corresponding debt. If, for the taxable year, the average balance of a secured debt does not exceed the applicable debt limit for that debt, all of the interest paid or accrued during the taxable year with respect to the debt is qualified residence interest. If the average balance of the secured debt exceeds the applicable debt limit for that debt, the amount of qualified residence interest with respect to the debt is determined by multiplying the interest paid or accrued with respect to the debt by a fraction, the numerator of which is the applicable debt limit for that debt and the denominator of which is the average balance of the debt.

(2) *Determination of applicable debt limit.* For each secured debt, the applicable debt limit for the taxable year is equal to

(i) The lesser of—

(A) The fair market value of the qualified residence as of the date the debt is first secured, and

(B) The adjusted purchase price of the qualified residence as of the end of the taxable year,

(ii) Reduced by the average balance of each debt previously secured by the qualified residence.

For purposes of paragraph (e)(2)(ii) of this section, the average balance of a debt shall be treated as not exceeding the applicable debt limit of such debt. See paragraph (n)(1)(i) of this section for the rule that increases the adjusted purchase price in paragraph (e)(2)(i)(B) of this section by the amount of any qualified indebtedness (certain medical and educational debt). See paragraph (f) of this section for special rules relating to the determination of the fair market value of the qualified residence.

(3) *Example.* (*i*) R's principal residence has an adjusted purchase price on December 31, 1988, of $105,000. R has two debts secured by the residence. The average balances and interest payments on each debt during 1988 and fair market value of the residence on the date each debt was secured are as follows:

Debt	Date secured	Fair market value	Average balance	Interest
Debt 1	June 1983	$100,000	$80,000	$8,000
Debt 2	May 1987	140,000	40,000	4,800
Total			120,000	12,800

(*ii*) The amount of qualified residence interest for 1988 under the exact method is determined as follows. Because there are no debts previously secured by the residence, the applicable debt limit for Debt 1 is $100,000 (the lesser of the adjusted purchase price as of the end of the taxable year and the fair market value of the residence at the time the debt was secured). Because the average balance of Debt 1 ($80,000) does not exceed its applicable debt limit ($100,000), all of the interest paid on the debt during 1988 ($8,000) is qualified residence interest.

(*iii*) The applicable debt limit for Debt 2 is $25,000 ($105,000 (the lesser of $140,000 fair market value and $105,000 adjusted purchase price) reduced by $80,000 (the average balance of Debt 1)). Because the average balance of Debt 2 ($40,000) exceeds its applicable debt limit, the amount of qualified residence interest on Debt 2 is determined by multiplying the amount of interest paid on the debt during the year ($4,800) by a fraction equal to its applicable debt limit divided by its average balance ($25,000/$40,000 = 0.625). Accordingly, $3,000 ($4,800 x 0.625) of the interest paid in 1988 on Debt 2 is qualified residence interest. The character of the remaining $1,800 of interest paid on Debt 2 is determined under the rules of paragraph (e)(4) of this section.

(4) *Treatment of interest paid or accrued with respect to secured debt that is not qualified residence interest*—(i) *In general.* Under the exact method, the excess of the interest paid or accrued during the taxable year with respect to a secured debt over the amount of qualified residence interest with respect to the debt is allocated under the rules of § 1.163–8T.

(ii) *Example.* T borrows $20,000 and the entire proceeds of the debt are disbursed by the lender to T's broker to purchase securities held for investment. T secures the debt with T's principal residence. In 1990, T pays $2,000 of interest on the debt. Assume that under the rules of paragraph (e) of this section, $1,500 of the interest is qualified residence interest. The remaining $500 in interest expense would be allocated under the rules of § 1.163–8T. Section 1.163–8T generally allocates debt (and the associated interest expense) by tracing disbursements of the debt proceeds to specific expenditures. Accordingly, the $500 interest expense on the debt that is not qualified residence interest is investment interest subject to section 163(d).

(iii) *Special rule if debt is allocated to more than one expenditure.* If—

(A) The average balance of a secured debt exceeds the applicable debt limit for that debt, and

(B) Under the rules of § 1.163–8T, interest paid or accrued with respect to such debt is allocated to more than one expenditure,

the interest expense that is not qualified residence interest may be allocated among such expenditures, to the extent of such expenditures, in any manner selected by the taxpayer.

(iv) *Example.* (*i*) C borrows $80,000 secured by a qualified residence. C uses (within the meaning of § 1.163–8T) $20,000 of the proceeds in C's trade or business, $20,000 to purchase stock held for investment and $20,000 for personal purposes. In 1990, C pays $6,000 in interest on the debt and, under the rules of § 1.163–8T, $2,000 in interest is allocable to trade or business expenses, $2,000 to investment expenses and $2,000 to personal expenses. Assume that under paragraph (e) of this section, $2,500 of the interest is qualified residence interest and $3,500 of the interest is not qualified residence interest.

(*ii*) Under paragraph (e)(4)(iii) of this section, C may allocate up to $2,000 of the interest that is not qualified residence interest to any of the three categories of expenditures up to a total of $3,500 for all three categories. Therefore, for example, C may allocate $2,000 of such interest to C's trade or business and $1,500 of such interest to the purchase of stock.

(f) *Special rules*—(1) *Special rules for personal property*—(i) *In general.* If a qualified residence is personal property under State law (*e.g.*, a boat or motorized vehicle)—

(A) For purposes of paragraphs (c)(1) and (d)(1) of this section, if the fair market value of the residence as of the date that any secured debt (outstanding during the taxable year) is first secured by the residence is less than the adjusted purchase price as of the end of the taxable year, the lowest such fair market value shall be substituted for the adjusted purchase price.

(B) For purposes of paragraphs (e)(2)(i)(A) and (f)(1)(i)(A) of this section, the fair market value of the residence as of the date the debt is first secured by the residence shall not exceed the fair market value as of any date on which the taxpayer borrows any additional amount with respect to the debt.

(ii) *Example.* D owns a recreational vehicle that is a qualified residence under paragraph (p)(4) of this section. The adjusted purchase price and fair market value of the recreational vehicle is $20,000 in 1989. In 1989, D establishes a line of credit secured by the recreational vehicle. As of June 1, 1992, the fair market value of the vehicle has decreased to $10,000. On that day, D borrows an additional amount on the debt by using the line of credit. Although under paragraphs (e)(2)(i) and (f)(1)(i)(A) of this section, fair market value is determined at the time the debt is first secured, under paragraph (f)(1)(i)(B) of this section, the fair market value is the lesser of that amount or the fair market value on the most recent date that D borrows any additional amount with respect to the line of credit. Therefore, the fair market value with respect to the debt is $10,000.

(2) *Special rule for real property*—(i) *In general.* For purposes of paragraph (e)(2)(i)(A) of this section, the fair market value of a qualified residence that is real property under State law is presumed irrebuttably to be not less than the adjusted purchase price of the residence as of the last day of the taxable year.

(ii) *Example.* (*i*) C purchases a residence on August 11, 1987, for $50,000, incurring a first mortgage. The residence is real property under State law. During 1987, C makes $10,000 in home improvements. Accordingly, the adjusted purchase price of the residence as of December 31, 1988, is $60,000. C incurs a second mortgage on May 19, 1988, as of which time the fair market value of the residence is $55,000.

(*ii*) For purposes of determining the applicable debt limit for each debt, the fair market value of the residence is generally determined as of the time the debt is first secured. Accordingly, the fair market value would be $50,000 and $55,000 with respect to the first and second mortgage, respectively. Under the special rule of paragraph (f)(2)(i) of this section, however, the fair market value with respect to both debts in 1988 is $60,000, the adjusted purchase price on December 31, 1988.

(g) *Selection of method.* For any taxable year, a taxpayer may use the simplified method (described in paragraph (d) of this section) or the exact method (described in paragraph (e) of this section) by completing the appropriate portion of Form 8598. A taxpayer with two qualified residences may use the simplified method for one residence and the exact method for the other residence.

(h) *Average balance*—(1) *Average balance defined.* For purposes of this section, the term "average balance" means the amount determined under this paragraph (h). A taxpayer is not required to use the same method to determine the average balance of all secured debts during a taxable year or of any particular secured debt from one year to the next.

(2) *Average balance reported by lender.* If a lender that is subject to section 6050H (returns relating to mortgage interest received in trade or business from individuals) reports the average balance of a secured debt on Form 1098, the taxpayer may use the average balance so reported.

(3) *Average balance computed on a daily basis*—(i) *In general.* The average balance may be determined by—

(A) Adding the outstanding balance of a debt on each day during the taxable year that the debt is secured by a qualified residence, and

(B) Dividing the sum by the number of days during the taxable year that the residence is a qualified residence.

(ii) *Example.* Taxpayer A incurs a debt of $10,000 on September 1, 1989, securing the debt with A's principal residence. The residence is A's principal residence during the entire taxable year. A pays current interest on the debt monthly, but makes no principal payments. The debt is, therefore, outstanding for 122 days with a balance each day of $10,000. The residence is a qualified residence for 365 days. The average balance of the debt for 1989 is $3,342 (122 x $10,000/365).

(4) *Average balance computed using the interest rate*—(i) *In general.* If all accrued interest on a secured debt is paid at least monthly, the average balance of the secured debt may be determined by dividing the interest paid or accrued during the taxable year while the debt is secured by a qualified residence by the annual interest rate on the debt. If the interest rate on a debt varies during the taxable year, the lowest annual interest rate that applies to the debt during the taxable year must be used for purposes of this paragraph (h)(4). If the residence securing the debt is a qualified residence for less than the entire taxable year, the average balance of any secured debt may be determined by dividing the average balance determined under the preceding sentence by the percentage of the taxable year that the debt is secured by a qualified residence.

(ii) *Points and prepaid interest.* For purposes of paragraph (h)(4)(i) of this section, the amount of interest paid during the taxable year does not include any amount paid as points and includes prepaid interest only in the year accrued.

(iii) *Examples—Example (1).* B has a line of credit secured by a qualified residence for the entire taxable year. The interest rate on the debt is 10 percent throughout the taxable year. The principal balance on the debt changes throughout the year. B pays the accrued interest on the debt monthly. B pays $2,500 in interest on the debt during the taxable year. The average balance of the debt ($25,000) may be computed by dividing the total interest paid by the interest rate ($25,000 = $2,500/0.10).

Example (2). Assume the same facts as in example 1, except that the residence is a qualified residence, and the debt is outstanding, for only one-half of the taxable year and B pays only $1,250 in interest on the debt during the taxable year. The average balance of the debt may be computed by first dividing the total interest paid by the interest rate ($12,500 = $1,250/0.10). Second, because the residence is not a qualified residence for the entire taxable year, the average balance must be determined by dividing this amount ($12,500) by the portion of the year that the residence is qualified (0.50). The average balance is therefore $25,000 ($12,500/0.50).

(5) *Average balance computed using average of beginning and ending balances*—(i) *In general.* If—

(A) A debt requires level payments at fixed equal intervals (*e.g.*, monthly, quarterly) no less often than semi-annually during the taxable year,

(B) The taxpayer prepays no more than one month's principal on the debt during the taxable year, and

(C) No new amounts are borrowed on the debt during the taxable year,

the average balance of the debt may be determined by adding the principal balance as of the first day of the taxable year that the debt is secured by the qualified residence and the principal balance as of the last day of the taxable year that the debt is secured by the qualified residence and dividing the sum by 2. If the debt is secured by a qualified residence for less than the entire period during the taxable year that the residence is a qualified residence, the average balance may be determined by multiplying the average balance determined under the preceding sentence by a fraction, the numerator of which is the number of days during the taxable year that the debt is secured by the qualified residence and the denominator of which is the number of days during the taxable year that the residence is a qualified residence. For purposes of this paragraph (h)(5)(i), the determination of whether payments are level shall disregard the fact that the amount of the payments may be adjusted from time to time to take into account changes in the applicable interest rate.

(ii) *Example.* C borrows $10,000 in 1988, securing the debt with a second mortgage on a principal residence. The terms of the loan require C to make equal monthly payments of principal and interest so as to amortize the entire loan balance over 20 years. The balance of the debt is $9,652 on January 1, 1990, and is $9,450 on December 31, 1990. The average balance of the debt during 1990 may be computed as follows:

Balance on first day of the year: $9,652
Balance on last day of the year: $9,450

$$\text{Average balance:} \quad \frac{\$9{,}652 + \$9{,}450}{2} = \$9{,}551$$

(6) *Highest principal balance.* The average balance of a debt may be determined by taking the highest principal balance of the debt during the taxable year.

(7) *Other methods provided by the Commissioner.* The average balance may be determined using any other method provided by the Commissioner by form, publication, revenue ruling, or revenue procedure. Such methods may include methods similar to (but with restrictions different from) those provided in paragraph (h) of this section.

(8) *Anti-abuse rule.* If, as a result of the determination of the average balance of a debt using any of the methods specified in paragraphs (h) (4), (5), or (6) of this section, there is a significant overstatement of the amount of qualified residence interest and a principal purpose of the pattern of payments and borrowing on the debt is to cause the amount of such qualified residence interest to be overstated, the district director may redetermine the average balance using the method specified under paragraph (h)(3) of this section.

(i) [Reserved.]

(j) *Determination of interest paid or accrued during the taxable year*—(1) *In general.* For purposes of determining the amount of qualified residence interest with respect to a secured debt, the amount of interest paid or accrued

during the taxable year includes only interest paid or accrued while the debt is secured by a qualified residence.

(2) *Special rules for cash-basis taxpayers*—(i) *Points deductible in year paid under section 461(g)(2).* If points described in section 461(g)(2) (certain points paid in respect of debt incurred in connection with the purchase or improvement of a principal residence) are paid with respect to a debt, the amount of such points is qualified residence interest.

(ii) *Points and other prepaid interest described in section 461(g)(1).* The amount of points or other prepaid interest charged to capital account under section 461(g)(1) (prepaid interest) that is qualified residence interest shall be determined under the rules of paragraphs (c) through (e) of this section in the same manner as any other interest paid with respect to the debt in the taxable year to which such payments are allocable under section 461(g)(1).

(3) *Examples.*

Example (1). T designates a vacation home as a qualified residence as of October 1, 1987. The home is encumbered by a mortgage during the entire taxable year. For purposes of determining the amount of qualified residence interest for 1987, T may take into account the interest paid or accrued on the secured debt from October 1, 1987, through December 31, 1987.

Example (2). R purchases a principal residence on June 17, 1987. As part of the purchase price, R obtains a conventional 30-year mortgage, secured by the residence. At closing, R pays 2½ points on the mortgage and interest on the mortgage for the period June 17, 1987 through June 30, 1987. The points are actually paid by R and are not merely withheld from the loan proceeds. R incurs no additional secured debt during 1987. Assuming that the points satisfy the requirements of section 461(g) (2), the entire amount of points and the interest paid at closing are qualified residence interest.

Example (3). (*i*) On July 1, 1987, W borrows $120,000 to purchase a residence to use as a vacation home. W secures the debt with the residence. W pays 2 points, or $2,400. The debt has a term of 10 years and requires monthly payments of principal and interest. W is permitted to amortize the points at the rate of $20 per month over 120 months. W elects to treat the residence as a second residence. W has no other debt secured by the residence. The average balance of the debt in each taxable year is less than the adjusted purchase price of the residence. W sells the residence on June 30, 1990, and pays off the remaining balance of the debt.

(*ii*) W is entitled to treat the following amounts of the points as interest paid on a debt secured by a qualified residence—

1987	$120 = $20 × 6 months;
1988	$240 = $20 × 12 months;
1989	$120 = $20 × 6 months.
Total	$480

All of the interest paid on the debt, including the allocable points, is qualified residence interest. Upon repaying the debt, the remaining $1,920 ($2,400 − $480) in unamortized points is treated as interest paid in 1990 and, because the average balance of the secured debt in 1990 is less than the adjusted purchase price, is also qualified residence interest.

(k) *Determination of adjusted purchase price and fair market value*—(1) *Adjusted purchase price*—(i) *In general.* For purposes of this section, the adjusted purchase price of a qualified residence is equal to the taxpayer's basis in the residence as initially determined under section 1012 or other applicable sections of the Internal Revenue Code, increased by the cost of any improvements to the residence that have been added to the taxpayer's basis in the residence under section 1016(a)(1). Any other adjustments to basis, including those required under section 1033(b) (involuntary conversions), and 1034(e) (rollover of gain or sale of principal residence) are disregarded in determining the taxpayer's adjusted purchase price. If, for example, a taxpayer's second residence is rented for a portion of the year and its basis is reduced by depreciation allowed in connection with the rental use of the property, the amount of the taxpayer's adjusted purchase price in the residence is not reduced. See paragraph (m) of this section for a rule that treats the sum of the grandfathered amounts of all secured debts as the adjusted purchase price of the residence.

(ii) *Adjusted purchase price of a qualified residence acquired incident to divorce.* [Reserved.]

(iii) *Examples—Example (1).* X purchases a residence for $120,000. X's basis, as determined under section 1012, is the cost of the property, or $120,000. Accordingly, the adjusted purchase price of the residence is initially $120,000.

Example (2). Y owns a principal residence that has a basis of $30,000. Y sells the residence for $100,000 and purchases a new principal residence for $120,000. Under section 1034, Y does not recognize gain on the sale of the former residence. Under section 1034(e), Y's basis in the new residence is reduced by the amount of gain not recognized. Therefore, under section 1034(e), Y's basis in the new residence is $50,000 ($120,000 − $70,000). For purposes of section 163(h), however, the adjusted purchase price of the residence is not adjusted under section 1034(e). Therefore, the adjusted purchase price of the residence is initially $120,000.

Example (3). Z acquires a residence by gift. The donor's basis in the residence was $30,000. Z's basis in the residence, determined under section 1015, is $30,000. Accordingly, the adjusted purchase price of the residence is initially $30,000.

(2) *Fair market value*—(i) *In general.* For purposes of this section, the fair market value of a qualified residence on any date is the fair market value of the taxpayer's interest in the residence on such date. In addition, the fair market value determined under this paragraph (k)(2)(i) shall be determined by taking into account the cost of improvements to the residence reasonably expected to be made with the proceeds of the debt.

(ii) *Example.* In 1988, the adjusted purchase price of P's second residence is $65,000 and the fair market value of the residence is $70,000. At that time, P incurs an additional debt of $10,000, the proceeds of which P reasonably expects to use to add two bedrooms to the residence. Because the fair market value is determined by taking into account the cost of improvements to the residence that are reasonably expected to be made with the proceeds of the debt, the fair market value of the residence with respect to the debt incurred in 1988 is $80,000 ($70,000 + $10,000).

(3) *Allocation of adjusted purchase price and fair market value.* If a property includes both a qualified residence and other property, the adjusted purchase price and the fair market value of such property must be allocated between the qualified residence and the other property. See paragraph (p)(4) of this section for rules governing such an allocation.

(l) [Reserved].

(m) *Grandfathered amount*—(1) *Substitution for adjusted purchase price.* If, for the taxable year, the sum of the grandfathered amounts, if any, of all secured debts exceeds the adjusted purchase price of the qualified residence, such sum may be treated as the adjusted purchase price of the residence under paragraphs (c), (d) and (e) of this section.

(2) *Determination of grandfathered amount*—(i) *In general.* For any taxable year, the grandfathered amount of any secured debt that was incurred on or before August 16, 1986, and was secured by the residence continuously from August 16, 1986, through the end of the taxable year, is the average balance of the debt for the taxable year. A secured debt that was not incurred and secured on or before August 16, 1986, has no grandfathered amount.

(ii) *Special rule for lines of credit and certain other debt.* If, with respect to a debt described in paragraph (m)(2)(i) of this section, a taxpayer has borrowed any additional amounts after August 16, 1986, the grandfathered amount of such debt is equal to the lesser of—

(A) The average balance of the debt for the taxable year, or

(B) The principal balance of the debt as of August 16, 1986, reduced (but not below zero) by all principal payments after August 16, 1986, and before the first day of the current taxable year.

For purposes of this paragraph (m)(2)(ii), a taxpayer shall not be considered to have borrowed any additional amount with respect to a debt merely because accrued interest is added to the principal balance of the debt, so long as such accrued interest is paid by the taxpayer no less often than quarterly.

(iii) *Fair market value limitation.* The grandfathered amount of any debt for any taxable year may not exceed the fair market value of the residence on August 16, 1986, reduced by the principal balance on that day of all previously secured debt.

(iv) *Examples—Example (1).* As of August 16, 1986, T has one debt secured by T's principal residence. The debt is a conventional self-amortizing mortgage and, on August 16, 1986, it has an outstanding principal balance of $75,000. In 1987, the average balance of the mortgage is $73,000. The adjusted purchase price of the residence as of the end of 1987 is $50,000. Because the mortgage was incurred and secured on or before August 16, 1986 and T has not borrowed any additional amounts with respect to the mortgage, the grandfathered amount is the average balance, $73,000. Because the grandfathered amount exceeds the adjusted purchase price ($50,000), T may treat the grandfathered amount as the adjusted purchase price in determining the amount of qualified residence interest.

Example (2). (*i*) The facts are the same as in example (1), except that in May 1988, T also obtains a home equity line of credit that, on August 16, 1986, has a principal balance of $40,000. In November 1986, T borrows an additional $10,000 on the home equity line, increasing the balance to $50,000. In December 1988, T repays $5,000 of principal on the home equity line. The average balance of the home equity line in 1987 is $45,000.

(*ii*) Because T has borrowed additional amounts on the line of credit after August 16, 1986, the grandfathered amount for that debt must be determined under the rules of paragraph (m)(2)(ii) of this section. Accordingly, the grandfathered amount for the line of credit is equal to the lesser of $45,000, the average balance of the debt in 1987, and $35,000, the principal balance on August 16, 1986, reduced by all principal payments between August 17, 1986, and December 31, 1986 ($40,000–$5,000). The sum of the grandfathered amounts with respect to the residence is $108,000 ($73,000 + $35,000). Because the sum of the grandfathered amounts exceeds the adjusted purchase price ($50,000), T may treat the sum as the adjusted purchase price in determining the qualified residence interest for 1987.

(3) *Refinancing of grandfathered debt*—(i) *In general.* A debt incurred and secured on or before August 16, 1986, is refinanced if some or all of the outstanding balance of such a debt (the "original debt") is repaid out of the proceeds of a second debt secured by the same qualified residence (the "replacement debt"). In the case of a refinancing, the replacement debt is treated as a debt incurred and secured on or before August 16, 1986, and the grandfathered amount of such debt is the amount (but not less than zero) determined pursuant to paragraph (m)(3)(ii) of this section.

(ii) *Determination of grandfathered amount*—(A) *Exact refinancing.* If—

(*1*) The entire proceeds of a replacement debt are used to refinance one or more original debts, and

(*2*) The taxpayer has not borrowed any additional amounts after August 16, 1986, with respect to the original debt or debts,

the grandfathered amount of the replacement debt is the average balance of the replacement debt. For purposes of the preceding sentence, the fact that proceeds of a replacement debt are used to pay costs of obtaining the replacement debt (including points or other closing costs) shall be disregarded in determining whether the entire proceeds of the replacement debt have been used to refinance one or more original debts.

(B) *Refinancing other than exact refinancings*—(*1*) *Year of refinancing.* In the taxable year in which an original debt is refinanced, the grandfathered amount of the original and replacement debts is equal to the lesser of—

(*i*) The sum of the average balances of the original debt and the replacement debt, and

(*ii*) The principal balance of the original debt as of August 16, 1986, reduced by all principal payments on the original debt after August 16, 1986, and before the first day of the current taxable year.

(*2*) *In subsequent years.* In any taxable year after the taxable year in which an original debt is refinanced, the grandfathered amount of the replacement debt is equal to the least of—

(*i*) The average balance of the replacement debt for the taxable year,

(*ii*) The amount of the replacement debt used to repay the principal balance of the original debt, reduced by all principal payments on the replacement debt after the date of the refinancing and before the first day of the current taxable year, or

(*iii*) The principal balance of the original debt on August 16, 1986, reduced by all principal payments on the original debt after August 16, 1986, and before the date of the refinancing, and further reduced by all principal payments on the replacement debt after the date of the refinancing and before the first day of the current taxable year.

(C) *Example*—(*1*) *Facts.* On August 16, 1986, T has a single debt secured by a principal residence with a balance of $150,000. On July 1, 1988, T refinances the debt, which still has a principal balance of $150,000, with a new secured debt. The principal balance of the replacement debt throughout 1988 and 1989 is $150,000. The adjusted purchase price of the residence is $100,000 throughout 1987, 1988 and 1989. The average balance of the original debt was $150,000 in 1987 and $75,000 in 1988. The average balance of the replacement debt is $75,000 in 1988 and $150,000 in 1989.

(*ii*) *Grandfathered amount in 1987.* The original debt was incurred and secured on or before August 16, 1986 and T has not borrowed any additional amounts with respect to the debt. Therefore, its grandfathered amount in 1987 is its average balance ($150,000). This amount is treated as the adjusted purchase price for 1987 and all of the interest paid on the debt is qualified residence interest.

(*iii*) *Grandfathered amount in 1988.* Because the replacement debt was used to refinance a debt incurred and secured on or before August 16, 1986, the replacement debt is treated as a grandfathered debt. Because all of the proceeds of the replacement debt were used in the refinancing and because no amounts have been borrowed after August 16, 1986, on the original debt, the grandfathered amount for the original debt is its average balance ($75,000) and the grandfathered amount for the replacement debt is its average balance ($75,000). Since the sum of the grandfathered amounts ($150,000) exceeds the adjusted purchase price of the residence, the sum of the grandfathered amounts may be substituted for the adjusted purchase price for 1988 and all of the interest paid on the debt is qualified residence interest.

(*iv*) *Grandfathered amount in 1989.* The grandfathered amount for the placement debt is its average balance ($150,000). This amount is treated as the adjusted purchase price for 1989 and all of the interest paid on the mortgage is qualified residence interest.

(4) *Limitation on term of grandfathered debt*—(i) *In general.* An original debt or replacement debt shall not have any grandfathered amount in any taxable year that begins after the date, as determined on August 16, 1986, that the original debt was required to be repaid in full (the "maturity date"). If a replacement debt is used to refinance more than one original debt, the maturity date is determined by reference to the original debt that, as of August 16, 1986, had the latest maturity date.

(ii) *Special rule for nonamortizing debt.* If an original debt was actually incurred and secured on or before

August 16, 1986, and if as of such date the terms of such debt did not require the amortization of its principal over its original term, the maturity date of the replacement debt is the earlier of the maturity date of the replacement debt or the date 30 years after the date the original debt is first refinanced.

(iii) *Example.* C incurs a debt on May 10, 1986, the final payment of which is due May 1, 2006. C incurs a second debt on August 11, 1990, with a term of 20 years and uses the proceeds of the second debt to refinance the first debt. Because, under paragraph (m)(4)(i) of this section, a replacement debt will not have any grandfathered amount in any taxable year that begins after the maturity date of the original debt (May 1, 2006), the second debt has no grandfathered amount in any taxable year after 2006.

(n) *Qualified indebtedness (secured debt used for medical and educational purposes)*—(1) *In general*—(i) *Treatment of qualified indebtedness.* The amount of any qualified indebtedness resulting from a secured debt may be added to the adjusted purchase price under paragraph (e)(2)(i)(B) of this section to determine the applicable debt limit for that secured debt and any other debt subsequently secured by the qualified residence.

(ii) *Determination of amount of qualified indebtedness.* If, as of the end of the taxable year (or the last day in the taxable year that the debt is secured), at least 90 percent of the proceeds of a secured debt are used (within the meaning of paragraph (n)(2) of this section) to pay for qualified medical and educational expenses (within the meaning of paragraphs (n)(3) and (n)(4) of this section), the amount of qualified indebtedness resulting from that debt for the taxable year is equal to the average balance of such debt for the taxable year.

(iii) *Determination of amount of qualified indebtedness for mixed-use debt.* If, as of the end of the taxable year (or the last day in the taxable year that the debt is secured), more than ten percent of the proceeds of a secured debt are used to pay for expenses other than qualified medical and educational expenses, the amount of qualified indebtedness resulting from that debt for the taxable year shall equal the lesser of—

(A) The average balance of the debt, or

(B) The amount of the proceeds of the debt used to pay for qualified medical and educational expenses through the end of the taxable year, reduced by any principal payments on the debt before the first day of the current taxable year.

(iv) *Example.* (*i*) C incurs a $10,000 debt on April 20, 1987, which is secured on that date by C's principal residence. C immediately uses (within the meaning of paragraph (n)(2) of this section) $4,000 of the proceeds of the debt to pay for a qualified medical expense. C makes no principal payments on the debt during 1987. During 1988 and 1989, C makes principal payments of $1,000 per year. The average balance of the debt during 1988 is $9,500 and the average balance during 1989 is $8,500.

(*ii*) Under paragraph (n)(1)(iii) of this section, C determines the amount of qualified indebtedness for 1988 as follows:

Average balance		$9,500
Amount of debt used to pay for qualified medical expenses	$4,000	
Less payments of principal before 1988	$0	
Net qualified expenses		$4,000

The amount of qualified indebtedness for 1988 is, therefore, $4,000 (lesser of $9,500 average balance or $4,000 net qualified expenses). This amount may be added to the adjusted purchase price of C's principal residence under paragraph (e)(2)(i)(B) of this section for purposes of computing the applicable debt limit for this debt and any other debt subsequently secured by the principal residence.

(*iii*) C determines the amount of qualified indebtedness for 1989 as follows:

Average balance		$8,500
Amount of debt used to pay for qualified medical expenses	$4,000	
Less payments of principal before 1988	$1,000	
Net qualified expenses		$3,000

The amount of qualified indebtedness for 1989 is, therefore, $3,000 (lesser of $8,500 average balance or $3,000 net qualified expenses).

(v) *Prevention of double counting in year of refinancing*—(A) *In general.* A debt used to pay for qualified medical or educational expenses is refinanced if some or all of the outstanding balance of the debt (the "original debt") is repaid out of the proceeds of a second debt (the "replacement debt"). If, in the year of a refinancing, the combined qualified indebtedness of the original debt and the replacement debt exceeds the combined qualified expenses of such debts, the amount of qualified indebtedness for each such debt shall be determined by multiplying the amount of qualified indebtedness for each such debt by a fraction, the numerator of which is the combined qualified expenses and the denominator of which is the combined qualified indebtedness.

(B) *Definitions.* For purposes of paragraph (n)(1)(v)(A) of this section—

(*1*) The term "combined qualified indebtedness" means the sum of the qualified indebtedness (determined without regard to paragraph (n)(1)(v) of this section) for the original debt and the replacement debt.

(*2*) The term "combined qualified expenses" means the amount of the proceeds of the original debt used to pay for qualified medical and educational expenses through the end of the current taxable year, reduced by any principal payments on the debt before the first day of the current taxable year, and increased by the amount, if any, of the proceeds of the replacement debt used to pay such expenses through the end of the current taxable year other than as part of the refinancing.

(C) *Example.* (*1*) On August 11, 1987, C incurs a $8,000 debt secured by a principal residence. C uses (within the meaning of paragraph (n)(2)(i) of this section) $5,000 of the proceeds of the debt to pay for qualified educational expenses. C makes no principal payments on the debt. On July 1, 1988, C incurs a new debt in the amount of $8,000 secured by C's principal residence and uses all of the proceeds of the new debt to repay the original debt. Under paragraph (n)(2)(ii) of this section $5,000 of the new debt is treated as being used to pay for qualified educational expenses. C makes no principal payments (other than the refinancing) during 1987 or 1988 on either debt and pays all accrued interest monthly. The average balance of each debt in 1988 is $4,000.

(*ii*) Under paragraph (n)(1)(iii) of this section, the amount of qualified indebtedness for 1988 with respect to the original debt is $4,000 (the lesser of its average balance ($4,000) and the amount of the debt used to pay for qualified medical and educational expenses ($5,000)). Similarly, the amount of qualified indebtedness for 1988 with respect to the replacement debt is also $4,000. Both debts, however, are subject in 1988 to the limitation in paragraph (n)(1)(v)(A) of this section. The combined qualified indebtedness, determined without regard to the limitation, is $8,000 ($4,000 of qualified indebtedness from each debt). The combined qualified expenses are $5,000 ($5,000 from the original debt and $0 from the replacement debt). The amount of qualified indebtedness from each debt must, therefore, be reduced by a fraction, the numerator of which is $5,000 (the combined qualified expenses) and the denominator of which is $8,000 (the combined qualified indebtedness). After application of the limitation, the amount of qualified indebtedness for the original debt is $2,500 ($4,000 x ⅝). Similarly, the amount of qualified indebtedness for the replacement debt is $2,500. Note that the total qualified indebtedness for both the original and the replacement debt is $5,000 ($2,500 + $2,500). Therefore, C is entitled to the same amount of qualified indebtedness as C would have been entitled to if C had not refinanced the debt.

(vi) *Special rule for principal payments in excess of qualified expenses.* For purposes of paragraph (n)(1)(iii)(B), (n)(1)(v)(B)(*2*) and (n)(2)(ii) of this section, a principal payment is taken into account only to the extent that the payment, when added to all prior payments, does not exceed the amount used on or before the date of the payment to pay for qualified medical and educational expenses.

(2) *Debt used to pay for qualified medical or educational expenses*—(i) *In general.* For purposes of this section, the proceeds of a debt are used to pay for qualified medical or educational expenses to the extent that—

(A) The taxpayer pays qualified medical or educational expenses within 90 days before or after the date that amounts are actually borrowed with respect to the debt, the proceeds of the debt are not directly allocable to another expense under § 1.163–8T(c)(3) (allocation of debt; proceeds not disbursed to borrower) and the proceeds of any other debt are not allocable to the medical or educational expenses under § 1.163–8T(c)(3), or

(B) The proceeds of the debt are otherwise allocated to such expenditures under § 1.163–8T.

(ii) *Special rule for refinancings.* For purposes of this section, the proceeds of a debt are used to pay for qualified medical and educational expenses to the extent that the proceeds of the debt are allocated under § 1.163–8T to the repayment of another debt (the "original debt"), but only to the extent of the amount of the original debt used to pay for qualified medical and educational expenses, reduced by any principal payments on such debt up to the time of the refinancing.

(iii) *Other special rules.* The following special rules apply for purposes of this section.

(A) Proceeds of a debt are used to pay for qualified medical or educational expenses as of the later of the taxable year in which such proceeds are borrowed or the taxable year in which such expenses are paid.

(B) The amount of debt which may be treated as being used to pay for qualified medical or educational expenses may not exceed the amount of such expenses.

(C) Proceeds of a debt may not be treated as being used to pay for qualified medical or educational expenses to the extent that:

(*1*) The proceeds have been repaid as of the time the expense is paid;

(*2*) The proceeds are actually borrowed before August 17, 1986; or

(*3*) The medical or educational expenses are paid before August 17, 1986.

(iv) *Examples—Example (1).* A pays a $5,000 qualified educational expense from a checking account that A maintains at Bank 1 on November 9, 1987. On January 1, 1988, A incurs a $20,000 debt that is secured by A's residence and places the proceeds of the debt in a savings account that A also maintains at Bank 1. A pays another $5,000 qualified educations expense on March 15 from a checking account that A maintains at Bank 2. Under paragraph (n)(2) of this section, the debt proceeds are used to pay for both educational expenses, regardless of other deposits to, or expenditures from, the accounts, because both expenditures are made within 90 days before or after the debt was incurred.

Example (2). B pays a $5,000 qualified educational expense from a checking account on November 1, 1987. On November 30, 1987, B incurs a debt secured by B's residence, and the lender disburses the debt proceeds directly to a person who sells B a new car. Although the educational expense is paid within 90 days of the date the debt is incurred, the proceeds of the debt are not used to pay for the educational expense because the proceeds are directly allocable to the purchase of the new car under § 1.163–8T(c)(3).

Example (3). On November 1, 1987, C borrows $5,000 from C's college. The proceeds of this debt are not disbursed to C, but rather are used to pay tuition fees for C's attendance at the college. On November 30, 1987, C incurs a second debt and secures the debt by C's residence. Although the $5,000 educational expense is paid within 90 days before the second debt is incurred, the proceeds of the second debt are not used to pay for the educational expense, because the proceeds of the first debt are directly allocable to the educational expense under § 1.163–8T(c)(3).

Example (4). On January 1, 1988, D incurs a $20,000 debt secured by a qualified residence. D places the proceeds of the debt in a separate account (*i.e.*, the proceeds of the debt are the only deposit in the account). D makes payments of $5,000 each for qualified educational expenses on September 1, 1988, September 1, 1989, September 1, 1990, and September 1, 1991. Because the debt proceeds are allocated to educational expenses as of the date the expenses are paid, under the rules of § 1.163–8T(c)(4), the following amounts of the debt proceeds are used to pay for qualified educational expenses as of the end of each year:

1988: $5,000
1989: $10,000
1990: $15,000
1991: $20,000

Example (5). During 1987 E incurs a $10,000 debt secured by a principal residence. E uses (within the meaning of paragraph (n)(2)(i) of this section) all of the proceeds of the debt to pay for qualified educational expenses. On August 20, 1988, at which time the balance of the debt is $9,500, E incurs a new debt in the amount of $9,500 secured by E's principal residence and uses all of the proceeds of the new debt to repay the original debt. Under paragraph (n)(2)(ii) of this section, all of the proceeds of the new debt are used to pay for qualified educational expenses.

(3) *Qualified medical expenses.* Qualified medical expenses are amounts that are paid for medical care (within the meaning of section 213(d)(1) (A) and (B)) for the taxpayer, the taxpayer's spouse, or a dependent of the taxpayer (within the meaning of section 152), and that are not compensated for by insurance or otherwise.

(4) *Qualified educational expenses.* Qualified educational expenses are amounts that are paid for tuition, fees, books, supplies and equipment required for enrollment, attendance or courses of instruction at an educational organization described in section 170(b)(1)(A)(ii) and for any reasonable living expenses while away from home while in attendance at such an institution, for the taxpayer, the taxpayer's spouse or a dependent of the taxpayer (within the meaning of section 152) and that are not reimbursed by scholarship or otherwise.

(o) *Secured debt*—(1) *In general.* For purposes of this section, the term "secured debt" means a debt that is on the security of any instrument (such as a mortgage, deed of trust, or land contract)—

(i) That makes the interest of the debtor in the qualified residence specific security for the payment of the debt,

(ii) Under which, in the event of default, the residence could be subjected to the satisfaction of the debt with the same priority as a mortgage or deed of trust in the jurisdiction in which the property is situated, and

(iii) That is recorded, where permitted, or is otherwise perfected in accordance with applicable State law.

A debt will not be considered to be secured by a qualified residence if it is secured solely by virtue of a lien upon the general assets of the taxpayer or by a security interest, such as a mechanic's lien or judgment lien, that attaches to the property without the consent of the debtor.

(2) *Special rule for debt in certain States.* Debt will not fail to be treated as secured solely because, under an applicable State or local homestead law or other debtor protection law in effect on August 16, 1986, the security interest is ineffective or the enforceability of the security interest is restricted.

(3) *Times at which debt is treated as secured.* For purposes of this section, a debt is treated as secured as of the date on which each of the requirements of paragraph (o)(1) of this section are satisfied, regardless of when amounts are actually borrowed with respect to the debt. For purposes of this paragraph (o)(3), if the instrument is recorded within a commercially reasonable time after the security interest is granted, the

VOL 52 ISS 245 DEC 22 1987 UMI

VOL 52 ISS 245 DEC 22 1987 UMI

instrument will be treated as recorded on the date that the security interest was granted.

(4) *Partially secured debt*—(i) *In general.* If the security interest is limited to a prescribed maximum amount or portion of the residence, and the average balance of the debt exceeds such amount or the value of such portion, such excess shall not be treated as secured debt for purposes of this section.

(ii) *Example.* T borrows $80,000 on January 1, 1991. T secures the debt with a principal residence. The security in the residence for the debt, however, is limited to $20,000. T pays $8,000 in interest on the debt in 1991 and the average balance of the debt in that year is $80,000. Because the average balance of the debt exceeds the maximum amount of the security interest, such excess is not treated as secured debt. Therefore, for purposes of applying the limitation on qualified residence interest, the average balance of the secured debt is $20,000 (the maximum amount of the security interest) and the interest paid or accrued on the secured debt is $2,000 (the total interest paid on the debt multiplied by the ratio of the average balance of the secured debt ($20,000) and the average balance of the total debt ($80,000)).

(5) *Election to treat debt as not secured by a qualified residence*—(i) *In general.* For purposes of this section, a taxpayer may elect to treat any debt that is secured by a qualified residence as not secured by the qualified residence. An election made under this paragraph shall be effective for the taxable year for which the election is made and for all subsequent taxable years unless revoked with the consent of the Commissioner.

(ii) *Example.* T owns a principal residence with a fair market value of $75,000 and an adjusted purchase price of $40,000. In 1988, debt A, the proceeds of which were used to purchase the residence, has an average balance of $15,000. The proceeds of debt B, which is secured by a second mortgage on the property, are allocable to T's trade or business under § 1.163–8T and has an average balance of $25,000. In 1988, T incurs debt C, which is also secured by T's principal residence and which has an average balance in 1988 of $5,000. In the absence of an election to treat debt B as unsecured, the applicable debt limit for debt C in 1988 under paragraph (e) of this section would be zero dollars ($40,000−$15,000−$25,000) and none of the interest paid on debt C would be qualified residence interest. If, however, T makes or has previously made an election pursuant to paragraph (o)(5)(i) of this section to treat debt B as not secured by the residence, the applicable debt limit for debt C would be $25,000 ($40,000−$15,000), and all of the interest paid on debt C during the taxable year would be qualified residence interest. Since the proceeds of debt B are allocable to T's trade or business under § 1.163–8T, interest on debt B may be deductible under other sections of the Internal Revenue Code.

(iii) *Allocation of debt secured by two qualified residences.* [Reserved.]

(p) *Definition of qualified residence*—(1) *In general.* The term "qualified residence" means the taxpayer's principal residence (as defined in paragraph (p)(2) of this section), or the taxpayer's second residence (as defined in paragraph (p)(3) of this section).

(2) *Principal residence.* The term "principal residence" means the taxpayer's principal residence within the meaning of section 1034. For purposes of this section, a taxpayer cannot have more than one principal residence at any one time.

(3) *Second residence*—(i) *In general.* The term "second residence" means—

(A) A residence within the meaning of paragraph (p)(3)(ii) of this section,

(B) That the taxpayer uses as a residence within the meaning of paragraph (p)(3)(iii) of this section, and

(C) That the taxpayer elects to treat as a second residence pursuant to paragraph (p)(3)(iv) of this section.

A taxpayer cannot have more than one second residence at any time.

(ii) *Definition of residence.* Whether property is a residence shall be determined based on all the facts and circumstances, including the good faith of the taxpayer. A residence generally includes a house, condominium, mobile home, boat, or house trailer, that contains sleeping space and toilet and cooking facilities. A residence does not include personal property, such as furniture or a television, that, in accordance with the applicable local law, is not a fixture.

(iii) *Use as a residence.* If a residence is rented at any time during the taxable year, it is considered to be used as a residence only if the taxpayer uses it during the taxable year as a residence within the meaning of section 280A(d). If a residence is not rented at any time during the taxable year, it shall be considered to be used as a residence. For purposes of the preceding sentence, a residence will be deemed to be rented during any period that the taxpayer holds the residence out for rental or resale or repairs or renovates the residence with the intention of holding it out for rental or resale.

(iv) *Election of second residence.* A taxpayer may elect a different residence (other than the taxpayer's principal residence) to be the taxpayer's second residence for each taxable year. A taxpayer may not elect different residences as second residences at different times of the same taxable year except as provided below—

(A) If the taxpayer acquires a new residence during the taxable year, the taxpayer may elect the new residence as a taxpayer's second residence as of the date acquired;

(B) If property that was the taxpayer's principal residence during the taxable year ceases to qualify as the taxpayer's principal residence, the taxpayer may elect that property as the taxpayer's second residence as of the date that the property ceases to be the taxpayer's principal residence; or

(C) If property that was the taxpayer's second residence is sold during the taxable year or becomes the taxpayer's principal residence, the taxpayer may elect a new second residence as of such day.

(4) *Allocations between residence and other property*—(i) *In general.* For purposes of this section, the adjusted purchase price and fair market value of property must be allocated between the portion of the property that is a qualified residence and the portion that is not a qualified residence. Neither the average balance of the secured debt nor the interest paid or accrued on secured debt is so allocated. Property that is not used for residential purposes does not qualify as a residence. For example, if a portion of the property is used as an office in the taxpayer's trade or business, that portion of the property does not qualify as a residence.

(ii) *Special rule for rental of residence.* If a taxpayer rents a portion of his or her principal or second residence to another person (a "tenant"), such portion may be treated as used by the taxpayer for residential purposes if, but only if—

(A) Such rented portion is used by the tenant primarily for residential purposes,

(B) The rented portion is not a self-contained residential unit containing separate sleeping space and toilet and cooking facilities, and

(C) The total number of tenants renting (directly or by sublease) the same or different portions of the residence at any time during the taxable year does not exceed two. For this purpose, if two persons (and the dependents, as defined by section 152, of either of them) share the same sleeping quarters, they shall be treated as a single tenant.

(iii) *Examples—Example (1).* D, a dentist, uses a room in D's principal residence as an office which qualifies under section 280A(c)(1)(B) as a portion of the dwelling unit used exclusively on a regular basis as a place of business for meeting with patients in the normal course of D's trade or business. D's adjusted purchase price of the property is $65,000; $10,000 of which is allocable under paragraph (o)(4)(i) of this section to the room used as an office. For purposes of this section, D's residence does not include the room used as an office. The adjusted purchase price of the residence is, accordingly, $55,000. Similarly, the fair market value of D's residence must be allocated between the office and the remainder of the property.

Example (2). J rents out the basement of property that is otherwise used as J's principal residence. The basement is a self-contained residential unit, with sleeping space and toilet and cooking facilities. The adjusted purchase price of the property is $100,000; $15,000 of which is allocable under paragraph (o)(4)(i) of this section to the basement. For purposes of this section, J's residence does not include the basement and the adjusted purchase price of the residence is $85,000. Similarly, the fair market value of the residence must be allocated between the basement unit and the remainder of the property.

(5) *Residence under construction*—(i) *In general.* A taxpayer may treat a residence under construction as a qualified residence for a period of up to 24 months, but only if the residence becomes a qualified residence, without regard to this paragraph (p)(5)(i), as of the time that the residence is ready for occupancy.

(ii) *Example.* X owns a residential lot suitable for the construction of a vacation home. On April 20, 1987, X obtains a mortgage secured by the lot and any property to be constructed on the lot. On August 9, 1987, X begins construction of a residence on the lot. The residence is ready for occupancy on November 9, 1989. The residence is used as a residence within the meaning of paragraph (p)(3)(iii) of this section during 1989 and X elects to treat the residence as his second residence for the period November 9, 1989, through December 31, 1989. Since the residence under construction is a qualified residence as of the first day that the residence is ready for occupancy (November 9, 1987), X may treat the residence as his second residence under paragraph (p)(5)(i) of this section for up to 24 months of the period during which the residence is under construction, commencing on or after the date that construction is begun (August 9, 1987). If X treats the residence under construction as X's second residence beginning on August 9, 1987, the residence under construction would cease to qualify as a qualified residence under paragraph (p)(5)(i) on August 8, 1989. The residence's status as a qualified residence for future periods would be determined without regard to paragraph (p)(5)(i) of this section.

(6) *Special rule for time-sharing arrangements.* Property that is otherwise a qualified residence will not fail to qualify as such solely because the taxpayer's interest in or right to use the property is restricted by an arrangement whereby two or more persons with interests in the property agree to exercise control over the property for different periods during the taxable year. For purposes of determining the use of a residence under paragraph (p)(3)(iii) of this section, a taxpayer will not be considered to have used or rented a residence during any period that the taxpayer does not have the right to use the property or to receive any benefits from the rental of the property.

(q) *Special rules for tenant-stockholders in cooperative housing corporations*—(1) *In general.* For purposes of this section, a residence includes stock in a cooperative housing corporation owned by a tenant-stockholder if the house or apartment which the tenant-stockholder is entitled to occupy by virtue of owning such stock is a residence within the meaning of paragraph (p)(3)(ii) of this section.

(2) *Special rule where stock may not be used to secure debt.* For purposes of this section, if stock described in paragraph (q)(1) of this section may not be used to secure debt because of restrictions under local or State law or because of restrictions in the cooperative agreement (other than restrictions the principal purpose of which is to permit the tenant-stockholder to treat unsecured debt as secured debt under this paragraph (q)(2)), debt may be treated as secured by such stock to the extent that the proceeds of the debt are allocated to the purchase of the stock under the rules of § 1.163–8T. For purposes of this paragraph (q)(2), proceeds of debt incurred prior to January 1, 1987, may be treated as allocated to the purchase of such stock to the extent that the tenant-stockholder has properly and consistently deducted interest expense on such debt as home mortgage interest attributable to such stock on Schedule A of Form 1040 in determining his taxable income for taxable years beginning before January 1, 1987. For purposes of this paragraph (q)(2), amended returns file after December 22, 1987, are disregarded.

(3) *Treatment of interest expense of the cooperative described in section 216(a)(2).* For purposes of section 163(h) and § 1.163–9T (disallowance of deduction for personal interest) and section 163(d) (limitation on investment interest), any amount allowable as a deduction to a tenant-stockholder under section 216(a)(2) shall be treated as interest paid or accrued by the tenant-stockholder. If a tenant-stockholder's stock in a cooperative housing corporation is a qualified residence of the tenant-shareholder, any amount allowable as a deduction to the tenant-stockholder under section 216(a)(2) is qualified residence interest.

(4) *Special rule to prevent tax avoidance.* If the amount treated as qualified residence interest under this section exceeds the amount which would be so treated if the tenant-stockholder were treated as directly owning his proportionate share of the assets and liabilities of the cooperative and one of the principal purposes of the cooperative arrangement is to permit the tenant-stockholder to increase the amount of qualified residence interest, the district director may determine that such excess is not qualified residence interest.

(5) *Other definitions.* For purpose of this section, the terms "tenant-stockholder," "cooperative housing corporation" and "proportionate share" shall have the meaning given by section 216 and the regulations thereunder.

(r) *Effective date.* The provisions of this section are effective for taxable years beginning after December 31, 1986.

PART 602—[AMENDED]

Par. 3. The authority for Part 602 continues to read as follows:

Authority: 26 U.S.C. 7805.

§ 602.10 [Amended]

Par. 4. Section 602.101(c) is amended by inserting in the appropriate place in the table "§ 1.163–10T . . . 1545–1009."

There is need for immediate guidance with respect to the provisions contained in this Treasury decision. For this reason, it is found impractical to issue this Treasury decision with notice and public procedure under subsection (b) of section 553 of Title 5 of the United States Code or subject to the effective date limitation of subsection (d) of that section.

Lawrence B. Gibbs,
Commissioner of Internal Revenue.

Approved: December 15, 1987.

O. Donaldson Chapoton,
Assistant Secretary of the Treasury.

[FR Doc. 87–29272 Filed 12–21–87; 8:45 am]

BILLING CODE 4830–01–M

DEPARTMENT OF LABOR

Office of the Secretary

29 CFR Part 19

Right to Financial Privacy Act of 1978; Final Implementation Regulations

AGENCY: Office of the Secretary, Labor.

ACTION: Notice of final rulemaking.

SUMMARY: These final regulations authorize Department of Labor units to

VOL 52 ISS 245 DEC 22 1987 UMI

request financial records from a financial institution pursuant to the formal written request procedure established by the Right to Financial Privacy Act of 1978 and would set forth the conditions under which such requests may be made. Section 1108(2) of that Act requires that the formal written request be authorized by regulations promulgated by the head of the agency or department. These final regulations will enable Department of Labor units to utilize the formal written request procedure to obtain financial records.

EFFECTIVE DATE: January 21, 1988.

FOR FURTHER INFORMATION CONTACT: Sofia P. Petters, Counsel for Administrative Legal Services, Office of the Solicitor, U.S. Department of Labor, Room N–2428, 200 Constitution Avenue, NW., Washington, DC 20210; telephone (202) 523–8188.

SUPPLEMENTARY INFORMATION: The Right to Financial Privacy Act of 1978, 92 Stat. 3697, 12 U.S.C. 3401 *et seq.*, limits government access to financial records of customers of financial institutions. In order for government agencies to obtain such records, the Act requires that there be either customer authorizations, authorized search warrants, judicial or administrative subpoenas, or formal written requests by a governmental authority. Formal written requests may only be made pursuant to a regulatory authorization promulgated by the head of the agency or department, 12 U.S.C. 3408(2).

In order to assist those departmental agencies or units that have no statutory administrative subpoena power, this final regulatory authorization is needed to comply with 12 U.S.C. 3408(2).

This rule was originally published for public comment as a proposed rule in the **Federal Register** on April 2, 1985 (50 FR 13049). Comments were to be submitted until May 2, 1985. No comments were received. Inasmuch as no comments have been received, the proposed rule is adopted as the final rule. No changes have been made except for a punctuation change in § 19.1(a) wherein a parenthesis is being closed.

Classification

This rule is procedural in character in that it implements the formal written request procedure established by the Right to Financial Privacy Act of 1978. Therefore, the rule is not classified as a "major rule" under Executive Order 12291 on Federal Regulations, because it is not likely to result in (1) an annual effect on the economy of $100 million or more; (2) a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; or (3) significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets. Accordingly, no regulatory impact analysis is required.

Regulatory Flexibility Act

The Department believes that the rule will have no "significant economic impact upon a substantial number of small entities" within the meaning of section 3(a) of the Regulatory Flexibility Act, Pub. L. No. 96–354, 91 Stat. 1164 (5 U.S.C. 605(b)). The Secretary has certified to the Chief Counsel for Advocacy of the Small Business Administration to this effect. This conclusion is reached because the rule is procedural in character in that it implements the formal written request procedure established by the Right to Financial Privacy Act of 1978 and thus no significant economic impact is expected with respect to small entities, nor with respect to other entities as well. Accordingly, no regulatory flexibility analysis is required.

Paperwork Reduction Act

This rule is not subject to section 3504(h) of the Paperwork Reduction Act, since it does not contain a collection of information requirement.

List of Subjects in 29 CFR Part 19

Privacy.

Accordingly, a new Part 19 is added to Subtitle A of Title 29 of the Code of Federal Regulations to read as follows:

PART 19—RIGHT TO FINANCIAL PRIVACY ACT

Sec.
19.1 Definitions.
19.2 Purpose.
19.3 Authorization.
19.4 Contents of request.
19.5 Certification.

Authority: Sec. 1108, Right to Financial Privacy Act of 1978, 92 Stat. 3697 *et seq.*, 12 U.S.C. 3401 *et seq.*, (5 U.S.C. 301); and Reorganization Plan No. 6 of 1950.

§ 19.1 Definitions.

For purposes of this regulation, the term:

(a) "Financial institution" means any office of a bank, savings bank, card issuer as defined in section 103 of the Consumer Credit Protection Act (15 U.S.C. 1602(n)), industrial loan company, trust company, savings and loan, building and loan, or homestead association (including cooperative banks), credit union, consumer financial institution, located in any State or territory of the United States, the District of Columbia, Puerto Rico, Guam, American Samoa, or the Virgin Islands.

(b) "Financial record" means an original of, a copy of, or information known to have been derived from, any record held by a financial institution pertaining to a customer's relationship with the financial institution.

(c) "Person" means an individual or a partnership of five or fewer individuals.

(d) "Customer" means any persons or authorized representative of that person who utilized or is utilizing any service of a financial institution, or for whom a financial institution is acting or has acted as a fiduciary, in relation to an account maintained in the person's name.

(e) "Law enforcement inquiry" means a lawful investigation or official proceeding inquiring into a violation of or failure to comply with any criminal or civil statute or any regulation, rule, or order issued pursuant thereto.

(f) "Departmental unit" means those offices, divisions bureaus, or other components of the Department of Labor authorized to conduct law enforcement inquiries.

(g) "Act" means the Right to Financial Privacy Act of 1978.

§ 19.2 Purpose.

The purpose of these regulations is to authorize Departmental units to request financial records from a financial institution pursuant to the formal written request procedure authorized by section 1108 of the Act, and to set forth the conditions under which such requests may be made.

§ 19.3 Authorization.

Departmental units are hereby authorized to request financial records of any customer from a financial institution pursuant to a formal written request under the Act only if:

(a) No administrative summons or subpoena authority reasonably appears to be available to the Departmental unit to obtain financial records for the purpose for which the records are sought;

(b) There is reason to believe that the records sought are relevant to a legitimate law enforcement inquiry and will further that inquiry;

(c) The request is issued by the Assistant Secretary or Deputy Under Secretary heading the Departmental unit requesting the records, or by a senior agency official designated by the head of the Departmental unit. Officials so designated shall not delegate this authority to others;

(d) The request adheres to the requirements set forth in § 19.4; and

(e) The notice requirements set forth in section 1108(4) of the Act, or the requirements pertaining to delay of notice in section 1109 of the Act are satisfied, except in situations where no notice is required (e.g., section 1113(g)).

§ 19.4 Contents of request.

The formal written request shall be in the form of a letter or memorandum to an appropriate official of the financial institution from which financial records are requested. The request shall be signed by an issuing official of the requesting Departmental unit, as specified in § 19.3(c). It shall set forth that official's name, title, business address and business phone number. The request shall also contain the following:

(a) The identity of the customer or customers to whom the records pertain;

(b) A reasonable description of the records sought;

(c) Any other information that the issuing official deems appropriate, e.g., the date on which the requesting Departmental unit expects to present a certificate of compliance with the applicable provisions of the Act, the name and title of the individual to whom disclosure is to be made, etc.

(d) In cases where customer notice is delayed by a court order, a copy of the court order shall be attached to the formal written request.

§ 19.5 Certification.

Prior to obtaining the requested records pursuant to a formal written request, a senior official designated by the head of the requesting Departmental unit shall certify in writing to the financial institution that the Departmental unit has complied with the applicable provisions of the Act.

Signed at Washington, DC, this 14th day of December, 1987.

Dennis E. Whitfield,

Deputy Secretary of Labor.

[FR Doc. 87–29287 Filed 12–21–87; 8:45 am]

BILLING CODE 4510–23–M

DEPARTMENT OF THE INTERIOR

Office of Surface Mining Reclamation and Enforcement

30 CFR Part 913

Removal of Condition (c) From the Illinois Permanent Regulatory Program

AGENCY: Office of Surface Mining Reclamation and Enforcement (OSMRE), Interior.

ACTION: Final rule.

SUMMARY: OSMRE is announcing the removal of the condition listed at 30 CFR 913.11(c) ["Condition (c)"] placed on the Secretary's approval of the Illinois permanent regulatory program (hereinafter referred to as the Illinois program) under the Surface Mining Control and Reclamation Act of 1977 (SMCRA). Condition (c) required the State to adopt a policy statement or otherwise amend its program to the effect that the best technology currently available (BTCA) for sediment control required the use of sedimentation ponds. Subsequently, the United States District Court for the District of Columbia remanded the Federal rules establishing sedimentation ponds or other siltation structures with point source discharges as BTCA, thus rendering the original Illinois rules no less effective than the current Federal regulations governing sediment control measures.

EFFECTIVE DATE: December 22, 1987.

FOR FURTHER INFORMATION CONTACT: James F. Fulton, Director, Springfield Field Office, Office of Surface Mining Reclamation and Enforcement, 600 East Monroe Street, Room 20, Springfield, Illinois 62701; Telephone: (217) 492–4495.

SUPPLEMENTARY INFORMATION:

I. Background on the Illinois Program

On June 1, 1982, the Secretary of Interior conditionally approved the Illinois permanent regulatory program. Information pertinent to the general background, revisions, modifications, and amendments to the Illinois program submission, as well as the Secretary's findings, the disposition of comments, and a detailed explanation of the conditions of approval of the Illinois program can be found in the June 1, 1982 **Federal Register** (47 FR 23883 *et seq.*). Subsequent actions concerning the conditions of approval and program amendments are identified at 30 CFR 913.11, 913.15 and 913.16.

II. Secretary's Findings on Condition (c)

As discussed in Finding 14.7 of the program approval notice (47 FR 23861–23862, June 1, 1982), Illinois uses the term "siltation structures" when establishing the performance standards for sediment control at 62 IAC 1816.46 and 1817.46. As originally promulgated, the corresponding Federal rules at 30 CFR 816.46 and 817.46 used the more limiting term "sedimentation ponds" because, as explained in the preamble to those rules (44 FR 15159, March 13, 1979), OSMRE had determined that BTCA for sediment control required the use of sedimentation ponds. Since the Illinois definition of "siltation structures" at 62 IAC 1701.5 ("a device, or devices, used to remove, collect or otherwise control runoff so that resulting outflow will meet applicable effluent standards") includes structures other than sedimentation ponds, the Secretary, with the State's concurrence, imposed condition (c) on his approval of the Illinois program.

As codified at 30 CFR 913.11(c), condition (c) required that Illinois adopt a policy statement or otherwise amend its program to indicate that sedimentation ponds are BTCA for sediment control. It also specified that if the State desired to approve any other technology, OSMRE would first have to review and approve it as an experimental practice or a program amendment.

On September 26, 1983, the Secretary revised 30 CFR 816.46 and 817.46, replacing the requirement for sedimentation ponds with one for siltation structures in recognition of the fact that treatment facilities other than sedimentation ponds may also qualify as BTCA for sediment control (48 FR 44034). However, the Federal definitions of "siltation structure" and its subset of "other treatment facilities" continued to be more restrictive than the Illinois definition of "siltation structure" in that the Federal rules required that any such structure have a point-source discharge.

On July 15, 1985, the United States District Court for the District of Columbia remanded 30 CFR 816.46(b)(2) and 817.46(b)(2) to the extent that they require the use of siltation structures, as defined in 30 CFR 816.46(a) and 817.46(a), as BTCA for sediment control (*In re: Permanent Surface Mining Regulation Litigation II*, Civil Action No. 79–1144). The court found that the Secretary had (1) failed to articulate a satisfactory explanation for requiring siltation structures in every instance, and (2) without reasoned analysis, dismissed evidence in the administrative record pointing to potential negative impacts of siltation structures. In particular, the court questioned the Secretary's assertion that structures with point-source discharges must be required as BTCA because there is no technical basis on which to judge the effectiveness of alternative sediment control measures.

On November 20, 1986, the Secretary suspended 30 CFR 816.46(b)(2) and 817.46(b)(2), which required that all surface drainage from disturbed areas be passed through a siltation structure prior to leaving the permit area, to comply with the court's decision (51 FR 41952 *et seq.*). This means that the regulatory authority must determine BTCA for sediment control on a case-by-case basis in a manner consistent with the Federal definition of BTCA at 30 CFR 701.5. As in the Illinois program, siltation structures with point-source

discharge will no longer be required as BTCA for sediment control in every instance.

The Federal rules at 30 CFR 816.45(a), 816.46(b)(1), 817.45(a) and 817.46(b)(1) continue to require that, in accordance with section 515(b)(10)(B)(i) of SMCRA, sediment control measures be designed, constructed and maintained to prevent additional contributions of suspended solids to streamflow or runoff outside the permit area to the extent possible using the best technology currently available.

The corresponding Illinois regulations at 62 IAC 1816.45(a), 1816.42(a)(1), 1817.45(a) and 1817.42(a)(1), respectively, contain provisions which are identical or substantively similar to these Federal rules. In addition, the Illinois definition of "best technology currently available" at 62 IAC 1701.5 is virtually identical to the corresponding Federal definition at 30 CFR 701.5.

Therefore, the Secretary finds that the suspension of the Federal rules requiring the use of structures with point-source discharges as BTCA for sediment control renders the Illinois program no less effective than the Federal regulations concerning the use of BTCA for sediment control. Hence, condition (c) can be removed.

III. Public Comment

On July 29, 1987, OSMRE requested public comment on its proposal to remove condition (c) (52 FR 28309–28310). No comments were received during the comment period, which closed on August 28, 1987.

Pursuant to section 503(b) of SMCRA and 30 CFR 732.17(h)(10)(i), comments were also solicited from various Federal agencies. No substantive comments were received.

IV. Secretary's Decision

Based on the above findings, the Secretary is removing the condition of approval of the Illinois program codified at 30 CFR 913.11(c). He is amending 30 CFR Part 913 to implement this decision. This final rule is being made effective immediately since consistency of State and Federal standards is required by SMCRA.

V. Procedural Requirements

1. *Compliance with the National Environmental Policy Act:* The Secretary has determined that, pursuant to section 702(d) of SMCRA, 30 U.S.C. 1292(d), no environmental impact statement need be prepared for this rulemaking.

2. *Executive Order No. 12291 and the Regulatory Flexibility Act:* On August 28, 1981, the Office of Management and Budget (OMB) granted OSMRE an exemption from sections 3, 4, 7 and 8 of Executive Order 12291 for actions directly related to approval or conditional approval of State regulatory programs. Therefore, this action is exempt from preparation of a Regulatory Impact Analysis and regulatory review by OMB.

The Department of the Interior has determined that the removal of this condition will not have a significant economic effect on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). This rule will not impose any new requirements; rather it will ensure that existing requirements established by SMCRA and the Federal rules will be met by the State.

3. *Paperwork Reduction Act:* This rule does not contain information collection requirements which require approval by the Office of Management and Budget under 44 U.S.C. 3507.

List of Subjects in 30 CFR Part 913

Coal mining, Intergovernmental relations, Surface mining, Underground mining.

Date: December 14, 1987.

James E. Cason,

Deputy Assistant Secretary—Land and Minerals Management.

PART 913—ILLINOIS

30 CFR Part 913 is amended as follows:

1. The authority citation for Part 913 continues to read as follows:

Authority: Pub. L. 95–87, Surface Mining Control and Reclamation Act of 1977 (30 U.S.C. 1201 *et seq.*).

§ 913.11 [Amended]

2. In § 913.11, paragraph (c) is removed.

[FR Doc. 87–29270 Filed 12–21–87; 8:45 am]

BILLING CODE 4310–05–M

DEPARTMENT OF THE TREASURY

Fiscal Service

31 CFR Parts 316, 342, and 351

[Department of the Treasury Circulars No. 553, Tenth Revision; Public Debt Series No. 3–67, Second Revision; and No. 1–80, Second Revision]

U.S. Savings Bonds and Notes; Tables Reflecting Investment Yields and Maturity Periods

AGENCY: Bureau of the Public Debt, Fiscal Service, Treasury.

ACTION: Notice providing update of tables showing the redemption values and investment yields of United States Savings Bonds/Notes

SUMMARY: This notice updates the tables set forth in the offering circulars for Series E/EE savings bonds and savings notes. The tables reflect the redemption values and investment yields for accrual dates occurring November 1, 1987 through April 1, 1988, for Series E/EE savings bonds and savings notes.

DATE: Effective Date: December 22, 1987.

FOR FURTHER INFORMATION CONTACT: Jacqueline L. Jackson, Attorney Adviser, Office of the Chief Counsel, Bureau of the Public Debt, Washington, DC 20239–0001, (202) 376–4320.

SUPPLEMENTARY INFORMATION: This notice updates the tables reflecting the investment yields of Series E/EE savings bonds and savings notes. Offering circulars No. 653 (Series E), No. 1–80 (Series EE) and Public Debt Series No. 3–67 (Saving Notes) are hereby supplemented by the addition of tables showing the redemption values and investment yields for accrual dates occurring November 1, 1987 through April 1, 1988. It shou1d be noted that, for the first time, the tables reflect the market-based variable yields described in the offering circulars at 31 CFR 316.8(b)(2)(C)(iii) for Series E savings bond, 31 CFR 351.2(f)(2) for Series EE savings bonds, and 31 CFR 342.2a(b)(2) for savings notes. It should also be noted that the values shown apply only where the securities are actually paid. They do not form the basis for future accruals.

Procedural Requirements

This notice is not considered a "major rule" for purposes of Executive Order 12291. A regulatory impact analysis, therefore, is not required.

The notice and public procedures of the Administrative Procedure Act are inapplicable, pursuant to 5 U.S.C. 553(a)(2). As no notice of proposed rulemaking is required, the provisions of the Regulatory Flexibility Act (5 U.S.C. 601, *et seq.*) do not apply.

List of Subjects in 31 CFR Parts 316, 342, and 351

Bonds, Government securities.

Dated: November 18, 1987.

Gerald Murphy,

Fiscal Assistant Secretary.

Accordingly, pursuant to the authority of Department of the Treasury Circular No. 653, Tenth Revision (31 CFR, Part 316), Public Debt Series No. 3–67, Second Revision (31 CFR Part 342), and No. 1–80, Second Revision, (31 CFR Part 351); the following updated tables are provided:

DEPARTMENT OF DEFENSE

Office of the Secretary

32 CFR Part 40a

Defense Contracting; Reporting Procedures on Defense Related Employment

AGENCY: Office of the Secretary, DOD.

ACTION: Final rule.

SUMMARY: This rule is the fiscal year 1987 revision of the section listing DOD contractors receiving contract awards of $10 million or more. This part is published to comply with the provisions of section 1, Pub. L. 97–295, October 12, 1982; 10 U.S.C. 2397.

EFFECTIVE DATE: September 30, 1987.

FOR FURTHER INFORMATION CONTACT: Mr. J.R. Sungenis, Director for Information Operations and Reports, Washington Headquarters Services, 1215 Jefferson Davis Highway, Suite 1204, Arlington, VA 22202–4302. Telephone (202) 746–0334.

List of Subjects in 32 CFR Part 40a

Armed Forces, Conflict of interests, Government employees, Government procurement, Reporting and recordkeeping requirements.

Accordingly, 32 CFR Part 40a is revised to read as follows:

PART 40a—DEFENSE CONTRACTING: REPORTING PROCEDURES ON DEFENSE RELATED EMPLOYMENT

Authority: 10 U.S.C. 2397.

§ 40a.1 Department of Defense contractors receiving contract awards of $10 million or more.

BILLING CODE 3851-01-M

POSTAL SERVICE

39 CFR Part 111

Domestic Mail Manual; Miscellaneous Amendments

AGENCY: Postal Service.

ACTION: Final rule.

SUMMARY: The Postal Service hereby describes the numerous miscellaneous revisions consolidated in the Transmittal Letter for issue 25 of the Domestic Mail Manual, which is incorporated by reference in the Code of Federal Regulations, see 39 CFR 111.1.

Most of the revisions are minor, editorial, or clarifying. Substantive changes, such as the new regulations on drug paraphernalia and ballistic knives, the revised regulations on the minimum ZIP + 4 coding requirement, and the revised merchandise return service regulations, have previously been published in the Federal Register.

DATE: Effective Date: December 20, 1987.

FOR FURTHER INFORMATION CONTACT: Paul J. Kemp, (202) 268-2960.

SUPPLEMENTARY INFORMATION: The Domestic Mail Manual has been amended by the publication of a transmittal letter for issue 25, dated December 20, 1987. The text of all published changes is filed with the Director of the Federal Register.

Subscribers to the Domestic Mail Manual receive these amendments automatically from the Government Printing Office.

The following excerpt from the Summary of Changes section of the transmittal letter for issue 25 covers the minor changes not previously described in interim or final rules published in the Federal Register.

Note.—This is a complete issue of the DMM, including changes announced in the Postal Bulletin through October 29, 1987. All future issues of the DMM will also be complete issues. This issue includes an updated index and a new Glossary of Forms that lists every form mentioned in the DMM.

Summary of Changes

1. Section 122.15. *Return Address,* and 912.44b. *How to Mail* (Certified Mail) are revised to more specifically state that the Postal Service requires that pieces of Express Mail and certified mail must bear the sender's return address if the customer requests a return receipt (PB 21641, 10–15–87).

2. Exhibits 122.63*b, e, f, m, n, o, p, q,* and *r,* in section 122.63. *Assignment of ZIP Codes,* are revised to include updated ZIP Code listings as shown in *Postal Bulletin* 21641, 10–15–87; PB 21642, 10–22–87; PB 21643, 10–29–87.

3. * * *

4. Section 124.63g, *Live Animals,* is revised to allow shipments of pigeons by Express Mail in specifically approved containers. No other warm blooded animals are mailable without specific authorization by the Office of Classification and Rates Administration.

5. Exhibit 125.2. *Conditions Applied to Mail Addressed to Military Post Offices Overseas,* (Conditions Table) is no longer published in the DMM. The *Conditions Table* will be published in its entirety approximately twice a year, with periodic updates, in the *Postal Bulletin.*

6. Section 131, is given a new heading, *Responsibilities,* and is revised to reflect that the Director, Office of Classification and Rates Administration delegated only to the General Managers of the Rates and Classification Centers (RCCs) the authority to decide customer appeals of field mail classification decisions and to clarify that other field managers must refer requests for exceptions to mail preparation or classification requirements to the Rates and Classification Center (PB 21640, 10–8–87).

7. Section 136, *Mixed Classes of Mail,* is revised by the addition of new section 136.9, *Priority Mail Drop Shipment Service,* to describe this new optional service to expedite the movement of First-, second-, third-, and fourth-class mail from one domestic postal facility to another through the Priority Mail network (PB 21640, 10–8–87).

8. Section 137. *Official Mail,* is revised by the addition of new section 137.272b(5), *Mail of the U.S. Postal Service,* which provides specific guidance on official mail of the Postal Service. Also, the exhibits of absentee balloting materials are changed to show in the indicium, "39 USC 3406" reflecting codification in Title 39, United States Code, of the August 1986 consolidation of the Federal Voting Assistance Act of 1955 and the Overseas Citizens Voting Rights Act of 1975.

9. Section 137.15, *Forwarding Mailing Records for Franked Mail,* is revised to implement the new Franked Mail Sampling System—Outside Washington Subsystem, which becomes effective January 16, 1988. The new system is designed to improve statistical revenue estimates for countable, franked mail and non-prepaid special services which originate from, or are sent to, district or state offices of Members of Congress or other authorized users of the franking privilege.

10. Section 144.1. *Postage Meters,* is revised by the addition of new section 144.14, *Possession,* to require anyone who has a postage meter to have both a valid postage meter license and a rental agreement with the meter manufacturer.

11. Section 144.49. *Ad Plates,* lists postal markings (endorsements) that are permissible for display in the ad plate area of metered mail pieces. Section 144.492 is revised to include endorsements for "ZIP + 4" and "ZIP + 4 Presort" (PB 21643, 10–29–87).

12. In section 159.4. *Dead Mail,* section 159.42, *Insured and COD Matter,* is revised to reflect that postal facilities handling undeliverable mail should no longer hold third-class single-piece rate mail, fourth-class mail, and articles found loose in the mail, but should send dead letters to the dead letter daily and dead parcels to the dead parcel branch weekly. Section 159.5. *Dead Letter Branches and Service Areas,* is revised to reflect changes in regional dead letter service areas (PB 21640, 10–8–87). Section 159.52. *Dead Parcel Branches,* is also revised to reflect changes in service areas.

13. Section 296. *Claims Procedures,* is revised to reflect that an Express Mail refund claim may be filed at any post office.

14. * * *

15. Sections 323, 366, 368 are revised and new section 365.5. *Residual Pieces,* is added to more clearly define residual pieces of Presorted First-Class mailings and ZIP + 4 First-Class mailings and to clarify which postage rates are chargeable for residual pieces (PB 21643, 10–29–87).

16. Sections 467, 667, and 767, contain second- third- and fourth-class mail pallet regulations. These sections are revised primarily to reflect adoption of a new national pallet application and to make the regulations consistent from class to class, where appropriate. The only major changes that affect mail preparation are:

a. An increase in the maximum weight for fourth-class packages; and,

b. The specification of strict criteria for the placement and print size of extraneous information on pallet labels. Specific sections that are revised are: 467.2, 467.3; 667.1, 667.66, 667.7, 667.8; 767.5, and 767.6.

17. In Chapter 4. *Second-Class Mail,* sections 411.34, 411.333, 411.354, and 468.2c are revised to clarify eligibility for the Intra-SCF rate. The Intra-SCF rate can be applied to addressed pieces that are not mailed at in-county rates and are mailed and delivered within the SCF of mailing (PB 21640, 10–8–87).

18. Section 643.1 is revised and retitled. *Revocation for Cause.* Section 643.2 is deleted and 643.3. *Revocation for Nonuse,* is renumbered. 643.2. These changes are made to eliminate repetition and to clarify that the General Manager of the Rates and Classification Center (RCC) is authorized to revoke special bulk third-class rate privileges for cause, with provision for appeal through the RCC to the Director. Office of Classification and Rates Administration. USPS Headquarters. Washington. DC 20260–5360 (PB 21635. 9–3–87).

19. In section 911. *Registered Mail,* section 911.31a is revised to specifically prohibit acceptance of envelopes made to Tyvek, plastic, and glossy surfaces in the domestic registered mail service.

20. * * *

21. In section 941. *Money Orders,* sections 941.141 and .142 are revised to direct carriers to instruct customers to retain the receipt part of Form 6387. *Rural Money Order Transaction.*

22. The following sections have been revised and in some instances restructured for clarity and to standardize format and terminology. No substantive changes were intended to be made.

915, Special Delivery
916, Special Handling
931, Certificates of Mailing
932, Return Receipts
933, Restricted Delivery
941.1, Money Orders
950–952, Alternate Delivery Services

23. Minor, non-substantive changes have also been made to 122.16d. 123.617,

123.65, 133.1, 137.275(1), 141.13, 144.62, 621.1*b*, 911.521*b* (3), 917.52, 917.56c, 942.2 942.13, 942.2, 953.3 and 953.4.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Health Care Financing Administration

42 CFR Parts 435 and 436

[BERC–304–CN]

Medicaid Program; Coverage of Qualified Pregnant Women and Children and Newborn Children; Correction

AGENCY: Health Care Financing Administration (HCFA), HHS.

ACTION: Final rule; correction.

SUMMARY: This document corrects a final rule that incorporated in the Medicaid regulations several mandatory eligibility groups of qualified pregnant women and certain children under 5 and newborn children of Medicaid-eligible women, published in the **Federal Register** of Monday, November 9, 1987 (52 FR 43063).

FOR FURTHER INFORMATION CONTACT: Richard Strauss, 301–594–6529.

SUPPLEMENTARY INFORMATION: The following corrections are made in FR Document 87–25763 appearing on page 43063 in the issue of November 9, 1987:

§ 435.3 [Corrected].

1. On page 43071, in § 435.3, paragraph (a)—

a. The statutory citation "1902(a) (second paragraph after (44))" is corrected to "1902(a) (second paragraph after (47))";

b. In the statutory citation "1902(j)", the word "progran" is corrected to "program";

c. In the statutory citation "1905(a)", the numeral "(18)" is corrected to "(21)".

§ 435.301 [Corrected]

2. On page 43072, in § 435.301, paragraph (b)(1)(iii), the cross-reference to "§ 435.119" is corrected to "§ 435.117".

§ 436.2 [Corrected]

3. On page 43072, in § 436.2—

a. The statutory citation "1902(a)(a) (third paragraph after 37)" is corrected to "1902(a) (second paragraph after (47))";

b. The statutory citation "1905(a) (clause following (18))" is corrected to "1905(a) (clause following (21))";

c. The statutory citation "412(e)(5) Of Immigration and Nationality Act Eligibility of certain refugees" is corrected to "412(e)(5) of Immigration and Nationality Act—Eligibility of certain refugees".

d. The statutory citation "Pub. L. 93–272" is corrected to "Pub. L. 96–272" and "Veterans' " is corrected to "Veterans".

§ 436.114 [Corrected]

4. On page 43072, in § 436.114, paragraph (d), line 5, "to" is corrected to "is".

§ 436.124 [Corrected]

5. On page 43073, in § 436.124, paragraph (a), "child s" is corrected to "child's".

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 73

[MM Docket No. 86–219; RM–5252]

Radio Broadcasting Services; Bella Vista, AR

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: The Commission, in response to a petition filed by JEM Broadcasting Company, licensee of Station KJEM(AM) Bentonville-Bella Vista, AR substitutes FM Channel 293C2 for Channel 293A at Bella Vista, AR, to provide that community with a first wide coverage FM service. Although Channel 293A was originally allotted to Bella Vista in MM Docket No. 84–231, petitioner provided engineering data to reveal that the channel could be upgraded to Class C2 status. With this action, the proceeding is terminated.

DATES: *Effective Date:* January 29, 1988. The window period for filing applications for Channel 293C2 at Bella Vista will be announced in a future Public Notice to be issued by the Audio Services Division, Mass Media Bureau.

FOR FURTHER INFORMATION CONTACT: Nancy V. Joyner, Mass Media Bureau (202) 634–8530.

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's Report and Order, MM Docket No. 86–219, adopted November 25, 1987, and released December 16, 1987. The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 230), 1919 M Street, NW., Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractors, International Transcription Service, (202) 857–3800, 2100 M Street, NW., Suite 140, Washington, DC 20037.

[PR Docket No. 87–132; FCC 87–368]

Maritime Services; Rule Amendment Concerning Applications for VHF Public Coast Stations

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: The new rule requires licensees of existing public coast stations to make a showing of need for additional frequencies if the coverage areas of existing and proposed service would overlap by 70% or more. The purpose of the rule is to clarify application processing requirements and to ensure frequencies are not assigned without adequate justification.

EFFECTIVE DATE: February 1, 1988.

FOR FURTHER INFORMATION CONTACT: Robert P. Deyoung, (202) 632–7175.

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's *Report and Order*, adopted November 24, 1987, and released December 11, 1987. The full text of the Commission's decision including the rule change is available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 230), 1919 M Street NW., Washington, DC. The full text of this decision including the rule change may also be purchased from the Commission's copy contractor, International Transcription Services, Inc., (202) 857–3800, 2100 M Street NW., Suite 140 Washington, DC 20037.

Summary of Report and Order

1. The Commission has amended the rules to require licensees of existing VHF public coast stations to make a showing of need for additional frequencies if existing and proposed service areas would overlap by 70% or more. The purpose of the rule is to clarify application processing requirements and to ensure frequencies are not assigned without adequate justification.

2. We hereby certify pursuant to the Regulatory Flexibility Act of 1980, 5 U.S.C. 605, that this Rule will not have a significant economic impact on a substantial number of small entities. The Rule has been applied by administrative practice and has been found to require no increase in the information from a public coast station applicant for new or additional facilities.

3. The rule adopted herein has been analyzed with respect to the Paperwork Reduction Act of 1980 and found to contain no new or modified form, information collection and/or record keeping, labeling, disclosure, or record retention requirements; and will not increase or decrease burden hours imposed on the public.

4. This Report and Order is issued under the authority of 47 U.S.C. 154(i) and 303(g) and (r).

5. A copy of this Report and Order shall be sent to the Chief Counsel for Advocacy of the Small Business Administration.

Secretary.

New Rules

Part 80 of Chapter I of Title 47 of the Code of Federal Regulations is amended as follows:

PART 80—STATIONS IN THE MARITIME SERVICES

1. The authority citation for 47 CFR Part 80 continues to read as follows:

Authority: Secs. 4, 303, 48 Stat. 1066, 1082, as amended; 47 U.S.C. 154, 303, unless otherwise noted. Interpret or apply 48 Stat. 1064–1068, 1081–1105, as amended; 47 U.S.C. 151–155, 301–609; 3 UST 3450, 3 UST 4726, 12 UST 2377.

2. In § 80.371, paragraph (c) is revised to read as follows:

§ 80.371 Public correspondence frequencies.

* * * * *

(c) *Working frequencies in the 156–162 MHz band.* Initial grants will be limited to one working frequency. An additional frequency may be assigned when the assigned working frequency is also used by a foreign station near enough to result in harmful radio interference by simultaneous operation or when the channel occupancy of the assigned frequency or frequencies exceeds 40 percent during its busiest hours of operation. An application for assignment of an additional working frequency based on channel occupancy must be accompanied by a factual showing that for any 4 days within a 10-consecutive-day period of station operation in each of 2 months immediately prior to the filing of the application, the assigned frequency or frequencies was in average daily use for exchanging communications at least 40 percent of the 3 busiest hours of each day, of which not more the half of the use time was waiting or setup time. For purposes of this paragraph, an application for a frequency which overlaps by 70 percent or more the coverage area of a frequency already authorized for use by a station licensed to the same applicant or substantially the same applicant will be considered an application for an additional frequency.

[FR Doc. 87–29279 Filed 12–21–87; 8:45 am]

BILLING CODE 6712–01–M

INTERSTATE COMMERCE COMMISSION

49 CFR Parts 1011 and 1152

[Ex Parte No. 274 (Sub-No. 16)]

Exemption of Rail Line Abandonments or Discontinuances—Offers of Financial Assistance

AGENCY: Interstate Commerce Commission.

ACTION: Final rules.

SUMMARY: The Commission adopts final rules modifying 49 CFR 1152.27 and 1152.50 to enable the filing of offers of financial assistance to subsidize or acquire rail lines subject to an abandonment or discontinuance exemption authorized by the Commission. The rules generally incorporate the financial assistance procedures of 49 U.S.C. 10905 in the class exemption or individual petition for exemption process. The Commission also modifies its rules, codified at 49 CFR 1011, to specifically delegate to the Director of the Office of Proceedings authority to partially revoke an exemption to the extent it applies to 49 U.S.C. 10905. The rules are set forth below.

EFFECTIVE DATE: The rules are effective January 21, 1988.

FOR FURTHER INFORMATION CONTACT: Joseph H. Dettmar, (202) 275-7245. [TDD for hearing impaired: (202) 275-1721].

SUPPLEMENTARY INFORMATION: Additional information is contained in the Commission's decision. To purchase a copy of the full decision, write to Dynamic Concepts, Inc., Room 2229, Interstate Commerce Commission Building, Washington, DC 20423, or call (202) 289-4357/4359 (DC Metropolitan area), (assistance for the hearing impaired is available through TDD services (202) 275-1721 or by pickup from Dynamic Concepts, Inc., in Room 2229 at Commission headquarters).

The rule modifications will not have a significant economic impact on a substantial number of small entities, but may have a positive effect on a few small carriers by enabling them to enter new markets more easily.

This action will not significantly affect either the quality of the human environment or energy conservation.

List of Subjects

49 CFR Part 1011

Administrative practice and procedure; Authority delegations.

49 CFR Part 1152

Administrative practice and procedure; Railroads.

Decided: December 14, 1987.

By the Commission, Chairman Gradison, Vice Chairman Lamboley, Commissioners Sterrett, Andre, and Simmons.

Noreta R. McGee,

Secretary.

Title 49, Subtitle B, Chapter X, Parts 1011 and 1152 of the Code of Federal Regulations are amended as follows:

PART 1011—COMMISSION ORGANIZATION; DELEGATIONS OF AUTHORITY

1. The authority citation for 49 CFR Part 1011 continues to read as follows:

Authority: 49 U.S.C. 10301, 10302, 10304, 10305, 10321; 31 U.S.C. 9701; 5 U.S.C. 553.

2. Section 1011.2 is amended by revising paragraph (a)(8) to read as follows:

§ 1011.2 The Commission.

(a) * * *

(8) All appeals of initial decisions determining (i) whether to designate protested abandonment proceedings for investigation (including action on requests for oral hearing), (ii) whether offers of financial assistance satisfy the standards of 49 U.S.C. 10905(d), for purposes of negotiations or in exemption proceedings for purpose of partial revocation and negotiations, (iii) whether partially to revoke or to reopen abandonment exemptions authorized, respectively, under 49 U.S.C. 10505 and 49 CFR 1152 Subpart F for the purpose of imposing public use conditions under the criteria in 49 CFR 1152.28, and (iv) the applicability and administration of the Trials Act (16 U.S.C. 1247 (d)) in abandonment proceedings under 49 U.S.C. 10903–04 (and abandonment exemption proceedings) as set forth in 49 CFR 1011.8(c) (4) and (5). Appeals on these matters must be filed within 10 days of the date the action is taken, and responses must be filed within 10 days thereafter.

* * * * *

3. Section 1011.8 is amended by revising paragraph (c)(2) to read as follows:

§ 1011.8 Delegation of authority by the Interstate Commerce Commission to specific bureaus and offices of the Commission.

* * * * *

(c) * * *

(2) Whether offers of financial assistance satisfy the statutory standards of 49 U.S.C. 10905(d), for purposes of negotiations or in exemption proceedings for purposes of partial revocation and negotiations.

* * * * *

PART 1152—ABANDONMENT AND DISCONTINUANCE OF RAIL LINES AND RAIL TRANSPORTATION UNDER 49 U.S.C. 10903

4. The authority citation for 49 CFR Part 1152 continues to read as follows:

Authority: 5 U.S.C. 553, 559, and 704; 11 U.S.C. 1170; 16 U.S.C. 1247(d); and 49 U.S.C. 10321, 10362, 10505, and 10903, *et seq.*

5. Section 1152.25 is amended by revising paragraph (e)(1) to read as follows:

§ 1152.25 Participation in abandonment or discontinuance proceedings.

* * * * *

(e) *Appellate procedures*—(1) *Scope of rule.* Except as specifically indicated below, these appellate procedures are to be followed in abandonment and discontinuance proceedings in lieu of the general procedures at 49 CFR Part 1115. Appeals of initial decisions of the Director of the Office of Proceedings determining (i) whether to designate protested abandonment proceedings for investigation (including action on requests for oral hearings); (ii) whether offers of financial assistance satisfy the standards of 49 U.S.C. 10905(d) for purposes of negotiations or in exemption proceedings for purposes of partial revocation and negotiations; (iii) whether partially to revoke or to reopen abandonment exemptions authorized, respectively, under 49 U.S.C. 10505 and 49 CFR Part 1152 Subpart F for the purpose of imposing public use conditions under the criteria in 49 CFR 1152.28; and (iv) the applicability and administration of the Trails Act (16 U.S.C. 1247(d)) in abandonment proceedings under 49 U.S.C. 10903–04 (and abandonment exemption proceedings) as set forth in 49 CFR 1011.8(c) (4) and (5) will be acted upon by the entire Commission pursuant to the rule set forth at 49 CFR 1011.2(a)(8). An original and 10 copies of all appeals, and replies to appeals, under this section should be filed with the Commission.

* * * * *

6. Section 1152.27 is amended by revising paragraphs (a) through (g), paragraph (h)(7), paragraph (j), and paragraphs (l) (1) and (2) to read as follows:

§ 1152.27 Financial assistance procedures.

(a) *Provision of information.* An applicant must provide promptly upon request to a party considering an offer of financial assistance to continue existing rail service, and concurrently to the Commission, the following:

(1) (i) *In an application proceeding,* an estimate of the annual subsidy and minimum purchase price required to keep the line or a portion of the line in operation;

(ii) *In an exemption proceeding,* either an estimate of the annual subsidy or the minimum purchase price, depending upon the type of financial assistance indicated in the potential offeror's formal expression of intent submitted under paragraph (c)(2)(i) of this section;

(2) Its most recent reports on the physical condition of the involved line; and

(3) Traffic, revenue, and other data necessary to determine the amount of annual financial assistance that would be required to continue rail transportation over that part of the railroad line. In an exemption proceeding, the data to be provided must at a minimum include the carrier's estimate of the net liquidation value of the line, with supporting data reflecting available real estate appraisals, assessments of the quality and quantity of track materials in a line, and removal cost estimates (including the cost of transporting removed materials to point of sale or point of storage for relay use), and, if an offer of subsidy is contemplated, an estimate of the cost of rehabilitating the line to Federal Railroad Administration Class I Safety Standards (49 CFR Part 213).

(b) *Federal Register notices.* (1) *Abandonment and discontinuance applications.* If the Commission finds that the present or future public convenience and necessity permit or require the proposed abandonment or discontinuance, the Commission will publish these findings in the Federal Register concurrently with the service of the decision. The Federal Register publication will serve as notice to persons intending to offer financial assistance to assure continued rail service under 49 U.S.C. 10905 and these regulations as they relate to abandonment and discontinuance applications.

(2) *Exemption proceedings.* If the Commission exempts a proposed abandonment of a line of railroad from the prior approval requirements of 49 U.S.C. 10903, *et seq.*, the Commission will publish notice of this action in the Federal Register. The Federal Register publication will serve as notice to persons with a potential interest in providing financial assistance to assure continued rail service under 49 U.S.C. 10905 and these regulations as they relate to exempt abandonments and discontinuances.

(c) *Submission of financial assistance offer—(1) Abandonment and discontinuance applications.* (i) *Service and filing.* An offeror must serve its offer of assistance on the carrier owning and operating the line and all parties to the abandonment or discontinuance proceeding. The offer must be filed concurrently with the Secretary, Interstate Commerce Commission, Washington, DC 20423.

(A) An offer may be filed and served at any time after the filing of the abandonment or discontinuance application. Once notice of the abandonment findings is published in the Federal Register, however, the Commission must be notified that an offer has previously been submitted.

(B) An offer, or notification of a previously filed offer, must be filed and served no later than 10 days after the Federal Register publication described in paragraph (b) of this section. This filing and service is subject to the requirements of 49 CFR 1152.25 (d)(1), (d)(2), and (d)(4).

(C) If, after a *bona fide* request, applicant has failed to provide a potential offeror promptly with the information required under paragraph (a) of this section and if that information is not contained in the application, the Commission will entertain petitions to toll the 10-day period for submitting offers of financial assistance under paragraph (c)(1) of this section. Petitions must be filed with the Commission within 5 days after publication in the Federal Register (described in paragraph (b) of this section). Petitions should include copies of the prior written request for information or an accurate outline of the specific information that was orally requested. Replies to these petitions must be filed within 10 days after the publication. These petitions and replies must be filed on or before their actual due date under 49 CFR 1152.25(d)(4). The Commission will issue a decision on petitions within 15 days after publication.

(ii) *Contents of offer.* The offeror shall set forth its offer in detail. The offer must:

(A) Identify the line, or the portion of the line, in question;

(B) Demonstrate that the offeror is financially responsible; that is, that it has or within a reasonable time will have the financial resources to fulfill proposed contractual obligations;

(C) Explain the disparity between the offeror's purchase price or subsidy if it is less than the carrier's estimate under paragraph (a)(1) of this section, and explain how the offer of subsidy or purchase is calculated.

(2) *Exemption proceedings.* (i) *Expression of intent to file offer.* Persons with a potential interest in providing financial assistance must no later than 10 days after the Federal Register publication described in paragraph (b)(2) of this section submit to the carrier and the Commission a formal expression of their intent to file an offer of financial assistance, indicating the type of financial assistance they wish to provide (*i.e.*, subsidy or purchase). Such submissions are subject to the filing requirements of § 1152.25(d)(1) through (d)(3). Submission of a formal expression of intent under this subsection will automatically stay the effective date either of the decision granting an individual exemption or the notice of exemption under the class exemption for 40 days (normally, this will be 10 days beyond the date stated in the Federal Register publication).

(ii) *Service and filing.* An offeror must serve its offer of assistance on the carrier that instituted the exempt filing as well as all other parties to the proceeding. The offer must be filed concurrently with the Secretary, Interstate Commerce Commission, Washington, DC 20423.

(A) An offer may be filed and served at any time after the filing of the exemption petition or notice of exemption. Once notice of exemption is published in the Federal Register, however, the Commission must be notified that an offer has previously been submitted.

(B) An offer, or notification of a previously filed offer, must be filed and served no later than 30 days after the Federal Register publication described in paragraph (b)(2) of this section. This filing and service is subject to the requirements of 49 CFR 1152.25 (d)(1), (d)(2), and (d)(4).

(C) If, after a *bona fide* request, applicant has failed to provide a potential offeror promptly with the information required under paragraph (a) of this section and if that information is not contained in the exemption petition or notice of exemption, the Commission will entertain petitions to toll the 30-day period for submitting offers of financial assistance under paragraph (c)(2) of this section. Petitions must be filed with the Commission within 25 days after publication in the Federal Register (described in paragraph (b)(2) of this section). Petitions should include copies of the prior written request for information or an accurate outline of the specific information that was orally requested. Replies to these

petitions must be filed within 30 days after the publication. These petitions and replies must be filed on or before their actual due date under 49 CFR 1152.25(d)(4). The Commission will issue a decision on petitions to toll the offer period within 35 days after publication.

(D) Upon receipt of a formal expression of intent to file an offer under paragraph (c)(2)(i) of this section, applicant may advise the Commission and the potential offeror that additional time is needed to develop the information required under paragraph (a) of this section. Applicant shall expressly indicate the amount of time it considers necessary (not to exceed 60 days) to develop and submit the required information to the potential offeror. For the duration of the time period so indicated by applicant the 30-day period for submitting offers of financial assistance under paragraph (c)(2) of this section shall be tolled without formal Commission action.

(iii) *Contents of offer.* The offeror shall set forth its offer in detail. The offer must meet the requirements of paragraph (c)(1)(ii).

(d) *Access to documents.* Upon receipt by the carrier of a written comment under § 1152.25 or a formal expression of intent under paragraph (c)(2)(i) of this section indicating an intent to offer financial assistance or upon receipt by the carrier of an offer of financial assistance, whichever occurs earlier, the carrier must make available to that party or offeror the records, accounts, appraisals, working papers, and other documents used in preparing Exhibit 1 (§ 1152.38) or, if an exemption proceeding, those documents that would have been used in preparing Exhibit 1 had an abandonment or discontinuance application been filed or whatever records, reports, and other data in the possession of the carrier seeking the exemption which provide data comparable to that which would have been utilized in preparing an Exhibit 1. These documents shall be made available during regular business hours at a time and place mutually agreeable to the parties.

(e) *Review of offers.* (1) *Abandonment and discontinuance applications.* The Commission will review each offer submitted to determine if the offeror is a financially responsible person offering assistance which is likely to cover: (1) The difference between the revenues attributable to the line and the avoidable cost of providing freight service on the line plus a reasonable return on the value of the line, or (ii) the acquisition cost of all or any portion of the line. If these criteria are met, the Commission will issue a decision postponing the issuance of a certificate of abandonment or, if a certificate has been issued, postponing the effective date of the certificate. This decision will be issued within 15 days of the **Federal Register** publication described in paragraph (b) of this section (or five days after the offer is filed if the time for filing has been tolled under paragraph (c)(1)(i)(C) of this section). Under the delegation of authority at § 1011.8, the Director of the Office of Proceedings will make the initial determination whether offers of financial assistance satisfy the standards of 49 U.S.C. 10905(d) for purposes of negotiations. Appeals of initial decisions determining whether offers of financial assistance satisfy the standards of 49 U.S.C. 10905(d) for purposes of negotiations will be acted upon by the entire Commission pursuant to the rule set forth at 49 CFR 1011.2(a)(8).

(2) *Exemption proceedings.* The Commission will review each offer submitted to determine if the offeror is a financially responsible person offering assistance which is likely to cover: (i) The difference between the revenues attributable to the line and the avoidable cost of providing freight service on the line plus a reasonable return on the value of the line; or (ii) the acquisition cost of all or any portion of the line. If these criteria are met, the Commission will postpone the effective date either of the decision granting an individual exemption or the notice of exemption under the class exemption and partially revoke the exemption or (in the case of a class exemption) the notice of exemption to the extent it applies to 49 U.S.C. 10905. The decision to postpone and partially revoke will be issued within 35 days of the **Federal Register** publication described in paragraph (b) of this section (or five days after the offer is filed if the time for filing has been tolled under paragraph (c)(2)(ii)(C) or (c)(2)(ii)(D) of this section). Under the delegation of authority at § 1011.8, the Director of the Office of Proceedings will make the initial determination whether offers of financial assistance satisfy the standards of 49 U.S.C. 10905(d) for purposes of partial revocation and negotiations. Appeals of initial decisions determinig whether offers of financial assistance satisfy the standards of 49 U.S.C. 10905(d) for purposes of partial revocation and negotiations will be acted upon by the entire Commission pursuant to the rule set forth at 49 CFR 1011.2(a)(8).

(f) *Agreement on financial assistance.* (1) If the carrier and a person offering financial assistance enter into a subsidy agreement designed to provide for continued rail service, the Commission will postpone the issuance of a certificate authorizing the abandonment or discontinuance. If a certificate, decision granting an individual exemption, or notice of exemption has been issued, the Commission will postpone the effective date of the certificate, decision, or notice of exemption. The postponement will be for as long as the subsidy agreement is in effect.

(2) If the carrier and a person offering to purchase a line enter into a purchase agreement which will result in continued rail service, the Commission will approve the transaction and dismiss the application for abandonment or discontinuance, or the petition for exemption or notice of exemption. Commission approval is not required under 49 U.S.C. 10901 or 11343 for the parties to consummate the transaction or for the purchaser to institute service and operate as a railroad subject to 49 U.S.C. 10501(a).

(g) *Failure to reach agreement on financial assistance.* (1) If the carrier and a financially responsible person fail to agree on the amount or terms of subsidy or purchase, either party may request the Commission to establish the conditions and amount of compensation. This request must be filed with the Commission within 30 days after the offer is made and served concurrently on all parties to the proceeding.

(2) If no agreement is reached within 30 days after the offer of purchase or subsidy is made, and no request is made to the Commission to set the conditions and amount of compensation under paragraph (g)(1) of this section, the Commission will serve either (i) a certificate authorizing the abandonment or discontinuance within 10 days after the date the request to set conditions and amount of compensation was due (unless an appeal is being heard under § 1152.25(e)), or (ii) a decision vacating the prior decision, which postponed the effective date of either the decision granting the exemption or the notice of exemption and partially revoked either the decision granting the exemption or (in the case of a class exemption) the notice of exemption. The certificate or decision to vacate will be effective on its date of service. If a certificate was issued but its effective date was postponed under paragraph (e) of this section, the certificate will become effective 10 days after the date the request to set conditions and compensation was due (unless an appeal is being heard under § 1152.25(e)).

(h) * * *

(7) Within 10 days of the service date of the Commission's decision, the offeror must accept or reject the Commission's terms and conditions with a written notification to the Commission and all parties to the proceeding. If the offeror accepts the terms and conditions set by the Commission, the Commission's decision is binding on both parties. If the offeror withdraws its offer or does not accept the terms and conditions set by the Commission with a timely written notification, the Commission will serve, within 20 days after the service date of the Commission decision setting the terms and conditions, either

(i) a certificate authorizing the abandonment or discontinuance (unless other offers are being considered under paragraph (l) of this section and unless an appeal is being heard under § 1152.25(e)), or

(ii) a decision vacating the prior decision, which postponed the effective date of either the decision granting the exemption or the notice of exemption and partially revoked the exemption or (in the case of a class exemption) the notice of exemption (unless other offers are being considered under paragraph (l) of this section).

The certificate or decision to vacate will be effective on its date of service. If a certificate was issued but its effective date was postponed under paragraph (e) of this section, the certificate will become effective 20 days after the service date of the Commission decision setting the terms and conditions (unless other offers are being considered under paragraph (l) of this section or an appeal is being heard under § 1152.25(e)).

* * * * *

(j) *Discontinuance of subsidy.* A subsidizer may discontinue a subsidy under this section by giving 60 days notice of the discontinuance to the applicant and all other parties to the proceeding. Unless another financially responsible party enters into a subsidy agreement as beneficial to the carrier as the discontinued subsidy agreement, the carrier may by filing a request with the Commission and serving the request on all parties to the abandonment or exemption proceeding obtain

(1) A certificate authorizing abandonment or discontinuance of service or

(2) A decision vacating the decision postponing the effective date of either the decision granting the exemption or the notice of exemption.

The Commission will issue a certificate or decision to vacate within 10 days after the filing and service of the request. This certificate or decision to vacate will be effective immediately. If a certificate was issued but its effective date was postponed under paragraph (e) of this section, the certificate will become effective 10 days after the filing and service of the request.

* * * * *

(l) *Multiple offers of financial assistance.* (1) If an applicant receives more than one offer to purchase or subsidize the line, the applicant must select the offeror with whom it wishes to transact business. In abandonment and discontinuance application proceedings within 25 days after the **Federal Register** publication described in paragraph (b)(1) of this section and in exemption proceedings within 45 days after the **Federal Register** publication described in paragraph (b)(2) of this section, applicant must (i) file a written notification of its selection with the Commission, and (ii) serve a copy of the notification on all parties to the proceeding.

(2)(i) *Abandonment and discontinuance applications.* If the applicant has received multiple offers of financial assistance and has selected the offeror with whom it wishes to transact business, the negotiating parties shall complete the sale or subsidy agreement or request the Commission to establish the conditions and amount of compensation within 40 days after the **Federal Register** publication described in paragraph (b)(1) of this section. The request must be served concurrently on all parties to the proceeding. If no agreement on subsidy or sale is reached within the 40 day period and the Commission has not been requested to establish the conditions and amount of compensation, any other offeror may request the Commission to establish the conditions and amount of compensation. This request must be filed at the Commission within 50 days of the **Federal Register** publication described in paragraph (b)(1) of this section and served concurrently on all parties to the proceeding. If no other request is filed, the Commission will issue a certificate authorizing abandonment or discontinuance within 60 days of the **Federal Register** publication described in paragraph (b)(1) of this section (unless an appeal is being heard under § 1152.25(e)). This certificate will be effective immediately. If no other request is filed and a certificate was issued but its effective date was postponed under paragraph (e) of this section, the certificate will become effective 60 days after the **Federal Register** publication described in paragraph (b)(1) of this section (unless an appeal is being heard under § 1152.25(e)).

(ii) *Exemption proceedings.* If the carrier seeking the exemption has received multiple offers of financial assistance and has selected the offeror with whom it wishes to transact business, the negotiating parties shall complete the sale or subsidy agreement or request the Commission to establish the conditions and amount of compensation within 60 days after the **Federal Register** publication described in paragraph (b)(2) of this section. The request must be served concurrently on all parties to the proceeding. If no agreement on subsidy or sale is reached within the 60 day period and the Commission has not been requested to establish the conditions and amount of compensation, any other offeror may request the Commission to establish the conditions and amount of compensation. This request must be filed at the Commission within 70 days of the **Federal Register** publication described in paragraph (b)(2) of this section and served concurrently on all parties to the proceeding. If no other request is filed, the Commission will issue a decision vacating the decision postponing the effective date of either the decision granting exemption or (in the case of a class exemption) the notice of exemption within 80 days of the **Federal Register** publication described in paragraph (b)(2) of this section. The decision to vacate will be effective immediately.

* * * * *

7. Section 1152.50 is amended by designating the existing text of paragraph (a) as paragraph (a)(1) and by adding a new paragraph (a)(2) and revising paragraph (d)(3) to read as follows:

§ 1152.50 Exempt abandonments and discontinuance of service and trackage rights.

(a) (1) * * *

(2) Whenever the Commission determines a proposed abandonment to be exempt from the requirements of 49 U.S.C. 10903–10905, whether under this section or on the basis of the merits of an individual petition, the provisions of § 1152.27 as they relate to exemption proceedings shall be applicable.

* * * * *

(d) * * *

(3) The Commission, through the Director of the Office of Proceedings, shall publish a notice in the **Federal Register** within 20 days after the filing of the notice of exemption. Petitions to stay the effective date of the exemption and formal expressions of intent to submit

offers of financial assistance to assure continued rail service on the line must be filed within 10 days after publication, and petitions for reconsideration must be filed within 20 days after publication. The exemption will be effective 30 days after publication (unless stayed pending reconsideration or pursuant to 49 CFR 1152.27(c)(2)(i) a formal expression of intent to file an offer of financial assistance has been submitted). If the notice of exemption contains false or misleading information, the use of the exemption is void *ab initio* and the Commission shall summarily reject the exemption notice.

BILLING CODE 7035-01-M

Proposed Rules

Federal Register
Vol. 52, No. 245
Tuesday, December 22, 1987

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

NUCLEAR REGULATORY COMMISSION

10 CFR Part 2

High-Level Waste Licensing Support System Advisory Committee (Negotiated Rulemaking); Fifth Meeting

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice of fifth meeting.

SUMMARY: The Nuclear Regulatory Commission will hold the fifth meeting of the High-Level Waste Licensing Support System Advisory Committee on January 25–26, 1988. The Committee, established under authority of the Federal Advisory Committee Act (FACA), is tasked with developing recommendations for revision of the Commission's Rules of Practice in 10 CFR Part 2 related to the adjudicatory proceeding for the issuance of a license for a geologic repository for the disposal of high-level waste (HLW). The Committee is attempting to negotiate a consensus on proposed revisions related to the submission and management of records and documents for the HLW licensing proceeding.

DATES: The fifth meeting of the HLW Licensing Support System Advisory Committee will be held Januray 25–26, 1988, beginning at 9:30 a.m. (MST) on January 25 and 8:30 a.m. (MST) on January 26.

ADDRESSES: The location of the January 25–26, 1988, meeting of the HLW Licensing Support System Advisory Committee is the Stouffer Concourse Hotel, 3801 Quebec Street, Denver, Colorado 80207.

FOR FURTHER INFORMATION CONTACT: Donnie H. Grimsley, Director, Division of Rules and Records, Office of Administration and Resources Management, U.S. Nuclear Regulatory Commission, Washington, DC 20555, Telephone: 301–492–7211.

SUPPLEMENTARY INFORMATION: The fifth meeting of the HLW Licensing Support System Advisory Committee ("negotiating committee") is scheduled to include continued discussion of substantive issues related to a high-level waste licensing support system.

The following are the remaining meetings of the negotiating committee that are scheduled as of the date of this notice:

February 11–12, 1988—The Conservation Foundation, Washington, DC
March 23–24, 1988—Denver, Colorado (location to be announced)
April 18–19, 1988—The Conservation Foundation, Washington, DC
May 18–19, 1988—The Conservation Foundation, Washington, DC

Dated at Bethesda, Maryland, this 17th day of December 1987.

For the Nuclear Regulatory Commission.

David L. Meyer,

Chief, Rules and Procedures Branch, Division of Rules and Records, Office of Administration and Resources Management.

[FR Doc. 87-29305 Filed 12-21-87; 8:45 am]

BILLING CODE 7590-01-M

FEDERAL DEPOSIT INSURANCE CORPORATION

12 CFR Part 332

Powers Inconsistent With Purposes of Federal Deposit Insurance Law

AGENCY: Federal Deposit Insurance Corporation (" FDIC").

ACTION: Withdrawal of proposed rule.

SUMMARY: The FDIC is withdrawing a proposed amendment to Part 332 of its regulations last published for comment on June 7, 1985 (50 FR 23964) which would have, among other things, prohibited insured banks, subject to certain exceptions, from directly engaging in real estate development activities or insurance underwriting activities and would have established certain restrictions on the indirect conduct of such activities.

EFFECTIVE DATE: December 15, 1987.

FOR FURTHER INFORMATION CONTACT: Pamela E.F. LeCren, Senior Attorney, Legal Division, (202) 898–3730, Ken A. Quincy, Chief, Applications Section, Division of Bank Supervision, (202) 898–6753, or Daniel M. Gautsch, Examination Specialist, Planning and Program Development Branch, Division of Bank Supervision, (202) 898–6912, Federal Deposit Insurance Corporation, 550 17th Street, NW., Washington, DC 20429.

SUPPLEMENTARY INFORMATION: On November 26, 1984 the Board of Directors of the FDIC adopted a Notice of Proposed Rulemaking soliciting comment on a proposed regulation governing the direct and indirect involvement of insured banks in real estate brokerage and real estate development, insurance brokerage and underwriting, data processing for third parties, travel agency activities, and other financially related services (49 FR 48552, December 13, 1984). The Notice set forth a proposed amendment to Part 332 of the FDIC regulations ("Powers Inconsistent with the Purposes of Federal Deposit Insurance Law"). In brief that proposal: (1) Prohibited any insured bank (including insured nonmember banks, national banks, state banks that are members of the Federal Reserve System, insured branches of foreign banks, and federally chartered savings banks insured by the FDIC) from directly engaging in insurance underwriting, real estate development, reinsurance, insuring, guarantying or certifying title to real estate, guarantying or becoming surety upon the obligations of others, insuring the fidelity of others, or engaging in a surety business, (2) required any subsidiary of an insured bank that conducted any of these activities to meet the criteria for a "bona fide" subsidiary set out in the proposed regulation, (3) required notice to the FDIC of intent to invest in any such subsidiary, (4) placed certain restrictions on the affiliation of an insured bank with a company that engages in any such activities, (5) placed certain restrictions on extensions of credit and other transactions between insured banks and their subsidiaries or affiliates that engage in any such activities, (6) required all insured banks that established or acquired a subsidiary or became affiliated with a company that engaged in such activities prior to the effective date of the regulation to conform thereto within one year, (7) required any insured bank that as of the effective date of the regulation was directly engaging in any such activities to conform to the regulations within two years, and (8) placed certain restrictions on insured banks that provided electronic data processing services to persons or companies other

BEST COPY AVAILABLE

VOL 52 ISS 245 DEC 22 1987 UMI

than banks, or acted as agent or broker for insurance, real estate, securities, or travel services.

The proposed regulation was published for a sixty-day comment period during which 517 comments were received. After considering the comments, the FDIC issued a revised proposed regulation for an additional 45-day comment period. (50 FR 23964, June 7, 1985). The revised proposal differed from the original proposal primarily in that it: (1) Permitted an insured bank to conduct real estate development directly through the bank provided that the bank's aggregate investment in real estate development activities (including related extensions of credit) did not exceed 50% of the bank's primary capital and the bank's investment in any one real estate development project (including related extensions of credit) did not exceed 10% of the bank's primary capital, (2) permitted an insured bank to operate a life insurance underwriting department within the bank under certain conditions, (3) defined the term "real estate development", (4) added a waiver provision, (5) deleted the provisions of the proposal dealing with insurance and real estate brokerage, data processing, and travel agency activities, and (6) revised the proposed compliance time periods. The FDIC also held a one-day public hearing on the revised proposal (July 12, 1985) at which 14 individuals participated through the submission of written and oral testimony. Eighty-four written comments (in addition to those submitted at the hearing) were received over the 45-day comment period.

At its December 15, 1987 meeting the FDIC's Board of Directors voted to formally withdraw the June 7, 1985 proposal. It is the Board of Director's opinion that as more than two years have passed since the proposal was isued for comment the proposal has grown "stale" and significant work is necessary to update and complete the proposal. Furthermore, preliminary indications are that there are presently no system wide problems resulting from newly-granted real estate investment or insurance powers. The Board of Directors has, therefore, decided that the proposal should be withdrawn. Staff has been instructed, however, to continue to study events in the marketplace and any instances of safety and soundness problems associated with real estate and insurance powers and to repropose a regulation for the Board of Directors' consideration as appropriate.

The Board of Directors acknowledges that no final action has been taken on the proposal to date in part due to ongoing discussions between the FDIC and the Board of Governors of the Federal Reserve System in an attempt to coordinate final action on the June, 1985 proposal with action by the Board of Governors on its proposed rulemaking concerning real estate activities of bank holding companies and their subsidiaries. (50 FR 4519 and 52 FR 42301). Those discussions will continue as appropriate.

The Board of Directors wishes to stress that this action is not prompted by a decision to discontine efforts toward establishing guidelines for the safe and sound conduct of real estate development and insurance underwriting activities by insured banks and their subsidiaries and affiliates. It is the Board of Directors' intent rather that staff actively continue to study bank involvement in these activities and develop a proposed regulatory approach, as appropriate, for the Board's consideration as soon as those efforts are complete. In the interim, the FDIC will monitor bank involvement in these areas and deal with any supervisory problems on a case-by-case basis.

Dated at Washington, DC, this 15th day of December, 1987.

By Order of the Board of Directors.

Hoyle L. Robinson,

Executive Secretary.

BILLING CODE 6714-01-M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 71

[Airspace Docket No. 87-ASW-35]

Proposed Revision of Transition Area; Terrell, TX

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice of proposed rulemaking will revise the transition area located at Terrell, TX. The development of a new standard instrument approach procedure (SIAP) to the Terrell Municipal Airport utilizing the new Travis Nondirectional Radio Beacon (NDB) has made this action necessary. Additionally, a review of the categories of aircraft now operating into and out of the airport has revealed the need to revise the transition area. The intended effect of this proposed revision is to provide additional controlled airspace for aircraft executing the new SIAP to the airport. The proposed revision will provide adequate controlled airspace for all SIAP's now serving the airport.

DATES: Comments must be received on or before January 28, 1988.

ADDRESSES: Send comments on the proposal in triplicate to:

Manager, Airspace and Procedures Branch, Air Traffic Division, Southwest Region, Docket No. 87-ASW-35, Department of Transportation, Federal Aviation Administration, Fort Worth, TX 76193-0530

The official docket may be examined in the Office of the Regional Counsel, Southwest Region, Federal Aviation Administration, 4400 Blue Mound Road, Fort Worth, TX.

FOR FURTHER INFORMATION CONTACT: Bruce C. Beard, Airspace and Procedures Branch, Department of Transportation, Federal Aviation Administration, Fort Worth, TX 76193-0530; Telephone: (817) 624-5561.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested parties are invited to participate in this proposed rulemaking by submitting such written date, views, or arguments as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposal. Communications should identify the airspace docket and be submitted in triplicate to the address listed above. Commenters wishing the FAA to acknowledge receipt of their comments on this notice must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Airspace Docket No. 87-ASW-35." The postcard will be date/time stamped and returned to the commenter. All communications received before the specified closing date for comments will be considered before taking action on the proposed rule. The proposal contained in this notice may be changed in the light of comments received. All comments submitted will be available for examination in the Office of the Regional Counsel, 4400 Blue Mound Road, Fort Worth, TX, both before and after the closing date for comments. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

Availability of NPRM's

Any person may obtain a copy of this notice of proposed rulemaking (NPRM) by submitting a request to the Manager, Airspace and Procedures Branch, Department of Transportation, Federal Aviation Administration, Fort Worth, TX 76193-0530. Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRM's should also request a copy of Advisory Circular No. 11-2A which describes the application procedure.

The Proposal

The FAA is considering an amendment to § 71.181 of the Federal Aviation Regulations (14 CFR Part 71) by revising the transition area located at Terrell, TX. The development of a new SIAP utilizing the Travis NDB, plus a change in the categories of aircraft operating into and out of the airport, has necessitated this proposed revision. This proposed revision will increase the present transition area from a 5-mile radius of the airport to a 6.5-mile radius of the airport, with an arrival extension to the northeast. The intended effect of this proposed revision is to provide adequate controlled airspace for all SIAP's now serving the airport. Section 71.181 of Part 71 of the Federal Aviation Regulations was republished in Handbook 7400.6C dated January 2, 1987.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 71

Aviation safety, Transition areas.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me, the FAA proposes to amend Part 71 of the Federal Aviation Regulations (14 CFR Part 71) as follows:

PART 71—[AMENDED]

1. The authority citation for Part 71 continues to read as follows:

Authority: 49 U.S.C. 1348(a), 1354(a), 1510; E.O. 10854; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983); 14 CFR 11.69.

§ 71.181 [Amended]

2. Section 71.181 is amended as follows:

Terrell, TX [Revised]

That airspace extending upward from 700 feet above the surface within a 6.5-mile radius of the Terrell Municipal Airport (latitude 32°42'36"N., longitude 96°16'02"W.), and within 5.5 miles each side of the 019° bearing from the Travis NDB (latitude 32°45'36"N., longitude 96°14'56"W.), extending from the 6.5-mile radius to 11 miles northeast of the airport.

Issued in Fort Worth, TX, on December 9, 1987

Larry L. Craig,

Manager, Air Traffic Division, Southwest Region.

[FR Doc. 87-29254 Filed 12-21-87; 8:45 am]

BILLING CODE 4910-13-M

14 CFR Part 71

[Airspace Docket No. 87-ASO-18]

Proposed Alteration of Transition Area; Eastman GA

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes to alter the Eastman, Georgia, transition area by adding an extension for a nondirectional radio beacon (NDB) standard instrument approach procedure to Runway 2 at the Eastman-Dodge County Airport. This action will lower the base of controlled airspace from 1,200 ft. to 700 ft. above the surface within three miles each side of the 203° bearing from the Eastman NDB (latitude 32°12'50"N., longitude 83°07'32"W.) from the six mile radius area of the Eastman-Dodge County Airport (latitude 32°12'51"N., longitude 83°07'42"W.) to 8.5 miles southwest of the NDB.

DATES: Comments must be received on or before: January 24, 1988.

ADDRESSES: Send comments on the proposal in triplicate to:

Federal Aviation Administration, ASO-530, Manager, Airspace and Procedures Branch, Docket No. 87-ASO-18, P.O. Box 20636, Atlanta, Georgia, 30320.

The official docket may be examined in the Office of the Regional Counsel, Room 652, 3400 Norman Berry Drive, East Point, Georgia 30344, telephone: (404) 763-7646.

FOR FURTHER INFORMATION CONTACT: James G. Walters, Airspace Section, Airspace and Procedures Branch, Air Traffic Division, Federal Aviation Administration, P.O. Box 20636, Atlanta, Georgia 30320; telephone: (404) 763-7646.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested parties are invited to participate in this proposed rule-making by submitting such written data, views or arguments as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposal. Communications should identify the airspace docket and be submitted in triplicate to the address listed above. Commenters wishing the FAA to acknowledge receipt of their comments on this notice must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Airspace Docket No. 87-ASO-18." The postcard will be date/time stamped and returned to the commenter. All communications received before the specified closing date for comments will be considered before taking action on the proposed rule. The proposal contained in this notice may be changed in the light of comments received. All comments submitted will be available for examination in the Office of the Regional Counsel, Room 652, 3400 Norman Berry Drive, East Point, Georgia 30344, both before and after the closing date for comments. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

Availability of NPRM's

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, Manager, Airspace and Procedures Branch (ASO-530), Air Traffic Division, P.O. Box 20636, Atlanta, Georgia 30320. Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRM's should also request a copy of Advisory Circular No.

11–2 which describes the application procedure.

The Proposal

The FAA is considering an amendment to § 71.181 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) to alter the Eastman, Georgia, Transition Area. This action will provide additional controlled airspace for aircraft executing a new NDB standard instrument approach procedure to Runway 2 at the Eastman-Dodge County Airport. Section 71.181 of Part 71 of the Federal Aviation Regulations was republished in FAA Handbook 7400.6C dated January 2, 1987.

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore, (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter than will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 71

Aviation safety, Transition area.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration (FAA) proposes to amend Part 71 of the Federal Aviation Regulations (14 CFR Part 71) as follows:

PART 71—[AMENDED]

1. The authority citation for Part 71 continues to read as follows:

Authority: 49 U.S.C. 1348(a), 1354(a), 1510; E.O. 10854; 49 U.S.C. 106(g) (Revised Pub. L. 97–449, January 12, 1983); 14 CFR 11.69

§ 71.181 [Amended]

2. Section 71.181 is amended as follows:

Eastman, Georgia (Amended)

By changing the period at the end of the present description to a semicolon and adding, "within three miles each side of the 203° bearing from the Eastman, GA, NDB (latitude 32°12'50"N., longitude 83°07'32"W.), extending from the 6-mile radius area to 8.5 miles southwest of the NDB."

Issued in East Point, Georgia, on December 8, 1987.

William D. Wood,

Acting Manager, Air Traffic Division Southern Region.

[FR Doc. 8–29253 Filed 12–21–87; 8:45 am]

BILLING CODE 4910-13-M

CONSUMER PRODUCT SAFETY COMMISSION

16 CFR Part 1700

Poison Prevention Packaging Requirements; Proposed Exemption of Certain Conjugated Estrogens Tablets

AGENCY: Consumer Product Safety Commission.

ACTION: Proposed rule.

SUMMARY: The Commission proposes to amend its regulation that allows certain conjugated estrogens tablets to be marketed in mnemonic packages [1] that are not child-resistant. Except for this regulation, child-resistant packaging would be required because these substances are oral prescription drugs. The proposed amendment would increase from 26.5 mg to 32 mg the amount of the drug allowed per non-child-resistant mnemonic package. This drug is proposed to be exempted because of its low toxicity. The drug is used for the treatment of a variety of female hormonal imbalance disorders.

DATE: Comments on the proposal should be submitted not later than February 22, 1988.

ADDRESSES: Comments should be mailed to the Office of the Secretary, Consumer Product Safety Commission, Washington, DC 20207, or delivered to the Office of the Secretary, Consumer Product Safety Commission, Room 528, 5401 Westbard Avenue, Bethesda, Maryland, telephone (301) 492–6800.

All public documents that the Commission has concerning this proceeding may be inspected at, or copies obtained from, the Office of the Secretary.

FOR FURTHER INFORMATION CONTACT: Virginia White, Project Manager, Office of Program Management and Budget, Consumer Product Safety Commission, Washington, DC 20207, telephone (301) 492–6554.

Inquiries from the media should be directed to Lou Brott, Office of Media Relations, Consumer Product Safety Commission, Washington, DC 20207, telephone (301) 492–5540.

SUPPLEMENTARY INFORMATION:

A. Background

Among other substances, oral prescription drugs intended for human use are subject to child-resistant packaging requirements issued under the Poison Prevention Packaging Act of 1970 ("the PPPA"), 15 U.S.C. 1471–1476. 16 CFR 1700.14(a)(10). There currently is an exemption from these requirements for conjugated estrogens, when dispensed in mnemonic packages containing not more than 26.5 mg of the drug and containing no other substances subject to § 1700.14(a)(10). 49 FR 50388; December 28, 1984. Conjugated estrogens are hormonal drugs used for the treatment of various female hormone imbalance disorders.

By letter dated October 10, 1986, Ayerst Laboratories petitioned the Commission to extend the exemption for conjugated estrogens from 26.5 mg to 32 mg per mnomonic package.

The petitioner requested the extension because of current prescribing practices, which indicate that many physicians now prefer a 25-day monthy cyclic regimen to the previously-favored 21-day regimen.

As justification for the requested increased exemption, the petitioner cited the human experience data which supported the original exemption for conjugated estrogens. These data show the absence of acute toxicity resulting from accidental ingestion of conjugated estrogens by young children.

The petitioner states that the exemption is further warranted because conjugated estrogens are closely related biochemically and pharmacologically to several of the estrogenic compounds used as oral contraceptives, which were previously exempted from child-resistant packaging requirements by the Commission, but that conjugated estrogens are less potent in terms of estrogenic activity. The petitioner notes that the exemption for oral contraceptives does not refer to specific amounts of hormones. The petitioner believes that this provides a precedent for extension of the exemption for conjugated estrogens from 26.5 mg to 32 mg per package.

The petitioner states that because conjugated estrogens are used primarily to treat postmenopausal symptoms and osteoporosis, this product, unlike oral contraceptives, is used primarily in households without young children. The petitioner states that the many elderly

[1] A mnemonic package is any package designed for the administration of one dosage unit at a time and incorporating any feature which serves to remind the user to take the dosage at specified intervals throughout the period during which the medication is to be administered.

users of the product are likely to experience difficulty using child-resistant packaging.

Conjugated estrogens have been available for several decades as a prescription drug for the treatment of female hormone imbalance disorders. It is estimated that between 2.9 and 3.6 million women are using these products. About 12 pharmaceutical companies manufacture oral conjugated-estrogens products. Unit volume for these products in 1980 is estimated at 564 million tablets, with sales of $80 million. Approximately 7.3 million prescriptions for these products were filled in 1980.

B. Toxicity Data

Theoretical lethal dose. Based upon the extrapolation of animal test data submitted by the petitioner, the theoretical lethal dose of conjugated estrogens for a 10 kilogram child would between 1.8 and 3.3 grams, which is 58 to 100 times the amount that would be in a single package of the requested exempted amount.

Chronic Toxicity. Estrogens should be avoided during pregnancy because of possible damage to the fetus. Similar effects have been observed for a variety of drugs, indicating the special susceptibility of the fetus to the toxic effects of many chemicals and drugs. Long-term therapeutic administration of estrogenic compounds has been shown to lead to an increased risk, in women, of endometrial cancer and of various blood clotting disorders. There is no evidence, however, that such effects would be expected from a single acute exposure in a child. No such effects have been reported over the span of more than forty years which these drugs have been marketed.

C. Injury Data

For the period 1978 through 1984, data from the National Clearinghouse for Poison Control Centers show 169 reported ingestions of conjugated estrogens. Five of the cases reported symptoms; none resulted in a hospital visit.

For the period 1978 through January 1987, the Commission's "Children and Poisonings" data base shows 13 children treated in hospital emergency rooms following ingestion of conjugated estrogens. None of the children was hospitalized.

Literature reviews conducted by the staff and by the petitioner reveal no reports of death or serious injury following ingestions of conjugated estrogens by children under age five. There have been reports of cramping, vomiting, nausea, and diarrhea following acute ingestion of large amounts of estrogens.

It should be noted also that unit dose packaging tends to limit the amount a small child ingests, because of the time and effort necessary to open each unit.

D. FDA Comments

The Food and Drug Administration, Center for Drugs and Biologics, also reviewed the petition and concluded that the increased amount of conjugated estrogens, *i.e.*, from 26.5 mg per mnemonic package to 32 mg per mnemonic package, would pose no health risk to children under five as a result of accidental ingestion.

E. Action on the Petition

Based upon the animal data and human experience information discussed above, it appears that this drug has low toxicity and poses a minimal threat of illness or injury in children as a result of accidental ingestion.

After considering the available information, the Commission preliminarily concludes that the degree and nature of the hazard to children in the availability of the conjugated estrogens tablets that are the subject of this petition are such that special packaging is not required to protect children from serious personal injury or serious illness resulting from handling, using or ingesting such substance. Accordingly, the Commission voted to grant the petition. Therefore, the Commission proposes below to amend 16 CFR 1700.14(a)(10) to exempt Conjugated Estrogens Tablets, U.S.P., from requirements for child-resistant packaging, when dispensed in mnemonic packages containing not more the 32 mg of the drug.

F. Regulatory Flexibility Certification

When an agency undertakes a rulemaking proceeding, the Regulatory Flexibility Act (Pub. L. 96–354, 5 U.S.C. 601 *et seq.*) generally requires the agency to prepare proposed and final regulatory flexibility analyses discribing the impact of the rule on small businesses and other small entities. The purpose of the Regulatory Flexibility Act, as stated in section 2(b) (5 U.S.C. 602 note), is to require agencies, consistent with their objectives, to fit the requirements of regulations to the scale of the businesses, organizations, and governmental jurisdictions subject to the regulations. Section 605 of the Act provides that an agency is not required to prepare a regulatory flexibility analysis if the head of an agency certifies that the rule will not have a significant economic impact of a substantial number of small entities.

The exemption issued below will have the effect of giving the manufacturers of the exempted products the option of packaging their product in an additional manner. The difference in cost for packaging with special packaging and with packaging permitted by the exemption is not believed to be significant. Accordingly, the Commission concludes that this exemption will not have any significant economic effect on a substantial number of small entities.

G. Environmental Considerations

The Commission's regulations governing environmental review procedures state, at 16 CFR 1021.5(c)(3), that exemption of products from requirements for child-resistant packaging under the PPPA normally has little or no potential for affecting the human environment. The Commission does not foresee any special or unusual circumstances surrounding the exemption issued below. For this reason, the Commission concludes that neither an environmental assessment nor an environmental impact statement is required in this proceeding.

H. Effective Date

Since the rule proposed below provides for an exemption, the provision of 5 U.S.C. 553(c) requiring a delay in the effective date is inapplicable. Accordingly, the rule shall become effective upon publication of the final rule in the Federal Register.

List of Subjects in 16 CFR Part 1700

Consumer protection, Drugs, Infants and children, Packaging and containers, Poison prevention, Toxic substances.

Conclusion

For the reasons given above, the Commission proposes to amend Title 16 of the Code of Federal Regulations as follows:

PART 1700—[AMENDED]

1. The authority citation for Part 1700 is revised to read as follows:

Authority: Pub. L. 91–601, secs. 1–9, 84 Stat. 1670–74, 15 U.S.C. 1471–76. Secs. 1700.1 and 1700.14 also issued under Pub. L. 92–573, sec. 30(a), 86 Stat. 1231, 15 U.S.C. 2079(a).

2. Section 1700.14(a)(10)(xvii) is revised to read as follows:

§ 1700.14 Substance requiring special packaging.

(a) * * *

(10) * * *

(xvii) Conjugated Estrogens Tablets, U.S.P., when dispensed in mnemonic packages containing not more than 32.0 mg of the drug and containing no other substances subject to this § 1700.14(a)(10).

* * * * *

Dated: December 8, 1987.

Sadye E. Dunn,

Secretary, Consumer Product Safety Commission.

[FR Doc. 87-28742 Filed 12-21-87; 8:45 am]

BILLING CODE 6355-01-M

DEPARTMENT OF THE TREASURY

Internal Revenue Service

26 CFR Part 1

[LR-137-86]

Limitation on Deduction for Nonbusiness Interest; Personal Interest

AGENCY: Internal Revenue Service, Treasury.

ACTION: Notice of proposed rulemaking by cross-reference to temporary regulations.

SUMMARY: In the Rules and Regulations portion of this issue of the **Federal Register**, the Internal Revenue Service is issuing temporary amendments to the income tax regulations relating to the treatment of personal interest and the treatment and determination of qualified residence interest. Changes to the law were made by the Tax Reform Act of 1986. The text of those temporary regulations also serves as the comment document for this proposed rulemaking.

DATES: The regulations contained in this document are proposed to be effective for taxable years beginning after December 31, 1986. Written comments and requests for a public hearing must be delivered or mailed by February 22, 1988.

ADDRESS: Send comments and requests for public hearing to: Commissioner of Internal Revenue, Attention: CC:LR:T (LR-137-86), Washington, DC 20224.

FOR FURTHER INFORMATION CONTACT: Sharon L. Hall of the Legislation and Regulations Division, Office of Chief Counsel, Internal Revenue Service, 1111 Constitution Avenue NW., Washington, DC 20224 (Attention: CC:LR:T) (202-566-3288, not a toll-free call).

SUPPLEMENTARY INFORMATION:

Background

The temporary regulations (designated by a T following the section citation) in the Rules and Regulations portion of this issue of the **Federal Register** amend Part 1 of Title 26 of the Code of Federal Regulations. These amendments reflect the provisions of section 163(h) of the Internal Revenue Code of 1986 as added by section 511(b) of the Tax Reform Act of 1986 (Pub. L. 99-514, 100 Stat. 2246). For the text of the temporary regulations, see FR Doc. (T.D. 8168) published in the Rules and Regulations portion of this issue of the **Federal Register**. A general discussion of the temporary regulations is contained in the preamble to the regulations. The final regulations, which this document proposes to base on the temporary regulations, would amend Part 1 of Title 26 of the Code of Federal Regulations.

Special Analyses

The Commissioner of Internal Revenue has determined that this proposed rule is not a major rule as defined in Executive Order 12291. Accordingly, a Regulatory Impact Analysis is not required. Although this document is a notice of proposed rulemaking that solicits public comments, the Internal Revenue Service has concluded that the proposed regulations are interpretative and that the notice and public procedure requirements of 5 U.S.C. 553 do not apply. Accordingly, a regulatory flexibility analysis is not required under the Regulatory Flexibility Act (5 U.S.C. chapter 6).

The collection of information requirements contained in this notice of proposed rulemaking have been submitted to the Office of Management and Budget (OMB) for review under section 3504(h) of the Paperwork Reduction Act. Comments on the requirements should be sent to the Office of Information and Regulatory Affairs of OMB, Attention: Desk Officer for Internal Revenue Service, New Executive Office Building, Washington, DC 20503. The Internal Revenue Service requests that persons submitting comments on these requirements to OMB also send copies of those comments to the Service.

Comments and Requests for a Public Hearing

Before adopting these proposed regulations, consideration will be given to any written comments that are submitted (preferably eight copies) to the Commissioner of Internal Revenue. All comments will be available for public inspection and copying. A public hearing will be held upon written request to the Commissioner by any person who submitted comments. If a public hearing is held, notice of the time and place will be published in the **Federal Register**.

Drafting Information

The principal author of these proposed regulations is Sharon L. Hall of the Legislation and Regulations Division, Office of Chief Counsel, Internal Revenue Service. However, personnel from other offices of the Internal Revenue Service and Treasury participated in developing the regulations on matters of both substance and style.

BILLING CODE 4830-01-M

DEPARTMENT OF DEFENSE

Office of the Secretary

32 CFR Part 285

[DoD Directive 5400.7]

DoD Freedom of Information Act Program

AGENCY: Department of Defense.

ACTION: Proposed rule.

SUMMARY: This proposed rule published a revision to DoD Directive 5400.7, which is the authority document for publication of DoD Regulation 5400.7-R. DoD Regulation 5400.7-R (32 CFR Part 286) was published as a final rule on July 10, 1987 (Vol. 52, No. 132) pursuant to the Freedom of Information Reform Act of 1986, section 1801-1804 (Pub. L. 99-540); and section 954 of the National Defense Authorization Act for FY 1987 (Pub. L. 99-661). This proposed rule merely addresses nonsubstantive administrative changes to DoD Directive 5400.7 to make it consistent with DoD Regulation 5400.7-R.

DATE: Comments will be accepted January 21, 1988.

ADDRESS: Send comments to: Charlie Y. Talbott, Office of the Assistant Secretary of Defense (Public Affairs), Washington, DC 20301-1400.

FOR FURTHER INFORMATION CONTACT: Charlie Y. Talbott, (202) 697-1180.

SUPPLEMENTARY INFORMATION:

List of Subjects in 32 CFR Part 285

Freedom of information.

Accordingly, Title 32, Chapter I, is amended to add Part 285 as follows:

PART 285—DOD FREEDOM OF INFORMATION ACT PROGRAM

Sec.
285.1 Reissuance and purpose.
285.2 Applicablity and scope.
285.3 Definitions.
285.4 Policy.
285.5 Responsibilities.
286.6 Information requirements.
286.7 Effective date and implementation.

Authority. Public Law 99-570, secs. 1801-1804; Pub. L. 99-661, Sec. 2328; 5 U.S.C. 552.

§ 285.1 Reissuance and purpose.

(a) This part:

(1) Reissues DoD Directive 5400.7.[1]

(2) Establishes policies and procedures for the implementation of the DoD Freedom of Information Act (FOIA) Program under 5 U.S.C. 552.

(3) Delegates authorities and responsibilities for the effective administration of the program.

(b) This part also authorizes, consistent with DoD 5025.1-M [2] the publication of DoD 5400.7-R, [3] the single DoD regulation on the FOIA Program.

§ 285.2 Applicability and scope.

(a) This part applies to the Office of the Secretary of Defense (OSD) and its administrative support agencies, the Military Departments, the Organization of the Joint Chiefs of Staff (OJCS), the Unified and Specified Commands, the Defense Communications Agency (DCA), Defense Contract Audit Agency (DCAA), Defense Intelligence Agency (DIA), Defense Investigative Service (DIS), Defense Logistics Agency (DLA), Defense Mapping Agency (DMA), and the Defense Nuclear Agency (DNA). For the purpose of this part, OSD, OJCS, the Unified Commands, and OSD administrative support agencies are considered one "DoD Component." The other DoD Components referred herein are the Military Departments, DCA, DCAA, DIA, DIS, DLA, DMA, and DNA.

(b) The National Security Agency records are subject to this part unless the records are exempt under Pub. L. 86-36.

§ 285.3 Definitions.

The terms used in this part are defined in 32 CFR Part 286.

§ 285.4 Policy.

It is DoD policy to:

(a) Promote public trust by making the maximum amount of information available to the public on the operation and activities of the Department of Defense, consistent with DoD's responsibility to ensure national security.

(b) Allow a requester to obtain records from the Department of Defense that are available through other public information services without invoking the FOIA.

(c) Make available, under the procedures established by 32 CFR Part 286, those records that are requested by a member of the general public who cites the FOIA.

(d) Answer promptly all other requests for information, records, objects, and articles under established procedures and practices.

(e) Release records to the public unless those records are exempt from mandatory disclosure as outlined in Chapter III of DoD 5400.7-R.

(f) Process requests by individuals for access to records about themselves under the Privacy Act procedures as implemented by 32 CFR Part 286a, and procedures outlined in this part as amplified by 32 CFR Part 286.

§ 285.5 Responsibilities.

(a) The *Assistant Secretary of Defense (Public Affairs)* (ASD(PA)) shall:

(1) Direct and administer the DoD FOIA Program to ensure compliance with policies and procedures that govern the administration of the program.

(2) Issue a DoD FOIA regulation and other discretionary instructions and guidance to ensure timely and reasonably uniform implementation of the FOIA in the Department of Defense.

(3) Internally administer the FOIA Program for the OSD, the OJSC and, as an exception to DoD Directive 5100.3 [4] the Unified Commands (the Specified Commands remain under the Military Departments for FOIA matters).

(4) As the designee of the Secretary of Defense, serve as the sole appellate authority for appeals to decisions of respective Initial Denial Authorities identified in ASD(PA) supplementing instructions.

(b) The *General Counsel of DoD* shall provide uniformity in the legal interpretation of this part.

(c) *Heads of DoD Components* shall:

(1) Publish in the **Federal Register** any instructions necessary for the internal administration of this part within a DoD Component that are not prescribed by this part or by other issuances of the ASD(PA). For the guidance of the public, the information specified in 5 U.S.C. 552(a)(1) shall be published in accordance with 32 CFR Part 296.

(2) Conduct training on the provisions of this part and 5 U.S.C. 552 as amended for officials and employees who implement the FOIA.

(3) Submit the reports prescribed in Chapter VII of DoD 5400.7-R.

(4) Make available for public inspection and copying in an appropriate facility or facilities, in accordance with rules published in the **Federal Register**, the records specified in 5 U.S.C. 552(a)(2) unless such records are published and copies are offered for sale.

(5) Maintain and make available for public inspection and copying current indices of these records.

§ 286.6 Information requirements.

The reporting requirements in Chapter VII of DoD 5400.7-R have been assigned Report Control Symbol DD-PA(A) 1365.

§ 286.7 Effective date and implementation.

This part is proposed to be effective January 21, 1988. Forward one copy of implementing documents to the Assistant Secretary of Defense (Public Affairs) within 120 days.

Linda M. Bynum,

Alternate OSD Federal Register, Liaison Officer, Department of Defense.

December 17, 1987.

DEPARTMENT OF COMMERCE

Agency Form Under Review by the Office of Management and Budget (OMB)

DOC has submitted to OMB for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

Agency: Bureau of the Census
Title: Special Population Census—Address Register and Enumeration Book
Form Number: Agency—SC–19, SC–19A; OMB—0607–0368
Type of Request: Revision of a currently approved collection
Burden: 150,000 respondents; 12,450 reporting hours
Needs and Uses: This collection is used to obtain current population data between the decennial census. Collected data are used as an input to the calculations of the Bureau's local area estimates. Data are also used by many states for the distribution of funds to locals governments.
Affected Public: Individuals or households
Frequency: As requested
Respondent's Obligation: Voluntary
OMB Desk Officer: Francine Picoult 395–7340

Copies of the above information collection proposal can be obtained by calling or writing DOC Clearance Officer, Edward Michals, (202) 377–3271, Department of Commerce, Room H6622, 14th and Constitution Avenue NW., Washington, DC 20230.

Written comments and recommendations for the proposed information collection should be sent to Francine Picoult, OMB Desk Officer, Room 3228, New Executive Office Building, Washington, DC 20503.

Dated: December 15, 1987.

Edward Michals,

Departmental Clearance Officer, Office of Management and Organization.

[FR Doc. 87–29265 Filed 12–21–87; 8:45 am]

BILLING CODE 3510–07–M

Agency Forms Under Review by the Office of Management and Budget (OMB)

DOC has submitted to OMB for clearance the following proposals or collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

Agency: Bureau of Economic Analysis
Title: Transactions of U.S. Banking Branch or Agency with Foreign Parent
Form Number: Agency—BE–606B; OMB—0608–0023
Type of Request: Revision of a currently approved collection
Burden: 325 respondents; 1,300 reporting hours
Needs and Uses: This collection is used to obtain data on current and capital account transactions between foreign owners holding a 10 percent or more ownership interest in unincorporated U.S. banks and the U.S. banking branches or agencies for the preparation of the balance of payments accounts of the United States.
Affected Public: Businesses or other for-profit institutions
Frequency: Quarterly
Respondent's Obligation: Mandatory
OMB Desk Officer: John Griffen 395–7340
Agency: Bureau of Economic Analysis
Title: Transactions of U.S. Affiliate, Except an Unincorporated Bank, with Foreign Parent
Form Number: Agency—BE–605; OMB—0608–0009
Type of Request: Revision of a currently approved collection
Burden: 3,000 respondents; 12,000 reporting hours
Needs and Uses: This collection is used to obtain data on current and capital account transactions between foreign owners (other than banking branches and agencies) holding a 10 percent or more ownership interest in U.S. business enterprises and their U.S. business enterprises. Data are required for the preparation of the balance of payments accounts of the United States.
Affected Public: Businesses or other for-profit institutions
Frequency: Quarterly
Respondent's Obligation: Mandatory
OMB Desk Officer: John Griffen 395–7340

Copies of the above information collection proposals can be obtained by calling or writing DOC Clearance Officer, Edward Michals, (202) 377–3271, Department of Commerce, Room H6622, 14th and Constitution Avenue NW., Washington, DC 20230.

Written comments and recommendations for the proposed information collections should be sent to John Griffen, OMB Desk Officer, Room 3228, New Executive Office Building, Washington, DC 20503.

Dated: December 15, 1987.

Edward Michals,

Departmental Clearance Officer, Office of Management and Organization.

International Trade Administration

[Application #87–A0004]

Export Trade Certificate of Review; National Machine Tool Builders' Association

AGENCY: International Trade Administration, Commerce.

ACTION: Notice of issuance of an amended export trade certificate of review, Application #87–A0004.

SUMMARY: The Department of Commerce has issued an amendment to the export trade certificate of review granted to the National Machine Tool Builders' Association ("NMTBA") on May 19, 1987 (52 FR 19371, May 22, 1987).

FOR FURTHER INFORMATION CONTACT: John E. Stiner, Director, Office of Export Trading Company Affairs, International Trade Administration, 202–377–5131. This is not a toll-free number.

SUPPLEMENTARY INFORMATION: Title III of the Export Trading Company Act of 1982 ("the Act") (Pub. L. 97–290) authorizes the Secretary of Commerce to issue export trade certificates of review. The regulations implementing Title III are found at 15 CFR Part 325 (50 FR 1804, January 11, 1985).

The Office of Export Trading Company Affairs is issuing this notice pursuant to 15 CFR 325.6(b), which requires the Department of Commerce to publish a summary of a certificate in the **Federal Register**. Under section 305(a) of the Act and 15 CFR 325.11(a), any person aggrieved by the Secretary's determination may, within 30 days of the date of this notice, bring an action in any appropriate district court of the United States to set aside the determination on the ground that the determination is erroneous.

The amendment consists of the following changes:

(1) Hurco Companies, Inc., Indianapolis, Indiana, and Manufacturing Technology, Inc., Mishawaka, Indiana, have been added as "Members" of the certificate;

(2) The following companies have been deleted as "Members" of the certificate: ACME-Cleveland Corp.; AMAF Industries, Inc.; Apex Corporation; Automated Machine Tool Technology, Inc.; Barker Milling Machine Company; Farrel Company; Harvill Machine Inc.; Hydra-Tool Corp.; Laser Systems Division; Lehman Division of Smith International Inc.; MG Cutting Systems; MHP Machines, Inc.; V & O Press Company, Inc.; Wadell Equipment Company, Inc.; Wardell Mfg. Co., Inc.; and The Wheelabrator Corp;

(3) The "Members" Landis Tool Co. and Lamb Techicon Corp. have been replaced with their controlling entity, Litton Industrial Automation Systems, Inc; and the "Member" Teledyne Landis Machine has been replaced with its controlling entity. Teledyne Industries, Inc.; and

(4) The company name listing for the "Member" APEC-Guill Technologies Inc. has been changed to APEC/CPM Guill Technologies Inc.; Automated Machine Tool Technology, Inc. to ACROLOC/CNC Systems; Cam-Apt, Inc. to CAM-APT Technologies; Chemtool Deburring Systems to CHEMTOOL, Incoporated; Clearing to USI Clearing; C.O. Hoffacker Company to C.O. Hoffacker Co. Division of the Hoff Co.; Dake to Dake Division, JSS Corporation; Davenport Machine Tool Division to Davenport Machine—A Dover Industries Company; ES-Tech to Equipment Systems; Fairfield Machine to Fairfield Machine Co., Inc.; Geometric Tool to Geometric Tool—Division Greenfield Industries; Giddings and Lewis to Giddings and Lewis—A Division of Amco International Corporation; Hansvedt EDM Division to Hansvedt; Harper Buffing Machine to Harper Company; HE&M Saw to HEM, Inc.; P.R. Hoffman to P.R. Hoffman Machine Products Co.; Imperial Stamp & Engraving Company to Imperial Stamp & Engraving Co., Inc.; Industrial Development Systems to Industrial Development Systems, Inc.; Intertech Automation Company to Intertech Development Company; ITW Illitron to Illinois Tools Works Inc.; Livernois Automation Company to Livernois Engineering Co.; The Lodge & Shipley Company to Lodge & Shipley/Manuflex; Lyon Machine Builders Div. to Lyon Machine Builders; Miller Fluid Power Corporation to Miller Fluid Power; National Automatic Tool Co., Inc., to NATCO, Inc.; The Olofsson Corporation to Olofsson Corporation; Peerless Saw Division to Peerless Saws; PMC Industries to PMC Industries, Inc.; Republic Lagun Machine Tool Co. to Republic Lagun CNC Corporation; S-P Manufacturing Corporation to The S-P Manufacturing Corporation; Geo. T. Schmidt Division to Geo T. Schmidt; Universal Engineering to Universal Engineering Div. Stanwhich Industries Inc.; Valenite–Kamset to GTE Valetine Corporation; Vulcan Tool Company to Vulcan Tool Corp.

EFFECTIVE DATE: October 8, 1987.

A copy of the certificate will be kept in the International Trade Administration's Freedom of Information Records Inspection Facility, Room 4102, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230.

Date: December 16, 1987.

John E. Stiner,

Director, Office of Export Trading Company Affairs.

BILLING CODE 3510–DR–M

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

Announcing an Import Restraint Limit for Certain Cotton Textile Products Produced or Manufactured in the German Democratic Republic Effective on January 1, 1988

December 17, 1987.

The Chairman of the Committee for the Implementation of Textile Agreements (CITA), under the authority contained in E.O. 11651 of March 3, 1972, as amended, has issued the directive published below to the Commissioner of Customs to be effective on January 1, 1988. For further information contact Jerome Turtola, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 377–4212. For information on the quota status of this limit, please refer to the Quota Status Reports which are posted on the bulletin boards of each Customs port. For information on embargoes and quota re-openings, please call (202) 377–3715.

Summary

In the letter published below, the Chairman of the Committee for the Implementation of Textile Agreements directs the Commissioner of Customs to prohibit entry into the United States for consumption, or withdrawal from warehouse for consumption, of cotton textile products in Category 334, produced or manufactured in the German Democratic Republic and exported during the twelve-month period which begins on January 1, 1988 and extends through December 31, 1988, in excess of the designated specific limit.

Background

The Bilateral Cotton Textile Agreement, effected by exchange of notes dated December 10, 1986 and February 27, 1987, between the Government of the United States and the German Democratic Republic establishes a specific limit for cotton textile products in Category 334, produced or manufactured in the German Democratic Republic and exported during the period which begins on January 1, 1988 and extends through December 31, 1988.

A description of the textile categories in terms of T.S.U.S.A. numbers was published in the **Federal Register** on December 13, 1982 (47 FR 55709), as amended on April 7, 1983 (48 FR 15175, May 3, 1983 (48 FR 19924), December 14, 1983, (48 FR 55607), December 30, 1983 (48 FR 57584), April 4, 1984 (49 FR 13397), June 28, 1984 (49 FR 26622), July 16, 1984 (49 FR 28754), November 9, 1984 (49 FR 44782), July 14, 1986 (51 FR 25386), July 29, 1986 (51 FR 27068) and in Statistical Headnote 5, Schedule 3 of the Tariff Schedules of the United States Annotated (1987).

The letter to the Commissioner of Customs and the actions taken pursuant to it are not designed to implement all of the provisions of the bilateral agreement, but are designed to assist only in the implementation of certain of its provisions.

James H. Babb,

Chairman, Committee for the Implementation of Textile Agreements.

Committee for the Implementation of Textile Agreements

December 17, 1987.

Commissioner of Customs,
Department of the Treasury, Washington, DC 20229

VOL 52 ISS 245 DEC 22 1987 UMI

Dear Mr. Commissioner: Under the terms of Section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854); pursuant to the Bilateral Cotton Textile Agreement, effected by exchange of notes dated December 10, 1986 and February 27, 1987, between the Governments of the United States and the German Democratic Republic; and in accordance with the provisions of Executive Order 11651 of March 3, 1972, as amended, you are directed to prohibit, effective on January 1, 1988, entry into the United States for consumption and withdrawal from warehouse for consumption of cotton textile products in Catetory 334, produced or manufactured in the German Democratic Republic and exported during the twelve-month period which begins on January 1, 1988 and extends through December 31, 1988, in excess of 19,500 dozen.

To the extent that trade which now falls in the foregoing category is within a category limit for the period January 1, 1987 through December 31, 1987, such trade, to the extent of any unfilled balances, shall be charged against the levels of restraint established for such goods during the period. In the event the limits established for that period have been exhausted by previous entries, such goods shall be subject to the level set forth in this directive.

The restraint limit set forth above is subject to adjustment in the future according to the provisions of the agreement, effected by exchange of notes dated December 10, 1986 and February 27, 1987 between the Governments of the United States and the German Democratic Republic, which provide, in part, that: (1) Specific limits may be exceeded by designated percentages during an agreement year for carryover and carryforward; no carryover shall be available during the first agreement year; (2) administrative arrangements or adjustments may be made to resolve minor problems arising in the implementation of this agreement.

In carrying out the above directions, the Commissioner of Customs should construe entry into the United States for consumption to include entry for consumption into the commonwealth of Puerto Rico.

The Committee for this Implementation of Textile Agreements has determined that this action falls within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553(a)(1).

Sincerely,

James H. Babb,

Chairman, Committee for the Implementation of Textile Agreements.

[FR Doc. 87-29237 Filed 12-21-87; 8:45 am]

BILLING CODE 3510-DR-M

Adjustment of an Import Restraint Limit for Certain Cotton Textile Products Produced or Manufactured in Uruguay

December 16, 1987.

The Chairman of the Committee for the Implementation of Textile Agreements (CITA), under the authority contained in E.O. 11651 of March 3, 1972, as amended, has issued the directive published below to the Commissioner of Customs to be effective on December 17, 1987. For further information contact Naomi Freeman, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 377-4212. For information on the quota status of this limit, please refer to the Quota Status Reports which are posted on the bulletin boards of each Customs port. For information on embargoes and quota re-openings, please call (202) 377-3715.

Summary

In the letter published below, the Chairman of the Committee for the Implementation of Textile Agreements directs the Commissioner of Customs to increase the restraint limit for cotton textile products in Category 335, which are exported from Uruguay during the six-month period which began on July 1, 1987 and extends through December 31, 1987.

Background

A CITA directive dated December 4, 1987 (52 FR 26820), as amended, established, among other things, an import limit for certain cotton textile products in Category 335, produced or manufactured in Uruguay and exported during the six-month period which began on July 1, 1987 and extends through December 31, 1987. Pursuant to a request from the Government of the Republic of Uruguay and under the terms of the Bilateral Cotton and Wool Textile Agreement, effected by exchange of notes dated December 30, 1983 and January 23, 1984, as amended, and as further amended September 10, 1987, between the Governments of the United States and the Republic of Uruguay, Category 335 is being increased for carryforward.

A description of the textile categories in terms of T.S.U.S.A. numbers was published in the Federal Register on December 13, 1982 (47 FR 55709), as amended on April 7, 1983 (48 FR 15175), May 3, 1983 (48 FR 19924), December 14, 1983 (48 FR 55607), December 30, 1983 (48 FR 57584), April 4, 1984 (49 FR 13397), June 28, 1984 (49 FR 26622), July 16, 1984 (49 FR 28754), November 9, 1984 (49 FR 44782), July 14, 1986 (51 FR 25386), July 29, 1986 (51 FR 27068) and in Statistical Headnote 5, Schedule 3 of the Tariff Schedules of the United States Annotated (1987).

Adoption by the United States of the Harmonized Commodity Code (HCC) may result in some changes in the categorization of textile products covered by this notice. Notice of any necessary adjustments to the limits affected by adoption of the HCC will be published in the Federal Register.

The letter to the Commissioner of Customs and the actions taken pursuant to it are not designed to implement all of the provisions of the bilateral agreement, but are designed to assist only in the implementation of certain of its provisions.

James H. Babb,

Chairman, Committee for the Implementation of Textile Agreements.

Committee for the Implementation of Textile Agreements

December 16, 1987.

Commissioner of Customs,
Department of the Treasury,
Washington, DC 20229

Dear Mr. Commissioner: This directive amends, but does not cancel, the directive issued to you on December 4, 1987 by the Chairman, Committee for the Implementation of Textile Agreements, concerning imports of cotton textile products in Category 335, produced or manufactured in Uruguay and exported during the six-month period which began on July 1, 1987 and extends through December 31, 1987.

Effective on December 17, 1987, the directive of December 4, 1987 is amended to include an adjusted limit of 67,000 dozen [1] for cotton textile products in Category 335, under the terms of the Bilateral Cotton and Wool Textile Agreement, effected by exchange of notes dated December 30, 1983 and January 23, 1984.[2]

The Committee for the Implementation of Textile Agreements has determined that this action falls within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553(a)(1).

Sincerely,

James H. Babb,

Chairman, Committee for the Implementation of Textile Agreements.

[FR Doc. 87-29236 Filed 12-21-87; 8:45 am]

BILLING CODE 3510-DR-M

[1] The limit has not been adjusted to account for imports exported after December 31, 1986.

[2] The agreement provides, inpart, that: (1) specific limits may be exceeded by designated percentages; (2) specific limits may be increased for carryover and carryforward; (3) administrative arrangements or adjustments may be made to resolve minor problems arising in the implementation of the agreement; and (4) carryforward of 100 percent is available for restraints prorated to facilitate adoption of the Harmonized Code.

DEPARTMENT OF DEFENSE

Office of the Secretary

Defense Science Board Task Force on B-1B Defensive Avionics; Cancellation of Meeting.

AGENCY: Department of Defense.

ACTION: Cancellation of meeting.

SUMMARY: The meeting notice for the Defense Science Board Task Force on B-1B Defense Avionics for December 22-23, 1987 as published in the Federal Register (Vol. 52, No. 197, Page 38000-38001, Tuesday, October 13, 1987, FR Doc 87-23644) has been cancelled.

Linda Bynum,

Alternate OSD Federal Register Liaison Offcer, Department of Defense.

December 17, 1987.

BILLING CODE 3810-01-M

Defense Science Board Task Force on Use of Commercial Components in Military Equipment; Meetings

AGENCY: Department of Defense.

ACTION: Notice of Advisory Committee Meetings.

SUMMARY: The Defense Science Board Task Force on Use of Commercial Components in Military Equipment will meet in closed session on January 11, 1988 at the TRW Corporation, Washington, DC.

The mission of the Defense Science Board is to advise the Secretary of Defense and the Under Secretary of Defense for Acquisition on scientific and technical matters as they affect the perceived needs of the Department of Defense. At this meeting the Task Force will receive classified briefings on military acquisition programs and systems availability and the affect of increased use of commercial items on force posture.

In accordance with section 10(d) of the Federal Advisory Committee Act, Pub. L. No. 92-463, as amended (5 U.S.C. App. II (1982)), it has been determined that this DSB Task Force meeting, concerns matters listed in 5 U.S.C. 552b(c)(1) (1982), and that accordingly this meeting will be closed to the public.

Linda Bynum,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

December 17, 1987.

BILLING CODE 3810-01-M

Defense Science Board; Meetings

AGENCY: Department of Defense.

ACTION: Notice of Advisory Committee Meetings.

SUMMARY: The Defense Board will meet in closed session on February 10-11, May 18-19, and October 19-20, 1988 at the Pentagon, Arlington, Virginia.

The mission of the Defense Science Board is to advise the Secretary of Defense and the Under Secretary of Defense for Acquisition on scientific and technical matters as they affect the perceived needs of the Department of Defense. At these meetings the Defense Science Board will discuss interim findings and tentative recommendations resulting from ongoing Task Force activities. The Board will also discuss plans for future consideration of scientific and technical aspects of specific strategies, tactics, and policies as they may affect the U.S. national defense posture.

In accordance with section 10(d) of the Federal Advisory Committee Act, Pub. No. 92-463, as amended (5 U.S.C. App. II (1982)), it has been determined that these Defense Science Board meetings, concern matters listed in 5 U.S.C. 552b(c)(1) (1982), and that accordingly these meetings will be closed to the public.

Linda Bynum,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

December 17, 1987.

BILLING CODE 3810-01-M

DEPARTMENT OF ENERGY

Office of Energy Research

Energy Research Advisory Board, Research & Technology Utilization Panel; Open Meeting

Notice is hereby given of the following meeting:

Name: Research and Technology Utilization Panel of the Energy Research Advisory Board (ERAB).

Date & Time: January 12, 1988—12:30 p.m.-5:00 p.m., January 13, 1988—8:30 a.m.-5:00 p.m.

Place: Department of Energy, 1000 Independence Ave., SW., Room 4A-110, Washington, DC 20585.

Contact: Charles E. Cathey, Department of Energy, 1000 Independence Ave., SW., Washington, DC 20585, (202) 586-2263.

Purpose of the Parent Board

To advise the Department of Energy (DOE) on the overall research and development conducted in DOE and to provide long-range guidance in these areas to the Department.

Purpose of the Panel

The Research and Technology Utilization Panel is a subgroup of ERAB and reports to the parent Board. The Research and Technology Utilization Panel will: review the process and effectiveness of the movement of scientific research and technology from DOE and its contractors to industry, universities, and state and local governments; review the technology transfer objectives and efforts of the major Departmental programs; evaluate the significance of past activities in this area; and make recommendations to improve the activities.

Tentative Agenda

- The agenda for this meeting will be to hear presentations from universities and corporations on their experiences with technology transfers from the Department. These will include presentations from AMAX, ARCO, Babcock-Wilcox, Ford, Massachusetts Institute of Technology and the University of Texas, among others.
- Public Comment (10 minute rule)

Public Participation

The meeting is open to the public. Written statements may be filed with the Panel either before or after the meeting. Members of the public who wish to make oral statements pertaining to agenda items should contact Charles Cathey at the address or telephone number listed above. Requests must be received 5 days prior to the meeting and reasonable provisions will be made to include the presentation on the agenda. The Chairperson of the Panel is empowered to conduct the meeting in a fashion that will facilitate the orderly conduct of business.

Minutes of the Meeting

Available for public review and copying at the Freedom of Information Public Reading Room, 1E–190, Forrestal Building, 1000 Independence Ave., SW., Washington, DC between 9:00 am and 4:00 pm, Monday through Friday, except Federal holidays. Issued at Washington, DC December 10, 1987.

Charles E. Cathey,

Deputy Director, Science & Technology Affairs Office of Energy Research.

FEDERAL COMMUNICATIONS COMMISSION

[Report No. 1699]

Petitions for Reconsideration and Clarification of Actions in Rulemaking Proceedings

December 15, 1987.

Petitions for reconsideration and clarification have been filed in the Commission rule making proceeding listed in this Public Notice and published pursuant to 47 CFR 1.429(e). The full text of these documents are available for viewing and copying in Room 239, 1919 M Street NW., Washington, DC, or may be purchased from the Commissions copy contractor, International Transcription Service (202–857–3800). Oppositions to these petitions must be filed; See § 1.4(b)(1) of the Commissions rules (47 CFR 1.4(b)(1)). Replies to an opposition must be filed within 10 days after the time for filing oppositions has expired.

Subject: Separation of costs of regulated telephone service from costs of nonregulated activities.

Amendment of Part 31, the Uniform System of Accounts for Class A and Class B Telephone Companies to provide for nonregulated activities and to provide for transactions between telephone companies and their affiliates. (CC Docket No. 86–111) Number of petitions received: 2

Federal Communications Commission.

FEDERAL RESERVE SYSTEM

Change in Bank Control; Acquisition of Shares of Banks or Bank Holding Companies

The notificant listed below has applied under the Change in Bank Control Act (12 U.S.C. 1817(j)) and § 225.41 of the Board's Regulation Y (12 CFR 225.41) to acquire a bank or bank holding company. The factors that are considered in acting on notices are set forth in paragraph 7 of the Act (12 U.S.C. 1817(j)(7)).

The notices are available for immediate inspection at the Federal Reserve Bank indicated. Once the notices have been accepted for processing, they will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank indicated for that notice or to the offices of the Board of Governors. Comments must be received not later than January 11, 1988.

A. **Federal Reserve Bank of Kansas City** (Thomas M. Hoenig, Vice President), 925 Grand Avenue, Kansas City, Missouri 64198:

1. *Kirkpatrick & Co.*, Oklahoma City, Oklahoma; to acquire an additional 4.87 percent of the voting shares of United Oklahoma Bankshares, Inc., Del City, Oklahoma, and thereby indirectly acquire United Del City Bank, Del City, Oklahoma.

Board of Governors of the Federal Reserve System, December 16, 1987.

BILLING CODE 6820–24–M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Disease Control

Recommendations for Protecting the Health and Safety Against Potential Adverse Effects of Long-Term Exposure to Low Doses of Agents: GA, GB, VX, Mustard (H, HD, T), and Lewisite (L)

AGENCY: Centers for Disease Control (CDC), Public Health Service, HHS.

ACTION: Request for public comment.

SUMMARY: Agents GA, GB, VX, MUSTARD (H, HD, T), and Lewisite (L) are now stored by the Department of Defense (DOD). Pub. L. 99–145 (50 U.S.C 1521) mandates that all unitary (self-contained) lethal and chemical munitions be destroyed by 1994. Pub. L. 91–121 and Pub. L. 91–441 (50 U.S.C 1512) mandate that the Department of Health and Human Services must review DOD plans for disposing of these munitions and make recommendations to protect human health. Public comment is requested on these recommendations.

DATE: Comments must be received on or before January 21, 1988.

ADDRESS: Comments may be mailed to Director, Center for Environmental Health and Injury Control, Centers for Disease Control, Chamblee 27, Room 1005 MS F29, 1600 Clifton Road, NE., Atlanta, GA 30333.

FOR FURTHER INFORMATION CONTACT: Linda W. Anderson, Chief, Special Programs Group, Center for Environmental Health and Injury, Centers for Disease Conrol, Chamblee 27, Room 1208 MS F29, 1600 Clifton Road, NE., Atlanta, Georgia 30333.

SUPPLEMENTARY INFORMATION: Section 1412 of Pub. L. 99–145 (50 U.S.C 1521) mandates that the present stockpile of lethal chemical agents be destroyed by September 30, 1994. Pub. L. 91–121 and Pub. L. 91–441 (50 U.S.C. 1512) mandate that the Department of Health and Human Services (HHS) review Department of Defense (DOD) plans for transporting and/or disposing of lethal chemical agents and make recommendations for protecting human health and safety; HHS has delegated this authority to the Centers for Disease Control (CDC). In the absence of Federal regulatory standards, DOD has developed safety and health standards for handling these agents. CDC has reviewed existing data and is proposing recommendations for protecting human health and safety during the transportation and/or disposal of these lethal agents.

The national stockpile of lethal chemical agents includes six chemicals:

GA (Tabun or ethyl N,N-dimethyl phosphoroamidocyanidate, CAS 77–81–6)

GB (Sarin or isopropyl methylphosphonofluoridate, CAS 107–44–8)

VX (O-ethyl-S-(2-diisopropylaminoethyl)-methyl phosphonothiolate, CAS 50782–69–9)

H, HD (Sulfur mustard or di-2-chloroethyl sulfide, CAS 505–60–2)

T (Bis(2-chloroethylthioethyl) ether, CAS 63918–89–8)

L (Lewisite or dichloro 2-chlorovinylarsine, CAS 541–25–3)

The DOD stores these agents in bulk containers and/or munitions at eight locations within the continental United States. A ninth location is in the central Pacific.

Previously, HHS has made recommendations for protecting human health from the adverse effects of acute exposure to agents GB, VX, and mustard. Citizens near depots where chemical weapons are stored have expressed concerns about the potential for delayed effects of acute exposure and about the potential health effects of long-term exposure to low doses of agents. (Here "low dose" means an airborne concentration of agent below the control limits.) To resolve these questions, CDC gathered data on these agents and held an open meeting to discuss the potential delayed effects of acute exposure and of adverse effects of long-term exposure to low doses of these agents. The meeting, announced in the **Federal Register** dated August 20, 1987 (52 FR 31449), was held September 29–30, 1987, in Atlanta, Georgia. The CDC invited consultants and the public. Comments from individuals rather than group comments or consensus were solicited.

Like widely used insecticides, the nerve agents GA, GB, and VX are organic compounds containing phosphorus (organophosphorus compounds). They affect nerves, muscles, and glands by inhibiting acetyl cholinesterase, an enzyme these tissues must have to function properly. Sulfur mustard (H, HD, hereafter referred to simply as "mustard") and Lewisite (L) are vesicants—that is, they cause chemical burns or blisters of the kin and mucous membranes, such as the conjunctiva of the eyes and the mucosa of airways.

Lewisite is an organic compound containing arsenic. A sixth agent, HT, is a mixture of mustard, agent T (bis(2-chloroethylthioethyl) ether), and impurities. Very little is known about the long-term toxicity of agent T. Agent T has much lower volatility than the H with which it is mixed. It is not expected to constitute an airborne hazard unless mustard is also present at concentrations much higher than permitted. Almost all (99.97%) of the vapor released by HT is mustard. HT control limits will therefore be identical with those for HD, with concentrations measured as HD.

During the public meeting on the potential effects of exposure to these agents, concerns that were raised included: Organophosphate-induced delayed neuropathy; electroencephalographic (EEG) or other functional changes following exposure to organophosphates; the carcinogenicity, mutagenicity, and/or teratogenicity of organophosphates; the cumulative effects of organophosphates, decreasing resistance to organophosphorus pesticides; the carcinogenicity, mutagenicity, and teratogenicity of mustard and Lewisite; delayed keratitis (injury to the cornea of the eye) following exposure to mustard; the response time, sensitivity, and specificity of monitors; the amount of agent in the various parts of the storage and demilitarization facilities; the response times and efficacy of abatement procedures in the event of an upset in plant operations or a release from storage, transportation, or incineration; use of historical monitoring in process control; and interactions of agents with other chemicals in the environment.

Published and unpublished reports of all potential adverse effects including carcinogenicity, mutagenicity, and teratogenicity for all agents were considered. Information on human carcinogenicity following wartime exposure to vesicants supplemented experimental data for mustard and Lewisite. Since the acute toxicity of GA and Lewisite had not been reviewed before, it was considered along with the potential long-term health effects. Reports relating delayed keratitis to mustard exposure were evaluated. The reports on delayed neuropathy and on EEG changes associated with poisoning by GB were available. In addition, individuals contributed critical information from their own experience and knowledge.

The ability of organophosphates to cause delayed neuropathy has been tested in domestic chickens, a sensitive indicator species. The chickens are given doses from 20 to more than 100 times the mean lethal dose and, for the chickens to demonstrate this effect, they must be protected from death by pretreatment with atropine or with atropine and an oxime. GB caused neuropathy in chickens only at doses several times greater than the mean lethal dose. Under similar conditions, VX did not induce delayed neuropathy. Neuropathy is considered an unlikely outcome from either acute intoxication with any of the nerve agents or from long-term exposure to them.

None of the nerve agents are mutagenic. Results of recently completed studies on GB and initial reports of studies on VX indicate no teratogenic effect. No evidence suggests that any of these nerve agents are carcinogenic. The EEG changes reported after intoxication with GB were considered to be of questionable significance—given the difficulty of demonstrating such changes and the absence of clinically significant effects even when EEG changes are present.

HHS had not previously reviewed standards for GA. The available information indicates that about twice as much GA as GB is needed to produce acute toxicity. Data for adverse reproductive effects are less complete for GA than for GB. The limited amount of GA present in the stockpile (4 tons) and the remoteness of the area where it will be destroyed (Tooele, Utah) provide further assurances that human health will be protected at the same control concentrations previously set for GB.

Questions related to the nerve agents proved relatively easy to resolve. The information bases are fairly complete, and there appears to be little risk either of adverse health effects from long-term exposure to low doses or of delayed health effects from acute exposure. On the basis of the evidence reviewed, HHS concludes that human health will be adequately protected from exposure to GA, GB, and VX vapor at the concentrations shown in Table 1. Even long-term exposure to these concentrations would not create any adverse health effects. At these concentrations, no detectable reduction in resistance to organophosphorus pesticides would occur.

TABLE 1.—CONTROL LIMITS (MG/M³) FOR CHEMICAL AGENTS[1]

Agent	General population	Workers
GA, GB	0.000003 (3×10^{-6})	0.0001 (1×10^{-4})
VX	0.000003 (3×10^{-6})	0.00001 (1×10^{-5})
H, HD, HT[2]	0.0001 (1×10^{-4})	0.003 (3×10^{-3})
L	0.003 (3×10^{-3})	0.003 (3×10^{-3})
Averaging time	72 hours	8 hours

[1] Protection against exposure to agents in aerosol and liquid form must be sufficient to prevent direct contact with the skin and eyes.
[2] Data supporting the ability to monitor for mustard at 0.0001 mg/m³ at all sites should be developed. HT is measured as HD.

The control limits contained in Table 1 are substantially below concentrations at which adverse effects have been observed for mustard and Lewisite. Delayed keratitis and chronic bronchitis are effects that follow acute symptomatic intoxication with mustard and would therefore not be expected at the limits proposed. Mustard is not a teratogen, but it is a mutagen. Because HHS accepts that mustard is a human carcinogen and because some evidence suggests that Lewisite might also be a carcinogen, lower levels of exposure are of potential concern. The available epidemiologic data indicate that mustard is a weak carcinogen when compared with other known human carcinogens, but they do not permit accurate estimation of the carcinogenic potency or the exact degree of the carcinogenic risk with confidence. Quantitative risk assessments prepared by the Oak Ridge National Laboratories and by a community study group at Edgewood, Maryland were considered. On the basis of a review of the methodology, we conclude that the many uncertainties in the method employed preclude its being used to define precisely the acceptable exposure limits to mustard.

Qualitative and quantitative data describing cancer risk were compared with risks faced by workers in industries considered nominally safe. We conclude that the weight of evidence indicates that overall cancer risks for workers exposed to air containing mustard at or below a concentration of 0.003 mg/m³ for the limited period of destruction (that is, a maximum of 2 to 5 years) are less than current risks of death by trauma in those nominally safe industries. Control of the stack emissions and the work-place air in accordance with the limits for mustard given in Tables 1 and 2 will amply protect a general population 1000 meters or more from a demilitarization site or transportation route.

Exposure to or contact with mustard by any route—respiratory, skin, or oral—should be limited to the extent practicable. This can be done by using appropriate engineering controls, personal protective equipment, and work practices. Concentrations in the work-place environment and surrounding air should be measured and verified by instruments that can reliably detect concentrations at or below the control limits. Rail cars or other transport vehicles should be treated as work places for this purpose. At this time, the most sensitive monitors can reliably measure 0.003 mg/m³ of mustard and Lewisite in the work-place air. The cycle time for mustard is 8 minutes—that is, the test is automatically repeated every 8 minutes. The cycle time for Lewisite is 12 hours. This level of exposure would be adequate protection for public health. The Army has reported the capability to monitor for mustard at concentrations as low as 0.0001 mg/m³ using a 12-hour sample time. This capability has been proven under usual ambient conditions at only one site. If it will not delay disposal, it is recommended that such capacity be demonstrated at and used for all sites where mustard will be transported or destroyed. The capacity to conduct such monitoring at all sites with mustard would represent a redundant safety factor.

Toxicologic information concerning Lewisite is sparse. We believe, however, that the proposed control limit, 0.003 mg/m³, is protective of public health. Lewisite is classed as an organic arsenic compound. The Occupational Safety and Health Administration (OSHA) has promulgated a standard (Permissible Exposure Level or PEL) of 0.5 mg/m³ for organic arsenic concentrations in work-place air. The U.S. Environmental Protection Agency (EPA) has authority to promulgate regulations for emissions of arsenic or other pollutants into ambient air, but, at present, EPA only has standards applicable to other specific sites or processes. Neither EPA standards, should they be promulgated, nor OSHA standards should be exceeded. The proposed control limits are lower than the existing OSHA occupational standard (0.5 mg/m³ of organic arsenicals, measured as arsenic) by a factor of 528. The Army should seek, through engineering design and operational controls, to minimize exposure to Lewisite. The facts that Lewisite will be destroyed only at Tooele, Utah, a facility remote from population centers, and that the maximum burning time for destruction of the existing stockpile of Lewisite is estimated to be less than 30 days provide additional assurance that human health will not be endangered.

Certain monitoring criteria are essential because any recommended exposure limit is only as good as the capability to measure and verify the exposure concentrations as they may occur. Specifically, the Army has agreed to provide data to CDC that document accurate and reproducible monitoring for agents at the recommended exposure limits and at each transportation or demilitarization facility monitored.

In summary, the control limits specified in Table 1 for all agents listed are considered protective of human health. The relatively short duration of the disposal program provides an additional margin of safety.

Control limits for stack emissions are primarily an engineering matter. These limits should (a) be attainable by a well-designed, well-constructed, and well-operated incineration facility; (b) give an early indication of upset conditions; and (c) be able to accurately measured in a timely manner. Limits based on these criteria will restrict emissions to concentrations well below those that would endanger health; they will usually prove more restrictive than a limit set on health bases alone. CDC has found that the allowable stack concentrations proposed by the Department of the Army (Table 2), meet the criteria above and are more restrictive than limits set on health bases alone; therefore, CDC recommends no changes in the concentrations. The concentrations must be evaluated by air dispersion modeling of worst-case-credible events and conditions specific to each site to ensure that the control limits for the general population and work-place (Table 1) would not be exceeded as a consequence of releases at or below the allowable stack concentrations.

TABLE 2.—ALLOWABLE STACK CONCENTRATIONS (MG/M³) FOR CHEMICAL AGENTS

Agent	Maximum allowable stack concentration
GA, GB	0.0003 (3×10^{-4})
VX	0.0003 (3×10^{-4})
H, HD, HT[1]	0.03 (3×10^{-2})
L	0.03 (3×10^{-2})

[1] HT is measured as HD.

Dated: December 16, 1987.

Glenda S. Cowart,

Director, Office of Program Support, Centers for Disease Control.

BILLING CODE 4160-18-M

Food and Drug Administration

Advisory Committees; Meetings

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: This notice announces forthcoming meetings of public advisory committees of the Food and Drug Administration (FDA). This notice also summarizes the procedures for the meetings and methods by which interested persons may participate in open public hearings before FDA's advisory committees.

Meetings: The following advisory committee meetings are announced:

Circulatory System Devices Panel

Date, time, and place. January 15, 1988, 8:30 a.m., Rm. 703–727A, Hubert H. Humphrey Bldg., 200 Independence Ave. SW., Washington, DC.

Type of meeting and contact person. Open public hearing, 8:30 a.m. to 9:30 a.m.; open committee discussion, 9:30 a.m. to 2:30 p.m.; closed committee deliberations, 2:30 p.m. to 4 p.m.; Keith Lusted, Center for Devices and Radiological Health (HFZ–450), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301–427–7373.

General function of the committee. The committee reviews and evaluates available data on the safety and effectiveness of medical devices currently in use and makes recommendations for their regulation.

Agenda—Open public hearing. Interested persons may present data, information, or views, orally or in writing on issues pending before the committee. Those desiring to make formal presentations should notify the contact person before January 8, 1988, and submit a brief statement of the general nature of the evidence or arguments they wish to present, the names and addresses of proposed participants, and an indication of the approximate time required to make their comments.

Open committee discussion. The committee will discuss a guidance document for balloon valvuloplasty, and premarket approval applications (PMA's) for one, or possibly two, percutaneous transluminal angioplasty catheters.

Closed committee deliberations. The committee will discuss trade secret and/or confidential commercial or financial information regarding the PMA's listed above. This portion of the meeting will be closed to permit discussion of this information (5 U.S.C. 552b(c)(4)).

Ophthalmic Devices Panel

Date, time, and place. January 21 and 22, 1988, 9 a.m., Auditorium, Hubert H. Humphrey Bldg., 200 Independence Ave. SW., Washington, DC.

Type of meeting and contact person. Open public hearing, January 21, 1988, 9 a.m. to 10 a.m.; open committee discussion, 10 a.m. to 3 p.m.; closed committee deliberations, 3 p.m. to 4 p.m.; open public hearing, January 22, 9 a.m. to 10 a.m.; open committee discussion, 10 a.m. to 3 p.m.; closed committee deliberations, 3 p.m. to 4 p.m.; open committee discussion, 4 p.m. to 5 p.m.; Daniel W.C. Brown, Center for Devices and Radiological Health (HFZ–460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301–427–7320.

General function of committee. The committee reviews and evaluates available data on the safety and effectiveness of devices currently in use and makes recommendations for their regulation. The committee also reviews data on new devices and makes recommendations regarding their safety and effectiveness and their suitability for marketing.

Agenda—Public hearing. Interested persons may present data, information, or views, orally or in writing, on issues pending before the committee. Those desiring to make formal presentations should notify the contact person before January 2, 1988, and submit a brief statement of the general nature of the evidence or arguments they wish to present, the names and addresses of proposed participants, and an indication of the approximate time required to make their comments.

Open committee discussion. On January 21, 1988, the committee will discuss general issues relating to approvals of premarket approval applications (PMA's) for Nd:YAG lasers and intraocular lenses (IOL's), and may discuss specific PMA's for these devices. If discussion of all pertinent Nd:YAG laser or IOL issues is not completed, discussion will be continued the following day. On January 22, 1988, the committee will discuss PMA's for contact lenses and other devices and requirements for PMA approval.

Closed committee deliberations. On January 21 and 22, 1988, the committee may discuss trade secret or confidential information relevant to PMA's for IOL's Nd:YAG lasers, contact lenses, or other ophthalmic devices. These portions of the meeting will be closed to permit discussion of this information (5 U.S.C. 552(c)(4)).

Orthopedic and Rehabilitation Devices Panel

Date, time, and place. January 22, 1988, 8 a.m., North Auditorium, Health and Human Services Bldg., 330 Independence Ave. SW. (enter at C St. entrance), Washington, DC.

Type of meeting and contact person. Open public hearing, January 22, 1988, 8 a.m. to 9 a.m.; open committee discussion, 9 a.m. to 11 a.m., 12:20 p.m. to 2:30 p.m., and 3:15 p.m. to 5:15 p.m; closed presentation of data, 11 a.m. to 11:30 a.m., 2:30 p.m. to 3 p.m., and 5:15 p.m. to 5:45 p.m; Marie Schroeder, Center for Devices and Radiological Health (HFZ–410), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301–427–7156.

General function of the committee. The committee reviews and evaluates available data on the safety and effectiveness of devices and makes recommendations for their regulations.

Agenda—Open public hearing. Interested persons may present data, information, or views, orally or in writing, on issues pending before the committee. Those desiring to make formal presentations should notify the contact person before January 14, 1988, and submit a brief statement of the general nature of the evidence or arguments they wish to present, the names and addresses of proposed participants, and an indication of the approximate time required to make their comments.

Open committee discussion. The committee will discuss premarket approval applications for a porous coated prosthetic hip and a porous coated total knee prosthesis. If time permits, the committee may also discuss a premarket approval application for a prosthetic ligament device or discuss general issues concerning ligament devices.

Closed presentation of data. The committee may review and/or discuss trade secret and/or confidential commercial or financial information relevant to premarket approval applications. This portion of the meeting will be closed to permit discussion of this information (5 U.S.C. 552b(c)(4)).

Vaccines and Related Biological Products Advisory Committee

Date, time, and place. January 25 and 26, 8:30 a.m., Bldg. 29, Rm. 115, National Institutes of Health, 8800 Rockville Pike, Bethesda, MD.

VOL 52 ISS 245 DEC 22 1987 UMI

Type of meeting and contact person. Open public hearing, January 25, 1988, 8:30 a.m. to 9:30 a.m., unless public participation does not last that long; open committee discussion, 9:30 a.m. to 2 p.m.; closed committee deliberations, 2 p.m. to 4:30 p.m.; open committee discussion, January 26, 1988, 8:30 a.m. to 10:30 a.m.; closed committee deliberations, 10:30 a.m. to 2 p.m.; Jack Gertzog, Center for Biologics Evaluation and Research (HFN–31), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301–443–5455.

General function of the committee. The committee reviews and evaluates available data on the safety and effectiveness of vaccines and related biological products intended for use in the diagnosis, prevention, or treatment of human diseases. The committee also reviews and evaluates the quality and relevance of FDA's research program which provides scientific support for the regulation of these products.

Agenda—Open public hearing. Interested persons requesting to present data, information, or views, orally or in writing, on issues pending before the committee should communicate with the committee contact person.

Open committee discussion. On January 25, 1988, from 8:30 a.m. to 2 p.m., the committee will discuss influenza vaccine formulation for the 1988–89 season. On January 26, 1988, from 8:30 a.m. to 10:30 a.m., the committee will review the intramural research program, Laboratory of Biophysics, Division of Biochemistry and Biophysics, Center for Biologics Evaluation and Research (CBER).

Closed committee deliberations. On January 25, 1988, from 2 p.m. to 4:30 p.m., and on January 26, 1988, from 1 p.m. to 2 p.m., the committee will review trade secret or confidential commercial information relevant to pending license applications and investigational new drugs. This portion of the meeting will be closed to permit discussion of this information (5 U.S.C. 552(c)(4)). On January 26, 1988, from 10:30 a.m. to 12 m., the committee will review part of the intramural research program in CBER. This portion of the meeting will be closed to prevent disclosure of personal information concerning individuals associated with this research program, disclosure of which would constitute a clearly unwarranted invasion of personal privacy (5 U.S.C. 552b(c)(6)).

Each public advisory committee meeting listed above may have as many as four separable portions: (1) An open public hearing, (2) an open committee discussion, (3) a closed presentation of data, and (4) a closed committee deliberation. Every advisory committee meeting shall have an open public hearing portion. Whether or not it also includes any of the other three portions will depend upon the specific meeting involved. The dates and times reserved for the separate portions of each committee meeting are listed above.

The open public hearing portion of each meeting shall be at least 1 hour long unless public participation does not last that long. It is emphasized, however, that the 1 hour time limit for an open public hearing represents a minimum rather than a maximum time for public participation, and an open public hearing may last for whatever longer period the committee chairperson determines will facilitate the committee's work.

Public hearings are subject to FDA's guideline (Subpart C of 21 CFR Part 10) concerning the policy and procedures for electronic media coverage of FDA's public administrative proceedings, including hearings before public advisory committees under 21 CFR Part 14. Under 21 CFR 10.205, representatives of the electronic media may be permitted, subject to certain limitations, to videotape, film, or otherwise record FDA's public administrative proceedings, including presentations by participants.

Meetings of advisory committees shall be conducted, insofar as is practical, in accordance with the agenda published in this **Federal Register** notice. Changes in the agenda will be announced at the beginning of the open portion of a meeting.

Any interested person who wishes to be assured of the right to make an oral presentation at the open public hearing portion of a meeting shall inform the contact person listed above, either orally or in writing, prior to the meeting. Any person attending the hearing who does not in advance of the meeting request an opportunity to speak will be allowed to make an oral presentation at the hearing's conclusion, if time permits, at the chairperson's discretion.

Persons interested in specific agenda items to be discussed in open session may ascertain from the contact person the approximate time of discussion.

Details on the agenda, questions to be addressed by the committee, and a current list of committee members are available from the contact person before and after the meeting. Transcripts of the open portion of the meeting will be available from the Freedom of Information Office (HFI–35), Food and Drug Administration, Rm. 12A–16, 5600 Fishers Lane, Rockville, MD 20857, approximately 15 working days after the meeting, at a cost of 10 cents per page. The transcript may be viewed at the Dockets Management Branch (HFA–305), Food and Drug Administration, Rm. 4–62, 5600 Fishers Lane, Rockville, MD 20857, approximately 15 working days after the meeting, between the hours of 9 a.m. and 4 p.m., Monday through Friday. Summary minutes of the open portion of the meeting will be available from the Freedom of Information Office (address above) beginning approximately 90 days after the meeting.

The Commissioner, with the concurrence of the Chief Counsel, has determined for the reasons stated that those portions of the advisory committee meetings so designated in this notice shall be closed. The Federal Advisory Committee Act (FACA), as amended by the Government in the Sunshine Act (Pub. L. 94–409), permits such closed advisory committee meetings in certain circumstances. Those portions of a meeting designated as closed, however, shall be closed for the shortest possible time, consistent with the intent of the cited statutes.

The FACA, as amended, provides that a portion of a meeting may be closed where the matter for discussion involves a trade secret; commercial or financial information that is privileged or confidential; information of a personal nature, disclosure of which would be a clearly unwarranted invasion of personal privacy; investigatory files compiled for law enforcement purposes; information the premature disclosure of which would be likely to significantly frustrate implementation of a proposed agency action; and information in certain other instances not generally relevant to FDA matters.

Examples of portions of FDA advisory committee meetings that ordinarily may be closed, where necessary and in accordance with FACA criteria, include the review, discussion, and evaluation of drafts of regulations or guidelines or similar preexisting internal agency documents, but only if their premature disclosure is likely to significantly frustrate implementation of proposed agency action; review of trade secrets and confidential commerical or financial information submitted to the agency; consideration of matters involving investigatory files compiled for law enforcement purposes; and review of matters, such as personnel records or individual patient records, where disclosure would constitute a clearly unwarranted invasion of personal privacy.

Examples of portions of FDA advisory committee meetings that ordinarily shall not be closed include the review, discussion, and evaluation of general preclinical and clinical test protocols and procedures for a class of drugs or devices; consideration of labeling requirements for a class of marketed drugs or devices; review of data and information on specific investigational or marketed drugs and devices that have previously been made public; presentation of any other data or information that is not exempt from public disclosure pursuant to the FACA, as amended; and, notably deliberative sessions to formulate advice and recommendations to the agency on matters that do not independently justify closing.

This notice is issued under section 10(a) (1) and (2) of the Federal Advisory Committee Act (Pub. L. 92–463, 86 Stat. 770–776 (5 U.S.C. App. I)), and FDA's regulations (21 CFR Part 14) on advisory committees.

Dated: December 14, 1987.

Frank E. Young,

Commissioner of Food and Drugs.

[FR Doc. 87–29230 Filed 12–21–87; 8:45 am]

BILLING CODE 4160–01–M

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[AA–620–08–4111–01–24–10]

Delay in Increase in Rental Rates on Simultaneous Oil and Gas Leases Extended

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of rental reduction for simultaneous oil and gas leases with annual rental due dates through February 1, 1989.

SUMMARY: The Secretary of the Interior has granted a rental reduction for an additional year for all simultaneous oil and gas leases with annual rental due dates through February 1, 1989, whose rental rates would increase from $1 to $3 per acre. This action extends the Secretarial decision initially drafted in September 1986 and announced by the **Federal Register** notice published on October 24, 1986 (51 FR 37793). The rental reduction suspension action will continue to be reviewed on an annual basis.

EFFECTIVE DATE: December 22, 1987.

ADDRESS: Inquiries or suggestions should be sent to: Director (620), Bureau of Land Management, Room 602 Premier Building, 18th & C Streets, NW., Washington, DC 20240.

FOR FURTHER INFORMATION CONTACT: Gloria J. Austin, (202) 653–2190.

SUPPLEMENTARY INFORMATION: The Secretary of the Interior announced on December 10, 1987, the decision to continue to grant a rental reduction for an additional year for all simultaneous oil and gas leases with annual rental due dates through February 1, 1989, whose rental rates would increase from $1 to $3 per acre or fraction thereof. In response to the President's message regarding Federal energy assets and lessening the burden on domestic energy production, this action will reduce annual rentals for all simultaneous leases, issued with a normal effective date of March 1, 1982, through March 1, 1984, subject to the rulemaking published on January 20, 1982 (47 FR 2864), which became effective February 19, 1982. The regualtion (43 CFR Part 3103) imposes a $3 per acre annual rate on those leases entering their sixth or subsequent year on which lessees have been paying $1 per acre for the first 5 years.

The regulatory change of January 20, 1982, initiated for the purpose of encouraging diligence through an increased or additional holding cost, would be counterproductive during the present weak domestic energy market and would lead to the return of large numbers of leases to the Federal Government through either relinquishment or failure to pay annual rental. During the first half of FY–1987, Federal oil and gas lessees outside of Alaska allowed approximately 8,700 leases on 12.9 million acres to be returned. This is a 28 percent increase over the number of leases returned during the same period of FY–1986, and a 98 percent increase over the first half of FY–1985. It is anticipated that a rental reduction to $1 per acre or fraction thereof will keep more lands under lease, encourage domestic exploration and allow more economical Federal oil and gas lease development.

This rental reduction is granted by the Secretary of the Interior under section 39 of the Mineral Leasing Act of 1920 (30 U.S.C. 209), and will continue to be reviewed annually to determine whether to extend the policy.

Additionally, any simultaneous oil and gas leases that terminated during their primary term, but were reinstated under the Class II procedures at 43 CFR 3108.2–3, do not revert to the $1 per acre rental rate, but retain the higher rental amount as provided under the terms of the Class II reinstated leases. Further, any simultaneous oil and gas leases for which all or a portion of the lands were determined to be within a known geological structure prior to the beginning of their sixth or subsequent year do not revert to the $1 per acre rental rate and shall require annual rental of $2 per acre or fraction thereof in accordance with 43 CFR 3103.2–2(d).

Date: December 10, 1986.

Donald Paul Hodel,

Secretary of the Interior.

[FR Doc. 87–29223 Filed 12–21–87; 8:45 am]

BILLING CODE 4310–84–M

Minerals Management Service

Development Operations Coordination Document; Conoco Inc.

AGENCY: Minerals Management Service, Interior.

ACTION: Notice of the receipt of a proposed Development Operations Coordination Document (DOCD).

SUMMARY: Notice is hereby given that Conoco Inc. has submitted a DOCD describing the activities it proposes to conduct on Lease OCS–G 2825, Block 65, West Cameron Area, offshore Louisiana. Proposed plans for the above area provide for the development and production of hydrocarbons with support activities to be conducted from onshore bases located at Cameron and Morgan City, Louisiana.

DATE: The subject DOCD was deemed submitted on December 11, 1987.

ADDRESS: A copy of the subject DOCD is available for public review at the Public Information Office, Gulf of Mexico OCS Region, Minerals Management Service, 1201 Elmwood Park Boulevard, Room 114, New Orleans, Louisiana (Office Hours: 8 a.m. to 4:30 p.m., Monday through Friday).

FOR FURTHER INFORMATION CONTACT: Warren Williamson; Minerals Management Service, Gulf of Mexico OCS Region, Field Operations, Plans, Platform and Pipeline Section, Exploration/Development Plans Unit; Telephone (504) 736–2874.

SUPPLEMENTARY INFORMATION: The purpose of this Notice is to inform the public, pursuant to section 25 of the OCS Lands Act Amendments of 1978, that the Minerals Management Service is considering approval of the DOCD and that it is available for public review.

Revised rules governing practices and procedures under which the Minerals Management Service makes information contained in DOCDs available to affected States, executives of affected local governments, and other interested parties became effective December 13, 1979 (44 FR 53685). Those practices and procedures are set out in revised § 250.34 of Title 30 of the CFR.

Date: December 14, 1987.

J. Rogers Pearcy,

Regional Director, Gulf of Mexico OCS Region.

[FR Doc. 87-29234 Filed 12-21-87; 8:45 am]

BILLING CODE 4310-MR-M

Development Operations Coordination Document; Shell Offshore Inc.

AGENCY: Minerals Management Service, Interior.

ACTION: Notice of the receipt of a proposed Development Operations Coordination Document (DOCD).

SUMMARY: Notice is hereby given that Shell Offshore Inc. has submitted a DOCD describing the activities it proposes to conduct on Lease OCS-G 2279, Block 106, South Marsh Island Area, offshore Louisiana. Proposed plans for the above area provide for the development and production of hydrocarbons with support activities to be conducted from an existing onshore base located at Morgan City, Louisiana.

DATE: The subject DOCD was deemed submitted on December 14, 1987.

ADDRESS: A copy of the subject DOCD is available for public review at the Public Information Office, Gulf of Mexico OCS Region, Minerals Management Service, 1201 Elmwood Park Boulevard, Room 114, New Orleans, Louisiana (Office Hours: 8 a.m. to 4:30 p.m., Monday through Friday).

FOR FURTHER INFORMATION CONTACT: Michael J. Tolbert; Minerals Management Service, Gulf of Mexico OCS Region, Field Operations, Plans, Platform and Pipeline Section, Exploration/Development Plans Unit; Telephone (504) 736-2867.

SUPPLEMENTARY INFORMATION: The purpose of this Notice is to inform the public, pursuant to section 25 of the OCS Lands Acts Amendments of 1978, that the Minerals Management Service is considering approval of the DOCD and that it is available for public review.

Revised rules governing practices and procedures under which the Minerals Management Service makes information contained in DOCDs available to affected States, executives of affected local governments, and other interested parties became effective December 13, 1979 (44 FR 53685). Those practices and procedures are set out in revised § 250.34 of Title 30 of the CFR.

Date: December 15, 1987.

J. Rogers Pearcy,

Regional Director, Gulf of Mexico OCS Region.

DEPARTMENT OF JUSTICE

Loging of Consent Decree Pursuant to the Clean Air Act

In accordance with Departmental policy, 28 CFR 50.7, notice is hereby given that on December 10, 1987 a proposed Consent Decree in *United States v. Combustion Engineering, Inc., et al.*, Civil Action No. 87CV7449 was lodged with the United States District Court of the Eastern District of Michigan. The proposed Consent Decree concerns control of air pollution at defendant's resource recovery facility in Detroit, Michigan. The proposed Consent Decree requires the defendant to comply with specified limits on emissions of air pollutants.

The Department of Justice will receive for a period of thirty (30) days from the date of this publication comments relating to the proposed Consent Decree. Comments should be addressed to the Assistant Attorney General of the Land and Natural Resources Division, Department of Justice, Washington, D.C. 20530, and should refer to *United States v. Combustion Engineering, Inc., et al.*, D.J. Ref. 90-5-2-1-1031.

The proposed consent decree may be examined at the office of the United States Attorney, Eastern District of Michigan, 817 Federal Building, 231 W. Lafayette, Detroit, Michigan 48226, and at the Region 5 Office of the Environmental Protection Agency, Office of Regional Counsel, 230 South Dearborn Street, Chicago, Illinois 60604. Copies of the Consent Decree may be examined at the Environmental Enforcement Section, Land and Natural Resources Division of the Department of Justice, Room 1517, Ninth Street and Pennsylvania NW., Washington, DC 20530. A copy of the proposed Consent Decree may be obtained in person or by mail from the Environmental Enforcement Section, Land and Natural Resources Division of the Deparment of Justice.

Roger J. Marzulla,

Assistant Attorney General Land and Natural Resources Division.

BILLING CODE 4410-09-M

DEPARTMENT OF LABOR

Office of the Secretary

[Secretary of Labor's Order 7-87]

Delegation of Authority and Assignment of Responsibilities for Employment Standards Programs

December 11, 1987.

1. *Purpose.* To delegate authority and assign responsibilities to the Assistant Secretary for Employment Standards.

2. *Background.* Heretofore authority for carrying out activities in connection with the administration of employment standards programs had been delegated to a Deputy Under Secretary for Employment Standards. An Assistant Secretary for Employment Standards position has now been established to replace the position of Deputy Under Secretary for Employment Standards. Consistent with that decision, this Order delegates authority of Secretary's Order 6-84 which was previously vested in the Deputy Under Secretary to the Assistant Secretary. This Order also incorporates those responsibilities under Sections 216(g)(2) and 274A of the Immigration and Nationality Act (INA).

3. *Delegation of Authority and Assignment of Responsibilities.*

a. *The Assistant Secretary for Employment Standards* is hereby delegated authority and assigned responsibility, except as hereinafter provided, for carrying out in the employment standards policies, programs, and activities of the Department of Labor, including those functions to be performed by the Secretary of Labor under:

(1) The Fair Labor Standards Act of 1938 (FLSA), as amended, 29 U.S.C. 201 *et seq.*, including the issuance of child labor hazardous occupation orders and other regulations concerning child labor standards. Authority and responsibility for the Equal Pay Act, section 6d of the FLSA, were transferred to the Equal Employment Opportunity Commission (EEOC) on July 1, 1979, pursuant to the President's Reorganization Plan No. 1 of February 1978.

(2) The Walsh-Healey Public Contracts Act of 1936, as amended, 41 U.S.C. *et seq.*, except those provisions relating to safety and health delegated to the Assistant Secretaries for Occupational Safety and Health and Mine Safety and Health.

(3) The Service Contract Act of 1965, as amended, 41 U.S.C. 351 *et seq.*, except those provisions relating to safety and health delegated to the Assistant Secretary for Occupational Safety and Health.

(4) The Davis-Bacon Act, as amended, and any laws now existing or subsequently enacted, providing for prevailing wage findings by the Secretary in accordance with or pursuant to the Davis-Bacon Act, as amended, 40 U.S.C. 276a-f; the Copeland Act, 40 U.S.C. 276c; Reorganization Plan No. 14 of 1950; and, the Tennessee Valley Authority Act, 16 U.S.C. 831.

(5) The Contract Work Hours and Safety Standards Act, as amended, 40 U.S.C. 327 *et seq.*, except those provisions relating to safety and health delegated to the Assistant Secretary for Occupational Safety and Health.

(6) Title III of the Consumer Credit Protection Act, 15 U.S.C. 1671 *et seq.*

(7) The State and Local Fiscal Assistance Act (Revenue Sharing), as amended, 31 U.S.C. 1221 *et seq.*, as it pertains to prevailing wage rates under the Davis-Bacon Act, as amended, 40 U.S.C. 276a-f.

(8) The labor standards provisions contained in sections 5(i), 5(j), and 7(g) of the National Foundation on the Arts and Humanities Act, as amended, 20 U.S.C. 954(i), 954(j), and 956(g), except those provisions relating to safety and health delegated to the Assistant Secretary for Occupational Safety and Health.

(9) The Migrant and Seasonal Agricultural Worker Protection Act of 1983, Pub. L. 97-470, 29 U.S.C. 1801 *et seq.*

(10) Any remaining activity under the Farm Labor Contractor Registration Act of 1963, as amended and repealed, Pub. L. 88-583, 78 Stat. 920.

(11) Section 3 (relating to education and research) and Section 5 (relating to studies) of the Age Discrimination in Employment Act of 1967 (ADEA), as amended, 29 U.S.C. 621 *et seq.* Authority and responsibility for the remaining provisions of ADEA were transferred to the EEOC on July 1, 1979, pursuant to the President's Reorganization Plan No. 1 of February 1978.

(12) Section 1450(i) of the Safe Drinking Water Act, Pub. L. 93-523, 42 U.S.C. 300 j-9(i).

(13) Section 507 of the Federal Water Pollution Prevention and Control Act, Pub. L. 89-234, 33 U.S.C. 1367.

(14) Section 23 of the Toxic Substances Control Act, 15 U.S.C. 2622.

(15) Section 7001 of the Solid Waste Disposal Act, 42 U.S.C. 6971.

(16) Section 322 of the Clean Air Act, 42 U.S.C. 7622.

(17) Section 210 of the Energy Reorganization Act of 1974, as amended, 42 U.S.C. 5851.

(18) Section 110 of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980, 42 U.S.C. 9610.

(19) Such additional Federal Acts as may from time to time confer upon the Secretary of Labor duties and responsibilities similar to: the Fair Labor Standards Act, 29 U.S.C. 201 *et seq.*; or the Davis-Bacon Act, as amended, 40 U.S.C. 276a-f, and related Acts; or employee protection responsibilities similar to those listed under 4a(12)-(18) above.

(20) The Federal Employees' Compensation Act, as amended and extended, 5 U.S.C. 8101 *et seq.*, except 8149 as it pertains to the Employees' Compensation Appeals Board.

(21) The Longshore and Harbor Worker's Compensation Act, as amended and extended, 33 U.S.C. 901 *et seq.*, except: 33 U.S.C. 921(b) as it applies to the Benefits Review Board; 33 U.S.C. 941 relating to activities assigned to the Assistant Secretary for Occupational Safety and Health; and, 33 U.S.C. 919(d) with respect to hearing examiners in the Office of Administrative Law Judges.

(22) Title IV of the Federal Mine Safety and Health Act of 1977, as amended, 30 U,S.C. 901 *et seq.*

(23) Title 38, U.S.C. 2012, except for monitoring of the Federal contractor job listing activities under section 2012(a) and the annual Federal contractor reporting obligations under 2012(d) delegated to the Assistant Secretary for Veterans' Employment and Training.

(24) Sections 501(a), 501(f), 502, and 503 of the Rehabilitation Act of 1973, as amended, Pub. L. 93-112, and Executive Order 11758.

(25) Executive Order 11246, as amended by Executive Order 11375 and Executive Order 12086—Federal Contract Compliance.

(26) Section 216(g)(2) (relating to the H-2A program) and section 274A(b)(3) (relating to employment eligibility verification and related recordkeeping) of the Immigration and Nationality Act (INA) of 1952, as amended, Pub. L. 82-414, as amended by Pub. L. 99-603.

b. *The Assistant Secretary for Employment Standards* is hereby delegated authority to designate appropriate officers of the Employment Standards Administration to perform functions provided under section 274A(b)(3) of the Immigration and Nationality Act (INA) of 1952, as amended, Pub. L. 82-414, as amended by Pub. L. 99-603.

c. *The Solicitor of Labor* shall have the responsibility for providing legal advice and assistance to all officers of the Department relating to the administration of the statutes and Executive orders listed in paragraph 4a above. The bringing of legal proceedings under the statutes and Executive orders listed in paragraph 4a above, the representation of the Secretary of Labor and/or other officials of the Department of Labor, and the determination of whether such proceedings or representation is appropriate in a given case are delegated exclusively to the Solicitor of Labor.

4. *Reservation of Authority.*

a. The submission of reports and recommendations to the President and the Congress concerning the administration of statutes and Executive orders listed in paragraph 4a above is reserved to the Secretary.

b. The jurisdiction of the Wage and Appeals Board, as presently described in Secretary's Order 24-70 (36 FR 306) and its rules of practice (29 CFR Part 7), is reserved, and the Board shall be authorized to review decisions under this Order relating to the Davis-Bacon Act and related laws within the scope of its jurisdiction, and relating to the Contract Work Hours and Safety Standards Act (except under contracts subject to the Service Contract Act).

c. The jurisdiction of the Board of Service Contract Appeals, as presently described in 29 CFR Part 8 and its rules of practice is reserved, and the Board shall be authorized to review decisions under this Order relating to the Service Contract Act and to the Contract Work Hours and Safey Standards Act under contracts subject to the Service Contract Act.

d. The determination of the application of the ineligible list provisions of section 3 of the Walsh-Healey Public Contracts Act, 41 U.S.C. 37, is reserved to the Secretary.

e. The determination of the

BEST COPY AVAILABLE

application of the ineligible list provisions of section 5 of the Service Contract Act, 41 U.S.C. 354, is reserved to the Secretary, with respect to all cases in which recommendations of administrative law judges were issued prior to March 21, 1984.

f. Decisions under section 103(b)(2) and 503(b)(2) of the Migrant and Seasonal Agricultural Worker Protection Act which permit the Secretary to modify or vacate the decision of an administrative law judge shall also be reserved to the Secretary.

g. Final decisions under paragraph 4(a)(12)–(18), and related final decisions which may be made under paragraph 4(a)(19), are reserved to the Secretary.

5. *Directive Affected.* Secretary's Order 6–84 is canceled.

6. *Effective Date.* This Order is effective immediately.

Dennis E. Whitfield,

Deputy Secretary of Labor.

BILLING CODE 4510–23–M

Employment and Training Administration

Investigations Regarding Certifications of Eligibility To Apply for Worker Adjustment Assistance

Petitions have been filed with the Secretary of Labor under section 221(a) of the Trade Act of 1974 ("the Act") and are identified in the Appendix to this notice. Upon receipt of these petitions, the Director of the Office of Trade Adjustment Assistance, Employment and Training Administration, has instituted investigations pursuant to section 221(a) of the Act.

The purpose of each of the investigations is to determine whether the workers are eligible to apply for adjustment assistance under Title II, Chapter 2, of the Act. The investigations will further relate, as appropriate, to the determination of the date on which total or partial separations began or threatened to begin and the subdivision of the firm involved.

The petitioners or any other persons showing a substantial interest in the subject matter of the investigations may request a public hearing, provided such request is filed in writing with the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than January 4, 1988.

Interested persons are invited to submit written comments regarding the subject matter of the investigations to the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than January 4, 1988.

The petitions filed in this case are available for inspection at the Office of the Director, Office of Trade Adjustment Assistance, Employment and Training Administration, U.S. Department of Labor, 601 D Street NW., Washington, DC 20213.

Signed at Washington, DC, this 14th day of December 1987.

Marvin M. Fooks,

Director, Office of Trade Adjustment Assistance.

Delco Systems Operations, Culpeper, VA; Negative Determination on Remand

Pursuant to the U.S. Court of International Trade remand of November 5, 1987 in *Former Employees of Delco Systems Operations* v. *the United States* (USCIT No. 86–12–01545), and on further review, it is recommended that the Department's original denial of trade adjustment assistance for workers for Delco Systems Operations, Culpeper, Virginia be reaffirmed.

The Diesel Division of General Motors (DDGM) in Canada was awarded a contract by the U.S. Department of Defense to build several different models of light armored vehicles. One of the models was the LAV–25MC. The LAV–25MC required gun turrets the production of which was exclusively subcontracted to Delco Systems Operations in Culpeper, Virginia in order to increase the domestic labor content provisions of the contract. DDGM in Canada did not simultaneously produce finished gun turrets with the Culpeper facility. The Culpeper facility did not produce gun turrets for anyone else but DDGM in Canada.

Company officials confirmed investigative findings that the workers at Culpeper produced the finished gun turrets for LAV–25MC vehicles. The gun turrets were sold and shipped under contract to DDGM in Canada where they were mounted on the LAV–25MC vehicles which were imported into the United States by the U.S. Government. Company officials stated that the Culpeper facility was the only source of supply for gun turrents for the LAV–25MC vehicles until the facility closed in October 1985 and its work was consolidated with that of DDGM's plant in London, Ontario. The Culpeper facility did not produce gun turrets for anyone else. The contract under which Delco Systems Operations produced gun turrets provided a closed market where imports of other gun turrets could not be implicated.

In the Court's remand, plaintiffs object to the Department's application of *U.S. Shoe Workers of America, AFL–CIO* v. *Bedell*, 506 F.2d 174 (D.C. Cir. 1974) to this case because "the relationship of shoe counters to shoes is not analogous to the relationship of gun turrets to light armored vehicles. Plaintiffs argue that "all shoe counters are, of necessity, a part of shoes; all gun turrets are not, of necessity, a part of light armored vehicles." Plaintiffs' argument falls short on at least two accounts. First, company officials confirmed the Department's finding that all the gun turrets produced at Culpeper were used for mounting on the LAV–25MC vehicle. All LAV–25MC vehicles were sold with turrets. Second, the gun turrets had no purpose in existing separately by themselves and none were imported into the United States—save one for warranty check-out by Delco Systems Operations.

Plaintiffs allege that the Department is inconsistent in the case at hand with respect to articles constituting a necessary part of or were a necessary factor in the production of a product. To support this allegation, the plaintiffs cite certain trade adjustment assistance cases where the Department did not consider the necessary article as a component. In *Gropper* v. *Donovan; Machine Printers & Engravers Ass'n* v. *Marshall*, and in *Dan Stipe* v. *U.S. Department of Labor* the Department determined, respectively, that imported knit fabric garments did not compete with domestic finished fabric used for production of knit fabric garments; that imported textile fabrics did not compete with domestically produced engraved rollers and screens used to print designs on fabric; and imported raw steel did not compete with domestic steel products such as tunnel liners and sectional plate. Each of these products in the cases cited above has a domestic market in which to test the increased import criterion. This is not the case for custom made gun turrets produced domestically and exported to Canada under an exclusive contract.

Findings on remand show that the gun turrets produced at Culpeper were produced to exact specifications for mounting on the LAV–24MC vehicle. Workers at Culpeper did not produce the LAV–25MC vehicle but only LAV–25MC gun turrets which had no market in themselves except with DDGM of Canada for mounting on the vehicle. The LAV–25MC vehicles are not interchangeable or substitutable with finished gun turrets produced for that vehicle. Accordingly, LAV–25MC vehicles are not like or directly competitive with gun turrets.

Further, the gun turrets produced at Culpeper were produced for an export market and although the gun turrets reentered the United States they did so as a component product incorporated into an altogether different finished article. Accordingly, sales of gun turrets to an export market would not provide a basis for certification.

In the case at hand, the gun turret component is custom made, under contract, for the LAV–25MC vehicle in a market closed by a contract. Production schedules had to be met. When the strike occurred in June, 1985 decisions were made that consolidated the Culpeper production in October 1985 with that of DDGM in Canada. Whether other gun turrets are or are not imported is a moot question since only gun turrets produced under contract by Delco in Culpeper to increase the domestic labor content provisions of the contract were used for mounting of the LAV–25MC vehicle prior to the consolidation.

Further, the Trade Act of 1974 provides benefits to workers when the Department can substantiate that increased imports of articles like or directly competitive with those produced by the workers' firm contributed importantly to decreased sales and/or production and decreased employment at the firm. The findings show that the decreased sales and production criterion of Section 222 of the Trade Act was not met in the period immediately preceding the strike. The strike began in early June, 1985. The findings show increased sales and production in both quantity and value in the first six months of 1985 compared to the same period in 1984. Workers can only receive trade adjustment assistance for separations resulting from a lack of work—not for entering a strike and voluntarily removing themselves from employment. Under the GM–UAW agreement settling the strike, GM workers at Culpeper were able to relocate to Delco Marine (a part of GMs commercial automobile operations) in Fredericksburg, Virginia.

Conclusion

After reconsideration on remand, I reaffirm the original denial of eligibility to apply for adjustment assistance for former workers of Delco Systems Operations, Culpeper, Virginia.

Signed at Washington, DC, this 14th day of December 1987.

Robert O. Deslongchamps;

Director, Office of Legislation and Actuarial Services, UIS.

BILLING CODE 4510–30–M

Minneapolis Electric Steel Casting Co. et al.; Determinations Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 (19 U.S.C. 2273) the Department of Labor herein presents summaries of determinations regarding eligibility to apply for adjustment assistance issued during the period December 7, 1987–December 11, 1987.

In order for an affirmative determination to be made and a certification of eligibility to apply for adjustment assistance to be issued, each of the group eligibility requirements of section 222 of the Act must be met.

(1) That a significant number or proportion of the workers in the workers' firms, or an appropriate subdivision thereof, have become totally or partially separated,

(2) That sales or production, or both, of the firm or subdivision have decreased absolutely, and

(3) That increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have contributed importantly to the separations, or threat thereof, and to the absolute decline in sales or production.

Negative Determinations

In each of the following cases the investigation revealed that criterion (3) has not been met. A survey of customers indicated that increased imports did not contribute importantly to worker separations at the firm.

TA–W–20, 169; Minneapolis Electric Steel Castings Co., Minneapolis, MN

TA–W–20, 161; Facet Enterprises, Inc., Murfreesboro, NC

TA–W–20, 174; Bardons & Oliver, Inc., Cleveland, OH

TA–W–20, 159; Combustion Engineering, Inc., Monongahela, PA

TA–W–20, 082; Powerex, Inc., Auburn, NY

TA–W–20, 175; Castchem, Inc., Muse, PA

TA–W–20, 176; Castamerica, Inc., Pittsburgh, PA

In the following cases the investigation revealed that criterion (3) has not been met for the reasons specified.

TA–W–20, 179; Eureka Crude Purchasing, Inc., Eureka, KS

The workers' firm does not produce an article as required for certification under section 222 of the Trade Act of 1974.

TA–W–20, 170; Navistar International, Waukesha, WI

The investigation revealed that criterion (2) has not been met. Sales or production did not decline during the relevant period as required for certification.

TA–W–20, 192; Shanhouse Outerwear, Inc., Magnolia, AR

Increased imports did not contribute importantly to workers separations at the firm.

TA–W–20, 182; General Motors Corp., BOC Janesville, Janesville, WI

Increased imports did not contribute importantly to workers separations at the firm.

Affirmative Determinations

TA–W–20, 165; Kaiser Aluminum & Chemical Corp., Halethorpe Works, Baltimore, MD

A certification was issued covering all workers of the firm separated on or after September 28, 1986.

TA–W–20, 171, Nor East Plastics, Elmira, NY

A certification was issued covering all workers of the firm separated on or after September 29, 1986.

TA–W–20, 200; White Sands Beachwear, Paterson, NJ

A certification was issued covering all workers of the firm separated on or after October 6, 1986 and before June 8, 1987.

TA–W–20, 162; Climate Master, Utica, NY

A certification was issued covering all workers of the firm separated on or after June 1, 1987.

TA–W–20, 225; Jackes-Evans Manufacturing Co., St. Louis, MO

A certification was issued covering all workers of the firm separated on or after October 12, 1986.

TA–W–20, 054; General Motors Corp., Truck & Bus, Flint, MI

A certification was issued covering all workers of the utility vehicle and station wagon-type truck assembly line at the Flint, Michigan Truck and Bus Division separated on or after August 17, 1986 and before October 30, 1989.

TA–W–20, 210; General Electric Co., Ohio Coil Service, Newcomerstown, OH

A certification was issued covering all workers of the firm separated on or after October 5, 1986.

TA–W–20, 172; Sanyo Manufacturing Corp., Forrest City, AR

A certification was issued covering all workers of the firm separated on or after September 24, 1986.

I hereby certify that the aforementioned determinations were issued during the period December 7, 1987–December 11, 1987. Copies of these determinations are available for inspection in Room 6434, US Department of Labor, 601 D Street NW., Washington, DC 20213 during normal business hours or will be mailed to persons who write to the above address.

Marvin M. Fooks,

Director, Office of Trade Adjustment Assistance.

Dated: December 15, 1987.

NATIONAL FOUNDATION ON THE ARTS AND THE HUMANITIES

Agency Information Collection Under OMB Review

AGENCY: National Endowment for the Humanities.

ACTION: Notice.

SUMMARY: The National Endowment for the Humanities (NEH) has sent to the Office of Management and Budget (OMB) the following proposals for the collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

DATES: Comments on this information collection must be submitted on or before January 21, 1988.

ADDRESSES: Send comments to Ms. Ingrid Foreman, Management Assistant, National Endowment for the Humanities, Administrative Services Office, Room 202, 1100 Pennsylvania Avenue NW., Washington, DC 20506 (202–786–0233) and Ms. Elaina Norden, Office of Management and Budget, New Executive Office Building, 726 Jackson Place NW., Room 3208, Washington, DC 202503 (202–395–7316).

FOR FURTHER INFORMATION CONTACT: Ms. Ingrid Foreman, National Endowment for the Humanities, Administrative Services Office, Room 202, 1100 Pennsylvania Avenue NW., Washington, DC 20506 (202) 786–0233 from whom copies of forms and supporting documents are available.

SUPPLEMENTARY INFORMATION: All of the entries are grouped into new forms, revisions, or extensions. Each entry is issued by NEH and contains the following information: (1) The title of the form; (2) the agency form number, if applicable; (3) how often the form must be filled out; (4) who will be required or asked to report; (5) what form will be used for; (6) an estimate of the number of responses; (7) an estimate of the total number of hours needed to fill out the form. None of these entries are subject to 44 U.S.C. 3504(h).

Category: Revisions

Title: Applications and Instructions Forms for the Publication Subvention Category

Form Number: Not applicable

Frequency of Collection: Annual

Respondents: Publishers of works in the humanities

Use: Application for funding

Estimated Number of Respondents: 119 per year

Estimated Hours for Respondents to Provide Information: 24 per respondent.

Susan Metts,

Assistant Chairman for Administration.

BILLING CODE 7536–01–M

NUCLEAR REGULATORY COMMISSION

[Docket No. 50–316]

Indiana and Michigan Power Co.; Environmental Assessment and Finding of No Significant Impact

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of an amendment to Facility Operating License DPR–74, issued to Indiana and Michigan Power Company (the licensee), for the Donald C. Cook Nuclear Plant, Unit 2, located in Berrien County, Michigan.

Environmental Assessment

Identification of Proposed Action: The amendment would revise the provisions in the Technical Specifications to extend 18-month surveillances from December 31, 1987 to the refueling outage currently scheduled to begin in early 1988 for response-time testing for reactor trip and engineering safety features (ESF) instrumentation; response testing of equipment to ESF signals; reactor vessel level indication calibration; auxiliary feedwater system testing, including channel functional testing of loss of main feedwater pump signal; and diesel generator testing, including relief valve testing and essential service water valve testing. The licensee's application for amendment was dated October 28, 1987.

The Need for the Proposed Action: The proposed amendment is needed to allow certain surviellances and tests to be delayed starting from December 31, 1987 and until the refueling outage currently scheduled to begin in early 1988. If the extension is not granted, the D.C. Cook Unit 2 must be shut down or placed in a condition where an unwarranted reactor trip would be increasingly possible. The extension will allow the plant to continue operation during a period of increased demand.

Environmental Impacts of the Proposed Action: The proposed amendment will extend the period of certain surveillances by approximately 6 months beyond the technical specification requirement of 18 months. The D.C. Cook Unit 2 has been operating at reduced power (80% of full power) to further limit the steam generator tube degradation. This reduced power has extended the fuel cycle and has made it necessary to conduct the surveillances either at power and increase the likelihood of inadvertent reactor trip or at an early shutdown during an increased power demand period. The instrumentation involved has been shown in the past to be reliable and any problems that develop during the extension period will be dealt with in accordance with Technical Specification requirements. Extending the surveillance period will not significant affect operations nor create accidents (or unwarranted transients). Therefore, the Commission concludes that there are no significant radiological environmental impacts associated with the proposed amendment.

The proposed amendment does not affect nonradiological plant effluents and has no other environmental impact. Therefore, the Commission concludes that there are no significant nonradiological environmental impacts associated with the proposed amendment.

Alternatives to the Proposed Action: Since the Commission has concluded that there are no significant environmental effects that would result from the proposed action, any alternatives with equal or greater environmental impacts need not be evaluated. The bounding alternative, however, would be to require an early shutdown with subsequent restart to finish the fuel cycle. This action would create environmental impacts from the additional radioactive wastes (reactor coolant system cleanup) generated as the result of a shutdown and would also result in increased costs for replacement power, etc., without a clear benefit from performing the surveillance tests as scheduled. Requiring the surveillances to be performed at power could result in an inadvertent reactor trip which would have the same effect plus increasing the probability of an accident by challenging safety systems.

Alternative Use of Resources: These actions involve no use of resources not previously considered in the Final Environmental Statement related to operation of the D.C. Cook Nuclear Plant.

Agencies and Persons Consulted: The Commission's staff reviewed the licensee's request and did not consult other agencies or persons.

Finding of No Significant Impact

The Commission has determined not to prepare and environmental impact statement for the proposed amendment.

Based upon the foregoing environmental assessment, we conclude that the proposed action will not have a significant effect on the quality of the human environment.

For further details with respect to this action, see the application for amendment dated October 28, 1987 which is available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, DC and at the Maude Preston Palenske Memorial Library, 500 Market Street, St. Joseph, Michigan 49085.

Dated at Bethesda, Maryland this 17th day of December 1987.

For the Nuclear Regulatory Commission.

David L. Wigginton,

Acting Director, Project Directorate III–3, Division of Reactor Projects—III, IV, V and Special Projects, Office of Nuclear Reactor Regulation.

[FR Doc. 87–29308 Filed 2–21–87; 8:45 am]

BILLING CODE 7590–01–M

[Docket Nos. 50–266 and 50–301

Wisconsin Electric Power Co., Point Beach Nuclear Plant, Unit Nos. 1 and 2; Environmental Assessment and Finding of No Significant Impact

The U.S. Nuclear Regulatory Commission (the Commission or staff) is considering approval of a procedure to dispose of certain very low level radioactive waste pursuant to 10 CFR 20.302 as requested by Wisconsin Electric Power Company (the licensee) for Point Beach Nuclear Plant, Units 1 and 2, located in Manitowoc County, Wisconsin.

Environmental Assessment

Identification of Proposed Action: The proposed action would approve the periodic removal and on-site disposal of slightly radioactive sludge. The materials involved in this sludge disposal are the residual solids remaining in solution upon completion of the aerobic digestion sewage treatment process at Point Beach Nuclear Plant (PBNP). Wash basins located in the controlled area of the plant are believed to be the source of the very small quantity of radionuclides observed in the sludge. Six sites surrounding PBNP and owned by the licensee would be used for disposal of the sludge. The sludge would be plowed, disked, injected or otherwise incorporation into the surface soil layer. The proposed action is more fully discussed in the licensee's letter dated July 14, 1987 as supplemented by letter dated August 6 and October 8, 1987.

Need for Proposed Action: The waste involved in this disposal process consists of the residual solids remaining in solution upon completion of the aerobic digestion sewage treatment process utilized in PBNP. The PBNP sewage treatment plant issued in process waste water from the plant sanitary and potable water systems. These systems produce nonradioactive waste streams with the possible exception of wash basins located in the radiologically controlled area of the plant. These wash basins are believed to be the primary source of the extremely small quantities of radionuclides in the sludge. The sewage sludge generated at PBNP is allowed to accumulate in the sewage plant digestor and aeration basin. Two to four times annually, depending on work activities and corresponding work force at PNBP, the volumes of the sludge in the digestor and aeration basin needs to be reduced to allow continued efficient operation of the treatment facility. The total volume of sludge removd during each disposal operation is typically on the order of 15,000 gallons. The maximum capacity for the entire PBNP treatment facility and hence the maximum disposal volume is about 30,000 gallons. In the case of a maximum capacity disposal doses would not necessarily increase in proportion to the volume, since more than one disposal site may be used.

Trace amounts of radionuclides have been identified in PBNP sludge currently being stored awaiting disposal. The radionuclides identified and their concentrations in the sludge are summarized below:

Nuclide	Concentration (microcurie/cc)
Co–60	2.33E–07
Cs–137	1.50E–07

The total activity of the radionuclides in the stored sludge, based on the identified concentrations and a total volume of 15.000 gallons of sewage sludge, as follows:

Nuclide	Activity (microcuries)
Co–60	13.2
Cs–137	8.5

These concentrations and activities are representative of past and future values of concentrations and activities of radionuclides in the sludge which has been or is to be land spread.

Environmental Impacts of the Proposed Action: The rate of sewage sludge application on each of the six proposed sites will be monitored to insure doses are maintained within applicable limits. These limits require doses to the maximally exposed member of the general public to be maintained less than 1 mrem/year due to the disposal material. In addition, NRC guidance requires doses of less than 5 mrem/year to an inadvertent intruder.

Specifically, the radionuclide concentrations in the sludge shall be determined prior to each disposal by obtaining three representative samples from each of the sludge storage tanks. The samples shall be counted utilizing a GeLi detector and multichannel analyzer with appropriate geometry. The detection system is routinely calibrated and checked to ensure the lower limits of detection are within values specified in the Radiological Effluent Technical Specifications (RETS).

To insure the samples are representative of the overall concentration in the storage tanks, the radionuclide concentration determination for each of the three samples shall be analyzed to insure each sample is within two standard deviations of average value of three samples. If this criteria is not met, additional samples will be obtained and analyzed to insure a truly representative radionuclides concentration is utilized for dose calculations and concentration limit determinations. The average of all statistically valid concentration determinations will be utilized in determining the storage tank concentration values.

The radionuclides identified in the sludge, along with their respective concentrations, will be compared to concentration limits prior to disposal. The methodology discusses in Appendix F of the licensee's October 8, 1987 letter will be used in determining compliance with the proposed concentration limit. The total activity of the proposed disposal will be compared to the proposed activity limit as described in Appendix F.

In the concentration and activity limit criteria are met, the appropriate exposure pathways (as described in Appendix D of the licensee's October 8, 1987 letter) will be evaluated prior to each application of sludge. These exposures will be evaluated to insure the dose to the maximally exposed individual will be maintained less than 1 mrem/year and the dose to the inadvertent intruder is maintained less than 5 mrem/year. The exposure will be calculated utilizing the methodology used in Appendix E of the licensee's October 8, 1987 letter, including the current activity to be landspread along with the activity from all prior disposal. The remaining radioactivity from prior disposals will be corrected for radiological decay prior to performing dose calculations for the meat, milk, and vegetable ingestion pathways, the inhalation of resuspended radionuclides, and all pathways associated with a release to Lake Michigan. The residual radioactivity will be corrected for radiological decay and, if appropriate, the mixing of the radionuclides in the soil by plowing prior to performing external exposure calculations.

To assess the doses received by the maximally exposed individual and the inadvertent intruder, six credible pathways have been identified for the maximally exposed individual and four credible pathways for the inadvertent intruder. The identified credible pathways are described in Appendix D of the licensee's October 8, 1987 letter.

Calculations detailed in Appendix E of the licensee's October 8, 1987 letter demonstrate the disposal of the currently stored PBNP sewage sludge would result in exposures below these limits. The total annual exposure to the maximally exposed individual based on the identified exposure pathways is equal to 0.072 mrem. The dose to a hypothetical intruder assuming an overly conservative occupancy factor of 100% is calculated to be 0.115 mrem/year. By definition, the inadvertent intruder would not be exposed to the processed food pathways (meat and milk).

The calculation methodology used in determining doses for the proposed disposal of sludge stored at PBNP shall be utilized prior to each additional land application to insure doses are maintained less than those proposed by NRC. This calculation will include radionuclides disposed of in previous sludge applications. The activity from these prior disposals will be corrected for radiological decay prior to performing dose calculations for that meat, milk, and vegetable ingestion pathways, the inhalation of resuspended radionuclides, and all pathways associated with a potential release to Lake Michigan. The residual radioactivity will be corrected for radiological decay and, if applicable, the mixing of radionuclides in the soil prior to performing external exposure calculations. In addition, the dose to a farmer potentially leasing more than one application site will be addressed by summing the doses received from the external exposure from a ground plane source and resuspension inhalation pathways for each leased site. In addition, the maximum site-specific dose due to the other pathways identified in Appendix D to the licensee's October 8, 1987, letter will be utilized in the total exposure estimation.

The licensee's letter dated October 8, 1987 includes an analysis and evaluation of pertinent information as to the nature of the environment, including topographical, geological, meteorological and hydrological characteristics; usage of ground and surface waters in the general area; the nature and location of other potentially affected facilities; and procedures to be observed to minimize the risk of unexpected or hazardous exposures.

Based on a review and evaluation of the licensee's application, the staff concludes that the possible radiation risks to members of the general public as a result of such disposal would be well below regulatory limits.

Alternatives to the Proposed Action: The "no action" alternative is to deny the licensee's request for approval; namely, that other, more costly alternatives for disposal of the sludge would be necessary to support continued plant operation. This would entail packaging the sludge for transport to the disposal in a licensed waste burial site. The "no action" alternative also entails increased risks during transportation associated with offsite shipments, whereas transport for the proposed action is for very short distances across licensee-owned property.

Agencies and Persons Consulted: The staff reviewed the licensee's request and has not consulted other agencies or persons.

Finding of No Significant Impact

The Commission has determined not to prepare an environmental impact statement for the proposed action.

Based upon this environmental assessment, we conclude that the proposed action will not have a significant effect on the quality of the human environment.

For further details with respect to this action, see the licensee's application dated July 14, 1987, as supplemented on August 6 and October 8, 1987, which is available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, DC, and at the Joseph P. Mann Library, 1516 Sixteenth Street, Two Rivers, Wisconsin.

Dated at Bethesda, Maryland, this 16 day of December 1987.

For the Nuclear Regulatory Commission.

Kenneth E. Perkins,

Director, Project Directorate III–3, Division of Reactor Projects.

[FR Doc. 87–29307 Filed 12–21–87; 8:45 am]

BILLING CODE 7590–01–M

Advisory Committee on Reactor Safeguards Subcommittee on Reactor Operations; Meeting

The ACRS Subcommittee on Reactor Operations will hold a meeting on January 5, 1988, Room 1046, 1717 H Street, NW., Washington, DC.

The entire meeting will be open to the public attendance.

The agenda for the subject meeting shall be as follows:

Tuesday, January 5, 1988—1:00 p.m. until the conclusion of business

The Subcommittee will be briefed on, and discuss problems involved with, in-service testing.

Oral statements may be presented by members of the public with the concurrence of the Subcommittee Chairman; written statements will be accepted and made available to the Committee. Recordings will be permitted only during those portions of the meeting when a transcript is being kept, and questions may be asked only by members of the Subcommittee, its consultants, and Staff. Persons desiring to make oral statements should notify the ACRS staff member named below as far in advance as is practicable so that appropriate arrangements can be made.

During the initial portion of the meeting, the Subcommittee may exchange preliminary views regarding matters to be considered during the balance of the meeting. The Subcommittee will then hear presentations by and hold discussions with representatives of the NRC Staff and other interested persons regarding this review.

Further information regarding topics to be discussed, whether the meeting has been cancelled or rescheduled, the Chairman's ruling requests for the opportunity to present oral statements and the time allotted therefor can be obtained by a prepaid telephone call to the cognizant ACRS staff member, Mr. Herman Alderman (telephone 202/634–1414) between 8:15 a.m. and 5:00 p.m. Persons planning to attend this meeting are urged to contact the above named individual one or two days before the scheduled meeting to be advised of any changes in schedule, etc., which may have occurred.

Date: December 15, 1987.

Morton W. Libarkin,

Assistant Executive Director for Project Review.

[FR Doc. 29302 Filed 12–21–87; 8:45 am]

BILLING CODE 7590–01–M

Advisory Committee on Reactor Safeguards, Subcommittee on Advanced Reactor Designs; Meeting

The ACRS Subcommittee on Advanced Reactor Designs will hold a meeting on January 6, 1988, Room 1046, 1717 H Street NW., Washington, DC.

The entire meeting will be open to public attendance.

The agenda for the subject meeting shall be as follows:

Wednesday, January 6, 1988—8:30 a.m. until the conclusion of business

The Subcommittee will review and comment on the draft Commission paper that will be prepared by the NRC Staff regarding the severe accidents and containment issues for the DOE-sponsored advanced reactor designs.

Oral statements may be presented by members of the public with the concurrence of the Subcommittee Chairman written statements will be accepted and made available to the Committee. Recordings will be permitted only during those portions of the meeting when a transcript is being kept, and questions may be asked only by members of the Subcommittee, its consultants, and Staff. Persons desiring to make oral statements should notify the ACRS staff member named below as far in advance as is practicable so that appropriate arrangements can be made.

During the initial portion of the meeting, the Subcommittee, along with any of its consultants who may be present, may exchange preliminary views regarding matters to be considered during the balance of the meeting.

The Subcommittee will then hear presentations by and hold discussions with representatives of the NRC Staff, its consultants, and other interested persons regarding this review.

Further information regarding topics to be discussed, whether the meeting has been cancelled or rescheduled, the Chairman's ruling on requests for the opportunity to present oral statements and the time allotted therefor can be obtained by a prepaid telephone call to the cognizant ACRS staff member, Mr. M. El-Zeftawy (telephone 202/634–3267) between 8:15 a.m. and 5:00 p.m. Persons planning to attend this meeting are urged to contact the above named individual one or two days before the scheduled meeting to be advised of any changes in schedule, etc., which may have occurred.

Dated: December 15, 1987.

Morton W. Libarkin,

Assistant Executive Director for Project Review.

BILLING CODE 7590–01–M

[Docket No. 50–440A]

Cleveland Electric Illuminating Co. et al; Request To Suspend the Perry Nuclear Power Plant Antitrust License Conditions

By application dated September 18, 1987, the Ohio Edison Company (Ohio Edison or Licensee) requested the Director of the Office of Nuclear Reactor Regulation to amend the Perry Nuclear Power Plant (Perry) operating license, No. NPF–58, issued to Cleveland Electric Illuminating Co., Toledo Edison Co., Dequesne Light Co. and Ohio Edison.

In its application, Ohio Edison suggests that the production cost advantages associated with nuclear power forecasted during the 1970's have not been realized by Perry in the 1980's. Licensee states that the antitrust license conditions attached to the Perry operating license were based on the premise that nuclear power would provide an economic or competitive advantage to its owners. Licensee concludes that because the production cost advantages associated with nuclear power have disappeared the rationale for attaching antitrust license conditions to Perry has also disappeared and consequently, the license conditions as they apply to Ohio Edison should be suspended.

Pursuant to 10 CFR 2.101 and 50.90, the staff is publishing receipt of Licensee's request to amend the Perry operating license in the **Federal Register** and requesting public comment. A copy of the application for amendment has been forwarded to the Attorney General for his review and comment and a copy of this notice is being forwarded to counsel for Cleveland Public Power, Inc. (formerly the Municipal Electric Light Department of the City of Cleveland, Ohio). Moreover a copy of the application for amendment will be available for pubic inspection in the local public document room, Perry Public Library, 3753 Main Street, Perry, Ohio 44081 and at the Commission's Public Document Room located at 1717 H Street NW., Washington, DC 20555 for inspection by any interested party.

Any person who wishes to express views pursuant to the antitrust issues

raised in this amendment request, should submit said views within 45 days of the initial publication of this Notice in the **Federal Register** to the U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Chief, Policy Development and Technical Support Branch, Office of Nuclear Reactor Regulation.

For the Nuclear Regulatory Commission.

Cecil O. Thomas,

Acting Chief, Policy Development and Technical Support Branch, Program Management, Policy Development and Analysis Staff, Office of Nuclear Reactor Regulation.

[FR Doc. 87-29308 Filed 12-21-87; 8:45 am]

BILLING CODE 7590-01-M

[Docket Nos.: 50-373, and 50-374]

Commonwealth Edison Co.; Consideration of Issuance of Amendment to Facility Operating License and Opportunity for Prior Hearing

The United States Nuclear Regulatory Commission (the Commission) is considering issuance of amendments to Facility Operating License Nos. NPF-11 and NPF-18 issued to Commonwealth Edison Company (the licensee), for operation of LaSalle County Station, Units 1 and 2 located in LaSalle County, Illinois.

The amendments would revise Technical Specification 4.0.2.b such that "the combined time interval for any 3 consecutive surveillance intervals shall not exceed 3.25 times the specified surveillance interval" would not be applicable to refuel interval surveillances. With the advent of longer fuel cycles and less frequent and longer outages, LaSalle County Station is encountering difficulty completing surveillances required at a refueling interval by Technical Specifications. This will alleviate the immediate problem and prevent recurrence of this specific situation for successive operating cycles.

Prior to issuance of the proposed license amendment, the Commission will have made findings required by the Atomic Energy Act of 1954, as amended (the Act) and the Commission's regulations.

By January 21, 1988, the licensee may file a request for a hearing with respect to issuance of the amendment to the subject facility operating license and any person whose interest may be affected by this proceeding and who wishes to participate as a party in the proceeding must file a written petition for leave to intervene. Request for a hearing and petitions for leave to intervene shall be filed in accordance with the Commission's "Rules of Practice for Domestic Licensing Proceedings" in 10 CFR Part 2. If a request for a hearing or petition for leave to intervene is filed by the above date, the Commission or an Atomic Safety and Licensing Board, designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board Panel, will rule on the request and/or petition and the Secretary or the designated Atomic Safety and Licensing Board will issue a notice of hearing or an appropriate order.

As required by 10 CFR 2.714, a petition for leave to intervene shall set forth with particularity the interest of the petitioner in the proceeding, and how that interest may be affected by the results of the proceeding. The petition should specifically explain the reasons why intervention should be permitted with particular reference to the following factors: (1) The nature of the petitioner's right under the Act to be made a party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any order which may be entered in the proceeding on the petitioner's interest. The petition should also identify the specific aspect(s) of the subject matter of the proceeding as to which petitioner wishes to intervene. Any person who has filed a petition for leave to intervene or who has been admitted as a party may amend the petition without requesting leave of the Board up to fifteen (15) days prior to the first perhearing conference scheduled in the proceeding, but such an amended petition must satisfy the specificity requirements described above.

Not later than fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, a petitioner shall file a supplement to the petition to intervene which must include a list of the contentions which are sought to be litigated in the matter, and the bases for each contention set forth with reasonable specificity. Contentions shall be limited to matters within the scope of the amendment under consideration. A petitioner who fails to file such a supplement which satisfies these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing, including the opportunity to present evidence and cross-examine witnesses.

A request for a hearing or a petition for leave to intervene shall be filed with the Secretary of the Commission, United States Nuclear Regulatory Commission, Washington, DC 20555, Attention: Docketing and Service Branch, or may be delivered to the Commission's Public Document Room, 1717 H Street NW., Washington, DC, by the above date. Where petitions are filed during the last ten (10) days of the notice period, it is requested that the petitioner or representative for the petitioner promptly so inform the Commission by a toll-free telephone call to Western Union at (800) 325-6000 (in Missouri (800) 342-6700). The Western Union operator should be given DATAGRAM Identification Number 3737 and the following message addressed to Daniel R. Muller: petitioner's name and telephone number; date petition was mailed; plant name; and publication date and page number of this **Federal Register** notice. A copy of the petition should also be sent to the Office of the General Counsel—Bethesda, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and to Joseph Gallo, Isham, Lincoln, and Beale, 1150 Connecticut Ave. NW., Suite 1100, Washington, DC 20036, attorney for the license.

Nontimely filings of petitions for leave to intervene, amended petitions, supplemental petitions and/or requests for hearing will not be entertained absent a determination by the Commission, the presiding officer or the presiding Atomic Safety and Licensing Board, that the petition and/or request should be granted based upon a balancing of the factors specified in 10 CFR 2.714(a)(1)(i)-(v) and 2.714(d).

For further details with respect to this action, see the application for amendment dated December 4, 1987, which is available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, DC, and at the Public Library of Illinois Valley Community College, Rural Route No. 1, Oglesby, Illinois 61348.

Dated at Bethesda, Maryland this 15th day of December 1987.

For the Nuclear Regulatory Commission.

Daniel R. Muller,

Director, Project Directorate III-2, Division of Reactor Projects—III, IV, V and Special Projects.

BILLING CODE 7590-01-M

[Docket Nos. 55-60402; ASLBP No. 87-552-03-SP]

David W. Held (Senior Operator License for Beaver Valley Nuclear Power Station, Unit 1); Oral Presentation

December 16, 1987.

Before Administrative Judge: Peter B. Bloch, Presiding Officer.

An Oral Presentation, open to the public, will be convened in the U.S. Post Office Building, Room #40, 777 Corporation St., Beaver, Penn. 15009, January 5, 1988 (Tuesday) from 9 am to 5 pm.

Mr. David Held will be asked to present orally his point-by-point response to the affidavit of Mr. Barry Norris. Staff counsel or staff's witness may be requested to clarify which specific words of plant procedures or technical specifications are being relied on and otherwise to participate to the extent that it is helpful to the clarification of issues. I anticipate asking questions to assure that each point is addressed.

I note that Staff did not respond affirmatively to my suggestion that it propose an oral presentation date prior to January 12; the January 5 date is, therefore, set over the Staff's objection, stated in its Motion of December 15, 1987. Any motions that may affect this proceeding shall be reduced to writing and *received* by me and the other party before December 25, 1987. Subject to exceptions that I may grant, written responses shall be *received* no later than noon of January 4.

A transcript will be taken. Parties may be permitted to make closing summaries. I anticipate closing the record after this presentation and precluding further filings.

Peter B. Bloch,

Administrative Judge.

Bethesda, Maryland.

BILLING CODE 7590-01-M

[Docket Nos. 50-315 and 316]

Indiana and Michigan Power Co.; Consideration of Issuance of Amendment to Facility Operating License and Opportunity for Prior Hearing

The United States Nuclear Regulatory Commission (the Commission) is considering issuance of amendments to Facility Operating License Nos. DPR-58 and DPR-74, issued to Indiana and Michigan Power Company (the licensee), for operation of the Donald C. Cook Nuclear Plant, Unit Nos. 1 and 2, located in Berrien County, Michigan.

The amendments would revise the provisions in the Technical Specifications relating to deleting the requirement to measure the moderator temperature coefficient near the end of the fuel cycle. The licensee's application for amendments was dated October 20, 1987.

Prior to issuance of the proposed license amendments, the Commission will have made findings required by the Atomic Energy Act of 1954, as amended (the Act), and the Commission's regulations.

By January 21, 1988, the licensee may file a request for a hearing with respect to issuance of the amendments to the subject facility operating licenses and any person whose interest may be affected by this proceeding and who wishes to participate as a party in the proceeding must file a written petition for leave to intervene. Requests for a hearing and petitions for leave to intervene shall be filed in accordance with the Commission's "Rules of Practice for Domestic Licensing Proceedings" in 10 CFR Part 2. If a request for a hearing or petition for leave to intervene is filed by the above date, the Commission or an Atomic Safety and Licensing Board, designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board Panel, will rule on the request and/or petition and the Secretary or the designated Atomic Safety and Licensing Board will issue a notice of hearing or an appropriate order.

As required by 10 CFR 2.714, a petition for leave to intervene shall set forth with particularity the interest of the petitioner in the proceeding and how that interest may be affected by the results of the proceeding. The petition should specifically explain the reasons why intervention should be permitted with particular reference to the following factors: (1) The nature of the petitioner's right under the Act to be made a party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any order which may be entered in the proceeding on the petitioner's interest. The petition should also identify the specific aspect(s) of the subject matter of the proceeding as to which petitioner wishes to intervene. Any person who has filed a petition for leave to intervene or who has been admitted as a party may amend the petition, without requesting leave of the Board, up to fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, but such an amended petition must satisfy the specificity requirements described above.

Not later than fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, a petitioner shall file a supplement to the petition to intervene which must include a list of the contentions which are sought to be litigated in the matter and the bases for each contention set forth with reasonable specificity. Contentions shall be limited to matters within the scope of the amendment under consideration. A petitioner who fails to file such a supplement which satisfies these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing, including opportunity to present evidence and cross-examine witnesses.

A request for a hearing or a petition for leave to intervene shall be filed with the Secretary of the Commission, United States Nuclear Regulatory Commission, Washington, DC 20555, Attention: Docketing and Service Branch, or may be delivered to the Commission's Public Document Room, 1717 H Street NW., Washington, DC, by the above date. Where petitions are filed during the last ten (10) days of the notice period, it is requested that the petitioner or representative for the petitioner promptly so inform the Commission by a toll-free telephone call to Western Union at (800) 325-6000 (in Missouri (800) 342-6700). The Western Union operator should be given Datagram Identification Number 3737 and the following message addressed to Kenneth E. Perkins, Jr.: (petitioner's name and telephone number); (date petition was mailed); (plant name); and (publication date and page number of this **Federal Register** notice). A copy of the petition should also be sent to the Office of General Counsel—Bethesda, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and to Gerald Charnoff, Shaw, Pittman, Potts and Trowbridge, 2300 N Street NW., Washington, DC 20037, attorney for the licensee.

Nontimely filings of petitions for leave to intervene, amended petitions, supplemental petitions and/or requests for hearing will not be entertained absent a determination by the Commission, the presiding officer or the presiding Atomic Safety and Licensing Board that the petition and/or request should be granted based upon a

balancing of the factors specified in 10 CFR 2.714(a)(1)(i)–(v) and 2.714(d).

For further details with respect to this action, see the application for amendments dated October 20, 1987, which is available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, DC, and at the Maude Preston Palenski Memorial Library, 500 Market Street, St. Joseph, Michigan 49085.

Dated at Bethesda, Maryland, this 9th day of December 1987.

For the Nuclear Regulatory Commission.

David L. Wigginton,

Project Manager, Project Directorate III–3, Division of Reactor Projects.

BILLING CODE 7590–01–M

OFFICE OF PERSONNEL MANAGEMENT

Excepted Service

AGENCY: Office of Personnel Management.

ACTION: Notice.

SUMMARY: This gives notice of positions placed or revoked under Schedules A, B, and C in the excepted service, as required by civil service rule VI, Exceptions from the Competitive Service.

FOR FURTHER INFORMATION CONTACT: Leesa Martin, (202) 653–9404.

SUPPLEMENTARY INFORMATION: The Office of Personnel Management published its last monthly notice updating appointing authorities established or revoked under the Excepted Service provisions of 5 CFR Part 213 on November 24, 1987 (52 FR 45035). Individual authorities established or revoked under Schedule A, B, or C between November 1, 1987, and November 30, 1987, appear in a listing below. Future notices will be published on the fourth Tuesday of each month, or as soon as possible thereafter. A consolidated listing of all authorities will be published as of June 30 of each year.

Schedule A

The following exception has been revoked.

Department of the Navy

One Personnel Security Specialist in the Naval Personnel Program Support Activity, Bureau of Naval Personnel. Effective November 10, 1987.

Schedule B

No Schedule B exceptions were established or revoked during November.

Schedule C

Department of Agriculture

One Confidential Assistant to the General Counsel. Effective November 30, 1987.

Department of Commerce

One Confidential Assistant to the Under Secretary for International Trade. Effective November 3, 1987.

One Confidential Assistant to the Under Secretary for Economic Affairs. Effective November 6, 1987.

One Congressional Liaison Specialist to the Deputy Assistant Secretary for Congressional Affairs. Effective November 12, 1987.

One Confidential Assistant to the Deputy Assistant Secretary for Trade Information and Analysis. Effective November 23, 1987.

One Congressional Liaison Specialist to the Under Secretary for Economic Affairs. Effective November 23, 1987.

One Congressional Liaison Specialist to the Director for Congressional Affairs. Effective November 23, 1987.

One Confidential Assistant to the Deputy Assistant Secretary for Domestic Operations. Effective November 25, 1987.

Department of Defense

One Secretary (Typing) to the Principal Deputy Assistant Secretary for Public Affairs. Effective November 13, 1987.

Department of Education

One Director, Intergovernmental Affairs to the Deputy Under Secretary for Intergovernmental and Interagency Affairs. Effective November 3, 1987.

One Director, Program Informations and Coordination Staff to the Assistant Secretary for Special Education and Rehabilitation Services. Effective November 3, 1987.

One Special Assistant to the Special Assistant, Office of the Secretary. Effective November 3, 1987.

One Confidential Assistant to the Director for Office of Special Education Programs. Effective November 4, 1987.

One Special Assistant to the Director for Intergovernmental Affairs. Effective November 4, 1987.

One Confidential Assistant to the Assistant Secretary for Legislation. Effective November 9, 1987.

One Special Assistant to the Deputy Under Secretary for Intergovernmental and Interagency Affairs. Effective November 18, 1987.

One Director of Interagency Operations to the Deputy Under Secretary for Office of Intergovernmental and Interagency Affairs. Effective November 25, 1987.

One Executive Assistant to the Under Secretary. Effective November 30, 1987.

One Executive Assistant to the Deputy Under Secretary for Intergovernmental and Interagency Affairs. Effective November 30, 1987.

Department of Health and Human Services

One Special Assistant to the Director for Office of Community Services. Effective November 12, 1987.

One Special Assistant for National Drug Policy Board to the Administrator for Alcohol, Drug Abuse, and Mental Health Administration. Effective November 12, 1987.

One Special Assistant for National Drug Policy Board to the Administrator for Alcohol, Drug Abuse, and Mental Health Administration. Effective November 23, 1987.

Department of Housing and Urban Development

One Special Assistant to the President for Government National Mortgage Association. Effective November 6, 1987.

One Assistant to the Deputy Assistant Secretary for Congressional Relations. Effective November 18, 1987.

One Assistant to the Deputy Assistant Secretary for Congressional Relations. Effective November 27, 1987.

Department of the Interior

One Supervisory Public Affairs Specialist to the Commissioner of Reclamation. Effective November 3, 1987.

Department of Justice

One Secretary (Steno) to the Assistant Attorney General. Effective November 4, 1987.

One Missing Children's Program Coordinator to the Administrator for Office of Juvenile Justice and Delinquency Prevention. Effective November 6, 1987.

One Attorney-Advisor (General) to the Assistant Attorney General. Effective November 6, 1987.

One Special Assistant to the Director for Community Relations Service. Effective November 9, 1987.

Department of Labor

One Special Assistant to the Secretary. Effective November 9, 1987.

Department of Transportation

One Special Assistant to the Director for Office of Public Affairs. Effective November 10, 1987.

One Special Assistant to the Administrator. Effective November 17, 1987.

One Associate Director for Program Affairs to the Director, Office of Commercial Space Transportation. Effective November 20, 1987.

Department of Treasury

One Special Assistant to the Executive Director for U.S. Savings Bonds Division. Effective November 3, 1987.

One Legislative Manager to the Deputy Assistant Secretary for Legislative Affairs. Effective November 6, 1987.

One Staff Assistant to the Deputy Assistant Secretary for Administration. Effective November 12, 1987.

Action

One Staff Assistant to the Associate Director for Legislative Public and Intergovernmental Affairs. Effective November 5, 1987.

Commodity Futures Trading Commission

One Governmental Affairs Officer to the Chairman. Effective November 30, 1987.

Environmental Protection Agency

One Special Assistant to the Assistant Administrator for Administration and Resources Management. Effective November 23, 1987.

Equal Employment Opportunity Commission

One Special Assistant to the Commissioner. Effective November 4, 1987.

Export-Import Bank of the United States

One Administrative Assistant (Typing) to the President and Chairman. Effective November 3, 1987.

Federal Emergency Management Agency

One Confidential Assistant to the Associate Director for National Preparedness. Effective November 13, 1987.

Federal Martime Commission

One Secretary (Typing) to the Commissioner. Effective November 13, 1987.

Federal Trade Commission

One Confidential Assistant to the Chairman. Effective November 5, 1987.

Office of Management and Budget

One Confidential Assistant to the Executive Assistant to the Director. Effective November 6, 1987.

President's Commission on Executive Exchange

One Secretary (Typing) to the Executive Director. Effective November 13, 1987.

Small Business Administration

One Special Assistant to the Regional Administrator. Effective November 23, 1987.

United States Trade Representative

One Confidential Secretary to the Ambassador. Effective November 23, 1987.

Authority: 5 U.S.C. 3301, 3302; E.O. 10577, 3 CFR 1954–1958 Comp., P. 218.

DEPARTMENT OF TRANSPORTATION

Office of the Secretary

Reports, Forms, and Recordkeeping Requirements; Submittals to OMB on December 15, 1987

AGENCY: Department of Transportation (DOT), Office of the Secretary.

ACTION: Notice.

SUMMARY: This notice lists those forms, reports, and recordkeeping requirements imposed upon the public which were transmitted by the Department of Transportation on December 15, 1987, to the Office of Management and Budget (OMB) for its approval in accordance with the requirements of the Paperwork Reudction Act of 1980 (44 U.S.C. Chapter 35).

FOR FURTHER INFORMATION CONTACT: John Chandler, Annette Wilson, or Cordelia Shepherd, Information Requirements Division, M–34, Office of the Secretary of Transportation, 400 Seventh Street SW., Washington, DC 20590, telephone (202) 366–4735, or Gary Waxman or Sam Fairchild, Office of Management and Budget, New Executive Office Building, Room 3228, Washington, DC 20503, (202) 395–7340.

SUPPLEMENTARY INFORMATION:

Background

Section 3507 of Title 44 of the United States Code, as adopted by the Paperwork Reduction Act of 1980, requires that agencies prepare a notice for publication in the **Federal Register**, listing those information collection requests submitted to the Office of Management and Budget (OMB) for initial, approval, or for renewal under that Act. OMB reviews and approves agency submittals in accordance with

criteria set forth in that Act. In carrying out its responsibilities, OMB also considers public comments on the proposed forms, reporting and recordkeeping requirements. OMB approval of an information collection requirement must be renewed at least once every three years.

Information Availability and Comments

Copies of the DOT information collection requests submitted to OMB may be obtained from the DOT officials listed in the "For Further Information Contact" paragraph set forth above. Comments on the requests should be forwarded, as quickly as possible, directly to the OMB officials listed in the "For Further Information Contact" paragraph set forth above. It you anticipate submitting substantive comments, but find that more than 10 days from the date of publication are needed to prepare them, please notify the OMB officials of your intent immediately.

Items Submitted for Review by OMB

The following information collection requests were submitted to OMB on December 15, 1987.

DOT No.: 2978
OMB No.: New
Administration: U.S. Coast Guard
Title: Survey of Alcohol Intoxication In Recreational Boating
Need for Information: This information collection requirement is needed to determine the relative risk of fatal recreational boating accidents associated with various Blood Alcohol Cencentrations (BAC's)
Proposed Use of Information: The information will be used to determine the blood alcohol level of the victims. The Coast Guard will further use this information to inform boaters of their risk and to target boating safety programs. The results of the study will be provided to the states to support their regulation development in the area of boating while intoxicated
Frequency: One time
Burden Estimate: 175
Respondents: Recreational boaters
Form(s): GC–5472

DOT No.: 2985
OMB No.: 2133–0023
Administration: Maritime Administration
Title: Port Facility Inventory
Need for Information: To determine whether individual Port Facilities and Services are available for use by Federal agencies prior to and during National Defense Emergencies
Proposed Use of Information: To maintain data on essential Port Facilities
Frequency: Biennially
Burden Estimate: 30 hours
Respondents: Terminal Owners, Port Operators
Form(s): MA.400

DOT No.: 2990
OMB No.: 2125–0521
Administration: Federal Highway Administration
Title: Developing and Recording Cost For Railroad Adjustments
Need for Information: For railroad companies to maintain adequate records to support costs incurred for reimbursable railroad adjustments on Federal-aid projects
Proposed Use of Information: For FHWA to reimburse State highway agencies for costs of construction on Federal-aid projects
Frequency: Recordkeeping—3 year retention period
Burden Estimate: 4,600
Respondents: Railroad companies
Form(s):

DOT No.: 2991
OMB No.: 2127–0506
Administration: National Highway Traffic Safety Administration
Title: 49 CFR 571.125, Warning Devices
Need for Information: To aid the agency in achieving many of the safety goals
Proposed Use of Information: Manufacturers are required to provide permanently attached labels on warning devices giving name of manufacturer, date of manufacture certifying that it conforms with the applicable standard. Also, it should include specific instructions to the driver
Frequency: On occasion
Burden Estimate: 77 hours
Respondents: Businesses/small businesses
Form(s): None

DOT No.: 2992
OMB No.: 2115–0141
Administration: U.S. Coast Guard
Title: Reporting and Recordkeeping Requirements For Fire Fighting Equipment, Structural Fire Protection Materials, Lifesaving Equipment and Marine Sanitation Devices
Need for Information: The requirements contained in this submission are needed to ensure that emergency and lifesaving equipment is safe and reliable
Proposed Use of Information: The Coast Guard uses the information to approve emergency equipment and to determine that production stock of lifesaving appliances will be identical to those which were originally tested and approved
Frequency: On occasion
Burden Estimate: 7140
Respondents: Equipment manufacturers and independent testing laboratories
Form(s): None

DOT No.: 2993
OMB No.: 2115–0514
Administration: U.S. Coast Guard
Title: Merchant Marine License, Certificate and Document Application Recordkeeping/Reporting Requirements
Need for Information: This information collection requirement is needed to determine and document the training, experience, physical condition, professional qualifications and character of persons applying for a merchant marine license, certificate or document
Proposed Use of Information: The information will be used to determine the applicant's qualifications to receive or continue to hold a license, certificate or document
Frequency: On occasion
Burden Estimate: 100,616.25
Respondents: Applicants for merchant marine license, certificate or document
Form(s): CG–719K, 866, 4509, 4510, 719B, 2765, 2838, 719A, 5206, 5205, 4865, 3750, 2987, 2849, 887, and FD–258

DOT No.: 2994
OMB No.: 2115–0007
Administration: U.S. Coast Guard
Title: Applications For Vessel Inspection/Waiver
Need for Information: This information collection requirement provides basic information which is necessary for the initial planning and scheduling of a vessel inspection. Also, the information collection allows certain vessel owners and operators to apply for a waiver from the inspection laws based on national defense consideration
Proposed Use of Information: This information collection requirement is used to schedule and plan vessel inspections and to analyze the request for waiver
Frequency: On occasion and triennially
Burden Estimate: 1,429
Respondents: Owners, operators and agents of commercial vessels
Form(s): None

DOT No.: 2995
OMB No.: 2115–0073
Administration: U.S. Coast Guard
Title: Alternative Compliance—72 Colregs and Inland Rules
Need for Information: This information collection requirement is needed to justify the respondents request to deviate from the technical requirements of the International Regulations for Preventing Collisions at Sea, 1972, and the Inland Navigational Rules Act of 1980
Proposed use of Information: The information will be used to determine the need for alternative systems on the vessel and the conditions that will apply
Frequency: On occasion
Burden Estimate: 135
Respondents: Vessel owners, operators, builders and agents
Form(s): N/A

DOT No.: 2996
OMB No.: 2120–0022
Administration: Federal Aviation Administration
Title: Certification: Merchanics, Repairmen, Parachute Riggers FAR–65
Need for Information: Certification is required before individuals can perform the specified job functions
Proposed Use of Information: The information is used to ensure that the applicant is qualified
Frequency: On occasion
Burden Estimate: 29,472 hours
Respondents: Individuals
Form(s): FAA—8610–1 and 8610–2

DOT No.: 2997
OMB No.: 2120–0010
Administration: Federal Aviation Administration
Title: Repair Station Certification—FAR–145
Need for Information: The information is needed to ensure that Repair Stations meet minimum acceptable standards
Proposed Use of Information: To issue initial, renewal, and amendments certificates to repair station facilities
Frequency: On occasion
Burden Estimate: 265,835 hours
Respondents: Repair Station Owners
Form(s): FAA Form 8310–3

DOT No.: 2998
OMB No.: 2120–0012
Administration: Federal Aviation Administration
Title: Parachute Lofts FAR–149
Need for Information: To determine compliance and applicant eligibility
Proposed Use of Information: The information is used to determine compliance and applicant eligibility for operation of parachute lofts
Frequency: On occasion
Burden Estimate: 6304
Respondents: Individuals and businesses
Form(s): FAA Form 8310–3

DOT No.: 2999
OMB No.: 2120–0033
Administration: Federal Aviation Administration
Title: Representatives of the Administrator FAR–183
Need for Information: FAA Act, section 314 authorizes appointment of properly qualified private persons to be representatives of the Administrator for examining, testing, and certifying airmen
Proposed Use of Information: The information is used to determine the eligibility of the representatives
Frequency: On occasion
Burden Estimate: 4,626
Respondents: Individuals
Form(s): FAA Forms 810–14, 8520–2, 8710–6

DOT No.: 3000
OMB No.: New Collection
Administration: Federal Highway Administration
Title: Federal Highway Administration
Need for Information: For FHWA and State officials to ensure that commercial motor vehicle operators meet the requirements of 49 CFR Part 383
Proposed Use of Information: For motor carrier employers to assist and ensure that commercial motor vehicle operators meet the provisions of the regulations of 49 CFR Part 383
Frequency: On occasion
Burden Estimate: 496,529
Respondents: Motor Carriers
Form(s):

DOT No.: 3001
OMB No.: 2127–0004
Administration: National Highway Traffic Safety Administration
Title: 49 CFR Part 573, Defect and noncompliance Reports
Need for Information: To monitor the recall campaigns requested by the manufacturers
Proposed Use of Information: Manufacturers of motor vehicles and equipment are required to report to this agency when they determine a recall campaign is needed. This helps the agency know the manufacturer's determination. The manufacturers must report on the status of the recall campaign, so the agency can monitor the recall
Frequency: On occasion
Burden Estimate: 6,300
Respondents: Business/small business or organizations
Form(s): None

DOT No.: 3002
OMB No.: 2120–0049
Administration: Federal Aviation Administration
Title: Agricultural Aircraft Operations FAR 137
Need for Information: The information is required from applicants who wish to be issued a commercial or private agricultural aircraft operator certificate
Proposed Use of Information: To determine applicant eligibility
Frequency: On occasion
Burden Estimate: 11,740 hours
Respondents: Individuals, businesses/small businesses
Form(s): FAA Form 8710–3

DOT No.: 3003
OMB No.: 2120–0028
Administration: Federal Aviation Administration
Title: Operations Specifications
Need for Information: To approve aircraft-operator's requests for operations specifications as are necessary to ensure safety in air transportation
Proposed Use of Information: The information is used to determine applicant's eligibility
Frequency: On occasion
Burden Estimate: 7,600 hours
Respondents: Businesses
Form(s): FAA Form 8400–1, 1A, 7

DOT No.: 3004
OMB No.: 2125–0196
Administration: Federal Highway Administration
Title: Time Records
Need for Information: To meet the requirements of 49 CFR 395.8(1) to provide an exemption from the driver's record of duty status for drivers operating within a 100 air-mile radius of the location to which they report for work
Proposed Use of Information: For FHWA and motor carriers to determine compliance with maximum time limitations are required by 49 CFR 395.3
Frequency: Recordkeeping/6 months
Burden Estimate: 10,804,553
Respondents: Motor carriers
Form(s):

DOT No.: 3005
OMB No.: 2125–0519
Administration: Federal Highway Administration
Title: Developing and Recording Cost for Utility Adjustments
Need for Information: For utility companies to maintain adequate records to support costs incurred for reimbursable utility adjustments on Federal-aid highway projects
Proposed Use of Information: For FHWA to reimburse State highway agencies for the costs of construction of Federal-aid projects
Frequency: Recordkeeping 3 year retention period
Burden Estimate: 480,000
Respondents: Utility companies
Form(s): N/A

DOT No.: 3006

OMB No.: New
Administration: Federal Aviation Administration
Title: Research questionnaire to be used in the program to identify and treat pilot errors
Need for Information: The information is needed to help design decision-making programs for pilots
Proposed Use of Information: To determine what characteristics could be involved in pilot judgment error
Frequency: One time
Burden Estimate: 1,500 hours
Respondents: Pilots
Form(s): Questionnaire

DOT No.: 3007
OMB No.: 2133–0016
Administration: Maritime Administration
Title: 46 CFR Part 298—Title XI Obligation Guarantees
Need for Information: To evaluate applicant eligibility for Title XI Assistance
Proposed Use of Information: To protect the Government's Financial interest in providing ship financing guarantee contracts
Frequency: On occasion; semiannually
Burden Estimate: 2,000 hours
Respondents: Ship owners and ship operators
Form(s): MA–163, attachments

DOT No: 3008
OMB No: 2115–0012
Administration: U.S. Coast Guard
Title: Application for Appointment as Cadet, U.S. Coast Guard Academy
Need for Information: This information collection requirement provides a means for interested persons to apply and compete for an appointment as a Cadet
Proposed Use of Information: The Coast Guard Academy uses this information to review applicants qualifications and qualifications and to determine eligibility
Frequency: Once per applicant
Burden Estimate: 8,800
Respondents: College bound men and women between 16 and 22 years old
Form(s): CG–4151, CGAD–618 A & B, CGAD 635, CGAD–634 A and B

DOT No: 3009
OMB No: 2138–0023
Administration: Research and Special Programs
Title: Reporting Required for International Civil Aviation Organization (ICAO)
Need for Information: To fulfill U.S. treaty obligation
Proposed Use of Information: Information is used by ICAO, a branch of the United Nations, to develop worldwide aviation policies
Frequency: Monthly, Quarterly and annually
Burden Estimate: 273 hours
Respondents: Large air carriers
Form(s): RSPA Forms AM, AN, C and EF and ICAO Forms A–1, B, C, D–1, D–2 and EF–1

DOT No: 3010
OMB No: New
Administration: U.S. Coast Guard
Title: Hooper Dredge Working Freeboard
Need for Information: Coast Guard needs this collection of information to ensure compliance with proposed regulations which will allow hopper dredge owners and operators to load deeper drafts and carry more dredged spoil
Proposed Use of Information: The Coast Guard uses this information to grant working freeboards to the requesting vessels. The vessel master will use this information to ensure safe operation of the vessel
Frequency: On occasion
Burden Estimate: 204
Respondents: Owners, agents and masters of self-propelled hopper dredges
Form(s): N/A.

Issued in Washington, DC on December 15, 1987.

Sunshine Act Meetings

Federal Register
Vol. 52, No. 245
Tuesday, December 22, 1987

This section of the FEDERAL REGISTER contains notices of meetings published under the "Government in the Sunshine Act" (Pub. L. 94-409) 5 U.S.C. 552b(e)(3).

SECURITIES AND EXCHANGE COMMISSION

Notice is hereby given, pursuant to the provisions of the Government in the Sunshine Act, Pub. L. 94–409, that the Securities and Exchange Commission will hold the following meeting during the week of December 21, 1987:

A closed meeting will be held on Tuesday, December 22, 1987, at 2:30 p.m.

The Commissioners, Counsel to the Commissioners, the Secretary of the Commission, and recording secretaries will attend the closed meeting. Certain staff members who are responsible for the calendared matters may also be present.

The General Counsel of the Commission, or his designee, has certified that, in his opinion, one or more of the exemptions set forth in 5 U.S.C. 552b(c)(4), (8), (9)(A) and (10) and 17 CFR 200.402(a)(4), (8), (9)(i) and (10) permit consideration of the scheduled matters at a closed meeting.

Commissioner Cox, as duty officer, voted to consider the items listed for the closed meeting in closed session.

The subject matter of the closed meeting scheduled for Tuesday, December 22, 1987, at 2:30 p.m., will be:

Institution of injunctive actions.
Settlement of injunctive action.
Settlement of administrative proceeding of an enforcement nature.
Institution of administrative proceedings of an enforcement nature.
Formal orders of investigation.

At times changes in Commission priorities require alterations in the scheduling of meeting items. For further information and to ascertain what, if any, matters have been added, deleted or postponed, please contact: Jacqueline Higgs at (202) 272–2149.

Jonathan G. Katz,
Secretary.
December 16, 1987.

Department of Transportation

Federal Aviation Administration

14 CFR Part 71

Proposed Establishment of Airport Radar Service Areas; Proposed Rulemaking

VOL 52 ISS 245 DEC 22 1987 UMI

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 71

[Airspace Docket No. 87-AWA-49]

Proposed Establishment of Airport Radar Service Areas

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes to establish an Airport Radar Service Area (ARSA) at Green Bay Austin Straubel Field, WI, and Whidbey Island Naval Air Station (NAS), WA. Each location is an airport at which a nonregulatory Terminal Radar Service Area (TRSA) is currently in effect. Establishment of each ARSA would require that pilots maintain two-way radio communication with air traffic control (ATC) while in the ARSA. Implementation of ARSA procedures at each of the affected locations would promote the efficient control of air traffic and reduce the risk of midair collision in terminal areas.

DATES: Comments must be received on or before March 29, 1988. Informal airspace meeting dates are as follows: Green Bay Austin Straubel Field, WI, February 23, 1988, and Whidbey Island NAS, WA—February 29, 1988.

ADDRESSES: Send comments on the proposal in triplicate to: Federal Aviation Administration, Office of the Chief Counsel, Attention: Rules Docket [AGC-204], Airspace Docket No. 87-AWA-49, 800 Independence Avenue SW., Washington, DC 20591.

The informal airspace meeting places are as follows:

Green Bay Austin Straubel Field, WI, ARSA.
Time: 7:00 p.m..
Location: Airport Director's Conference Room, Austin Straubel Field, Green Bay, WI

Whidbey Island NAS, WA, ARSA.
Time: 7:00 p.m..
Location: Swinomish Yacht Club, 310 North First, LaConner, WA.

The official docket may be examined in the Rules Docket, weekdays, except Federal holidays, between 8:30 a.m. and 5:00 p.m. The FAA Rules Docket is located in the Office of the Chief Counsel, Room 916, 800 Independence Avenue SW., Washington, DC.

The informal docket may also be examined during normal business hours at the office of the Regional Air Traffic Division.

FOR FURTHER INFORMATION CONTACT: Joe Gill, Airspace Branch (ATO-240), Airspace-Rules and Aeronautical Information Division, Air Traffic Operations Service, Federal Aviation Administration, 800 Independence Avenue SW., Washington, DC 20591; telephone: (202) 267-9252.

SUPPLEMENTARY INFORMATION:

Comments Invited

This notice involves two locations. Interested parties are invited to participate in this proposed rulemaking by submitting such written data, views, or arguments as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposal. Communications should identify the airspace docket and be submitted in triplicate to the address listed above. Commenters wishing the FAA to acknowledge receipt of their comments on this notice must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Airspace Docket No. 87-AWA-49." The postcard will be date/time stamped and returned to the commenter. All communications received before the specified closing date for comments will be considered before taking action on the proposed rule. The proposal contained in this notice may be changed in the light of comments received. All comments submitted will be available for examination in the Rules Docket both before and after the closing date for comments. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

Availability of NPRM's

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, Office of Public Affairs, Attention: Public Inquiry Center, APA-230, 800 Independence Avenue SW., Washington, DC 20591, or by calling (202) 267-3484. Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRM's should also request a copy of Advisory Circular No. 11-2 which describes the application procedure.

Meeting Procedures

In addition to seeking written comments on this proposal, the FAA will hold informal airspace meetings for the proposed ARSA locations in order to receive additional input with respect to the proposal. The dates, times, and places for these meetings are listed above. Persons who plan to attend the meetings should be aware of the following procedures to be followed:

(a) The meetings will be informal in nature and will be conducted by the designated representative of the Administrator. Each participant will be given an opportunity to make a presentation.

(b) There will be no admission fee or other charge to attend and participate. The meetings will be open to all persons on a space-available basis. The FAA representative may accelerate the agenda to enable early adjournment if the progress of the meetings is more expeditious than planned.

(c) The meetings will not be recorded. A summary of the comments made at these meetings will be filed in the docket.

(d) Position papers or other handout material relating to the substance of the meetings may be accepted. Participants submitting handout materials should present an original and two copies to the presiding officer. There should be an adequate number of copies provided for further distribution to all participants.

(e) Statements made by FAA participants at the meetings should not be taken as expressing a final FAA position.

Agenda

Presentation of Meeting Procedures
FAA Presentation of Proposal
Public Presentations and Discussion

Background

On April 22, 1982, the National Airspace Review (NAR) plan was published in the **Federal Register** (47 FR 17448). The plan encompassed a review of airspace use and procedural aspects of the ATC system. Among the main objectives of the NAR was the improvement of the ATC system by increasing efficiency and reducing complexity. In its review of terminal airspace, NAR Task Group 1-2 concluded that TRSA's should be replaced. Four types of airspace configurations were considered as replacement candidates, of which Model B, since redesignated ARSA, was the consensus recommendation.

In response, the FAA published NAR Recommendation 1-2.2.1, "Replace Terminal Radar Service Areas with Model B Airspace and Service" in Notice 83-9 (July 28, 1983; 48 FR 34286) proposing the establishment of ARSA's at the Robert Mueller Municipal Airport, Austin, TX, and the Port of Columbus International Airport, Columbus, OH. ARSA's were designated at these airports on a temporary basis by SFAR No. 45 (October 28, 1983; 48 FR 50038) in order to provide an operational confirmation of the ARSA concept for potential application on a national basis.

Following a confirmation period of more than a year, the FAA adopted the NAR recommendation and, on February 27, 1985, issued a final rule (50 FR 9252; March 6, 1985) defining an ARSA and establishing air traffic rules for operation within such an area. Concurrently, by separate rulemaking action, ARSA's were permanently established at the Austin, TX, and Columbus, OH, airports and also at the Baltimore/Washington International Airport, Baltimore, MD, (50 FR 9250; March 6, 1985). The FAA has stated that future notices would propose ARSA's for other airports at which TRSA procedures were in effect.

Additionally, the NAR Task Group recommended that the FAA develop quantitative criteria for proposing to establish ARSA's at locations other than those which are included in the TRSA replacement program. The task group recommended that these criteria take into account, among other things, traffic mix, flow and density, airport configuration, geographical features, collision risk assessment, and ATC capabilities to provide service to users. This criteria has been developed and is being published via the FAA directives system.

The FAA has established ARSA's at 93 locations under a paced implementation plan to replace TRSA's with ARSA's. This is one of a series of notices to implement ARSA's at locations with TRSA's or locations without TRSA's which warrant implementation of an ARSA.

Related Rulemaking

This notice proposes ARSA designation at two locations identified as candidates for an ARSA in the preamble to Amendment No. 71-10 (50 FR 9252). Other candidate locations will be proposed in future notices published in the **Federal Register**.

The Current Situation at the Proposed ARSA Locations

A TRSA is currently in effect at both of the locations at which ARSA's are proposed in this notice. A TRSA consists of the airspace surrounding a designated airport where ATC provides radar vectoring, sequencing, and separation for all aircraft operating under instrument flight rules (IFR) and for participating aircraft operating under visual flight rules (VFR). TRSA airspace and operating rules are not established by regulation, and participation by pilots operating under VFR is voluntary, although pilots are urged to participate. This level of service is known as Stage III and is provided at all locations identified as TRSA's. The NAR task group recommended the replacement of most TRSA's with ARSA's.

A number of problems with the TRSA program were identified by the task group. The task group stated that because there are different levels of service offered within the TRSA, users are not always sure of what restrictions or privileges exist, or how to cope with them. According to the task group, there is a shared feeling among users that TRSA's are often poorly defined, are generally dissimilar in dimensions, and encompass more area than is necessary or desirable. There are other users who believe that the voluntary nature of the TRSA does not adequately address the problems associated with nonparticipating aircraft operating in relative proximity to the airport and associated approach and departure courses. There is strong advocacy among user organizations that terminal radar facilities should provide all pilots the same service, in the same way, and, to the extent feasible, within standard size airspace designations.

The provisions of FAR § 91.87 relating to an airport traffic area (ATA), while necessary, do not eliminate the problem identified by the task group. For example, aircraft operating under VFR to or from a satellite airport and within the ATA of the primary airport are excluded from the two-way radio communications requirement of § 91.87. This condition is acceptable until the volume and density of traffic at the primary airport requires more complete ATC awareness and/or control of traffic in the area.

The Proposal

The FAA is considering an amendment to § 71.501 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) to establish ARSA's at Green Bay Austin Straubel Field, WI, which is a public airport, and Whidbey Island NAS, WA, a military airport. Both of these currently have nonregulatory TRSA's in effect. The proposed locations are depicted on charts in Appendix 1 to this notice.

FAA regulations, 14 CFR 91.88, define ARSA and prescribe operating rules for aircraft, ultralight vehicles, and parachute jump operations in airspace designated as an ARSA.

The ARSA rule provides in part that, prior to entering the ARSA, any aircraft arriving at any airport in an ARSA or flying through an ARSA must: (1) Establish two-way radio communications with the ATC facility having jurisdiction over the area, and (2) while in the ARSA, maintain two-way radio communications with that ATC facility. For aircraft departing from the primary airport within the ARSA, two-way radio communications must be maintained with the ATC facility having jurisdiction over the area. For aircraft departing a satellite airport within the ARSA, two-way radio communications must be established as soon as practicable after takeoff with the ATC facility having jurisdiction over the area, and thereafter maintained while operating within the ARSA.

All aircraft operating within an ARSA are required to comply with all ATC clearances and instructions and any FAA arrival or departure traffic pattern for the airport of intended operation. However, the rule permits ATC to authorize appropriate deviations to any of the operating requirements of the rule when safety considerations justify the deviation or more efficient utilization of the airspace can be attained. Ultralight vehicle operations and parachute jumps in an ARSA may only be conducted under the terms of an ATC authorization.

The FAA adopted the NAR task group recommendation that each ARSA be of the same airspace configuration insofar as practicable. The standard ARSA consists of airspace within 5 nautical miles of the primary airport extending from the surface to an altitude of 4,000 feet above that airport's elevation, and that airspace between 5 and 10 nautical miles from the primary airport from 1,200 feet above the surface to an altitude of 4,000 feet above that airport's elevation. Proposed deviation from the standard has been necessary at some airports due to adjacent regulatory airspace, international boundaries, topography, or unusual operational requirements.

Definitions, operating requirements, and specific airspace designations applicable to ARSA may be found in 14 CFR Part 71, §§ 71.14 and 71.501, and Part 91, §§ 91.1 and 91.88.

For the reasons discussed under "Regulatory Evaluation," the FAA has determined that this proposed regulation is not a "major rule" under Executive Order 12291 and is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979).

VOL 52 ISS 245 DEC 22 1987 UMI

Regulatory Evaluation

The FAA has conducted a Regulatory Evaluation of the proposed establishment of these additional ARSA sites. The major findings of that evaluation are summarized below, and the evaluation is available in the regulatory docket.

a. Costs

Costs which potentially could result from the establishment of additional ARSA sites fall into the following categories:

(1) Air traffic controller staffing, controller training, and facility equipment costs incurred by the FAA.

(2) Costs associated with the revision of charts, notification of the public, and pilot education.

(3) Additional operating costs for circumnavigating or flying over the ARSA.

(4) Potential delay costs resulting from operations within an ARSA.

(5) The need for some operators to purchase radio transceivers.

(6) Miscellaneous costs.

It has been the FAA's experience, however, that these potential costs do not materialize to any appreciable degree, and when they do occur, they are transitional, relatively low in magnitude, or attributable to specific implementation problems that have been experienced at a very small minority of ARSA sites. The reasons for these conclusions are presented below.

FAA expects that the additional ARSA sites proposed in this notice can be implemented without requiring additional controller personnel above current authorized staffing levels, because participation in radar service at these locations is already quite high, and the separation standards permitted in ARSA's will allow controllers to absorb the slight increase in participating traffic by handling all traffic much more efficiently. Further, because controller training will be conducted during normal working hours, and these facilities already operate the necessary radar equipment, FAA does not expect to incur any appreciable implementation costs. Essentially, the FAA will modify its terminal radar procedures at the proposed ARSA sites in a manner that will make more efficient use of existing resources.

No additional costs are expected to be incurred because of the need to revise sectional charts to incorporate the new ARSA airspace boundaries. Changes of this nature are routinely made during charting cycles, and the planned effective dates for newly established ARSA's are scheduled to coincide with the regular 6-month chart publication intervals.

This rulemaking proceeding and process will satisfy much of the need to notify the public and educate pilots about ARSA operations. The informal public meeting being held at each location where an ARSA is being proposed provides pilots with the best opportunity to learn both how an ARSA works and how it will affect their local operations. The expenses associated with these public meetings are considered cost attributable to the rulemaking process; however, any public information costs following establishment of a new ARSA are strictly attributable to the ARSA. The FAA expects to distribute a Letter to Airmen to all pilots residing within 50 miles of ARSA sites explaining the operation and configuration of the ARSA finally adopted. The FAA also has issued an Advisory Circular on ARSA's. The combined Letter to Airmen and prorated Advisory Circular costs have been estimated to be approximately $500 for each ARSA site. This cost is incurred only once upon the initial establishment of an ARSA.

Information on ARSA's following the establishment of additional sites will also be disseminated at aviation safety seminars conducted throughout the country by various district offices. These seminars are regularly provided by the FAA to discuss a variety of aviation safety issues and, therefore, will not involve additional costs strictly as a result of the ARSA program.

Additionally, no significant costs are expected to be incurred as a result of the follow-on user meetings that will be held at each site following implementation of the ARSA which will allow users to provide feedback to the FAA on local ARSA operations. These meetings are being held at public or other facilities which are being provided free of charge or at nominal cost. Further, because these meetings are being conducted by local FAA facility personnel, no travel, per diem, or overtime costs will be incurred by regional or headquarters personnel.

FAA anticipates that some pilots who currently transit the terminal area without establishing radio communications or participating in radar services may choose to circumnavigate the mandatory participation airspace of an ARSA rather than participate. Some minor delay costs will be incurred by these pilots because of the additional aircraft variable operating cost and lost crew and passenger time resulting from the deviation. Other pilots may elect to overfly the ARSA, or transit below the 1,200 feet above ground level (AGL) floor between the 5- and 10-nautical-mile rings. Although this will not result in any appreciable delay, a small additional fuel burn will result from the climb portion of the altitude adjustment (which will be offset somewhat by the descent).

FAA recognizes that the potential exists for delay to develop at some locations following establishment of an ARSA. The additional traffic that the radar facilities will be handling as a result of the mandatory participation requirement may, in some instances, result in minor delays to aircraft operations. FAA does not expect such delay to be appreciable. FAA expects that the greater flexibility afforded controllers in handling traffic as a result of the separation standards allowed in an ARSA will keep delay problems to a minimum. Those that do occur will be transitional in nature, diminishing as facilities gain operating experience with ARSA's and learn how to tailor procedures and allocate resources to take fullest advantage of the efficiencies that an ARSA will permit. This has been the experience at most of the locations where ARSA's have been effect for the longest period of time and is the recurring trend at the locations that have been more recently designated.

The FAA does not expect that any operator will find it necessary to install radio transceivers as a result of establishing the ARSA's proposed in this notice. Aircraft operating to and from primary airports already are required to have two-way radio communications capability because of existing airport traffic areas and, therefore, will not incur any additional costs as a result of the proposed ARSA's. Further, the FAA has made an effort to minimize these potential costs throughout the ARSA program by providing airspace exclusions, or cutouts, for satellite airports located within 5 nautical miles of the ARSA center where the ARSA would otherwise have extended down to the surface. Procedural agreements between the local ATC facility and the affected airports have also been used to avoid radio installation costs.

At some proposed ARSA locations, special situations might exist where establishment of an ARSA could impose certain costs on users of that airspace. However, exclusions, cutouts, and special procedures have been used extensively throughout the ARSA program to alleviate adverse impacts on local fixed base and airport operators. Similarly, the FAA has eliminated potential adverse impacts on existing

flight training practice areas, as well as soaring, ballooning, parachuting, ultralight and banner towing activities, by developing special procedures to accommodate these activities through local agreements between ATC facilities and the affected organizations. For these reasons, the FAA does not expect that any such adverse impact will occur at the candidate ARSA sites proposed in this notice.

b. Benefits

Much of the benefit that will result from ARSA's is nonquantifiable and is attributable to simplification and standardization of ARSA configurations and procedures. Further, once experience is gained in ARSA operations, the flexibility allowed air traffic controllers in handling traffic within an ARSA will enable them to move traffic with both efficiency and increased safety.

Some of the benefits of the ARSA cannot be specifically attributed to individual candidate airports, but rather will result from the overall improvements in terminal area ATC procedures realized as ARSA's are implemented throughout the country. ARSA's have the potential of reducing both near and actual midair collisions at the airports where they are established. Based upon the experience at the Austin and Columbus ARSA confirmation sites, FAA estimates that near midair collisions may be reduced by approximately 35 to 40 percent. Further, FAA estimates that implementation of the ARSA program nationally may prevent approximately one midair collision every 1 to 2 years throughout the United States. The quantifiable benefits of preventing a midair collision can range from less than $100,000, resulting from the prevention of a minor nonfatal accident between general aviation aircraft, to $300 million or more, resulting from the prevention of a midair collision involving a large air carrier aircraft and numerous fatalities. Establishment of ARSA's at the sites proposed in this notice will contribute to these improvements in safety.

c. Comparison of Costs and Benefits

A direct comparison of the costs and benefits of this proposal is difficult for a number of reasons. Many of the benefits of the rule are nonquantifiable, and it is difficult to specifically attribute the standardization benefits, as well as the safety benefits, to individual candidate ARSA sites.

FAA expects that any adjustment problems that may be experienced at the ARSA locations proposed in this notice will only be temporary, and that once established, the ARSA's will result in efficient terminal area operations. This has been the experience at the vast majority of ARSA sites that have already been implemented. In addition, establishment of the proposed ARSA sites will contribute to a reduction in near and actual midair collisions. For these reasons, FAA expects that establishment of the ARSA sites proposed in this notice will produce long term, ongoing benefits that will far exceed their costs, which are essentially transitional in nature.

International Trade Impact Analysis

This proposed regulation will only affect terminal airspace operating procedures at selected airports within the United States. As such, it will have no affect on the sale of foreign aviation products or services in the United States, nor will it affect the sale of United States aviation products or services in foreign countries.

Regulatory Flexibility Determination

The Regulatory Flexibility Act of 1980 (RFA) was enacted by Congress to ensure that small entities are not unnecessarily and disproportionately burdened by government regulations. Small entities are independently owned and operated small businesses and small not-for-profit organizations. The RFA requires agencies to review rules that may have a significant economic impact on a substantial number of small entities.

The small entities that potentially could be affected by implementation of the ARSA program include the fixed-base operators, flight schools, agricultural operators and other small aviation businesses located at satellite airports within 5 nautical miles of the ARSA center. If the mandatory participation requirement were to extend down to the surface at these airports, where under current regulations participation in radar services and radio communication with ATC is voluntary, operations at these airports might be altered, and some business could be lost to airports outside of the ARSA core. FAA has proposed to exclude many satellite airports located within 5 nautical miles of the primary airport at candidate ARSA sites to avoid adversely impacting their operations and to simplify coordinating ATC responsibilities between the primary and satellite airports. In some cases, the same purposes will be achieved through Letters of Agreement between ATC and the affected airports that establish special procedures for operating to and from these airports. In this manner, FAA expects to eliminate any adverse impact on the operations of small satellite airports that potentially could result from the ARSA program. Similarly, FAA expects to eliminate potentially adverse impacts on existing flight training practice areas, as well as soaring, ballooning, parachuting, ultralight, and banner towing activities, by developing special procedures that will accommodate these activities through local agreements between ATC facilities and the affected organizations. FAA has utilized such arrangements extensively in implementing the ARSA's that have been established to date.

Further, because the FAA expects that any delay problems that may initially develop following implementation of an ARSA will be transitory, and because the airports that will be affected by the ARSA program represent only a small proportion of all the public use airports in operation within the United States, small entities of any type that use aircraft in the course of their business will not be adversely impacted.

For these reasons, the FAA certifies that the proposed regulation, if adopted, will not result in a significant economic impact on a substantial number of small entities, and a regulatory flexibility analysis is not required under the terms of the RFA.

Aviation safety, Airport radar service areas.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration proposes to amend Part 71 of the Federal Aviation Regulations (14 CFR Part 71) as follows:

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE AND REPORTING POINTS

1. The authority citation for Part 71 continues to read as follow:

Authority: 49 U.S.C. 1348(a), 1354(a), 1510; E.O. 10854; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983); 14 CFR 11.69.

§ 71.501 [Amended]

2. Section 71.501 is amended as follows:

Green Bay Austin Strauble Field, WI [New]

That airspace extending upward from the surface to and including 4,700 feet MSL within a 5-mile radius of the Green Bay Austin Straubel Field (lat. 44°29'17" N., long. 88°18'58" W.); and that airspace extending upward from 1,900 feet MSL to and including 4,700 feet MSL within a 10-mile radius of the airport.

Part III

Department of Labor

Office of the Secretary

29 CFR Part 22

Program Fraud Civil Remedies Act of 1986; Final Rule

VOL 52 ISS 245 DEC 22 1987 UMI

DEPARTMENT OF LABOR

Office of the Secretary

29 CFR Part 22

Program Fraud Civil Remedies Act of 1986

AGENCY: Office of the Secretary, Labor.

ACTION: Final rule.

SUMMARY: The Program Fraud Civil Remedies Act of 1986 (Act) establishes an administrative remedy for fraudulent claims or statements submitted to various federal "authorities," including the Department of Labor. Anyone who, with knowledge or reason to know, submits a false, fictitious or fraudulent claim or statement to any of these "authorities" is liable for up to a $5,000 penalty and an assessment of double damages. This final rule establishes the policies and administrative procedures the Department of Labor will follow in implementing the provisions of the Act, and specifies the hearing and appeal rights of persons subject to penalties and assessments under the Act.

EFFECTIVE DATE: January 21, 1988.

FOR FURTHER INFORMATION CONTACT: Dennis McDaniel, Office of the Solicitor, Department of Labor, Room N2428, 200 Constitution Avenue, NW., Washington, DC 20210.

SUPPLEMENTARY INFORMATION: On October 21, 1986, the President signed the Omnibus Reconciliation Act of 1986, which enacted the Program Fraud Civil Remedies Act of 1986. The Act provides an administrative remedy for fraudulent claims or statements submitted to various authorities and provides up to a $5000 penalty and an assessment of double damages against anyone who submits a false claim or statement. These regulations establish the policies and procedures the Department of Labor will follow in carrying out the provisions of the Act.

The Act vests authority to investigate allegations of liability under its provisions in an agency's Investigatory Official. Based upon the results of an investigation, the agency Reviewing Official determines, with the concurrence of the Attorney General whether to refer the matter to a Presiding Officer for an administrative hearing. Any penalty or assessment imposed under the Act may be collected by the Attorney General, through the filing of a civil action, or by offsetting amounts, other than tax refunds, owed the particular party by the Federal Government. For purposes of this Act, these regulations designate the Inspector General of the Department of Labor, or his designee, as the Investigatory Official for the Department of Labor. They also designate the Solicitor of the Department of Labor, or his designee, as the Reviewing Official under the Act. Any administrative adjudication under the Act will be presided over by an administrative law judge in the Department of Labor's Office of Administrative Law Judges.

This rule was originally published in the **Federal Register** on June 2, 1987. Comments were to be submitted to the Department of Labor, in duplicate, on or before July 2, 1987. No written comments were received by the Department of Labor. Technical changes to the Department's regulations have been made to conform with the final model regulations issued by the President's Council on Integrity and Efficiency, and thereby to conform with the congressional intent that regulations under the Program Fraud Civil Remedies Act of 1986 be "substantially uniform throughout government." (S. Rep. No. 99–212, 99th Cong., 1st Sess. 12 (1986).)

Executive Order 12291

This rule is not a "major rule" under Executive Order 12291 because it is not likely to result in (1) an annual effect in the economy of $100 million or more; (2) a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; or (3) significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of the United States-based enterprises to compete with foreign based enterprises in domestic or foreign markets. Accordingly, no regulatory impact analysis is required.

Regulatory Flexibility Act

The Department believes that this final rule will have no "significant economic impact upon a substantial number of small entities" within the meaning of section 3(a) of the Regulatory Flexibility Act. Public Law 96–354, 94 Stat. 1164 (5 U.S.C. 605(b)). The Secretary has certified to the Chief Counsel for Advocacy of the Small Business Administration to this effect. This conclusion is reached because the rule does not, in itself, impose any additional requirements upon small entities. Accordingly, no regulatory flexibility analysis is required.

Paperwork Reduction Act

This rule is not subject to section 3504(h) of the Paperwork Reduction Act (44 U.S.C. 3501) since it does not contain a collection of information requirements.

List of Subjects in 29 CFR Part 22

Administrative practice and procedures, Claims, Government contracts, Grant programs.

Accordingly, Subtitle A of Title 29 of the Code of Federal Regulation is amended by adding a new Part 22 to read as follows:

PART 22—PROGRAM FRAUD CIVIL REMEDIES ACT OF 1986

Sec.

22.1 Basis and purpose.
22.2 Definitions.
22.3 Basis for civil penalties and assessments.
22.4 Investigation.
22.5 Review by the reviewing official.
22.6 Prerequisites for issuing a complaint.
22.7 Complaint.
22.8 Service of complaint.
22.9 Answer.
22.10 Default upon failure to file an answer.
22.11 Referral of complaint and answer to the ALJ.
22.12 Notice of hearing.
22.13 Parties to the hearing.
22.14 Separation of functions.
22.15 Ex parte contacts.
22.16 Disqualification of reviewing official or ALJ.
22.17 Rights of parties.
22.18 Authority of the ALJ.
22.19 Prehearing conferences.
22.20 Disclosure of documents.
22.21 Discovery.
22.22 Exchange of witness lists, statements, and exhibits.
22.23 Subpoenas for attendance at hearing.
22.24 Protective order.
22.25 Fees.
22.26 Form, filing, and service of papers.
22.27 Computation of time.
22.28 Motions.
22.29 Sanctions.
22.30 The hearing and burden of proof.
22.31 Determining the amount of penalties and assessments.
22.32 Location of hearing.
22.33 Witnesses.
22.34 Evidence.
22.35 The record.
22.36 Post-hearing briefs.
22.37 Initial decision.
22.38 Reconsideration of initial decision.
22.39 Appeal to authority head.
22.40 Stays ordered by the Department of Justice.
22.41 Stay pending appeal.
22.42 Judicial review.
22.43 Collection of civil penalties and assessments.
22.44 Right to administrative offset.
22.45 Deposit in Treasury of United States.
22.46 Compromise or settlement.
22.47 Limitations.

Authority: Pub. L. 99–509, §§ 6101–6104, 100 Stat. 1874, 31 U.S.C. 3801–3812.

§ 22.1 Basis and purpose.

(a) *Basis.* This part implements the Program Fraud Civil Remedies Act of 1986, Pub. L. No. 99–509, sections 6101–6104, 100 Stat. 1874 (October 21, 1986), to be codified at 31 U.S.C. 3801–3812. 31 U.S.C. 3809 of the statute requires each authority head to promulgate regulations necessary to implement the provisions of the statute.

(b) *Purpose.* This part (1) establishes administrative procedures for imposing civil penalties and assessments against persons who make, submit, or present, or cause to be made, submitted, or presented, false, fictitious, or fraudulent claims or written statements to authorities or to their agents, and (2) specifies the hearing and appeal rights of persons subject to allegations of liability for such penalties and assessments.

§ 22.2 Definitions.

(a) "*ALJ*" means an Administrative Law Judge in the authority appointed pursuant to 5 U.S.C. 3105 or detailed to the authority pursuant to 5 U.S.C. 3344.

(b) "*Authority*" means the United States Department of Labor.

(c) "*Authority head*" means the Secretary of Labor.

(d) "*Benefit*" means, in the context of "statement", anything of value, including but not limited to any advantage, preference, privilege, license, permit, favorable decision, ruling, status, or loan guarantee.

(e) "*Claim*" means, any request, demand, or submission—

(1) Made to the authority for property, services, or money (including money representing grants, loans, insurance, or benefits);

(2) Made to a recipient of property, services, or money from the authority or to a party to a contract with the authority—

(i) For property or services if the United States—

(A) Provided such property or services;

(B) Provided any portion of the funds for the purchase of such property or services; or

(C) Will reimburse such recipient or party for the purchase of such property or services; or

(ii) For the payment of money (including money representing grants, loans, insurance, or benefits) if the United States—

(A) Provided any portion of the money requested or demanded; or

(B) Will reimburse such recipient or party for any portion of the money paid on such request or demand; or

(3) Made to the authority which has the effect of decreasing an obligation to pay or account for property, services, or money.

(f) "*Complaint*" means the administrative complaint served by the reviewing official on the defendant under § 22.7.

(g) "*Defendant*" means any person alleged in a complaint under § 22.7 to be liable for a civil penalty or assessment under § 22.3.

(h) "*Department*" means the United States Department of Labor.

(i) "*Government*" means the United States Government.

(j) "*Individual*" means a natural person.

(k) "*Initial decision*" means the written decision of the ALJ required by § 22.10 or § 22.37, and includes a revised initial decision issued following a remand or a motion for reconsideration.

(l) "*Investigating official*" means the Inspector General of the Department of Labor or an officer or employee of the Office of the Inspector General designated by the Inspector General and serving in a position for which the rate of basic pay is not less than the minimum rate of basic pay for grade GS–16 under the General Schedule.

(m) "*Knows or has reason to know*," means that a person, with respect to a claim or statement—

(1) Has actual knowledge that the claim or statement is false, fictitious, or fraudulent;

(2) Acts in deliberate ignorance of the truth or falsity of the claim or statement; or

(3) Acts in reckless disregard of the truth or falsity of the claim or statement.

(n) "*Makes*", wherever it appears, shall include the terms presents, submits, and causes to be made, presented, or submitted. As the context requires, *making* or *made*, shall likewise include the corresponding forms of such terms.

(o) "*Person*" means any individual, partnership, corporation, association, or private organization, and includes the plural of that term.

(p) "*Representative*" means an attorney who is in good standing of the bar in any state, territory, or possession of the United States or of the District of Columbia or the Commonwealth of Puerto Rico, or other representative meeting the qualifications of a non-attorney representative found at 29 CFR 18.34 and designated by a party in writing.

(q) "*Reviewing official*" means the Solicitor of the Department of Labor or his designee who is—

(1) Not subject to supervision by, or required to report to, the investigating official; and

(2) Not employed in the organizational unit of the authority in which the investigating official is employed;

(3) Serving in a position for which the rate of basic pay is not less than the minimum rate of basic pay for Grade GS–16 under the General Schedule.

(r) "Statement" means any representation, certification, affirmation, document, record, or accounting or bookkeeping entry made—

(1) With respect to a claim or to obtain the approval or payment of a claim (including relating to eligibility to make a claim); or

(2) With respect to (including relating to eligibility for)—

(i) A contract with, or a bid or proposal for a contract with; or

(ii) A grant, loan, or benefit from,

the authority, or any State, political subdivision of a State, or other party, if the United States Government provides any portion of the money or property under such contractor for such grant, loan, or benefit, or if the Government will reimburse such State, political subdivision, or party for any portion of the money or property under such contract or for such grant, loan, or benefit.

§ 22.3 Basis for civil penalties and assessments.

(a) *Claims.* (1) Except as provided in paragraph (c) of this section, any person who makes a claim that the person knows or has reason to know—

(i) Is false, fictitious, or fraudulent;

(ii) Includes or is supported by any written statement which asserts a material fact which is false, fictitious, or fraudulent;

(iii) Includes or is supported by any written statement that—

(A) Omits a material fact;

(B) Is false, fictitious, or fraudulent as a result of such omission; and

(C) Is a statement in which the person making such statement has a duty to include such material fact; or

(iv) Is for payment for the provision of property or services which the person has not provided as claimed,

shall be subject, in addition to any other remedy that may be prescribed by law, to a civil penalty of not more than $5,000 for each such claim.

(2) Each voucher, invoice, claim form, or other individual request or demand for property, services, or money constitutes a separate claim.

(3) A claim shall be considered made to the authority, recipient, or party when such claim is actually made to an agent, fiscal intermediary, or other entity, including any State or political subdivision thereof, acting for or on behalf of the authority, recipient, or party.

(4) Each claim for property, services, or money is subject to a civil penalty regardless of whether such property, services, or money is actually delivered or paid.

(5) If the Government has made any payment (including transferred property or provided services) on a claim, a person subject to a civil penalty under paragraph (a)(1) of this section shall also be subject to an assessment of not more than twice the amount of such claim or that portion thereof that is determined to be in violation of paragraph (a)(1) of this section. Such assessment shall be in lieu of damages sustained by the Government because of such claim.

(b) *Statements.* (1) Except as provided in paragraph (c) of this section, any person who makes a written statement that—

(i) The person knows or has reason to know—

(A) Asserts a material fact which is false, fictitious, or fraudulent; or

(B) Is false, fictitious, or fraudulent because it omits a material fact that the person making the statement has a duty to include in such statement; and

(ii) Contains or is accompanied by an express certification or affirmation of the truthfulness and accuracy of the contents of the statement, shall be subject, in addition to any other remedy that may be prescribed by law, to a civil penalty of not more than $5,000 for each such statement.

(2) Each written representation, certification, or affirmation constitutes a separate statement.

(3) A statement shall be considered made to the authority when such statement is actually made to an agent, fiscal intermediary, or other entity, including any State or political subdivision thereof, acting for or on behalf of the authority.

(c) *Applications for certain benefits.* (1) In the case of any claim or statement made by any individual relating to any of the benefits listed in paragraph (c)(2) of this section received by such individual, such individual may be held liable for penalties and assessments under this section only if such claim or statement is made by such individual in making application for such benefits with respect to such individual's eligibility to receive such benefits.

(2) For purposes of paragraph (c) of this section, the term "benefits" means benefits under the Black Lung Benefits Act, which are intended for the personal use of the individual who receives the benefits or for a member of the individual's family.

(d) No proof of specific intent to defraud is required to establish liability under this section.

(e) In any case in which it is determined that more than one person is liable for making a claim or statement under this section, each person may be held liable for a civil penalty under this section.

(f) In any case in which it is determined that more than one person is liable for making a claim under this section on which the Government has made payment (including transferred property or provided services), an assessment may be imposed against any such person or jointly and severally against any combination of such persons.

§ 22.4 Investigation.

(a) If an investigating official concludes that a subpoena pursuant to the authority conferred by 31 U.S.C. 3804(a) is warranted—

(1) The subpoena so issued shall notify the person to whom it is addressed of the authority under which the subpoena is issued and shall identify the records or documents sought;

(2) The investigating official may designate a person to act on his or her behalf to receive the documents sought; and

(3) The person receiving such subpoena shall be required to tender to the investigating official or the person designated to receive the documents a certification that the documents sought have been produced, or that such documents are not available and the reasons therefor, or that such documents, suitably identified, have been withheld based upon the assertion of an identified privilege.

(b) If the investigating official concludes that an action under the Program Fraud Civil Remedies Act may be warranted, the investigating official shall submit a report containing the findings and conclusions of such investigation to the reviewing official.

(c) Nothing in this section shall preclude or limit an investigating official's discretion to refer allegations directly to the Department of Justice for suit under the False Claims Act or other civil relief, or to defer or postpone a report or referral to the reviewing official to avoid interference with a criminal investigation or prosecution.

(d) Nothing in this section modifies any responsibility of an investigating official to report violations of criminal law to the Attorney General.

§ 22.5 Review by the reviewing official.

(a) If, based on the report of the investigating official under § 22.4(b), the reviewing official determines that there is adequate evidence to believe that a person is liable under § 22.3 of this part, the reviewing official shall transmit to the Attorney General a written notice of the reviewing official's intention to issue a complaint under § 22.7.

(b) Such notice shall include—

(1) A statement of the reviewing official's reasons for issuing a complaint;

(2) A statement specifying the evidence that supports the allegations of liability;

(3) A description of the claims or statements upon which the allegations of liability are based;

(4) An estimate of the amount of money or the value of property, services, or other benefits requested or demanded in violation of § 22.3 of this part;

(5) A statement of any exculpatory or mitigating circumstances that may relate to the claims or statements known by the reviewing official or the investigating official; and

(6) A statement that there is a reasonable prospect of collecting an appropriate amount of penalties and assessments.

§ 22.6 Prerequisites for issuing a complaint.

(a) The reviewing official may issue a complaint under § 22.7 only if—

(1) The Department of Justice approves the issuance of a complaint in a written statement described in 31 U.S.C. 3803(b)(1), and

(2) In the case of allegations of liability under § 22.3(a) with respect to a claim, the reviewing official determines that, with respect to such claim or a group of related claims submitted at the same time such claim is submitted (as defined in paragraph (b) of this section), the amount of money or the value of property or services demanded or requested in violation of § 22.3(a) does not exceed $150,000.

(b) For the purposes of this section, a related group of claims submitted at the same time shall include only those claims arising from the same transaction (*e.g.*, grant, loan, application, or contract) that are submitted simultaneously as part of a single request, demand, or submission.

(c) Nothing in this section shall be construed to limit the reviewing official's authority to join in a single complaint against a person claims that are unrelated or were not submitted simultaneously, regardless of the amount of money, or the value of property or services, demanded or requested.

§ 22.7 Complaint.

(a) On or after the date the Department of Justice approves the issuance of a complaint in accordance with 31 U.S.C. 3803(b)(1), the reviewing official may serve a complaint on the defendant, as provided in § 22.8.

(b) The complaint shall state—

(1) The allegations of liability against the defendant, including the statutory basis for liability, an identification of the claims or statements that are the basis for the alleged liability, and the reasons why liability allegedly arises from such claims or statements;

(2) The maximum amount of penalties and assessments for which the defendant may be held liable;

(3) Instructions for filing an answer to request a hearing, including a specific statement of the defendant's right to request a hearing by filing an answer and to be represented by a representative; and

(4) That failure to file an answer within 30 days of service of the complaint will result in the imposition of the maximum amount of penalties and assessments without right to appeal, as provided in § 22.10.

(c) At the same time the reviewing official serves the complaint, he or she shall serve the defendant with a copy of these regulations.

§ 22.8 Service of complaint.

(a) Service of a complaint must be made by certified or registered mail or by delivery in any manner authorized by Rule 4(d) of the Federal Rules of Civil Procedure. Service is complete upon receipt.

(b) Proof of service, stating the name and address of the person on whom the complaint was served, and the manner and date of service, may be made by—

(1) Affidavit of the individual serving the complaint by delivery;

(2) A United States Postal Service return receipt card acknowledging receipt; or

(3) Written acknowledgment of receipt by the defendant or his representative.

§ 22.9 Answer.

(a) The defendant may request a hearing by filing an answer with the reviewing official within 30 days of service of the complaint. An answer shall be deemed to be a request for hearing.

(b) In the answer, the defendant—

(1) Shall admit or deny each of the allegations of liability made in the complaint;

(2) Shall state any defense on which the defendant intends to rely;

(3) May state any reasons why the defendant contends that the penalties and assessments should be less than the statutory maximum; and

(4) Shall state the name, address, and telephone number of the person authorized by the defendant to act as defendant's representative, if any.

(c) If the defendant is unable to file an answer meeting the requirements of paragraph (b) of this section within the time provided, the defendant may, before the expiration of 30 days from service of the complaint, file with the reviewing official a general answer denying liability and requesting a hearing, and a request for an extension of time within which to file an answer meeting the requirements of paragraph (b) of this section. The reviewing official shall file promptly with the ALJ the complaint, the general answer denying liability, and the request for an extension of time as provided in § 22.11. For good cause shown, the ALJ may grant the defendant up to 30 additional days within which to file an answer meeting the requirements of paragraph (b) of this section.

§ 22.10 Default upon failure to file an answer.

(a) If the defendant does not file an answer within the time prescribed in § 22.9(a), the reviewing official may refer the complaint to the ALJ.

(b) Upon the referral of the complaint, the ALJ shall promptly serve on defendant in the manner prescribed in § 22.8, a notice that an initial decision will be issued under this section.

(c) The ALJ shall assume the facts alleged in the complaint to be true, and, if such facts establish liability under § 22.3, the ALJ shall issue an initial decision imposing the maximum amount of penalties and assessments allowed under the statute.

(d) Except as otherwise provided in this section, by failing to file a timely answer, the defendant waives any right to further review of the penalties and assessments imposed under paragraph (c) of this section and the initial decision shall become final and binding upon the parties 30 days after it is issued.

(e) If, before such an initial decision becomes final, the defendant files a motion with the ALJ seeking to reopen on the grounds that extraordinary circumstances prevented the defendant from filing an answer, the initial decision shall be stayed pending the ALJ's decision on the motion.

(f) If, on such motion, the defendant can demonstrate extraordinary circumstances excusing the failure to file a timely answer, the ALJ shall withdraw the initial decision in paragraph (c) of this section, if such a decision has been issued, and shall grant the defendant an opportunity to answer the complaint.

(g) A decision of the ALJ denying a defendant's motion under paragraph (e) of this section is not subject to reconsideration under § 22.38.

(h) The defendant may appeal to the authority head the decision denying a motion to reopen by filing a notice of appeal with the authority head within 15 days after the ALJ denies the motion. The timely filing of a notice of appeal shall stay the initial decision until the authority head decides the issue.

(i) If the defendant files a timely notice of appeal with the authority head, the ALJ shall forward the record of the proceeding to the authority head.

(j) The authority head shall decide expeditiously whether extraordinary circumstances excuse the defendant's failure to file a timely answer based solely on the record before the ALJ.

(k) If the authority head decides that extraordinary circumstances excused the defendant's failure to file a timely answer, the authority head shall remand the case to the ALJ with instructions to grant the defendant an opportunity to answer.

(l) If the authority head decides that the defendant's failure to file a timely answer is not excused, the authority head shall reinstate the initial decision of the ALJ, which shall become final and binding upon the parties 30 days after the authority head issues such decision.

§ 22.11 Referral of complaint and answer to the ALJ.

Upon receipt of an answer, the reviewing official shall file the complaint and answer with the ALJ.

§ 22.12 Notice of hearing.

(a) When the ALJ receives the complaint and answer, the ALJ shall promptly serve a notice of hearing upon the defendant in the manner prescribed by § 22.8. At the same time, the ALJ shall send a copy of such notice to the representative for the Government.

(b) Such notice shall include—

(1) The tentative time and place, and the nature of the hearing;

(2) The legal authority and jurisdiction under which the hearing is to be held;

(3) The matters of fact and law to be asserted;

(4) A description of the procedures for the conduct of the hearing;

(5) The name, address, and telephone number of the representative of the Government and of the defendant, if any; and

(6) Such other matters as the ALJ deems appropriate.

§ 22.13 Parties to the hearing.

(a) The parties to the hearing shall be the defendant and the authority.

(b) Pursuant to 31 U.S.C. 3730(c)(5), a private plaintiff under the False Claims Act may participate in these proceedings to the extent authorized by the provisions of that Act.

§ 22.14 Separation of functions.

(a) The investigating official, the reviewing official, and any employee or agent of the authority who takes part in investigating, preparing, or presenting a particular case may not, in such case or a factually related case—

(1) Participate in the hearing as the ALJ;

(2) Participate or advise in the initial decision or the review of the initial decision by the authority head, except as a witness or a representative in public proceedings; or

(3) Make the collection of penalties and assessments under 31 U.S.C. 3806.

(b) The ALJ shall not be responsible to, or subject to the supervision or direction of the investigating official or the reviewing official.

(c) Except as provided in paragraph (a) of this section, the representative for the Government may be employed anywhere in the authority, including in the offices of either the investigating official or the reviewing official.

§ 22.15 Ex parte contacts.

No party or person (except employees of the ALJ's office) shall communicate in any way with the ALJ on any matter at issue in a case, unless on notice and opportunity for all parties to participate. This provision does not prohibit a person or party from inquiring about the status of a case or asking routine questions concerning administrative functions or procedures.

§ 22.16 Disqualification of reviewing official or ALJ.

(a) A reviewing official or ALJ in a particular case may disqualify himself or herself at any time.

(b) A party may file with the ALJ a motion for disqualification of a reviewing official or an ALJ. Such motion shall be accompanied by an affidavit alleging personal bias or other reason for disqualification.

(c) Such motion and affidavit shall be filed promptly upon the party's discovery of reasons requiring disqualification, or such objections shall be deemed waived.

(d) Such affidavit shall state specific facts that support the party's belief that personal bias or other reason for disqualification exists and the time and circumstances of the party's discovery of such facts. It shall be accompanied by a certificate of the representative of record that it is made in good faith.

(e) Upon the filing of such a motion and affidavit, the ALJ shall proceed no further in the case until he or she resolves the matter of disqualification in accordance with paragraph (f) of this section.

(f)(1) If the ALJ determines that a reviewing official is disqualified, the ALJ shall dismiss the complaint without prejudice.

(2) If the ALJ disqualifies himself or herself, the case shall be reassigned promptly to another ALJ.

(3) If the ALJ denies a motion to disqualify, the authority head may determine the matter only as part of his or her review of the initial decision upon appeal, if any.

§ 22.17 Rights of parties.

Except as otherwise limited by this part, all parties may—

(a) Be accompanied, represented, and advised by a representative;

(b) Participate in any conference held by the ALJ;

(c) Conduct discovery;

(d) Agree to stipulations of fact or law, which shall be made part of the record;

(e) Present evidence relevant to the issues at the hearing;

(f) Present and cross-examine witnesses;

(g) Present oral arguments at the hearing as permitted by the ALJ; and

(h) Submit written briefs and proposed findings of fact and conclusions of law after the hearing.

§ 22.18 Authority of the ALJ.

(a) The ALJ shall conduct a fair and impartial hearing, avoid delay, maintain order, and assure that a record of the proceeding is made.

(b) The ALJ has the authority to—

(1) Set and change the date, time, and place of the hearing upon reasonable notice to the parties;

(2) Continue or recess the hearing in whole or in part for a reasonable period of time;

(3) Hold conferences to identify or simplify the issues, or to consider other matters that may aid in the expeditious disposition of the proceeding;

(4) Administer oaths and affirmations;

(5) Issue subpoenas requiring the attendance of witnesses and the production of documents at depositions or at hearings;

(6) Rule on motions and other procedural matters;

(7) Regulate the scope and timing of discovery;

(8) Regulate the course of the hearing and the conduct of representatives and parties;

(9) Examine witnesses;

(10) Receive, rule on, exclude, or limit evidence;

(11) Upon motion of a party, take official notice of facts;

(12) Upon motion of a party, decide cases, in whole or in part, by summary judgment where there is no disputed issue of material fact;

(13) Conduct any conference, argument, or hearing on motions in person or by telephone; and

(14) Exercise such other authority as is necessary to carry out the responsibilities of the ALJ under this part.

(c) The ALJ does not have the authority to find Federal statutes or regulations invalid.

§ 22.19 Prehearing conferences.

(a) The ALJ may schedule prehearing conferences as appropriate.

(b) Upon the motion of any party, the ALJ shall schedule at least one prehearing conference at a reasonable time in advance of the hearing.

(c) The ALJ may use prehearing conferences to discuss the following:

(1) Simplification of the issues;

(2) The necessity or desirability of amendments to the pleadings, including the need for a more definite statement;

(3) Stipulations and admissions of fact or as to the contents and authenticity of documents;

(4) Whether the parties can agree to submission of the case on a stipulated record;

(5) Whether a party chooses to waive appearance at an oral hearing and to submit only documentary evidence (subject to the objection of other parties) and written argument;

(6) Limitation of the number of witnesses;

(7) Scheduling dates for the exchange of witness lists and of proposed exhibits;

(8) Discovery;

(9) The time and place for the hearing; and

(10) Such other matters as may tend to expedite the fair and just disposition of the proceedings.

(d) The ALJ may issue an order containing all matters agreed upon by the parties or ordered by the ALJ at a prehearing conference.

§ 22.20 Disclosure of documents.

(a) Upon written request to the reviewing official, the defendant may review any relevant and material documents, transcripts, records, and other materials that relate to the allegations set out in the complaint and upon which the findings and conclusions of the investigating official under § 22.4(b) are based, unless such documents are subject to a privilege under Federal law. Upon payment of fees for duplication, the defendant may obtain copies of such documents.

(b) Upon written request to the reviewing official, the defendant also may obtain a copy of all exculpatory information in the possession of the reviewing official or investigating official relating to the allegations in the complaint, even if it is contained in a document that would otherwise be privileged. If the document would otherwise be privileged, only that portion containing exculpatory information must be disclosed.

(c) The notice sent to the Attorney General from the reviewing official as described in § 22.5 is not discoverable under any circumstances.

(d) The defendant may file a motion to compel disclosure of the documents subject to the provisions of this section. Such a motion may only be filed with the ALJ following the filing of an answer pursuant to § 22.9.

§ 22.21 Discovery.

(a) The following types of discovery are authorized:

(1) Requests for production of documents for inspection and copying;

(2) Requests for admissions of the authenticity of any relevant document or of the truth of any relevant fact;

(3) Written interrogatories; and

(4) Depositions.

(b) For the purpose of this section and §§ 22.22 and 22.23, the term "documents" includes information, documents, reports, answers, records, accounts, papers, and other data and documentary evidence. Nothing contained herein shall be interpreted to require the creation of a document.

(c) Unless mutually agreed to by the parties, discovery is available only as ordered by the ALJ. The ALJ shall regulate the timing of discovery.

(d) *Motions for discovery.*

(1) A party seeking discovery may file a motion with the ALJ. Such a motion shall be accompanied by a copy of the requested discovery, or in the case of depositions, a summary of the scope of the proposed deposition.

(2) Within ten days of service, a party may file an opposition to the motion and/or a motion for protective order as provided in § 22.24.

(3) The ALJ may grant a motion for discovery only if he finds that the discovery sought—

(i) Is necessary for the expeditious, fair, and reasonable consideration of the issues;

(ii) Is not unduly costly or burdensome;

(iii) Will not unduly delay the proceeding; and

(iv) Does not seek privileged information.

(4) The burden of showing that discovery should be allowed is on the party seeking discovery.

(5) The ALJ may grant discovery subject to a protective order under § 22.24.

(e) *Depositions.* (1) If a motion for deposition is granted, the ALJ shall issue a subpoena for the deponent, which may require the deponent to produce documents. The subpoena shall specify the time and place at which the deposition will be held.

(2) The party seeking to depose shall serve the subpoena in the manner prescribed in § 22.8.

(3) The deponent may file with the ALJ a motion to quash the subpoena or a motion for a protective order within ten days of service.

(4) The party seeking to depose shall provide for the taking of a verbatim transcript of the deposition, which it shall make available to all other parties for inspection and copying.

(f) Each party shall bear its own costs of discovery.

§ 22.22 Exchange of witness lists, statements and exhibits.

(a) At least 15 days before the hearing or at such other time as may be ordered by the ALJ, the parties shall exchange witness lists, copies of prior statements of proposed witnesses, and copies of proposed hearing exhibits, including copies of any written statements that the party intends to offer in lieu of live testimony in accordance with § 22.33(b). At the time the above documents are exchanged, any party that intends to rely on the transcript of deposition testimony in lieu of live testimony at the hearing, if permitted by the ALJ, shall provide each party with a copy of the specific pages of the transcript it intends to introduce into evidence.

(b) If a party objects, the ALJ shall not admit into evidence the testimony of any witness whose name does not appear on the witness list or any exhibit not provided to the opposing party as provided above unless the ALJ finds good cause for the failure or that there is no prejudice to the objecting party.

(c) Unless another party objects within the time set by the ALJ, documents exchanged in accordance with paragraph (a) of this section shall be deemed to be authentic for the purpose of admissibility at the hearing.

§ 22.23 Subpoenas for attendance at hearing.

(a) A party wishing to procure the appearance and testimony of any individual at the hearing may request that the ALJ issue a subpoena.

(b) A subpoena requiring the attendance and testimony of an individual may also require the individual to produce documents at the hearing.

(c) A party seeking a subpoena shall file a written request therefor not less than 15 days before the date fixed for the hearing unless otherwise allowed by the ALJ for good cause shown. Such request shall specify any documents to be produced and shall designate the witnesses and describe the address and location thereof with sufficient particularity to permit such witnesses to be found.

(d) The subpoena shall specify the time and place at which the witness is to appear and any documents the witness is to produce.

(e) The party seeking the subpoena shall serve it in the manner prescribed in § 22.8. A subpoena on a party or upon an individual under the control of a party may be served by first class mail.

(f) A party or the individual to whom the subpoena is directed may file with the ALJ a motion to quash the subpoena within ten days after service or on or before the time specified in the subpoena for compliance if it is less than ten days after service.

§ 22.24 Protective order.

(a) A party or a prospective witness or deponent may file a motion for a protective order with respect to discovery sought by an opposing party or with respect to the hearing, seeking to limit the availability or disclosure of evidence.

(b) In issuing a protective order, the ALJ may make any order which justice requires to protect a party or person from annoyance, embarrassment, oppression, or undue burden or expense, including one or more of the following:

(1) That the discovery not be had;

(2) That the discovery may be had only on specified terms and conditions, including a designation of the time or place;

(3) That the discovery may be had only through a method of discovery other than that requested;

(4) That certain matters not be inquired into, or that the scope of discovery be limited to certain matters;

(5) That discovery be conducted with no one present except persons designated by the ALJ;

(6) That the contents of discovery or evidence be sealed;

(7) That a deposition after being sealed be opened only by order of the ALJ;

(8) That a trade secret or other confidential research, development, commercial information, or facts pertaining to any criminal investigation, proceeding, or other administrative investigation not be disclosed or be disclosed only in a designated way; or

(9) That the parties simultaneously file specified documents or information enclosed in sealed envelopes to be opened as directed by the ALJ.

§ 22.25 Fees.

The party requesting a subpoena shall pay the cost of the fees and mileage of any witness subpoenaed in the amounts that would be payable to a witness in a proceeding in United States District Court. A check for witness fees and mileage shall accompany the subpoena when served, except that when a subpoena is issued on behalf of the authority, a check for witness fees and mileage need not accompany the subpoena.

§ 22.26 Form, filing and service of papers.

(a) *Form.* (1) Documents filed with the ALJ shall include an original and two copies.

(2) Every pleading and paper filed in the proceeding shall contain a caption setting forth the title of the action, the case number assigned by the ALJ, and a designation of the paper (e.g., motion to quash subpoena).

(3) Every pleading and paper shall be signed by, and shall contain the address and telephone number of the party or the person on whose behalf the paper was filed, or his or her representative.

(4) Papers are considered filed when they are mailed. Date of mailing may be established by a certificate from the party or its representative or by proof that the document was sent by certified or registered mail.

(b) *Service.* A party filing a document with the ALJ shall, at the time of filing, serve a copy of such document on every other party. Service upon any party of any document other than those required to be served as prescribed in § 22.8 shall be made by delivering a copy or placing a copy of the document in the United States mail, postage prepaid and addressed to the party's last known address. When a party is represented by a representative, service shall be made upon such representative in lieu of the actual party.

(c) *Proof of service.* A certificate of the individual serving the document by personal delivery or by mail, setting forth the manner of service, shall be proof of service.

§ 22.27 Computation of time.

(a) In computing any period of time under this part or in an order issued thereunder, the time begins with the day following the act, event, or default, and includes the last day of the period, unless it is a Saturday, Sunday, or legal holiday observed by the Federal government, in which event it includes the next business day.

(b) When the period of time allowed is less than seven days, intermediate Saturdays, Sundays, and legal holidays observed by the Federal government shall be excluded from the computation.

(c) Where a document has been served or issued by placing it in the mail, an additional five days will be added to the time permitted for any response.

§ 22.28 Motions.

(a) Any application to the ALJ for an order or ruling shall be by motion. Motions shall state the relief sought, the authority relied upon, and the facts alleged, and shall be filed with the ALJ and served on all other parties.

(b) Except for motions made during a prehearing conference or at the hearing, all motions shall be in writing. The ALJ may require that oral motions be reduced to writing.

(c) Within 15 days after a written motion is served, or such other time as may be fixed by the ALJ, any party may file a response to such motion.

(d) The ALJ may not grant a written motion before the time for filing responses thereto has expired, except upon consent of the parties or following a hearing on the motion, but may overrule or deny such motion without awaiting a response.

(e) The ALJ shall make a reasonable effort to dispose of all outstanding motions prior to the beginning of the hearing.

§ 22.29 Sanctions.

(a) The ALJ may sanction a person, including any party or representative for—

(1) Failing to comply with an order, rule, or procedure governing the proceeding;

(2) Failing to prosecute or defend an action; or

(3) Engaging in other misconduct that interferes with the speedy, orderly, or fair conduct of the hearing.

(b) Any such sanction, including but not limited to those listed in paragraphs (c), (d), and (e) of this section, shall reasonably relate to the severity and nature of the failure or misconduct.

(c) When a party fails to comply with an order, including an order for taking a deposition, the production of evidence within the party's control, or a request for admission, the ALJ may—

(1) Draw an inference in favor of the requesting party with regard to the information sought;

(2) In the case of requests for admission, deem each matter of which an admission is requested to be admitted;

(3) Prohibit the party failing to comply with such order from introducing evidence concerning, or otherwise relying, upon testimony relating to the information; and

(4) Strike any part of the pleadings or other submissions of the party failing to comply with such request.

(d) If a party fails to prosecute or defend an action under this part commenced by service of a notice of hearing, the ALJ may dismiss the action or may issue an initial decision imposing penalties and assessments.

(e) The ALJ may refuse to consider any motion, request, response, brief or other document which is not filed in a timely fashion.

§ 22.30 The hearing and burden of proof.

(a) The ALJ shall conduct a hearing on the record in order to determine whether the defendant is liable for a civil penalty or assessment under § 22.3 and, if so, the appropriate amount of any such civil penalty or assessment considering any aggravating or mitigating factors.

(b) The authority shall prove defendant's liability and any aggravating factors by a preponderance of the evidence.

(c) The defendant shall prove any affirmative defenses and any mitigating factors by a preponderance of the evidence.

(d) The hearing shall be open to the public unless otherwise ordered by the ALJ for good cause shown.

§ 22.31 Determining the amount of penalties and assessments.

(a) In determining an appropriate amount of civil penalties and assessments, the ALJ and the authority head, upon appeal, should evaluate any circumstances that mitigate or aggravate the violation and should articulate in their opinions the reasons that support the penalties and assessments they impose. Because of the intangible costs of fraud, the expense of investigating such conduct, and the need to deter others who might be similarly tempted, ordinarily double damages and a significant civil penalty should be imposed.

(b) Although not exhaustive, the following factors are among those that may influence the ALJ and the authority head in determining the amount of penalties and assessments to impose with respect to the misconduct (*i.e.*, the false, fictitious, or fraudulent claims or statements) charged in the complaint:

(1) The number of false, fictitious, or fraudulent claims or statements;

(2) The time period over which such claims or statements were made;

(3) The degree of the defendant's culpability with respect to the misconduct;

(4) The amount of money or the value of the property, services, or benefit falsely claimed;

(5) The value of the Government's actual loss as a result of the misconduct, including forseeable consequential damages and the costs of investigation;

(6) The relationship of the amount imposed as civil penalties to the amount of the Government's loss;

(7) The potential or actual impact of the misconduct upon national defense, public health or safety, or public confidence in the management of Government programs and operations, including particularly the impact on the intended beneficiaries of such programs;

(8) Whether the defendant has engaged in a pattern of the same or similar misconduct;

(9) Whether the defendant attempted to conceal the misconduct;

(10) The degree to which the defendant has involved others in the misconduct or in concealing it;

(11) Where the misconduct of employees or agents is imputed to the defendant, the extent to which the defendant's practices fostered or attempted to preclude such misconduct;

(12) Whether the defendant cooperated in or obstructed an investigation of the misconduct;

(13) Whether the defendant assisted in identifying and prosecuting other wrongdoers;

(14) The complexity of the program or transaction, and the degree of the defendant's sophistication with respect to it, including the extent of the defendant's prior participation in the program or in similar transactions;

(15) Whether the defendant has been found, in any criminal, civil, or administrative proceeding to have engaged in similar misconduct or to have dealt dishonestly with the Government of the United States or of a State, directly or indirectly; and

(16) The need to deter the defendant and others from engaging in the same or similar misconduct.

(c) Nothing in this section shall be construed to limit the ALJ or the authority head from considering any other factors that in any given case may mitigate or aggravate the offense for which penalties and assessments are imposed.

§ 22.32 Location of hearing.

(a) The hearing may be held—

(1) In any judicial district of the United States in which the defendant resides or transacts business;

(2) In any judicial district of the United States in which the claim or statement in issue was made; or

(3) In such other place as may be agreed upon by the defendant and the ALJ.

(b) Each party shall have the opportunity to present argument with respect to the location of the hearing.

(c) The hearing shall be held at the place and at the time ordered by the ALJ.

§ 22.33 Witnesses.

(a) Except as provided in paragraph (b) of this section, testimony at the hearing shall be given orally by witnesses under oath or affirmation.

(b) At the discretion of the ALJ, testimony may be admitted in the form of a written statement or deposition. Any such written statement must be provided to all other parties along with the last known address of such witness, in a manner which allows sufficient time for other parties to subpoena such witness for cross-examination at the hearing. Prior written statements of witnesses proposed to testify at the hearing and deposition transcripts shall be exchanged as provided in § 22.22(a).

(c) The ALJ shall exercise reasonable control over the mode and order of interrogating witnesses and presenting evidence so as to (1) Make the interrogation and presentation effective for the ascertainment of the truth, (2) Avoid needless consumption of time, and (3) Protect witnesses from harassment or undue embarrassment.

(d) The ALJ shall permit the parties to conduct such cross-examination as may be required for a full and true disclosure of the facts.

(e) At the discretion of the ALJ, a witness may be cross-examined on matters relevant to the proceeding without regard to the scope of his or her direct examination. To the extent permitted by the ALJ, cross-examination on matters outside the scope of direct examination shall be conducted in the manner of direct examination and may proceed by leading questions only if the witness is a hostile witness, an adverse party, or a witness identified with an adverse party.

(f) Upon motion of any party, the ALJ shall order witnesses excluded so that they cannot hear the testimony of other witnesses. This rule does not authorize exclusion of—

(1) A party who is an individual;

(2) In the case of a party that is not an individual, an officer or employee of the party appearing for the entity pro se or designated by the party's representative; or

(3) An individual whose presence is shown by a party to be essential to the presentation of its case, including an individual employed by the Government engaged in assisting the representative for the Government.

§ 22.34 Evidence.

(a) The ALJ shall determine the admissibility of evidence.

(b) Except as provided in this part, the ALJ shall not be bound by the Federal Rules of Evidence. However, the ALJ may apply the Federal Rules of Evidence where appropriate, e.g., to exclude unreliable evidence.

(c) The ALJ shall exclude irrelevant and immaterial evidence.

(d) Although relevant, evidence may be excluded if its probative value is substantially outweighed by the danger of unfair prejudice, confusion of the issues, or by considerations of undue delay or needless presentation of cumulative evidence.

(e) Although relevant, evidence may be excluded if it is privileged under Federal law.

(f) Evidence concerning offers of compromise or settlement shall be inadmissible to the extent provided in Rule 408 of the Federal Rules of Evidence.

(g) The ALJ shall permit the parties to introduce rebuttal witnesses and evidence.

(h) All documents and other evidence offered or taken for the record shall be open to examination by all parties, unless otherwise ordered by the ALJ pursuant to § 22.24.

§ 22.35 The record.

(a) The hearing will be recorded and transcribed. Transcripts may be obtained following the hearing from the ALJ at a cost not to exceed the actual cost of duplication.

(b) The transcript of testimony, exhibits and other evidence admitted at the hearing, and all papers and requests filed in the proceeding constitute the

record for the decision by the ALJ and the authority head.

(c) The record may be inspected and copied (upon payment of a reasonable fee) by anyone, unless otherwise ordered by the ALJ pursuant to § 22.24.

§ 22.36 Post-hearing briefs.

The ALJ may require the parties to file post-hearing briefs. In any event, any party may file a post-hearing brief. The ALJ shall fix the time for filing such briefs, not to exceed 60 days from the date the parties receive the transcript of the hearing or, if applicable, the stipulated record. Such briefs may be accompanied by proposed findings of fact and conclusions of law. The ALJ may permit the parties to file reply briefs.

§ 22.37 Initial decision.

(a) The ALJ shall issue an initial decision based only on the record, which shall contain findings of fact, conclusions of law, and the amount of any penalties and assessments imposed.

(b) The findings of fact shall include a finding on each of the following issues:

(1) Whether the claims or statements identified in the complaint, or any portions thereof, violate § 22.3;

(2) If the person is liable for penalties or assessments, the appropriate amount of any such penalties or assessments considering any mitigating or aggravating factors that he or she finds in the case, such as those described in § 22.31.

(c) The ALJ shall promptly serve the initial decision on all parties within 90 days after the time for submission of post-hearing briefs and reply briefs (if permitted) has expired. The ALJ shall at the same time serve all parties with a statement describing the right of any defendant determined to be liable for a civil penalty or assessment to file motion for reconsideration with the ALJ or a notice of appeal with the authority head. If the ALJ fails to meet the deadline contained in this paragraph, he or she shall notify the parties of the reason for the delay and shall set a new deadline.

(d) Unless the initial decision of the ALJ is timely appealed to the authority head, or a motion for reconsideration of the initial decision is timely filed, the initial decision shall constitute the final decision of the authority head and shall be final and binding on the parties 30 days after it is issued by the ALJ.

§ 22.38 Reconsideration of initial decision.

(a) Except as provided in paragraph (d) of this section, any party may file a motion for reconsideration of the initial decision within 20 days of receipt of the initial decision. If service was made by mail, receipt will be presumed to be five days from the date of mailing in the absence of contrary proof.

(b) Every such motion must set forth the matters claimed to have been erroneously decided and the nature of the alleged errors. Such motion shall be accompanied by a supporting brief.

(c) Responses to such motions shall be allowed only upon request of the ALJ.

(d) No party may file motion for reconsideration of an initial decision that has been revised in response to a previous motion for reconsideration.

(e) The ALJ may dispose of a motion for reconsideration by denying it or by issuing a revised initial decision.

(f) If the ALJ denies a motion for reconsideration, the initial decision shall constitute the final decision of the authority head and shall be final and binding on the parties 30 days after the ALJ denies the motion, unless the initial decision is timely appealed to the authority head in accordance with § 22.39.

(g) If the ALJ issues a revised initial decision, that decision shall constitute the final decision of the authority head and shall be final and binding on the parties 30 days after it is issued, unless it is timely appealed to the authority head in accordance with § 22.39.

§ 22.39 Appeal to authority head.

(a) Any defendant who has filed a timely answer and who is determined in an initial decision to be liable for a civil penalty or assessment may appeal such decision to the authority head by filing a notice of appeal with the authority head in accordance with this section.

(b)(1) A notice of appeal may be filed at any time within 30 days after the ALJ issues an initial decision. However, if another party files a motion for reconsideration under § 22.38, consideration of the appeal shall be stayed automatically pending resolution of the motion for reconsideration.

(2) If a motion for reconsideration is timely filed, a notice of appeal may be filed within 30 days after the ALJ denies the motion or issues a revised initial decision, whichever applies.

(3) The authority head may extend the initial 30 day period for an additional 30 days if the defendant files with the authority head a request for an extension within the initial 30 day period and shows good cause.

(c) If the defendant files a timely notice of appeal with the authority head, and the time for filing motions for reconsideration under § 22.38 has expired, the ALJ shall forward the record of the proceeding to the authority head.

(d) A notice of appeal shall be accompanied by a written brief specifying exceptions to the initial decision and reasons supporting the exceptions.

(e) The representative for the Government may file a brief in opposition to exceptions within 30 days of receiving the notice of appeal and accompanying brief.

(f) There is no right to appear personally before the authority head.

(g) There is no right to appeal any interlocutory ruling by the ALJ.

(h) In reviewing the initial decision, the authority head shall not consider any objection that was not raised before the ALJ unless a demonstration is made of extraordinary circumstances causing the failure to raise the objection.

(i) If any party demonstrates to the satisfaction of the authority head that additional evidence not presented at such hearing is material and that there were reasonable grounds for the failure to present such evidence at such hearing, the authority head shall remand the matter to the ALJ for consideration of such additional evidence.

(j) The authority head may affirm, reduce, reverse, compromise, remand, or settle any penalty or assessment, determined by the ALJ in any initial decision.

(k) The authority head shall promptly serve each party to the appeal with a copy of the decision of the authority head and a statement describing the right of any person determined to be liable for a penalty or assessment to seek judicial review.

(l) Unless a petition for review is filed as provided in 31 U.S.C. 3805 after a defendant has exhausted all administrative remedies under this part and within 60 days after the date on which the authority head serves the defendant with a copy of the authority head's decision, a determination that a defendant is liable under § 22.3 is final and is not subject to judicial review.

§ 22.40 Stays ordered by the Department of Justice.

If at any time the Attorney General or an Assistant Attorney General designated by the Attorney General transmits to the authority head a written finding that continuation of the administrative process described in this part with respect to a claim or statement may adversely affect any pending or potential criminal or civil action related to such claim or statement, the authority head shall stay the process immediately. The authority head may order the process resumed only upon receipt of the written authorization of the Attorney General.

§ 22.41 Stay pending appeal.

(a) An initial decision is stayed automatically pending disposition of a motion for reconsideration or of an appeal to the authority head.

(b) No administrative stay is available following a final decision of the authority head.

§ 22.42 Judicial review.

Section 3805 of title 31, United States Code, authorizes judicial review by an appropriate United States District Court of a final decision of the authority head imposing penalties or assessments under this part and specifies the procedures for such review.

§ 22.43 Collection of civil penalties and assessments.

Sections 3806 and 3808(b) of title 31, United States Code, authorize actions for collection of civil penalties and assessments imposed under this part and specify the procedures for such actions.

§ 22.44 Right to administrative offset.

The amount of any penalty or assessment which has become final, or for which a judgment has been entered under § 22.42 or § 22.43, or any amount agreed upon in a compromise or settlement under § 22.46, may be collected by administrative offset under 31 U.S.C. 3716, except that an administrative offset may not be made under this subsection against a refund of an overpayment of Federal taxes, then or later owing by the United States to the defendant.

§ 22.45 Deposit in Treasury of United States.

All amounts collected pursuant to this part shall be deposited as miscellaneous receipts in the Treasury of the United States, except as provided in 31 U.S.C. 3806(g).

§ 22.46 Compromise or settlement.

(a) Parties may make offers of compromise or settlement at any time.

(b) The reviewing official has the exclusive authority to compromise or settle a case under this part at any time after the date on which the reviewing official is permitted to issue a complaint and before the date on which the ALJ issues an initial decision.

(c) The authority head has exclusive authority to compromise or settle a case under this part at any time after the date on which the ALJ issues an initial decision, except during the pendency of any review under § 22.42 or during the pendency of any action to collect penalties and assessments under § 22.43.

(d) The Attorney General has exclusive authority to compromise or settle a case under this part during the pendency of any review under § 22.42 or of any action to recover penalties and assessments under 31 U.S.C. 3806.

(e) The investigating official may recommend settlement terms to the reviewing official, the authority head, or the Attorney General, as appropriate. The reviewing official may recommend settlement terms to the authority head, or the Attorney General, as appropriate.

(f) Any compromise or settlement must be in writing.

§ 22.47 Limitations.

(a) The notice of hearing (under § 22.12) with respect to a claim or statement must be served in the manner specified in § 22.8 within 6 years after the date on which such claim or statement is made.

(b) If the defendant fails to file a timely answer, service of a notice under § 22.10(b) shall be deemed a notice of hearing for purposes of this section.

(c) The statute of limitations may be extended by agreement of the parties.

Signed at Washington, DC, this 14th day of December 1987.

Dennis E. Whitfield,

Deputy Secretary of Labor.

Part IV

Federal Maritime Commission

Inquiry on Tariff Automation; Notice

VOL 52 ISS 245 DEC 22 1987 UMI

FEDERAL MARITIME COMMISSION

Inquiry on Tariff Automation

The Federal Maritime Commission (FMC) is seeking the views of persons who are not potential bidders on the functionality of its proposed Automated Tariff Filing and Information System (ATFI).

The FMC has the responsibility under the shipping statutes to:

1. Accept the filing of common carrier tariffs and service contracts containing rates and charges governing transportation of cargo in U.S. waterborne domestic offshore and foreign commerce. (Marine terminal operators also file tariffs of their rates and charges.)

2. Ensure that tariffs and service contract data comply with basic statutory requirements before they are accepted for filing.

3. Maintain the official file of tariffs and service contracts and to certify authentic and accurate tariff data to courts and other tribunals.

4. Make tariffs and the essential terms of service contracts available for public inspection.

Due to the ever-growing volume of tariff-type data filed each year in paper format, the FMC, in order to better perform its statutory responsibilities, is attempting to automate its tariff functions through an electronic Automated Tariff Filing and Information System. The final system is scheduled to begin full operation in the Fall of 1989.

In 1986, a study by the FMC's private-sector contractor found that tariff automation was feasible and the FMC's Industry Advisory Committee agreed. In October of 1987, a Benefit Cost Analysis was prepared by a commercial contractor and corroborated the economic feasibility of the project. (This document is "Procurement Sensitive" and is not now available.) Recently, the FMC was delegated procurement authority for the project by the General Services Administration, and a draft functional Request for Proposals (RFP) is being finalized by a private-sector contractor for the FMC.

On December 3, 1987, the FMC requested in the Commerce Business Daily letters of interest by January 4, 1988 from potential bidders on the project. (See this CBD notice or the FMC's Press Release of the same date for further details.) The draft RFP will be sent to firms on the Bidders' List in January, 1988, and a Presolicitation Bidders Conference will be held shortly thereafter to respond to written and oral questions of the potential bidders, before the RFP is finalized. Technical matters are intended to be resolved by these specialized procurement procedures.

The impact of the proposed system's functionality, however, on the public and the shipping industry has been only recently developed in detail sufficient for meaningful review by, *inter alia*, the following types of firms:

1. The shipping industry, e.g., shippers, carriers, freight forwarders, and terminal operators;

2. The information industry, e.g., the commercial firms who perform requested tariff filing, retrieval and watching services for the shipping industry; and

3. Associations, small businesses, and other interested persons, such as the public and government agencies.

Accordingly, before the RFP is finalized, the FMC is providing this opportunity for comment by firms other than potential bidders on the below-described basic functionality of the proposed system.

The electronic ATFI system, for which the FMC is seeking a prime contractor, will be run on the contractor's central computer with appropriate terminals at the FMC for tariff review, processing, and retrieval. The format of tariff data to be electronically filed is being developed in conjunction with the industry Transportation Data Coordinating Committee and will emphasize "tariff line items," *vis-a-vis*, tariff pages, as under the present system. "Tariff line items" are basically equivalent to commodity rate items in current paper tariffs and can be amended directly, without having to issue an entire revised page.

As recommended by the FMC's Advisory Committee, standardized commodity or geographic coding will not be mandated at the beginning, but the system must have the capability to provide for these functions at the appropriate time. The system will also include the essential terms of service contracts.

Full implementation of the system will be in phases to allow commercial firms time to adapt their operations. Exemptions, at least temporary, will be granted to some types of tariff filers who are not economically able to use the electronic system.

The system will be as compatible as possible with existing computer equipment through the use of software for full connectibility. Filing of tariffs will be done primarily by using asynchronous terminals or microcomputers, dialing in with a modem to the FMC's data base. The filing software will provide on-line edit checks to ensure that the tariff information is correct and that basic statutory provisions are complied with before the tariff can be officially on file. Such edit checks, for example, will be able to electronically identify improper effective dates, such as a rate increase on less than 30-days notice. Other problems for which rejection is warranted, such as unclear or conflicting tariff provisions, will still have to be handled by FMC staff and, if necessary, resolved at the Commission level. The system's computer capabilities, however, will facilitate this process also.

The ATFI system will have appropriate security mechanisms to protect the integrity of the data base.

Tariff filers will be able to file and amend their tariff materials by remote access directly to the ATFI system by carriers or conferences almost any time of day. The carrier or conference will be able to screen-scan its tariff so that the appropriate item can be amended. Commercial tariff services can also continue to be used by carriers and conferences for filing, e.g., by direct input into the data base, after creating tariffs on instruction from their clients, or transforming their paper tariffs into electronic form. The FMC will encourage commercial tariff services to assist small firms who may find it difficult to file electronically.

Once the tariff data is officially on file, the FMC will download the entire data base in "flat files", formatted onto computer tapes which will be sold to any person at the relatively inexpensive, marginal cost of dissemination. This will satisfy the FMC's statutory duty of providing copies of tariffs at a reasonable charge. In order to keep up with a substantial number of rapidly changing freight rates in the shipping industry, however, interested persons must obtain these updated data-base tapes frequently. FMC will offer a subscription service to provide this capability.

The FMC will not perform any value-added processing of the tariff data for sale to the shipping public in competition with commercial tariff services. It is expected that those services will subscribe to the data-base tapes to facilitate their value-added services. The FMC must, however, use the system to process tariff data internally for investigative and other regulatory purposes and will continue to utilize appropriate and available, value-added services of commercial tariff firms for this purpose.

In order to carry out its other statutory function of making tariffs and essential terms of service contracts available for

public inspection, the FMC will continue to have a public reference room at its Headquarters in Washington, DC. Here, interested persons can access a terminal on which information on a particular tariff will be brought up on the screen and scanned to find the necessary rates and rules. Paper copies of tariff data will still be available upon written request, especially for certification to courts and other tribunals for proceedings involving disputes over historical tariff rates.

Another retrieval feature currently contained in the draft RFP is remote access to the FMC data base by modem, almost any time of day, for retrieval of tariff information by any interested person. This is described in the October 28, 1986 Feasibility Study Final Report as follows:

> "b. Retrieval and Analysis by the Public
>
> * * * * *
>
> "FMC would also allow remote access whereby a member of the general public could access the automated tariff system from remote locations. For example, the system would enable a shipper on the West Coast to retrieve data from the automated tariff system using a terminal or microcomputer equipped with a device (i.e., a modem) to enable data communications over public telephone lines.
>
> "* * * However, members of the general public would only be able to perform relatively rudimentary retrievals, and essentially no analysis of the data. Specifically, members of the public would only be able to retrieve one tariff at a time, in its full format. To retrieve a tariff, the public user would have to specify the specific tariff on a particular carrier that is desired; the public user would not be able to search by keys (e.g., by route or commodity).
>
> "* * * FMC has imposed these restrictions based on a careful analysis of applicable federal policies and precedents. FMC does not want to compete with third-party services for the provision of sophisticated retrieval and analysis of tariff data for shippers, carriers, and others in the private market. * * * In the absence of tariff automation—i.e., the status quo—FMC will make available copies of tariffs to members of the public only if they can specify the particular tariff desired. A user fee is assessed for this service. FMC would not expand these services after tariff automation is implemented. However, * * * FMC would help ensure that third-party services can provide such services." [Pages IV–8 and 9.]

However, to ensure that the system will not compete with commercial tariff information firms, the FMC is considering not including this general electronic retrieval feature in its final RFP, thereby leaving this function to be performed solely by existing tariff services for their clients, as they do now in a paper environment. The change would not prevent carrier and conference filers from remotely accessing their own tariffs on the FMC's data base for retrieval, as well as for filing. Moreover, carriers would not be precluded from remotely accessing ATFI for conference tariffs to which they belong in order to check the official freight rates that should be charged to their shippers; and any person can use the terminals in the FMC public reading room for tariff retrieval. However, under this potential change, carriers would have remote access to their competitors' tariff data only through the value-added vendors that will provide this service.

The foregoing is the basic "functionality" of ATFI, which is the result of many months of deliberations by the FMC after consideration of major policies on automation and electronic technology, the needs of the shipping industry and other affected businesses, proper use of Government funds, and the public interest. Other details, such as exact costs, must still be worked out as the system is contracted for and further developed.

The FMC will operate the ATFI system as a prototype for a period of at least six months to test it and improve its functionality and performance. Volunteers will be sought for this prototype operation, during which there will be public-comment rulemakings on the final format of electronic tariff data and for establishment of user fees.

In this outreach effort, the FMC is providing opportunity for comment by anyone whose business operation may be affected by the basic functionality of ATFI, so that the final RFP can set forth the necessary specifications for the best possible system.

In order for your comments to be so considered, they must be submitted in writing, in an original and 20 copies by January 22, 1988, to: Joseph C. Polking, Secretary, Federal Maritime Commission, 1100 L Street, NW., Washington, DC 20573.

After January 22, 1988, all comments will be made available to the public at the FMC's normal cost of production.

Responses to this Notice should not include procurement-related comments or questions about the technical nature of the system requirements or contractual or other issues raised by the draft RFP. These will be handled in the Presolicitation Bidders Conference. Also, commenters should not submit their qualifications as bidders on the project or similar promotional materials, since these will be requested by the RFP during the bidding process.

A copy of the summary of the 1986 Feasibility Study is available upon request to the Bureau of Administration at 202/523–5866. Because of the procurement process, however, no further information on the proposed system can be given out until the draft RFP is made public.

By the Commission.

Joseph C. Polking,

Secretary.

VOL 52 ISS 245 DEC 22 1987 UMI

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Parts 108 and 129

[Docket No. 25502; Amdts. Nos. 108-5 and 129-15]

Airplane Operator and Foreign Air Carrier Security Rules

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule; request for comments.

SUMMARY: This final rule requires the application of certain security procedures to all persons entering an airport sterile area in the United States at a preboarding screening check point. These procedures are designed to prevent or deter the carriage aboard aircraft of explosives, incendiaries, and deadly or dangerous weapons. These amendments are intended to limit the application of special procedures that have allowed certain classes of individuals to enter sterile areas through screening points without inspection of their persons and accessible property. They are needed to respond to a threat to aviation security highlighted by the recent crash of an air carrier aircraft with the loss of 44 lives.

DATES: This amendment is effective December 21, 1987. Comments must be received on or before February 21, 1988.

ADDRESS: Send comments on this final rule in duplicate to: Federal Aviation Administration, Office of the Chief Counsel, Attn: Rules Docket (AGC-204), Docket No. 25502, 800 Independence Avenue SW., Washington, DC 20591; or deliver comments in duplicate to: Federal Aviation Administration Rules Docket, Room 916, 800 Independence Avenue SW., Washington, DC 20591. Comments must be marked Docket No. 25502. Comments may be examined in the Rules Docket on weekdays, except Federal holidays, between 8:30 a.m. and 5:00 p.m.

FOR FURTHER INFORMATION CONTACT: Mr. Donnie Blazer, Domestic Civil Aviation Security Division, Office of Civil Aviation Security, Federal Aviation Administration, 800 Independence Avenue SW., Washington, DC 20591. Telephone: (202) 267-8058.

SUPPLEMENTARY INFORMATION:

Comments Invited

Because of the emergency need for this regulation, it is being adopted without notice and public comment. However, the Regulatory Policies and Procedures of the Department of Transportation (44 FR 11034; February 26, 1979) provide that, to the maximum extent possible, DOT operating administrations should provide an opportunity for public comment, after issuance, for regulations issued without prior notice. Accordingly, interested persons are invited to comment on this final rule by submitting such written data, views, or arguments as they may desire. Communications should identify the regulatory docket and be submitted in duplicate to: Federal Aviation Administration, Office of the Chief Counsel, Attention: Rules Docket, AGC-204, Docket No. 25502, 800 Independence Avenue SW., Washington, DC 20591. All comments received will be available in the Rules Docket for examination by interested persons. This amendment may be changed in the light of comments received.

Commenters wishing the FAA to acknowledge receipt of their comments on this final rule must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket No. 25502." The postcard will be date and time stamped and returned to the commenter.

Background

Part 108 of the Federal Aviation Regulations requires each certificate holder required to conduct security screening to prevent or deter the carriage aboard its airplanes of any explosive, incendiary, or deadly or dangerous weapon on or about any individual's person or accessible property. The certificate holder must use the procedures included, and the facilities and equipment described, in its security program approved by the FAA for this purpose. Similar requirements in Part 129 apply to foreign air carriers landing or taking off in the United States.

Under the security screening procedures adopted by U.S. certificate holders and foreign air carriers in their required security programs, employees of the airport and air carriers and other classes of individuals, including law enforcement officials, have been permitted to pass through airport screening points under special procedures. Under these programs, many of these individuals have not been required to submit to the inspection of their persons or accessible property. The FAA did not regard these classes of individuals as a risk to aviation security when they were properly identified and the special procedures were correctly applied.

Recent events have caused concern over the proper application of these procedures. On December 7, 1987, Pacific Southwest Airlines Flight 1771 apparently was caused to crash by an individual who had smuggled a gun aboard the aircraft. Forty-four persons lost their lives in this incident. While it is not yet clearly established whether the perpetrator of this crime used an air carrier employee identification card to avoid inspection of his person and property, the incident raises questions about the applicability of the screening process to airport and airline employees. Clearly proper application of the special screening procedures should prevent any unauthorized airport or airline employee from avoiding inspection of his or her person and accessible property. The FAA is particularly concerned that individuals, using real or forged identification, may attempt to similarly compromise the screening system. To ensure maximum protection of all of those involved in aviation and restore public confidence in the aviation security system, the FAA is adopting immediately rules to remove this possible abuse of the screening system.

These amendments to Parts 108 and 129 provide that all individuals who enter an airport sterile area at each preboarding screening checkpoint in the United States must be inspected using procedures, facilities, and equipment designed to detect explosives, incendiaries, and deadly or dangerous weapons. In addition, all accessible property under that person's control must be inspected. These inspection procedures will be applied to all airport and airline employees. Only limited exceptions will be authorized by the Administrator.

These emergency amendments apply only to operations of certificate holders and foreign air carriers in the United States. They apply to screening at each checkpoint in the United States for which the certificate holder or foreign air carrier is responsible, even if the screening of its passengers at a specific checkpoint is conducted by another operator.

Reason for No Notice and Immediate Adoption

These amendments are needed immediately to ensure the overall effectiveness of the aviation security regulations to meet this particular threat. For this reason, notice and public procedure are impracticable, and good cause exists for making this amendment effective in less then 30 days. In accordance with DOT Regulatory Policies and Procedures, an opportunity for public comment after publication is being provided.

Economic Assessment

Because of the emergency need for this regulation and in accordance with section 8(a)(1) of Executive Order 12291, I find that following the procedures of that Executive Order is impracticable. For the same reason, no regulatory evaluation has been prepared prior to publication of this final rule. In accordance with section 11(a) of the Department of Transportation Regulatory Policies and Procedures (44 FR 11034; February 26, 1979), a regulatory evaluation will be prepared and placed in the public docket, unless an exception is granted by the Secretary of Transportation.

Because none of the certificate holders affected by the amendment to Part 108 is a small entity and because the cost to the additional individuals submitting themselves to detection procedures is minimal, these amendments will not have a significant economic impact on a substantial number of small entities.

Conclusion

In accordance with section 8(a)(1) of Executive Order 12291, because of the emergency need for this regulation, the procedures in that Executive Order have not been followed. In view of the substantial public interest in the matter of aviation security, this regulation is considered significant under the Department of Transportation Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). Since none of the certificate holders affected by the amendment to Part 108 is a small entity and since the cost to individuals is minimal, it is certified that these amendments will not have a significant economic impact on a substantial number of small entities. A copy of the regulatory evaluation to be prepared for these amendments will be placed in the public docket, unless an exception is granted by the Secretary of Transportation.

List of Subjects

14 CFR Part 108

Airplane operator security, Aviation safety, Air transportation, Air carrier, Airlines, Security measures, Transportation.

14 CFR Part 129

Foreign air carrier, Aircraft, Air carrier.

The Amendment

Accordingly, Parts 108 and 129 of the Federal Aviation Regulations (14 CFR Part 108 and 129) are amended as follows:

PART 108—[AMENDED]

1. The authority citation for Part 108 continues to read as follows:

Authority: 49 U.S.C. 1354, 1356, 1357, 1358, 1421, and 1424; 49 U.S.C. 106(g) (Revised, Pub. L. 97-449, January 12, 1983).

2. By adding a new paragraph (c) to § 108.9 to read as follows:

§ 108.9 Screening of passengers and property.

* * * * *

(c) Except as provided by its approved security program, each certificate holder required to conduct screening under a security program shall use the procedures included, and the facilities and equipment described, in its approved security program for detecting explosives, incendiaries, and deadly or dangerous weapons to inspect each person entering a sterile area at each preboarding screening checkpoint in the United States for which it is responsible, and to inspect all accessible property under that person's control.

PART 129—[AMENDED]

3. The authority citation for Part 129 continues to read as follows:

Authority: 49 U.S.C. 1346, 1354(a), 1356, 1357, 1421, 1502, and 1511; 49 U.S.C. 106(g) (Revised, Pub. L. 97-449, January 12, 1983).

4. By adding a new paragraph (j) to § 129.25 to read as follows:

§ 129.25 Airplane security.

* * * * *

(j) Unless otherwise authorized by the Administrator, each foreign air carrier required to conduct screening under this part shall use procedures, facilities, and equipment for detecting explosives, incendiaries, and deadly or dangerous weapons to inspect each person entering a sterile area at each preboarding screening checkpoint in the United States for which it is responsible, and to inspect all accessible property under that person's control.

T. Allan McArtor,

Administrator.

Issued in Washington, DC., on December 16, 1987.

BEST COPY AVAILABLE

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers for $340.00 per year, or $170.00 for 6 months in paper form, or $188.00 per year, or $94.00 for six months in microfiche form, payable in advance. The charge for individual copies is $1.50 for each issue, or $1.50 for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402, or charge to your GPO Deposit Account or VISA or Mastercard.

There are no restrictions on the republication of material appearing in the **Federal Register**.

How To Cite This Publication: Use the volume number and the page number. Example: 52 FR 12345.

Rules and Regulations

Federal Register
Vol. 52, No. 246
Wednesday, December 23, 1987

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

DEPARTMENT OF AGRICULTURE

Office of the Secretary

7 CFR Part 7

Selection and Functions of Agricultural Stabilization and Conservation (ASC) State, County and Community Committees

AGENCY: Agricultural Stabilization and Conservation Service (ASCS), USDA.

ACTION: Interim rule.

SUMMARY: This interim rule implements provisions of section 8(b) of the Soil Conservation and Domestic Allotment Act (16 U.S.C. 590h(b)) as amended by the Food Security Act of 1985 (The "1985 Act"), Pub. L. 99–253, and the Agriculture, Rural Development, and Related Agencies Appropriations Act, 1987, as included in Public Laws 99–500 and 99–591 ("Pub. L. 99–500") with respect to the conduct and activities of State, county, and community ASC committees and the manner in which committee members are elected. The major revisions made by this rule are: (1) The manner in which community ASC committee members are elected and (2) the manner in which county ASC committee members are elected. Generally, this rule provides that community ASC committees shall consist of members who are elected from within the community. County ASC committees will consist of members elected by community ASC committee. In counties with one community ASC committee, such committee shall also serve as the county ASC committee.

DATES: This interim rule is effective December 23, 1987.

Comments must be received on or before January 22, 1988 in order to be assured of consideration.

ADDRESS: Send comments to: Director, Cotton, Grains, and Rice Price Support Division, Room 3630–S, P.O. Box 2415, Washington, DC 20013.

FOR FURTHER INFORMATION CONTACT: Karl V. Choice, Assistant to the Director, Cotton, Grain, and Rice Price Support Division, Agricultural Stabilization and Conservation Service, U.S. Department of Agriculture, P.O. Box 2415, Washington, DC 20013, Phone (202) 447–8782.

SUPPLEMENTARY INFORMATION:

This rule has been reviewed under U.S. Department of Agriculture (USDA) procedure established in accordance with provisions of Executive Order 12291 and Departmental Regulation 1512–1 and has been classified "not major." It has been determined that these program provisions will not result in: (1) An annual effect on the economy of $100 million or more; (2) a major increase in costs or process for consumers, individuals, industries, Federal, State or local government agencies or geographic regions; or (3) significant adverse effects on competition, employment, investment, productivity, innovation, or the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

It has been determined that a Regulatory Impact Analysis is not required for the changes which are made by this interim rule.

It has been determined that the Regulatory Flexibility Act is not applicable to this interim rule since ASCS is not required by 5 U.S.C. 553 or any other provision of law to publish a notice of proposed rulemaking with respect to the subject matter of this rule.

This program/activity is not subject to the provisions of Executive Order 12372 which requires intergovernmental consultation with State and local officials. See the Notice related to 7 CFR Part 3015, Subpart V, published at 48 FR 29115 (June 24, 1983).

It has been determined by an environmental evaluation that this action will have no significant impact on the quality of the human environment. Therefore, neither an environmental assessment nor an environmental impact statement is needed.

Background

Section 8(b) of the Soil Conservation and Domestic Allotment Act, as amended, provides for the selection of local (referred to as "community" committees in 7 CFR Part 7), county and State ASC committees. These committees are utilized in the administration of various programs conducted by the Department of Agriculture.

The 1985 Act and Public Laws 99–253 and 99–500 amended section 8(b) with respect to the manner in which local ("community") and county ASC committees are selected. Prior to these amendments, eligible farmers within a community elected a community ASC committee which in turn elected a county ASC committee person from eligible farmers within the county when the number of community ASC committees that were in a county was greater than one. In those counties in which there was only one community ASC committee, this committee also served as the county ASC committee. All county ASC committees consist of three members. The amendments made by the 1985 Act, Public Laws 99–253 and 99–500 provide that county ASC committees may be selected in one of two methods. Under the first method, farmers within one of three local administrative areas in a county may elect community ASC committee members who in turn elect a member to the county ASC committee. Under the second method, the county ASC committee may, if there was one community ASC committee established in a county prior to December 24, 1985, provide that the farmers in the community elect directly a member of the county ASC committee. Also, the length of office for community ASC committee members is increased from one to three years.

Special provisions were also made with respect to counties with a small number of farmers. County committees may reduce the number of local administrative areas from three to one if there is less than 150 farmers in the county. In addition, the Secretary may include more than one county or parts of different counties in a local administrative area if the Secretary determines that there is an insufficient number of farmers in an area to establish a slate of candidates and hold an election.

In addition to incorporating the amendments made by these statutory provisions, 7 CFR Part 7 also is amended to set forth a statement of the current

duties of State ASC committees and to make certain technical and grammatical corrections. Accordingly, the rule sets forth 7 CFR Part 7 in its entirety.

Since no substantive changes are made to 7 CFR Part 7 except as required by the amendments of the authorizing legislation, it has been determined that this interim rule shall become effective upon publication in the **Federal Register** without prior opportunity for public comment. Comments are requested, however, and will be taken into consideration in developing the final rule.

List of Subjects in 7 CFR Part 7

Agriculture.

Accordingly, 7 CFR Part 7 is revised to read as follows:

PART 7—SELECTION AND FUNCTIONS OF AGRICULTURAL STABILIZATION AND CONSERVATION STATE, COUNTY AND COMMUNITY COMMITTEES

Sec.

7.1 Administration.
7.2 General.
7.3 Definitions.
7.4 Selection of committee members.
7.5 Eligible voters.
7.6 Determination of elective areas.
7.7 Calling of elections.
7.8 Conduct of community committee elections.
7.9 Election of community committee members, delegates to local administrative area and county conventions, and county committee members.
7.10 Conduct of county convention.
7.11 County committee members.
7.12 Tie votes.
7.13 Vacancies.
7.14 Appeals.
7.15 Eligibility requirements of county committee members, community committee members, and delegates.
7.16 Eligibility requirements of all other personnel.
7.17 Dual office.
7.18 Terms of office of county and community members.
7.19 Terms of office of delegates to the conventions.
7.20 State committee duties.
7.21 County committee duties.
7.22 Community committee duties.
7.23 Chairperson of the county committee duties.
7.24 Chairperson of the community committee duties.
7.25 County executive director duties.
7.26 Private business activity and conflicts of interest.
7.27 Political activity.
7.28 Removal from office or employment for cause.
7.29 Delegation of authority to Deputy Administrator.
7.30 Right of review.
7.31 Hearing in connection with appeals and requests for reconsideration to Deputy Administrator.
7.32 Findings, analysis, and recommendations of hearing officer.
7.33 Determination of the Deputy Administrator.
7.34 Custody and use of books, records, and documents.
7.35 Administrative operations.
7.36 Implementation.
7.37 Applicability.
7.38 Retention of authority.

Authority: Secs. 4 and 8 of the Soil Conservation and Domestic Allotment Act, as amended; 49 Stat. 164 and 1148, as amended (16 U.S.C. 590d and 590h).

§ 7.1 Administration.

(a) The regulations of this part are applicable to the election and functions of community and county Agricultural Stabilization and Conservation ("ASC") committee and the functions of State ASC committees ("community", "county", and "State committees", respectively). State, county, and community committees shall be under the general supervision of the Administrator, Agricultural Stabilization and Conservation Service ("ASCS").

(b) State, county, and community committees, and representatives and employees thereof, do not have authority to modify or waive any of the provisions of this part.

(c) The State committees shall take any action required by these regulations which has not been taken by the county committee. The State committee shall also:

(1) Correct, or require a county committee to correct, any action taken by such county committee which is not in accordance with this part, or

(2) Require a county committee to withhold taking any action which is not in accordance with this part.

(d) No provision or delegation herein to a State or county committee shall preclude the Administrator, ASCS, or a designee of the Administrator, from determining any question arising under this part, or from reversing or modifying any determination made by a State or county committee.

§ 7.2 General.

State, county, and community committees shall, as directed by the Secretary of a designee of the Secretary, carry out the programs and functions of the Secretary.

§ 7.3 Definitions.

The terms defined in Part 719 of this title governing the reconstitution of farms shall also be applicable to this part.

§ 7.4 Selection of committee members.

State committee members shall be selected by the Secretary and shall serve at the pleasure of the Secretary. County and community committee members shall be elected in accordance with § 7.9 of this part.

§ 7.5 Eligible voters.

(a) Voters eligible to participate in:

(1) The direct election of county committee members and

(2) Community committee elections shall be persons who meet the requirements of paragraphs (b) and (c) of this section.

(b) Any person, regardless of race, color, religion, sex, age, or national origin, who has an interest in a farm as owner, operator, tenant, or sharecropper and who is of legal voting age in the State in which the farm is located, and any person not of such legal voting age who is in charge of the supervision and conduct of the farming operations on an entire farm, shall be eligible to vote for direct election of county committee members or community committee members if such person is eligible to participate with respect to the farm in any program administered by the county committee.

(c) In any State having a community property law, the spouse of a person who is eligible to vote in accordance with paragraph (b) of this section shall also be eligible to vote.

(d) If an eligible voter is an entity other than an individual, the eligible voter's vote may be cast by a duly authorized representative of such entity, as determined by the Deputy Administrator, State and County Operations, ASCS ("Deputy Administrator").

(e) Each county office shall have a list of eligible voters for each community within the county available for public inspection in advance of the community committee election.

(f) Each eligible voter shall be entitled to only one ballot in any election held in any one local administrative area. If the eligible voter has an interest in land located in more than one community in the county, such voter shall not be entitled to vote in more than one community in the county. There shall be no voting by proxy.

§ 7.6 Determination of elective areas.

(a) *Local administrative areas and communities.* (1) Except as provided in paragraph (b) of this section, there shall be three local administrative areas in each county. With respect to Alaska, the term "county" shall be the area so designated by the State committee.

(2) Each local administrative area shall have at least one community committee consisting of three members.

(3) The boundaries of the communities and local administrative areas shall be determined by the State committee after considering recommendations by the county committee.

(b) *Exceptions to general rule.* (1) A local administrative area may have more than one community committee if the county had more than three community committees on December 23, 1985.

(2) In counties with less than 150 producers, the county committee may reduce the number of communities to one.

(3) The Deputy Administrator may include more than one county or parts of different counties in a community if it is determined that there is an insufficient number of producers in an area to establish a slate of candidates for a community committee and hold an election.

(4) In counties which had less than three communities on December 23, 1985, the county committee may establish one community for the county.

(5) In any county where there is only one community, the community committee shall be the county committee.

(c) The county committee shall give public notice of the community boundaries in advance of the election.

§ 7.7 Calling of elections.

(a) Each election of community committee members shall be held on a date, or within a specified period of time, determined by the Deputy Administrator. Such date or period of time shall fall within a period beginning on or after July 1 and ending not later than December 30 each year. Each such election shall be held in accordance with instructions issued by the Deputy Administrator which shall be available for examination in each county office.

(b) If the number of eligible voters voting in any election of community committee members is so small that the State committee determines that the result of the election does not represent the views of a substantial number of eligible voters, the State committee shall declare the election void and call a new election. If it is determined by the State committee that the election for any position on a community committee has not been held substantially in accordance with official instructions, the State committee shall declare such election void and call a new election.

§ 7.8 Conduct of community committee elections.

(a) The county committee serving at the time shall be responsible for the conduct of community committee elections in accordance with instructions issued by the Deputy Administrator.

(b) Elections shall not be associated with, or held in conjunction with, any other election or referendum conducted for any other purpose.

(c) The county committee shall give advance public notice of how, when, and where eligible voters may vote; when and where the votes will be counted; and the right to witness the vote counting.

(d) All nominees shall be notified in writing of the outcome of the election by the county executive director.

§ 7.9 Election of community committee members, delegates to local administrative area and county conventions, and county committee members.

(a) Where there are three local administrative areas as provided in § 7.6 of this part there shall be an election of community committee members and alternates for a term of three years, or until such person's successor is elected and qualified, in one of the local administrative areas so that the term of office of the community committee members and alternates within one of the local administrative areas will expire each year.

(b) Except as provided in paragraph (d) of this section, the eligible voters in a community shall elect every three years a community committee composed of three members and shall elect first and second alternates to serve as acting members of the community committee in the order elected in case of the temporary absence of a member, or to become a member of the community committee in the order elected in case of the resignation, disqualification, removal, or death of a member. An acting member of the community committee shall have the same duties and the same authority as a regular member of such committee. The election shall be conducted by mail ballot in all counties, except that the Deputy Administrator may authorize use of the meeting or polling place method in a specific county where such is deemed justified. Where elections are by mail or by polling place, the county committee shall give advance public notice that nominations may be made by petition. Election shall be by secret ballot and by plurality vote with each eligible voter having the option of writing in the names of candidates. Except as provided in paragraph (d) of this section and § 7.10(c) of this part, the three regular members of the community committee shall be the delegates to the local administrative area and county conventions and the first and second alternates to community committee shall also be, in that order, alternate delegates to the local administrative area and county conventions. A person may not serve as delegate if such person has been a member of the county committee for that county during the 90 days preceding the community committee election. Failure to elect the prescribed number of alternates at the regular election shall not invalidate such election or require a special election to elect additional alternates.

(c) In any county where there is only one local administrative area, the community committee shall be the county committee.

(d) Where there is only one community in the county, one committee person shall be elected to hold office for a term of 3 years, or until such person's successor is elected and qualified, so that the term of office of one committee member will expire in each year. There shall also be elected annually a first alternate and second alternate to serve as acting members in the order elected in case of the temporary absence of a member or to become a member in the order elected in the case of resignation, disqualification, removal, or death of any member of the committee. In the event an alternate fills a permanent vacancy on the committee, such person shall assume the unexpired term of the committee member who is replaced and hold office until the end of that unexpired term. An acting member shall have the same duties and authority as a regular member.

(e) In any county where there are three local administrative areas, the delegates elected pursuant to § 7.9 (a) and (b) of this part shall meet in a local administrative area convention held before the close of the same calendar year in which they were elected to elect a county committee member and a first and second alternate. The Deputy Administrator may fix the exact date. Each delegate shall be entitled to only one vote on any ballot, and there shall be no voting by proxy. A majority of the delegates so elected and qualified to vote at the time of the convention shall constitute a quorum. Such convention shall be held to the extent practicable in the manner set forth in § 7.10 of this part and in accordance with instructions by the Deputy Administrator.

§ 7.10 Conduct of county convention.

(a) The county committee serving at the time shall be responsible for designating the place at which the county convention will be held and for the conduct of the convention in accordance with instructions issued by the Deputy Administrator.

(b) The delegates to the county convention shall determine which county committee members shall be the county committee chairperson and county committee vice-chairperson.

(c) Each local administrative area shall have the same number of delegates at the county convention. If a portion of the delegates from a local administrative area are precluded from attending the county convention as the result of the limitation imposed by the preceding sentence, the delegates from such local administrative area shall elect those delegates who shall attend the county convention.

(d) County conventions shall not be associated with or held in conjunction with any other election or referendum conducted for any other purpose.

(e) The county committee shall give advance public notice of the county convention which shall be open to the public.

(f) The county executive director shall notify in writing all newly elected county committee members, alternates, and county committee members with unexpired terms of the election results.

§ 7.11 County committee members.

(a) County committee members elected in accordance with § 7.9 of this part shall hold office for a term of three years or until a successor is elected and qualified. A first and second alternate shall serve as acting members of the committee in the order elected in case of the temporary absence of a member, or to become a member in the order elected in case of the resignation, disqualification, removal, or death of a member of the county committee. In the event an alternate fills a permanent vacancy on the county committee, that person shall assume the unexpired term of the county committee member who was replaced. An acting member of the county committee shall have the same duties and authority as a member.

(b) The county committee shall select a secretary who shall be the county executive director, other employee of the county committee, or the county agricultural extension agent for the county. If the county agricultural extension agent is not selected as secretary to the county committee, that person shall be an ex officio member of the county committee but shall not have the power to vote.

§ 7.12 Tie votes.

(a) Tie votes in community committee elections held by mail or polling place method shall be settled by lot. Tie votes in such elections held by the meeting method which cannot be settled by further balloting on the same day shall be settled by lot. In counties with one local administrative area, a tie vote in determining the chairperson and vice chairperson of the county committee which cannot be settled by further balloting on the same day shall be settled by lot.

(b) In the county or local administrative area convention, tie votes which cannot be settled by further balloting on the same day shall be settled by lot.

§ 7.13 Vacancies.

(a) In case of a vacancy in the office of chairperson of county or community committee, the respective vice chairperson shall become chairperson; in case of a vacancy in the office of vice chairperson, the respective third member shall become vice chairperson; in case of a vacancy in the office of the third member, the respective first alternate shall become the third member; and in case of a vacancy in the office of the first alternate, the respective second alternate shall become the first alternate. When unanimously recommended by the three members of the county committee, as constituted under this paragraph and paragraph (c) of this section, and approved by the State committee, the offices of chairperson and vice chairperson of the county committee may be filled from such membership without regard to the order of succession prescribed in this paragraph or the action of the delegates to the county convention.

(b) In case of a vacancy in the panel of delegates to the local administrative area or county convention, the respective community committee alternates shall act as delegates.

(c) In the event that a vacancy, other than one caused by temporary absence, occurs in the membership of the county committee and no alternate is available to fill the vacancy, the State committee shall call a meeting of the delegates of the appropriate community committees to elect persons to fill such vacancies as exist in the membership of the county committee and in the panel of alternates, except as provided in § 7.28 of this part.

(d) In the event that a vacancy, other than one caused by temporary absence, occurs in the membership of the community committee and no alternate is available to fill the vacany, a special election shall be held to fill such vacancies as exist in the membership and in the panel of alternates.

§ 7.14 Appeals.

(a) Any eligible voter in the county may appeal to the county committee in writing or in person, or both:

(1) The eligibility or ineligibility of a person to vote,

(2) The eligibility of a person to hold office, and

(3) The validity of the community committee elections. Such appeal must be made within 15 days of the election date, except that appeals on a determination of eligibility of a person nominated by petition must be made within 7 days of the date of notification of ineligibility.

(b) Any eligible voter in the county may appeal to the State committee in writing, in person, or both:

(1) A county committee decision on an election appeal. An appeal of a county committee decision must be made within 15 days of the notification of the decision, and

(2) The validity of a county convention. An appeal on the validity of a county convention must be made within 15 days of the county convention.

§ 7.15 Eligibility requirements of county committee members, community committee members, and delegates.

(a) To be eligible to hold office as a county committee member, community committee member, a delegate, or an alternate to any such office, a person must meet the conditions set forth in this section.

(b) Such person must.

(1) Be eligible to vote in the local administrative area in which the election is held if proposed for county committee member or alternate, or in the community in which the election is held if proposed for community committee member or alternate;

(2)(i) Except as provided in paragraph (b)(2)(ii) of this section, be residing in the local administrative area in which the election is held if proposed for county committee member or alternate, or be residing in the community in which the election is held if proposed for community committee member or alternate.

(ii) In cases where a State line, a county line, a local administrative area boundary, or a community boundary runs through a farm, eligible persons residing on such farm may hold office in the county or community in which the farm has been determined to be located for program participation purposes. In cases where a candidate has no farming interests in the local administrative area or community in which the person resides or only a token amount, as determined by the State committee, an eligible person may hold office when such person resides in the county and has farming interests in the local administrative area or community in which the person is a candidate.

(3) Not be ineligible under § 7.27 of this part.

(4) Not have been dishonorably discharged from any branch of the armed services; removed for cause from any public office; convicted of any fraud, larceny, embezzlement, or felony, unless any such disqualification is waived by the State committee or the Deputy Administrator;

(5) Not have been removed as a county committee member, community committee member, delegate, alternate to any such office, or as an employee for: Failure to perform the duties of the office; committing, attempting, or conspiring to commit fraud; incompetence; impeding the effectiveness of any program administered in the county; refusal to carry out or failure to comply with the Department's policy relating to equal opportunity and civil rights, including the equal employment policy, or interfering with others in carrying out such policy; or for violation of official instructions, unless any such disqualification is waived by the State committee or the Deputy Administrator;

(6) Not have been disqualified for future service because of a determination by a State committee that during previous service as a county committee member, community committee member, delegate, alternate of any such office, or as an employee of the county committee such person has: Failed to perform the duties of such office or employment; committed, attempted, or conspired to commit fraud; impeded the effectiveness of any program administered in the county; in the course of their official duties, refused to carry out or failed to comply with the Department's policy relating to equal opportunity and civil rights, including the equal employment policy, or interfered with others in carrying out such policy; or violated official instructions, unless any such disqualification is waived by the State committee or the Deputy Administrator;

(7) During the term of office, not be a full-time employee of the U.S. Department of Agriculture;

(8) If the office is that of county committee member, not be a sales agent or employee of the Federal Crop Insurance Corporation during the term of office;

(9) If the office is that of delegate to the local administrative area or county convention, not have been a county committee member for that county during the 90 days preceding the community election;

(10) If the office is that of county committee member, not be serving as a county committee member with one or more years following the current election remaining in the term of office; and

(11) If the office is that of county committee member, not have served three consecutive terms as county committee member just prior to the current election; however, any partial term served by an alternate who filled a permanent vacancy on the county committee, shall not count toward this three term limitation. The tenure of office of any county committee member, community committee member, delegate, or alternate to any such office, shall be terminated as soon as any such person becomes ineligible for office under the provisions of this section.

§ 7.16 Eligibility requirements of all other personnel.

(a) The county executive director and other employees of the county committee must not have been: Dishonorably discharged from any branch of the armed services; removed for cause from any public office; or convicted of any fraud, larceny, embezzlement, or felony, unless any such disqualification is waived by the State committee or the Deputy Administrator.

(b) The county executive director or any other employee of the county committee must not have been removed as a county committee member, community committee member, delegate, alternate to any such office, county executive director, or other employee of the county committee for: Failure to perform the duties of the office; committing, attempting, or conspiring to commit fraud; incompetence; impeding the effectiveness of any program administered in the county; refusal to carry out or failure to comply with the Department's policy relating to equal opportunity and civil rights, including equal employment policy, or interfering with others in carrying out such policy; or for violation of official instructions, unless such disqualification is waived by the State committee or the Deputy Administrator.

(c) The county executive director or any other employee of the county committee must not have been disqualified for future employment because of a determination by a State committee that during previous service as a county committee member, community committee member, delegate, alternate to any such office, or as an employee of the county committee has: Failed to perform the duties of such office or employment; committed, attempted, or conspired to commit fraud; impeded the effectiveness of any program administered in the county; refused to carry out or failed to comply with the Department's policy relating to equal opportunity and civil rights, including the equal employment policy, or interfered with others in carrying out such policy; or violated official instructions, unless such disqualification is waived by the State committee or the Deputy Administrator.

(d) The tenure of employment of any count executive director or other employee of the county committee shall be terminated as soon as any such person becomes ineligible for employment under the provisions of this section.

§ 7.17 Dual office.

(a) *County committee membership.* A member of the county committee may not be at the same time:

(1) A member of a community committee;

(2) A delegate to a local administrative area convention;

(3) A delegate to a county convention;

(4) The secretary to the county committee;

(5) A member of the State committee; or

(6) County executive director or any other county office employee.

(b) *Community committee membership.* A member of the community committee may not be at the same time:

(1) A member of a county committee;

(2) The secretary to the county committee;

(3) A member of the State committee; or

(4) County executive director or regular county office employee.

(c) *Delegate to conventions.* A delegate to the local administrative area or county convention may not be a member of the State committee.

§ 7.18 Terms of office of county and community members.

The term of office of county and community committee members and alternates to such office shall begin on a date fixed by the Deputy Administrator, which shall be after their election and not later than the first day in the next January. Before any such county committee members or alternate county

VOL 52 ISS 246 DEC 23 1987 UMI

committee members may take office, such person shall sign an oath of office pledge that they will faithfully, fairly, and honestly perform to the best of their ability all of the duties devolving on them as committee members. A term of office shall continue until a successor is elected and qualified as provided in §§ 7.8 and 7.9 of this part.

§ 7.19 Terms of office of delegates to the conventions.

The terms of office of delegates and alternates to the local administrative area and county conventions shall begin immediately upon their election and shall continue until their respective successors have elected and qualified.

§ 7.20 State committee duties.

The State committee, subject to the general direction and supervision of the Deputy Administrator, shall be generally responsible for carrying out in the State the agricultural conservation program, the production adjustment and price support programs, the acreage allotment and marketing quota programs, the wool and mohair incentive payment program, and any other program or function assigned by the Secretary or a designee of the Secretary.

§ 7.21 County committee duties.

(a) The county committee, subject to the general direction and supervision of the State committee, and acting through community committee members and other personnel, shall be generally responsible for carrying out in the county the agricultural conservation program, the production adjustment and price support programs, the acreage allotment and marketing quota programs, the wool and mohair incentive payment program, and any other program or function assigned by the Secretary or a designee of the Secretary.

(b) The county committee shall:

(1) Enter into leasing agreements for such office space as needed in accordance with official instructions.

(2) Employ the county executive director, subject to standards and qualifications furnished by the State committee, to serve at the pleasure of the county committee, except that incumbent directors shall not be removed other than in accordance with the provisions of § 7.28 of this part until all members of the county committee have been in office for at least 90 days. There shall be no employment discrimination due to race, religion, color, sex, age, or national origin. The county executive director may not be removed for advocating or carrying out the Department's policy on equal opportunity and civil rights, including the equal employment policy. In the event it is claimed that dismissal is for such reasons, the dismissal shall not become effective until the State committee and the Deputy Administrator have determined that dismissal was not because of such reasons;

(3) Direct the activities of the local committees elected in the county;

(4) Pursuant to official instructions, review, approve, and certify forms, reports, and documents requiring such action in accordance with such instructions;

(5) Recommend to the State committee needed changes in boundaries of community and local administrative areas;

(6) Make available to farmers and the public, information concerning the objectives and operations of the programs administered through the county committee;

(7) Make available to agencies of the Federal Government and others information with respect to the county committee activities in accordance with official instructions issued;

(8) Give public notice of the designation and boundaries of each community within the county not less than 50 days prior to the election of community committee members and delegates;

(9) Direct the giving of notices in accordance with applicable regulations and official instructions;

(10) Recommend to the State committee desirable changes in or additions to existing programs;

(11) Conduct such hearings and investigations as the State committee may request; and

(12) Perform such other duties as may be prescribed by the State committee.

§ 7.22 Community committee duties.

(a) The community committee shall be subject to the general direction and supervision of the county committee.

(b) The community committee shall:

(1) Serve as an advisor and consultant to the county committee;

(2) Periodically meet with the county committee and State committee to be informed on farm program issues;

(3) Communicate with producers on issues or concerns regarding farm programs;

(4) Report to the county committee, the State committee, and other interested persons on changes to, or modification of, farm programs recommended by producers;

(5) Perform such other functions as are required by law or as the Secretary or a designee of the Secretary may specify.

§ 7.23 Chairperson of the county committee duties.

The chairperson of the county committee or the person acting as the chairperson shall preside at meetings of the county committee, certify such documents as may require the chairperson's certification, and perform such other duties as may be prescribed by the State committee.

§ 7.24 Chairperson of the community committee duties.

The chairperson of the community committee or the person acting as the chairperson shall preside at meetings of the community committee, and perform such other duties as may be assigned by the county committee.

§ 7.25 County executive director duties.

(a) The county executive director shall execute the policies established by the county committee and be responsible for the day-to-day operations of the county office.

(b) The county executive director shall:

(1) In accordance with standards and qualifications furnished by the State committee, employ the personnel of the county office to serve at the pleasure of the county executive director. There shall be no employment discrimination due to race, religion, color, sex, age, or national origin. An employee may not be removed under this paragraph for advocating or carrying out the Department's policy on equal opportunity and civil rights, including the equal employment policy. In the event it is claimed that the dismissal is for such reason, the dismissal shall not become effective until the State committee and the Deputy Administrator have determined that dismissal was not because of such reason;

(2) Receive, dispose of, and account for all funds, negotiable instruments, or property coming into the custody of the county committee;

(3) Serve as counselor to the local administrative area and county convention chairperson on election procedures; and

(4) Supervise, under the direction of the county committee, the activities of the communitiy committees elected in the county.

§ 7.26 Private business activity and conflicts of interest.

(a) No county committee member, community committee member, delegate, alternate to any such office, or county office employee shall at any time use such office or employment to promote any private business interest.

(b) County committee members, community committee members, delegates, or alternates, and any person employed in the county office shall be subject to the official instructions issued with respect to conflicts of interest and proper conduct.

§ 7.27 Political activity.

(a) No person may be a member of the county governing body or hold a Federal, State, or county office filled by an election held pursuant to law or be employed by any such office and also hold office as a county committee member, community committee member, delegate, alternate to such office, or be employed in any capacity, except, that members of school boards, soil conservation district boards, weed control district boards, or of similar boards are not eligible to hold office or employment under this paragraph soley because of membership on such boards.

(b) No person may be a candidate for membership on the county governing body or for any Federal, State, or county office filled by an election held pursuant to law and hold office as a county committee member, community committee member, delegate, alternate to any such office, or be employed in any capacity, except, that candidates for school boards, soil conservation district boards, irrigation district boards, drainage district boards, weed control district boards, or for similar boards are not ineligible to hold office or employment under this subsection solely because of candidacy for such boards.

(c) No person may be an officer, employee, or delegate to a convention of any political party or political organization and hold office as a county committee member, community committee member, delegate, alternate to any such office, or be employed in any capacity.

(d) The tenure of office of any county committee member, community committee member, delegate, alternate to any such office, or the employment of any employee, shall be automatically terminated as soon as any such person becomes ineligible for office of employment under the provisions of paragraph (a), (b), or (c) of this section.

(e) No county committee member, community committee member, delegate, or alternate to any such office, or any employee shall at any time engage in the following political activities:

(1) Solicit or receive any contributions (including the sale of tickets) for political party organizations or for a candidate for political office or for any other political purpose in any room or building used for the transaction of any Federal official business, or at any place from any other county committee member, community committee member, delegate, or alternate to any such office or employee.

(2) Use official authority or influence to discharge, remove, demote, or promote any employee, or threaten or promise to so do, for withholding or giving contributions (including the buying or the refusal to buy tickets) for political purposes, or for supporting or opposing any candidate or any political organization in any primary, general, or special election for political office.

(3) Use or direct or permit the use of any official space, equipment, materials, supplies, or personal services either to support or oppose any political office holder, candidate or party, or for any other political purpose.

(f) A county committee member or alternate to such office, an employee on any day when entitled to receive pay for services in performance of duties, or an employee who serves during a continuous period of 90 days or more and has a regular tour of duty established in advance at any time, shall not solicit, collect, receive, disburse, or otherwise handle contributions of money, pledges, gifts, or anything of value (including the sale of tickets) made for:

(1) Political party organizations;

(2) A candidate for political office in any primary, general, or special election, but excluding such activities on behalf of individual candidates in township and municipal elections; or

(3) Any other political purpose.

§ 7.28 Removal from office or employment for cause.

(a) Any county committee member, community committee member, delegate to the local administrative area convention or the county convention, an alternate to any such office, county executive director, or any other county employee who: Fails to perform the duties of office; commits or attempts, or conspires to commit fraud; is incompetent; impedes the effectiveness of any program administered in the county; violates the provisions of § 7.27(e) or (f) of this part; refuses to carry out or fails to comply with the equal opportunity and civil rights, including the equal employment policy, or who interferes with others in carrying out such policy; or violates official instructions, shall be suspended from office or employment. Any person who is under formal investigation for any of the above-cited reasons may be suspended. The suspension action may be taken by the county executive director with respect to any other employee, or by the county committee or State committee with respect to the county executive director or any other county employee and by the State committee with respect to any county committee member, community committee member, delegate to the local administrative area convention or the county convention, or any alternate to any such office. Any person suspended shall be given a written statement of the reasons for such action and be allowed 15 days from the date of mailing of the notice of suspension in which to advise the county committee, or the State committee if it made the suspension, in writing, in person, or both, why such person should be restored to duty.

(b) The county committee or the county executive director, or the State committee if it made the suspension, following such further investigation as is deemed necessary shall restore to duty or remove the suspended person. The county committee or county executive director may not restore a suspended person to duty without prior written approval of the State committee, and, if such approval is denied, shall promptly remove such person. Upon refusal or failure of the county committee or the county executive director to remove promptly the suspended person, the State committee shall remove such person. In the event further investigation develops reasons for the action taken, in addition to those disclosed in the suspension notice, the suspended person shall be given written notification of such additional reasons and allowed 15 days from the date of mailing of the notice of additional reasons for the suspension in which to advise why such person should be restored to duty. In the event a person under suspension submits a resignation, acceptance thereof shall not prevent a determination by the county committee or State committee that such person would have been removed had the person remained in the position. Such determination shall constitute removal within the meaning of §§ 7.27 (e) and 7.28(c) of this part. The person so removed shall be given written notification of any such determination and the reasons therefor.

(c) Any incumbent or former county committee member, community committee member, delegate to the local administrative area convention or the county convention, an alternate to any such office, county executive director, or any other county employee who during a term of employment: Fails or failed to perform the duties of employment; committed, attempted, or conspired to commit fraud; was incompetent;

impeded the effectiveness of any program administered in the county; violated the provisions of § 7.27 (e) or (f) of this part; refused to carry out or failed to comply with the Department's policy relating to equal opportunity and civil rights, including the equal employment policy; or violated official instructions, may be disqualified for future service or employment by the State committee. Before any such disqualification determination is made, the State committee shall undertake such investigation as it deems necessary, after which the State committee shall give the affected person a written statement of the determination for the proposed disqualification action. Such person shall have 15 days from the date of receipt of such determination to advise in writing, in person or both, why the action should not be taken. If any further investigation develops substantial additional reasons for disqualification, the person involved shall be given a written statement of such reasons and 15 days from the date of mailing in which to respond. The State committee may remove the disqualification for future service or employment only with prior approval of the Deputy Administrator.

(d) Any county committee member, community committee member, delegate to the local administrative area convention or the county convention, or any alternate to any such office, county executive director, or any other county employee, who, prior to taking such persons's present office: Committed, or attempted or conspired to commit fraud; or impeded the effectiveness of any program administered in the county, may be suspended. Any such person who is under formal investigation for any reason set forth in this section may be suspended. The proceedings under this paragraph shall be applied the same as provided in paragraph (a) of this section.

(e) If in the event of suspensions or vacancies there are less than two members, including alternates, available to serve on the county committee, the State committee shall designate a person to administer the programs in the county pending the exoneration or removal of those persons under investigation and, if removed, pending the election of new county committee members and alternates. Such person may be the remaining member or alternate member of the committee if available. Any person named by the State committee to serve in such capacity shall have full authority to perform all duties regularly performed by a duly elected county committee.

§ 7.29 Delegation of authority to Deputy Administrator.

Notwithstanding the authority vested by this part in a State committee, a county committee, and the county executive director, the Deputy Administrator shall have authority to suspend and/or remove or disqualify for future service or employment, any county committee member, community committee member, delegate to the local administrative area convention or the county convention, an alternate to any such office, county executive director, or other county employee, for any and all of the reasons and causes authorizing such suspension, removal, and disqualification by the State committee, the county committee, or the county executive director. Any person suspended, removed or disqualified pursuant to this section shall be given a written statement of the reason for such action and shall be advised of the right of review as provided in § 7.30 of this part.

§ 7.30 Right of review.

Any person dissatisfied with a determination of the county committee or county executive director may appeal in writing or in person or both, such determination to the State committee. Any person dissatisfied with a determination of the State committee may appeal such determination in writing to the Deputy Administrator. Any person dissatisfied with the determination of the Deputy Administrator made under § 7.29 of this part may request a reconsideration of such determination by the Deputy Administrator. Any such appeal or request for reconsideration shall be made within 15 days from the date of the mailing of the determination with respect to which the appeal or request is filed. Except as provided in § 7.31 of this part, such appeals and requests for reconsideration shall be determined on an informal basis. The person filing the appeal or request for reconsideration may present reasons, in writing or in person, or both, why the determination should be reversed or modified. Within 60 days after the reasons have been presented, such person shall be notified of the determination on appeal or reconsideration. The notification shall clearly set forth the basis for the determination. The determination of the Deputy Administrator is final and not subject to further administrative review.

§ 7.31 Hearing in connection with appeals and requests for reconsideration to Deputy Administrator.

Any person (the "appellant") filing an appeal with the Deputy Administrator, or a request for reconsideration of a determination made by the Deputy Administrator under § 7.29 of this part, is entitled, at such person's election, to a hearing in connection therewith. If the appellant does not request a hearing, the appeal or reconsideration shall be handled in accordance with § 7.30 of this part. If the appellant desires a hearing, such person shall so advise the Deputy Administrator. The hearing shall be conducted by the Deputy Administrator, or a designee of the Deputy Administrator, who shall serve as a hearing officer. The hearing shall be held at the time and place designated by the hearing officer. The appellant may appear personally or through or accompanied by a representative. The hearing officer shall conduct the hearing so as to bring out pertinent facts, including the production of pertinent documents. Rules of evidence shall not be applied strictly, but the hearing officer shall exclude irrelevant or unduly repetitious evidence. Information having a bearing on the issues shall be received in evidence. Both the appellant and the agency representatives are entitled to produce witnesses and the appellant and agency representative shall be given an opportunity to cross-examine witnesses. The hearing officer shall inform the witnesses that they are subject to a fine of not more than $10,000 or imprisonment for not more than 5 years, or both, for making any false statements (18 U.S.C. 1001). The hearing officer shall cause a transcript to be made of the hearing and it shall be made available to the appellant at actual costs.

§ 7.32 Findings, analysis, and recommendations of hearing officer.

If the hearing has been conducted by a designee of the Deputy Administrator, the hearing officer shall, within 60 days from date of receipt of the transcript, transmit to the Deputy Administrator:

(1) The record of the hearing;

(2) The findings and analysis of the hearing officer; and

(3) A recommended determination.

§ 7.33 Determination of the Deputy Administrator.

Within 30 days after receipt of the findings, analysis, and recommendations of the hearing officer that are made under § 7.32 of this part, or within 60 days from the date of receipt of the transcript prepared under such section if the Deputy Administrator conducted the hearing, the Deputy Administrator shall make a final determination. The notification shall clearly set forth the basis for the determination. The determination of the Deputy Administrator is final and not subject to further administrative review.

§ 7.34 Custody and use of books, records, and documents.

(a) All books, records, and documents of or used by the county committee in the administration of programs assigned to it, or in the conduct of elections, shall be the property of the Commodity Credit Corporation or the United States Department of Agriculture, as applicable, and shall be maintained in good order in the county office.

(b) For polling and mail type elections, ballots shall remain in sealed boxes until the prescribed date for counting. Following the counting of ballots in all types of elections, the ballots shall be placed in sealed containers and retained for 30 days unless otherwise determined by the State committee.

(c) The books, records, and documents referred to in paragraph (a) shall be available for use and examination:

(1) At all times by authorized representatives of the Secretary; the Administrator, or a designee of the Administrator.

(2) By state, county, and community committee members, and authorized employees of the State and county office in the performance of duties assigned to them under this part, subject to instructions issued by the Deputy Administrator;

(3) At any reasonable time to any program participant insofar as such person's interests under the programs administered by the county committee may be affected, subject to instructions issued by the Deputy Administrator; and

(4) To any other person only in accordance with instructions issued by the Deputy Administrator.

§ 7.35 Administrative operations.

The administrative operations of county committees including but not limited to the following, shall be conducted, except as otherwise provided in these regulations, in accordance with official instructions issued: annual, sick, and other types of employee leave; location and use of the county committee office; the calling, and conduct of elections; and the maintenance of records of county and local committee meetings.

§ 7.36 Implementation.

Unless specifically provided in this part, the Deputy Administrator, State and County Operations, or the Deputy Administrator, Management, ASCS, is authorized to issue the instructions and procedures referred to herein which implement the provisions of this part.

§ 7.37 Applicability.

This part shall apply to each State of the United States.

§ 7.38 Retention of authority.

Nothing in this part shall preclude the Secretary, the Administrator, or the Deputy Administrator from administering any or all programs or exercising other functions delegated to the community committee, county committee, State committee, or any employee of such committees. In exercising this authority, the Secretary, the Administrator, or the Deputy Administrator may designate for such period of time as deemed necessary a person or persons of their choice to be in charge will full authority to carry on the programs or other functions without regard to the normal duties of such committees or employees.

Signed at Washington, DC on December 4, 1987.

Richard E. Lyng,

Secretary of Agriculture.

BILLING CODE 3410-05-M

Farmers Home Administration

7 CFR Part 1955

Property Management

AGENCY: Farmers Home Administration, USDA.

ACTION: Final rule; correction.

SUMMARY: The Farmers Home Administration (FmHA) corrects a final rule published December 18, 1986 (51 FR 45433). In this final rule, a portion of the paragraph in 7 CFR Part 1955, § 1955.10(a)(1) was inadvertently omitted. The intent of the action is to replace the missing sentence and clarify the paragraph.

EFFECTIVE DATE: December 23, 1987.

FOR FURTHER INFORMATION CONTACT: Thomas Baden, Senior Loan Officer, Farm Real Estate and Production Division, USDA, Room 5437, South Agriculture Building, 14th and Independence Avenue, SW., Washington, DC 20250, telephone (202) 475-4008.

SUPPLEMENTARY INFORMATION:

List of Subjects in 7 CFR Part 1955

Agriculture, Government property, Loan programs—agriculture, Loan programs—housing and community development, Low and moderate income housing, Rural areas.

As corrected, 7 CFR Part 1955 is amended as follows:

PART 1955—[AMENDED]

1. The authority citation for Part 1955 continues to read as follows:

Authority: 7 U.S.C. 1989; 42 U.S.C. 1480; 5 U.S.C. 301; 7 CFR 2.23; 7 CFR 2.70.

Subpart A—Liquidation of Loans Secured by Real Estate and Acquisition of Real and Chattel Property

2. Section 1955.10(a)(1) is revised to read as follows:

§ 1955.10 Voluntary conveyance of real property by the borrower to the Government.

* * * * *

(a) * * *

(1) *Loans to individuals.* The County Supervisor and District Director are authorized to accept a voluntary conveyance if the total indebtedness against the property (including prior and junior liens) does not exceed the respective loan approving authority for the type of loan (or combination of types) involved as outlined in Exhibits A through E of FmHA Instruction 1901-A (available in any FmHA office). The State Director is authorized to approve voluntary conveyances regardless of amount of indebtedness.

* * * * *

Date: June 3, 1987.

Vance L. Clark,

Administrator, Farmers Home Administration.

BILLING CODE 3410-07-M

FEDERAL HOME LOAN BANK BOARD

12 CFR Part 574

[No. 87-1242]

Acquisition of Control of Insured Institutions; Procedural Requirements

Date: December 11, 1987.

AGENCY: Federal Home Loan Bank Board.

ACTION: Final rule; revision of filing procedures and revision of time frames for public notification and sufficiency determinations.

SUMMARY: The Federal Home Loan Bank Board ("Board"), as operating head of the Federal Savings and Loan Insurance Corporation ("FSLIC"), is revising the procedural requirements applicable to applications, notices and rebuttal filings filed pursuant to 12 CFR Part 574 by changing certain filing procedures, modifying the time frames for public notification, and revising the time

frames that apply to the FSLIC's determination that an application or notice is sufficent.

EFFECTIVE DATE: December 23, 1987.

FOR FURTHER INFORMATION CONTACT: Kevin A. Corcoran, Deputy Director for Corporate, (202) 377–6982, Corporate and Securities Division, Office of General Counsel, Federal Home Loan Bank Board, 1700 G Street NW., Washington, DC 20552.

SUPPLEMENTARY INFORMATION: The Board, as operating head of the FSLIC, is revising the procedural requirements applicable to applications, notices, and rebuttal filings filed pursuant to 12 CFR Part 574 by changing certain filing procedures, modifying the time frames for public notification, and revising the time frames that apply to the FSLIC's determination that an application or notice is sufficient. The amendments are intended to expedite the processing of filings under 12 CFR Part 574 and to simplify the calculation of critical dates in the processing of applications and notices. In particular, the amendments are intended to conform various timeframes employed in Part 574 as closely as practicable to the FSLIC's recently adopted general guidelines for processing applications. *See* 52 FR 39064 (Oct. 20, 1987), *to be codified at*, 12 CFR 571.12. We note that such guidelines address such issues as multiple filings, automatic approval timeframes, and the exclusion of FSLIC-assisted cases from automatic approval timeframes.

The Board has amended the filing procedures set forth at § 574.6(b) to provide that copies of filings sent to the Board are to be sent directly to each office processing such filings. This change from the previous procedure (under which applicants are required to send all copies of filings to the Office of the Secretariat, marked to the attention of the appropriate offices) is intended to expedite the staff's processing of filings by ensuring that delays are not encountered when documents are forwarded from one office to another.

In addition, the Board has modified the procedures applicable to applications and notices filed under 12 CFR Part 574 in a number of ways. First, published notification of filing must occur no earlier than three calendar days before, and no later than three calendar days after, filing of an application or notice. The published notification must state the date, or the expected date, of filing. Second, the public comment period, which remains twenty calendar days long, subject to extension for up to an additional twenty calendar days, now commences on the date of filing, rather than on the date of publication.

Third, the amendments require the Corporation to determine whether the acquiror's application or notice is sufficient within thirty calendar days of the filing date. Within such period of time the Corporation also must determine whether to require information in cases where an acquiror has requested a waiver of required information. In addition, the review period will be extended for the same number of days by which the public comment period is extended.

Fourth, the Corporation has revised the period during which the Corporation must evaluate the sufficiency of the acquiror's response from ten business days to fifteen calendar days.

Finally, the first sentence of § 574.6(b) has been clarified by eliminating the phrase "or provided for" after the initial phrase "Any application required".

The foregoing changes are effective December 23, 1987, and are applicable to applications and notices in process as well as those filed after such date.

Because these changes are nonsubstantive, the Board finds that observance of the notice and comment procedure pursuant to 5 U.S.C. 553(b) and 12 CFR 508.11 and the 30-day delay of effective date pursuant to 5 U.S.C. 553(d) and 12 CFR 508.14 is unnecessary and contrary to the public interest.

List of Subjects in 12 CFR Part 574

Administrative practice and procedure, Holding companies, Savings and loan associations, Securities.

Accordingly, the Board hereby amends Part 574, Subchapter D, Chapter V, Title 12, Code of Federal Regulations, as set forth below.

SUBCHAPTER D—FEDERAL SAVINGS AND LOAN INSURANCE CORPORATION

PART 574—ACQUISITION OF CONTROL OF INSURED INSTITUTIONS

1. The authority citation for Part 574 continues to read as follows:

Authority: Sec. 407, 48 Stat. 1260, as amended (12 U.S.C. 1730); sec. 408, 82 Stat. 5, as amended (12 U.S.C. 1730a).

2. Amend § 574.6 by revising the first and fourth sentences of paragraph (b)(1); by revising paragraphs (b)(2), (b)(3), and (b)(5); by revising the second sentence of paragraph (b)(6); by revising the last sentence of paragraph (c)(1); by revising the second, third, and fourth sentences of paragraph (c)(2); by revising the first sentence of paragraph (d)(1); by revising paragraph (d)(2); and by revising the second sentence of paragraph (e) to read as follows:

§ 574.6 Procedural requirements.

* * * * *

(b) *Filing requirements*—(1) *Applications.* Any application required of a company shall be filed with the Corporation as follows: Where an application is not eligible to be processed under delegated authority under § 574.8(a), the company shall file three complete copies including exhibits and other pertinent papers and documents: one with the Office of the Secretariat, Federal Home Loan Bank Board, Washington, DC 20552 labelled "Dockets Copy;" one with the Corporate and Securities Division, Office of General Counsel, Federal Home Loan Bank Board, Washington, DC 20552; and one with the Office of Regulatory Policy, Oversight and Supervision, 900 Nineteenth Street NW., Washington, DC 20006; and shall transmit a fourth complete copy including exhibits and other pertinent papers and documents to the Principal Supervisory Agent of the district in which the insured institution, or institutions involved in the acquisitions have their home offices.* * * Where a company believes its application is eligible to be processed under delegated authority under § 574.8(a), the company shall file one copy with the Office of the Secretariat, Federal Home Loan Bank Board, Washington, DC 20552, and shall transmit two copies to the Principal Supervisory Agent and shall also transmit, together with all copies of its application, a brief summary of the proposed transaction including a statement as to why the company asserts the application may be processed under delegated authority, inlcuding an affirmative statement that none of the factors specified in § 574.8(a)(1) that would preclude action under delegated authority are present.* * *

(2) *H–(e)4. Information filing.* Any information filing required to be made to claim that a reorganization is exempt from prior written approval of the Corporation under § 574.3(c)(1)(ii) shall be filed as follows: one copy shall be filed with the Office of the Secretariat, Federal Home Loan Bank Board, Washington, DC 20552, labelled "Dockets Copy;" one copy shall be filed with the Corporate and Securities Division, Office of General Counsel, Federal Home Loan Bank Board, Washington, D.C. 20552; and a third copy shall be filed with the appropriate Principal Supervisory Agent for the institution to be acquired. Such a filing shall be clearly labeled "H–(e)4 Information Filing."

(3) *Notice.* (i) Any notice required to be filed by a person or persons shall be filed with the Corporation as follows: Where a notice is not eligible to be processed under delegated authority pursuant to § 574.8(a), the person shall file three complete copies of the notice, including exhibits and other pertinent papers and documents: one with the Office of the Secretariat, Federal Home Loan Bank Board, Washington, DC 20552, labelled "Dockets Copy;" one with the Corporate and Securities Division, Office of General Counsel, Federal Home Loan Bank Board, Washington, DC 20552; and one with the Office of Regulatory Policy, Oversight and Supervision, 900 Nineteenth Street NW., Washington, DC 20006; and shall transmit a fourth complete copy of the application and exhibits filed to the appropriate Principal Supervisory Agent.

(ii) At least one copy of the notice filed with each noted office shall be manually signed. Where a person believes his notice is eligible to be processed under delegated authority under § 574.08(a), the person shall file one copy with the Office of the Secretariat, Federal Home Loan Bank Board, Washington, DC 20552, labelled "Dockets Copy," and shall transmit two copies to the Principal Supervisory Agent and shall also transmit, together with all copies of his notice, a brief summary of the proposed transaction including a statement as to why the person asserts the notice may be processed under delegated authority, including an affirmative statement that none of the factors specified in § 574.8(a)(1) that would preclude action under delegated authority are present. Such statement shall be clearly labelled "Statement Regarding Eligibility for Processing Under Delegated Authority." If the person subsequently becomes aware of additional information or changed circumstances that would alter the eligibility of the notice for processing under delegated authority, the person shall promptly so advise the Principal Supervisory Agent in writing. In addition, an acquiror filing a notice of the acquisition of a state-chartered institution shall file an additional copy with the Principal Supervisory Agent, indicated, "State Supervisor Copy."

* * * * *

(5) *Rebuttal filing.* In order to apply to rebut a determination or presumption pursuant to § 574.4(e) of this part, copies shall be submitted as follows: Where a rebuttal filing is not eligible to be processed under delegated authority under § 574.8(a), the acquiror shall transmit three complete copies: one to the Office of the Secretariat, Federal Home Loan Bank Board, Washington, DC 20552, labelled "Dockets Copy;" one (manually signed) to the Corporate and Securities Division, Office of General Counsel, Federal Home Loan Bank Board, Washington, DC 20552; and one to the appropriate Principal Supervisory Agent. Where an acquiror believes the rebuttal filing is eligible to be processed under delegated authority under § 574.8(a), the acquiror shall transmit only two copies: one to the Office of the Secretariat, Federal Home Loan Bank Board, Washington DC 20552, labelled "Dockets Copy;" and one (manually signed) to the appropriate Principal Supervisory Agent; and shall also transmit, together with all copies of its rebuttal filing, a brief summary of the proposed transaction including a statement as to why the acquiror asserts the rebuttal filing may be processed under delegated authority, including an affirmative statement that none of the factors specified in § 574.8(a)(2), which would preclude action under delegated authority are present. Such statement shall be clearly labelled "Statement Regarding Eligibility for Processing Under Delegated Authority." If the acquiror subsequently becomes aware of additional information or changed circumstances that would alter the eligibility of the rebuttal filing for processing under delegated authority, the acquiror shall promptly so advise the Principal Supervisory Agent in writing.

(6) *Safe-harbor filing.* * * *. Three copies shall be submitted: one to the Office of the Secretariat, Federal Home Loan Bank Board, Washington, DC 20552, labelled "Dockets Copy;" one (manually signed) to the Corporate and Securities Division, Office of General Counsel, Federal Home Loan Bank Board, Washington, DC 20552; and one to the Office of Regulatory Policy, Oversight and Supervision, 900 Nineteenth Street NW., Washington, DC 20006. A fourth copy shall be transmitted to the appropriate Principal Supervisory Agent.

* * * * *

(c) *Sufficiency and waiver.* (1) * * *. Failure by an applicant to respond completely to a written request by the Corporation for additional information within 30 calendar days of the date of such request may be deemed to constitute withdrawal of the application, notice, or rebuttal filing or may be treated as grounds for denial of an application, issuance of a notice of disapproval of a notice, or rejection of a rebuttal.

(2) * * *. The Corporation shall notify an acquiror within 30 calendar days after proper filing of an application or notice as to whether an application or notice—

(i) Is sufficient;

(ii) Is insufficient, and what additional information is requested in order to render the application or notice sufficient; or

(iii) Is materially deficient and will not be processed;

Provided, That if the public comment period specified in paragraph (e) of this section is extended, the 30 day period shall be extended for the same number of days the public comment period is extended. The Corporation also shall notify an acquiror within 15 calendar days after proper filing of any additional information furnished in response to a specific request by the Corporation as to whether the application or notice is thereby deemed to be sufficient. If the Corporation fails to notify an acquiror within such times, the application or notice shall be deemed to be sufficient as of the expiration of the application period.

* * * * *

(d) *Publication.* (1) An acquiror shall publish a notification as provided in this section no earlier than three calendar days before and no later than three calendar days after filing an application under § 574.3(a) or notice under § 574.3(b) and shall mail a copy of the notification to the institution whose stock is sought to be acquired. * * *

(2) Notice published pursuant to paragraph (d) of this section shall be published in a manner that is conspicuous to the average reader and shall be made in substantially the following form:

Notice of Filing of Application or Notice for Acquisition of an Insured Institution

This is to inform the public that under § 574.3 of the Federal Home Loan Bank Regulations for Acquisitions of Insured Institutions [Acquiror] [has filed/intends to file] an [application/notice] with the Federal Savings and Loan Insurance Corporation for permission to acquire control of [insured institution], located in [location], on [date or intended date of filing].

Anyone may write in favor of or protest against the application and in so doing may submit such information as he deems relevant. Copies of all submissions must be sent to the Principal Supervisory Agent, Federal Home Loan Bank of [give name and address] [and in the case of applications or notices not delegated to the Principal Supervisory Agent under § 574.8(a), one copy to each of the following offices: Office of the Secretariat, Federal Home Loan Bank Board, Washington, DC 20552, labeled "Dockets Copy;" Corporate and Securities Division,

Office of General Counsel, Federal Home Loan Bank Board, Washington, DC 20552; and the Office of Regulatory Policy, Oversight and Supervision, 900 Nineteenth Street NW., Washington, DC 20006] within 20 calendar days of the filing of the [application/notice]. Up to an additional 20 calendar days to submit comments may be obtained upon a showing of good cause if a written request is received by the Principal Supervisory Agent within the initial 20-day period.

You may inspect the non-confidental portion of the [application/notice] and non-confidential portions of all comments filed at the Federal Home Loan Bank of _____ [and in the case of applications and notices not delegated to the Principal Supervisory Agent, by contacting the Information Services Section, Office of the Secretariat, Federal Home Loan Bank Board, Washington, DC 20552.] If you have any questions concerning these procedures, contact the Federal Home Loan Bank of _____, at ( ) _____, [and the Information Service Section at (202) 377-_____.]

* * * * *

(e) * * *. Within 20 calendar days of the date of filing (or up to 40 calendar days after such date if an extension is requested in writing within the initial 20-day period) anyone may file comments in favor of or in protest of the application or notice and in so doing may submit such information as he deems relevant. * * *

* * * * *

By the Federal Home Loan Bank Board.

John F. Ghizzoni,

Assistant Secretary.

BILLING CODE 6720-01-M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 71

[Airspace Docket No. 87-ASW-47]

Amendment of Transition Area; Venice, LA

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This final rule will amend the transition area located at Venice, LA. The development of a new LORAN C Area Navigation (LORAN RNAV) special instrument approach procedure (SIAP) to several heliports located in the vicinity of Venice, LA, has made this amendment necessary. The intended effect of this amendment is to provide adequate controlled airspace for aircraft executing this new LORAN RNAV SIAP to these various heliports.

EFFECTIVE DATE: 0901 UTC, January 25, 1988.

FOR FURTHER INFORMATION CONTACT: Bruce C. Beard, Airspace and Procedures Branch, Air Traffic Division, Southwest Region, Department of Transportation, Federal Aviation Administration, Fort Worth, TX 76193-0530, telephone (817) 624-5561.

SUPPLEMENTARY INFORMATION:

History

On October 5, 1987, the FAA proposed to amend Part 71 of the Federal Aviation Regulations (14 CFR Part 71) by amending the transition area located at Venice, LA (52 FR 38785).

Interested persons were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. No comments objecting to the proposal were received. Except for editorial changes, this amendment is that proposed in the notice. Section 71.181 of Part 71 of the Federal Aviation Regulations was republished in Handbook 7400.6C, dated January 2, 1987.

The Rule

This amendment to Part 71 of the Federal Aviation Regulations will amend the transition area located at Venice, LA. The development of a new LORAN RNAV SIAP to various heliports located in the Venice, LA, area has necessitated this amendment. The LORAN RNAV SIAP is a point in space approach and will not be associated with a particular heliport. Aircraft executing this approach will proceed by visual flight rules (VFR), weather conditions permitting, after the missed approach point (MAP) to either the Chevron Heliport or the PHI Heliport. Additional heliports may become associated with this SIAP in the future. The intended effect of this amendment will provide adequate controlled airspace for aircraft executing this new LORAN RNAV SIAP to the respective heliports.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 71

Aviation safety, Transition areas.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me, Part 71 of the Federal Aviation Regulations (14 CFR Part 71) is amended as follows:

PART 71—[AMENDED]

1. The authority citation for Part 71 continues to read as follows:

Authority: 49 U.S.C. 1348(a), 1354(a), 1510; Executive Order 10854; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983); 14 CFR 11.69.

§ 71.181 [Amended]

2. Section 71.181 is amended as follows:

Venice, LA [Amended]

By adding to the last sentence: and within a 7-mile radius of a point in space located at Latitude 29°15'30.70" N., Longitude 89°21'10.40" W.

Issued in Fort Worth, TX, on December 2, 1987.

Larry L. Craig,

Manager, Air Traffic Division, Southwest Region.

BILLING CODE 4910-13-M

DEPARTMENT OF COMMERCE

International Trade Administration

15 CFR Parts 371 and 399

[Docket No. 71263-7263]

Carbon Thermal Insulating Materials; Eligibility for Export Under General License GFW

AGENCY: Export Administration, Commerce.

ACTION: Final rule.

SUMMARY: General License GFW authorizes exports of certain low-level dual use items to most free world countries. The performance characteristics of these items generally are such that the United States may authorize exports of these items to controlled countries with only notification to other COCOM governments, although other criteria may be applied when appropriate.

This rule authorizes the export under General License GFW of low density, rigid, carbon-bonded, fibrous or non-fibrous carbon thermal insulating materials described in entry 1734A of the Commodity Control List.

EFFECTIVE DATE: This rule is effective December 23, 1987.

FOR FURTHER INFORMATION CONTACT: Jeff Tripp, Capital Goods Technology Center, Office of Technology and Policy Analysis, Export Administration, Telephone: (202) 377-5695.

SUPPLEMENTARY INFORMATION:

Rulemaking Requirements

1. Because this rule concerns a foreign and military affairs function of the United States, it is not a rule or regulation within the meaning of section 1(a) of Executive Order 12291, and it is not subject to the requirements of that Order. Accordingly, no preliminary or final Regulatory Impact Analysis has to be or will be prepared.

2. This rule does not contain a collection of information subject to the requirements of the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 *et seq.*).

3. Because a notice of proposed rulemaking and an opportunity for public comment are not required to be given for this rule by section 553 of the Administrative Procedure Act (5 U.S.C. 553), or by any other law, under sections 603(a) and 604(a) of the Regulatory Flexibility Act (5 U.S.C. 603(a) and 604(a)) no initial or final Regulatory Flexibility Analysis has to be or will be prepared.

4. Section 13(a) of the Export Administration Act of 1979, as amended (50 U.S.C. app. 2412(a)), exempts this rule from all requirements of section 553 of the Administrative Procedure Act (APA) (5 U.S.C. 553), including those requiring publication of a notice of proposed rulemaking, an opportunity for public comment, and a delay in effective date. This rule is also exempt from these APA requirements because it involves a foreign and military affairs function of the United States. Further, no other law requires that a notice of proposed rulemaking and an opportunity for public comment be given for this rule. Accordingly, it is being issued in final form. However, as with other Department of Commerce rules, comments from the public are always welcome. Comments should be submitted to Vincent Greenwald, Office of Technology and Policy Analysis, Export Administration, Department of Commerce, P.O. Box 273, Washington, DC 20044.

List of Subjects in 15 CFR Parts 371 and 399

Exports, Reporting and recordkeeping requirements.

Accordingly, the Export Administration Regulations (15 CFR Parts 368-399) are amended as follows:

1. The authority citations for Parts 371 and 399 continue to read as follows:

Authority: Pub. L. 96-72, 93 Stat. 503 (50 U.S.C. app. 2401 *et seq.*), as amended by Pub. L. 97-145 of December 29, 1981 and by Pub. L. 99-64 of July 12, 1985; E.O. 12525 of July 12, 1985 (50 FR 28757, July 16, 1985); Pub. L. 95-223 of December 28, 1977 (50 U.S.C. 1701 *et seq.*); E.O. 12532 of September 9, 1985 (50 FR 36861, September 10, 1985) as affected by notice of September 4, 1986 (51 FR 31925, September 8, 1986); Pub. L. 99-440 of October 2, 1986 (22 U.S.C. 5001 *et seq.*); and E.O. 12571 of October 27, 1986 (51 FR 39505, October 29, 1986).

PART 371—[AMENDED]

2. In § 371.23, paragraph (a) is revised and paragraph (c) is amended by inserting a new sentence after the second sentence, as follows:

§ 371.23 General License GFW; low-level exports to certain countries.

(a) *Scope.* A general license designated GFW is established authorizing exports of certain low-level commodities subject to national security controls. In most cases, these commodities have performance characteristics that permit the United States to approve exports to controlled countries with only notification to other COCOM governments.

* * * * *

(c) * * * [Some entries may use other criteria; for example, see ECCN 1734A.) * * *

* * * * *

PART 399—[AMENDED]

3. In Supplement No. 1 to § 399.1 (the Commodity Control List), Commodity Group 7 (Chemicals, Metalloids, Petroleum Products and Related Materials), ECCN 1734A is amended by adding a *GFW Eligibility* paragraph immediately after the *Special Licenses Available* paragraph, reading as follows:

* * * * *

GFW Eligibility: All commodities covered by this entry regardless of end-use, subject to the prohibitions contained in § 371.2(c).

* * * * *

BILLING CODE 3510-DT-M

15 CFR Part 399

[Docket No. 71023-7223]

Amendment of Validated License Controls on Stored Program Wire Bonders

AGENCY: Export Administration, Commerce.

ACTION: Final rule.

SUMMARY: Export Administration maintains the Commodity Control List (CCL), which specifies those items subject to Department of Commerce export controls. This rule amends the validated export license controls on certain "stored program controlled" wire bonders described in paragraph (b)(5)(ii) of the "List of Equipment Controlled by ECCN 1355" in ECCN 1355 on the CCL (Supplement No. 1 to 15 CFR 399.1). This action is in accordance with a finding of foreign availability under section 5(f) of the Export Administration Act of 1979, as amended. All "stored program controlled" wire bonders will now require a validated license for export only to destinations in Country Groups Q, S, W, Y, and Z, the People's Republic of China, and Afghanistan for national security reasons. For Country Group T and V, except the People's Republic of China and Afghanistan, a validated license is required only for wire bonders that are described in the "Validated License Required" paragraph of ECCN 1355.

Notice of the foreign availability determination on this equipment was published in the **Federal Register** on September 16, 1987 (52 FR 34976).

EFFECTIVE DATE: December 23, 1987.

FOR FURTHER INFORMATION CONTACT: John R. Pastore, Office of Foreign Availability, Department of Commerce, Washington, DC 20230, Telephone: (202) 377-5953.

SUPPLEMENTARY INFORMATION:

Rulemaking Requirements

1. Because this rule concerns a foreign and military affairs function of the United States, it is not a rule or regulation within the meaning of section 1(a) of Executive Order 12291, and it is not subject to the requirements of that Order. Accordingly, no preliminary or final regulatory impact analysis has been or will be prepared.

2. Section 13(a) of the Export Administration Act of 1979, as amended (50 U.S.C. app. 2412(a)), exempts this rule from all requirements of section 553 of the Administrative Procedure Act (APA) (5 U.S.C. 553) including those requiring publication of a notice of

proposed rulemaking, and opportunity for public comment, and a delay in effective date. This rule is also exempt from these APA requirements because it involves a foreign and military affairs function of the United States. Further, no other law requires that a notice of proposed rulemaking and opportunity for public comment be given for this rule. Accordingly, it is being issued in final form. However, as with other Department of Commerce rules, comments from the public are always welcome. Written comments (six copies) should be submitted to: Joan Maguire, Regulations Branch, Export Administration, Department of Commerce, P.O. Box 273, Washington, DC 20044.

3. Because a notice of proposed rulemaking and an opportunity for public comment are not required to be given for this rule by section 553 of the Administrative Procedure Act (5 U.S.C. 553), or by any other law, under sections 603(a) and 604(a) of the Regulatory Flexibility Act (5 U.S.C. 603(a) and 604(a)) no initial or final regulatory flexibility analysis has to be or will be prepared.

4. This rule involves a collection of information that is subject to the requirements of the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 *et seq.*). This collection has been approved by the Office of Management and Budget under control number 0625–0001.

List of Subjects in 15 CFR Part 399

Exports, Reporting and recordkeeping requirements.

Accordingly, Part 399 of the Export Administration Regulations (15 CFR Parts 368–399) is amended as follows:

PART 399—[AMENDED]

1. The authority citation for Part 399 continues to read as follows:

Authority: Pub. L. 96–72, 93 Stat. 503 (50 U.S.C. app. 2401 *et seq.*), as amended by Pub. L. 97–145 of December 29, 1981, and by Pub. L. 99–64 of July 12, 1985; E.O. 12525 of July 12, 1985 (50 FR 28757, July 16, 1985); Pub. L. 95–223 of December 28, 1977 (50 U.S.C. 1701 *et seq.*); E.O. 12532 of September 9, 1985 (50 FR 36861, September 10, 1985), as affected by notice of September 4, 1986 (51 FR 31925, September 8, 1986); Pub. L. 99–440 of October 2, 1986 (22 U.S.C. 5001 *et seq.*), and E.O. 12571 of October 27, 1986 (51 FR 39505, October 29, 1986).

Supplement No. 1 to § 399.1 [Amended]

2. In Supplement No. 1 to § 399.1 (the Commodity Control List), Commodity Group 3 (General Industrial Equipment), ECCN 1355A is amended by revising the *"Validated License Required"* paragraph and by adding a Technical Note following the *"Validated License Required"* paragraph to read as follows:

1355A Equipment for the manufacture or testing of electronic components and materials; and specially designed components, accessories and "specially designed software" therefor.

Controls for ECCN 1355A

* * * * *

Validated License Required: Country Groups QSTVWYZ. Wire bonders controlled by paragraph (b)(5)(ii) and that are not described below require a validated license only for Country Groups QSWYZ, the People's Republic of China, and Afghanistan. A validated license continues to be required to Country Groups QSTVWYZ for "stored program controlled" wire bonders that are specially designed and enabled to be integrated into a "totally automated (semiconductor) manufacturing facility" or have all of the following characteristics:

(a) Bonding wire that is less than 0.0007 inches (17.5 micrometers) diameter;

(b) Bond to bonding pads (on semiconductor circuits and devices) that are 0.0015 inches × 0.0015 inches (37.5 micrometers × 37.5 micrometers) or less and spaced closer than 0.0025 inches (62.5 micrometers) from center to center; and

(c) Have a bond cycle time of 100 ms or less per wire (bond cycle time measured with 1.5 mm distance between bonds).

Technical Note: A *"totally* automated (semiconductor) manufacturing facility" is one in which all equipment controls and all materials handling operations from the blank polished wafer through encapsulation and electronic test are performed without human intervention in the production of semiconductor circuits and devices. This is distinguished from an "automated (semiconductor) manufacturing facility" in which individual pieces of equipment, used in the production of semiconductor circuits and devices are: (a) Controlled from a host computer; and (b) associated with facilities to supply material and remove processed material without human intervention.

BILLING CODE 3510-DT-M

DEPARTMENT OF THE TREASURY

Internal Revenue Service

26 CFR Parts 1 and 18

[T.D. 8167]

Income Taxes; Taxable Years of Certain Entities

AGENCY: Internal Revenue Service, Treasury.

ACTION: Temporary regulations.

SUMMARY: This document contains temporary regulations relating to the requirement that certain entities generally conform their taxable years to the taxable years of their owners. In addition, the text of the temporary regulations set forth in this document also serves as the text of the proposed regulations cross-referenced in the notice of proposed rulemaking in the proposed rules section of this issue of the **Federal Register**. Changes to the applicable law were made by the Tax Reform Act of 1986. The regulations affect personal service corporations, partnerships, and S corporations (and owners of those entities) and provide them with the guidance needed to comply with the law.

EFFECTIVE DATE: The temporary regulations are effective for taxable years beginning after December 31, 1986.

FOR FURTHER INFORMATION CONTACT: Arthur E. Davis III of the Legislation and Regulations Division, Office of Chief Counsel, Internal Revenue Service, 1111 Constitution Avenue, NW., Washington, DC 20224 (Attention CC:LR:T), (202) 566–3238, not a toll-free call.

SUPPLEMENTARY INFORMATION:

Background

This document amends the Income Tax Regulations (26 CFR Part 1) to provide temporary regulations interpreting section 806 of the Tax Reform Act of 1986 (the 1986 Act), Pub. L. 99–514, 100 Stat. 2362, which amended sections 441, 706(b) and 1378 of the Internal Revenue Code of 1986. In general, section 806 of the 1986 Act requires personal service corporations (PSCs), partnerships and S corporations to conform their taxable years to the taxable years of their owners. These temporary regulations provide guidance on the amendments to section 441, relating to (a) the definition of a PSC (section 441(i)), and (b) the special rules for applying a 52–53-week taxable year in the case of a partnership, S corporation, personal service corporation or the owners of such entities (section 441(f)). In addition, the temporary regulations provide special rules for the application of the amendments to sections 706(b) and 1378 with respect to the spread of income and expense items ratably over a 4-year period in the case of partners and shareholders of S corporations required in one taxable year to take into account items from more than one taxable year of a partnership or S corporation. Furthermore, the temporary regulations make conforming changes to the general provisions regarding taxable years under section 441.

Explanation of Provisions

Taxable Year of a Personal Service Corporation

Section 441(i)(1) provides that a PSC must use the calendar year as its taxable year unless the PSC establishes, to the satisfaction of the Secretary, a business purpose for using a different period as its taxable year. The temporary regulations provide that the taxable year of a PSC is the calendar year, unless the PSC's annual accounting period is a fiscal year and the PSC obtains the approval of the Commissioner to have such a fiscal year as its taxable year.

Approval of the Commissioner is not required in the case of a PSC changing its taxable year to the calendar year. For this purpose, a 52–53-week taxable year of a PSC ending with reference to the month of December will be treated as if it were the calendar year. In the case of a change to the calendar year, the PSC should notify the Internal Revenue Service of the change, in accordance with the applicable revenue procedure, such as, for example, Rev. Proc. 87–32, 1987–28 I.R.B. 14.

Approval of a fiscal year by the Commissioner requires the PSC to demonstrate a business purpose. For example, a PSC which demonstrates that the desired fiscal year coincides with its natural business year, as defined in section 4.01(1) of Rev. Proc. 87–32, is deemed to have established a business purpose to the satisfaction of the Secretary. In this regard, taxpayers should review Announcement 87–82, 1987–37 I.R.B. 30, for modifications to Rev. Proc. 87–32 extending the due date for PSCs requesting the Commissioner's approval to establish a business purpose.

Definition of a Personal Service Corporation

Under the temporary regulations, a taxpayer is a PSC for a taxable year only if: (a) The taxpayer is a C corporation; (b) the principal activity of the taxpayer during the testing period for the taxable year is the performance of personal services; (c) the personal services are substantially performed by employee-owners; and (d) employee-owners hold more than 10 percent of the fair market value of the outstanding stock in the taxpayer as of the last day of the testing period for the taxable year.

Under the temporary regulations, the testing period for a taxable year is generally the taxable year preceding such taxable year. For example, a corporation that has been using June 30 as its taxable year will use the taxable year ended June 30, 1987, as the testing period for the taxable year beginning July 1, 1987.

With respect to a corporation whose first taxable year begins after December 31, 1986, the temporary regulations provide that the testing period for the corporation's first taxable year is the period beginning on the first day of the taxable year and ending on the earlier of (a) the last day of such taxable year, or (b) the last day of the calendar year in which the taxable year began.

Performance of Personal Services

During the course of drafting the temporary regulations, the Service considered many different approaches for determining whether an activity should be treated as the performance of a personal service. The approaches considered ranged from a narrow definition (*e.g.*, only activities described in section 448(d)(2)(A), relating to limitations on the use of the cash method of accounting) to a broad definition (*e.g.*, all activities except selling tangible property). After evaluating the various approaches, the Service concluded that the narrow definition of personal services provided in section 448(d)(2)(A) will apply for purposes of section 441(i).

Thus, under the temporary regulations any activity described in section 448(d)(2)(A) is treated as the performance of personal services. An activity not described in section 448(d)(2)(A) is not treated as the performance of personal services under the temporary regulations.

It should be noted, however, that although the temporary regulations provide that an activity is treated as the performance of personal services by reference to section 448(d)(2)(A), the definition of the term "personal service corporation" under these temporary regulations is different from the definition of the term "qualified personal service corporation" under section 448(d)(2). The principal differences relate to ownership requirements and the necessary percentage of personal service activities.

Principal Activity

The temporary regulations provide that the corporation's principal activity during the testing period will be the performance of personal services if the total amount of the corporation's compensation cost for such taxable year that is attributable to its personal service activities exceeds 50 percent of the corporation's total compensation cost. Compensation cost is defined as (a) salaries and wages, and (b) other amounts attributable to services rendered in the course of employment. However, compensation cost does not include amounts attributable to a plan, qualified under section 401(a) or 403(a), or defined in section 408(k).

Services Substantially Performed by Employee-Owners

The temporary regulations provide that the personal services performed by a corporation during a testing period will be treated as substantially performed by employee-owners of the corporation if more than 20 percent of the corporation's compensation cost with respect to personal services is attributable to employee-owners. Such determination is to be made by the taxpayer in any reasonable and consistent manner.

In the process of drafting the temporary regulations, the Service received many informal comments relating to the appropriate percentage for determining "substantially performed." Most of the commentators suggested that the term "substantially" should be interpreted as "substantially all." "Substantially all" would imply a very high percentage of services performed by employee-owners whereas "substantially" would imply a lower percentage. Given that the term "substantially" is used in the Code rather than the term "substantially all," the temporary regulations use 20 percent as the threshold for determining whether services are substantially performed by employee-owners.

Temporary regulations (§ 1.441–3T) issued under the authority to prescribe rules relating to the 52–53-week taxable year were published February 5, 1987 (52 FR 3615). Those temporary regulations interpreted the phrase "substantially performed by employee-owners" by using a 10 percent time test. That test was limited to taxpayers that desired to use a 52–53-week taxable year for a short taxable year ending on or before January 5, 1987. Upon further review, the Service determined that the 10 percent

BEST COPY AVAILABLE

time test is inappropriate for purposes of interpreting section 441(i), because that test does not adequately weight the relative contributions of the various employees, in particular the employee-owners. For example, under the time test, an hour billed at $100/hour by an employee-owner of a law firm (that is a C corporation) is treated the same as an hour of a junior associate that may be billed at $40/hour. A compensation test, however, provides a weighted approach to measure relative performance of personal services. In addition to changing the measurement base from time spent to compensation, these temporary regulations differ from the 10 percent time test provided in § 1.441–3T by (a) increasing the percentage from 10 percent to 20 percent, and (b) including the compensation cost for all employees involved in the corporation's personal service activity in the 20 percent calculation rather than including only compensation cost that is "directly and intrinsically related" to the providing of personal services.

Under the temporary regulations, a person is an employee-owner if that person is an employee on any day of the testing period, and the person owns any stock of the corporation on any day of the testing period. Attribution rules in section 318, as modified, apply for purposes of determining stock ownership. In addition, any person who is an owner and performs services for or on behalf of the corporation shall be treated as an employee for purposes of this rule, even if the legal form of that person's relationship to the corporation is such that he or she would be considered an independent contractor for other purposes.

52–53-Week Taxable Year

Section 441(f)(3) provides that the Secretary may by regulation provide terms and conditions for the application of the rules relating to the 52–53-week taxable year of a partnership, S corporation, personal service corporation, or any owner of such an entity.

The temporary regulations provide rules for cases in which the taxable year of a partnership and a partner, or an S corporation and an S corporation shareholder, or a personal service corporation and an employer-owner, end with or with reference to the same calendar month. Under the temporary regulations, in certain cases the taxable year of a partner, S corporation shareholder, or employee-owner will be deemed to end on the last day of the partnership's, S corporation's, or PSC's taxable year. For example, a calendar year partner in a 52–53-week partnership with a January 3, 1988 year end will be required to include in his 1987 income tax return his distributive share of partnership income for the taxable year ended January 3, 1988.

4-Year Spread

The temporary regulations provide that partners and S corporation shareholders may spread items of income and expense if (a) the items of income and expense are attributable to a partnership or S corporation that is required under section 806 of the 1986 Act to change its taxable year for the first taxable year beginning after December 31, 1986, and (b) the partner or S corporation would be required under the temporary regulations to include in one taxable year the items from more than one taxable year of the partnership or S corporation. The temporary regulations define the terms "income items" and "expense items" and provide other guidance with respect to section 806 of the 1986 Act.

Special Analyses

The Commissioner of Internal Revenue has determined that this temporary rule is not a major rule as defined in Executive Order 12291 and that a Regulatory Impact Analysis therefore is not required. A general notice of proposed rulemaking is not required by 5 U.S.C. 553 for temporary regulations. Accordingly, the temporary regulations do not constitute regulations subject to the Regulatory Flexibility Act (5 U.S.C. chapter 6).

Drafting Information

The principal author of these regulations is Arthur E. Davis III of the Legislation and Regulations Division of the Office of Chief Counsel, Internal Revenue Service. However, personnel from other offices of the Internal Revenue Service and Treasury Department participated in developing the regulations on matters of both substance and style.

Amendments to the Regulations

For the reasons set out in the preamble, Subchapter A, Parts 1 and 18 of Title 26, Chapter 1 of the Code of Federal Regulations is amended as set forth below:

Income Tax Regulations

PART 1—[AMENDED]

Paragraph 1. The authority for Part 1 is amended by adding the following citation:

Authority: 26 U.S.C. 7805. * * * Section 1.441–2T also issued under 26 U.S.C. 441(f).

Par. 2. Section 1.441–1 is redesignated as § 1.441–1T and amended by revising the caption, revising paragraphs (b), (f), and (g), and adding a new paragraph (h) to read as follows:

§ 1.441–1T Period for computation of taxable income (temporary).

* * * * *

(b) *Taxable year—*(1) *Definition of taxable year—*(i) *In general.* Except as otherwise provided in this paragraph (b)(1), the term "taxable year" means—

(A) The taxpayer's annual accounting period if it is a calendar year or a fiscal year; or

(B) The calendar year if section 441(g) (relating to taxpayers who keep no books or have no accounting period) applies. Except as provided in administrative provisions of the Internal Revenue laws, a taxable year may not cover a period of more than 12 calendar months. If a return is made under section 443 for a period of less than 12 months (a "short period"), the taxable year is the short period for which the return is made.

(ii) *Special rules for certain entities.* The general rule provided in paragraph (b)(1)(i) of this section may be modified by the Internal Revenue laws or regulations. For example, special rules are provided for the following taxpayers—

(A) In the case of personal service corporations, the applicable rules are contained in § 1.441–4T.

(B) In the case of partnerships, the applicable rules are contained in § 1.706–1T.

(C) In the case of S corporations, the applicable rules are contained in section 1378.

(D) In the case of members of an affiliated group which makes a consolidated return, the applicable rules are contained in § 1.1502–76 and paragraph (d) of § 1.442–1.

(E) In the case of trusts, the applicable rules are contained in section 645.

(F) In the case of real estate investment trusts, the applicable rules are contained in section 859.

(G) In the case of real estate mortgage investment conduits, the applicable rules are contained in section 860D(a)(5).

(H) In the case of FSCs or DISCs, the applicable rules are contained in section 441(h).

(2) *Adoption of taxable year.* A new taxpayer adopts a taxable year on or before the time prescribed by law (not including extensions) for the filing of the taxpayer's first return and may adopt, without prior approval, any taxable year that satisfies the requirements of section 441 and this section.

(3) *Change in taxable year—*(i) *General rule.* After a taxpayer has adopted a taxable year, such year must be used in computing taxable income and making returns for all subsequent years unless prior approval is obtained from the Commissioner to make a change or unless a change is otherwise permitted or required under the Internal Revenue laws or regulations. See section 442 and § 1.442–1. Also see paragraph (b)(4) of this section.

(ii) *Change in taxable year required by the Tax Reform Act of 1986.* Procedures for entities (certain personal service corporations, partnerships and S corporations) required to change their taxable year under section 806 of the Tax Reform Act of 1986, Pub. L. 99–514, 100 Stat. 2362, are provided in Rev. Proc. 87–32, 1987–28 I.R.B. 14, or successor revenue procedures.

(4) *Retention of taxable year—*(i) *In general.* In certain cases, taxpayers will be required under the Internal Revenue laws or regulations to change their taxable year unless they establish a business purpose for retaining their current taxable year. For example, corporations electing to be S corporations, corporations that are personal service corporations for the first time, and certain partnerships with new partners may be required to change their taxable year unless they establish a business purpose for retaining their current taxable year.

(ii) *Section 806 of the Tax Reform Act of 1986.* Rev. Proc. 87–32 provides (and any successor revenue procedure would provide) procedures for certain entities (i.e., personal service corporations, partnerships and S corporations) requesting the Commissioner's approval to retain a fiscal year when such entity would otherwise be required to change its taxable year under section 806 of the Tax Reform Act of 1986. In addition, personal service corporations should see Announcement 87–82, 1987–37 I.R.B. 30, for modifications to Rev. Proc. 87–32 extending the due date for personal service corporations requesting the Commissioner's approval to establish a business purpose.

(f) *Election of year consisting of 52–53 weeks.* For rules relating to the 52–53-week taxable year, see §§ 1.441–2T, 1.441–3T, and 1.441–4T.

(g) *No books kept; no accounting period.* Except as otherwise provided in the Internal Revenue laws or regulations, the taxpayer's taxable year shall be the calendar year if—

(1) The taxpayer keeps no books;

(2) The taxpayer does not have an annual accounting period (as defined in section 441(c) and paragraph (c) of this section); or

(3) The taxpayer has an annual accounting period, but such period does not qualify as a fiscal year (as defined in section 441(e) and paragraph (e) of this section).

For the purposes of paragraph (g)(1) of this section, the keeping of books does not require that records be bound. Records which are sufficient to reflect income adequately and clearly on the basis of an annual accounting period will be regarded as the keeping of books. A taxpayer whose taxable year is required to be a calendar year under section 441(g) and this paragraph (g) may not adopt a fiscal year without obtaining prior approval from the Commissioner. See section 442 and § 1.442–1T(a)(2).

(h) *Effective date.* This section is effective for taxable years beginning after December 31, 1986. See 26 CFR 1.441–1 (revised as of April 1, 1987) for rules applicable to taxable years beginning before January 1, 1987.

Par. 3. Section 1.441–2 is redesignated as § 1.441–2T and amended by revising the caption and paragraph (e) to read as follows:

§ 1.441–2T Election of year consisting of 52–53 weeks (temporary).

* * * * *

(e) *Partnerships, S corporations, and personal service corporations—*(1) *In general.* Paragraph (e) of this section applies if a partnership, partner, S corporation, S corporation shareholder, personal service corporation (within the meaning of § 1.441–4T(d)), or employee-owner (within the meaning of § 1.441–4T(h)) uses a 52–53-week taxable year.

(2) *Treatment of taxable years ending with reference to the same calendar month—*(i) *Timing of partners taking into account partnership items.* If the taxable year of a partnership and a partner end with reference to the same calendar month, then for purposes of determining the taxable year in which a partner takes into account—

(A) Items described in section 702, and

(B) Items that are deductible by the partnership (including items described in section 707(c)) and includible in the income of the partner, the partner's taxable year will be deemed to end on the last day of the partnership's taxable year.

(ii) *Timing of S shareholders taking into account S corporation items.* If the taxable year of an S corporation and a shareholder end with reference to the same calendar month, then for purposes of determining the taxable year in which a shareholder takes into account—

(A) Items described in section 1366(a), and

(B) Items that are deductible by the S corporation and includible in the income of the shareholder, the shareholder's taxable year will be deemed to end on the last day of the S corporation's taxable year.

(iii) *Personal service corporations and employee-owners.* If the taxable year of a personal service corporation and an employee-owner end with reference to the same calendar month, then for purposes of determining the taxable year in which an employee-owner takes into account items that are deductible by the personal service corporation and includible in the income of the employee-owner, the employee-owner's taxable year will be deemed to end on the last day of the personal service corporation's taxable year.

(3) *Automatic approval for partnerships and S corporations.* If a partnership or S corporation is required to use a taxable year ending with respect to the last day of a particular month and the partnership or S corporation desires to use a 52–53-week taxable year with reference to such month, the partnership or S corporation is granted automatic approval to use such 52–53-week taxable year. See § 1.441–4T(b)(2)(ii) for a similar rule for personal service corporations.

(4) *Examples.* The provisions of paragraph (e)(2) of this section may be illustrated by the following examples.

Example (1). ABC Partnership uses a 52–53-week taxable year that ends on the Sunday nearest to December 31, and its partners, A, B, and C, are individual calendar year taxpayers. Assume that, for ABC's taxable year ending January 3, 1988, each partner's distributive share of ABC's taxable income is $10,000. Under section 706(a) and paragraph (e)(2)(i) of this section, for the taxable year ending December 31, 1987, A, B, and C each must include $10,000 in income with respect to the ABC year ending January 3, 1988. Similarly, if ABC makes a guaranteed payment to A on January 2, 1988, A must include the payment in income for his or her taxable year ending December 31, 1987.

Example (2). X, a personal service corporation, uses a 52–53-week taxable year that ends on the Sunday nearest to December 31, and all of the employee-owners of X are individual calendar year taxpayers. Assume that, for its taxable year ending January 3,

1988. X pays a bonus of $10,000 to each employee-owner. Under paragraph (e)(2)(iii) of this section, each employee-owner must include the bonus in income for the taxable year ending December 31, 1987.

(5) *Effective date.* Paragraph (e) of this section applies to taxable years beginning after December 31, 1986.

Par. 4. Section 1.441–2T is amended by revising the heading and text of paragraph (f) to read as follows:

§ 1.441–2T Election of year consisting of 52–53 weeks (temporary).

* * * * *

(f) *Special rules for 1986 and subsequent years.* For special rules relating to certain adoptions of, or changes to or from, a 52–53-week taxable year ending in 1986 or 1987, see § 1.441–3T. For special rules relating to a 52–53-week taxable year beginning after December 31, 1986, see § 1.441–2T(e).

Par. 5. Section 1.441–4T is added in the appropriate place.

§ 1.441–4T Taxable year of a personal service corporation (temporary).

(a) *Taxable year.* The taxable year of a personal service corporation (as defined in paragraph (d) of this section) is—

(1) The calendar year, or a "short period" (as provided in § 1.441–1T(b)(1)(i)) ending December 31; or

(2) A fiscal year, or a short period (other than a short period provided in paragraph (a)(1) of this section), if the corporation obtains the approval of the Commissioner (in accordance with paragraph (c) of this section) for using such fiscal year.

(b) *Change in taxable year required*—(1) *In general.* For any taxable year beginning after December 31, 1986, a taxpayer that is a personal service corporation for such taxable year must—

(i) Use a taxable year described in paragraph (a) of this section; or

(ii) Change to such a taxable year by using a short taxable year that ends on the last day of a taxable year described in paragraph (a) of this section.

(2) *Approval not required for change to a calendar year*—(i) *In general.* A personal service corporation may change its taxable year to the calendar year without the approval of the Commissioner. In such cases, however, the taxpayer should notify the Internal Revenue Service of the change in accordance with the provisions of the applicable revenue procedure. See, for example, section 5.02(1) of Rev. Proc. 87–32, 1987–28 I.R.B. 14.

(ii) *Special rule for 52–53-week taxable year ending with reference to the month of December.* For purposes of this section, a 52–53-week taxable year of a personal service corporation ending with reference to the month of December shall be treated as the calendar year. In order to assist in the processing of the retention or change in taxable year, taxpayers should refer to this special rule by either typing or legibly printing the following statement at the top of page 1 of the income tax return: "FILED UNDER § 1.441–4T(b)(2)(ii)." See § 1.441–2T(e) for special rules regarding 52–53-week taxable years for personal service corporations.

(3) *Examples.* The provisions of paragraph (b) of this section may be illustrated by the following examples.

Example (1). X corporation's last taxable year beginning before January 1, 1987, ends on January 31, 1987. In addition, X is a personal service corporation for its taxable year beginning February 1, 1987, and does not obtain the approval of the Commissioner for using a fiscal year. Thus, under paragraph (b)(1) of this section, X is required to change its taxable year to the calendar year by using a short taxable year that begins on February 1, 1987, and ends on December 31, 1987. Under paragraph (b)(2)(i) of this section, X may change its taxable year without the consent of the Commissioner, but should notify the Internal Revenue Service of the change in accordance with section 5.02(1) of Rev. Proc. 87–32.

Example (2). Assume the same facts as in example (1), except that for its taxable year beginning February 1, 1987, X obtains the approval of the Commissioner to change its annual accounting period to a fiscal year ending September 30. Under paragraph (b)(1) of this section, X must file a tax return for the short period from February 1, 1987, through September 30, 1987.

Example (3). Assume the same facts as in example (1), except that the first taxable year for which X is a personal service corporation is the taxable year that begins on February 1, 1990. Thus, for taxable years ending before that date, this section does not apply with respect to X. For its taxable year beginning on February 1, 1990, however, X will be required to comply with paragraph (b) of this section. If X does not obtain the approval of the Commissioner to use a fiscal year, X will be required to change its taxable year to the calendar year by using a short taxable year that ends on December 31, 1990.

Example (4). Assume the same facts as in example (1), except that X desires to change to a 52–53-week taxable year ending with reference to the month of December. Pursuant to paragraphs (b)(2)(i) and (b)(2)(ii) of this section, X may change its taxable year to a 52–53-week taxable year ending with reference to the month of December without the consent of the Commissioner, but should notify the Internal Revenue Service of the change in accordance with paragraph (b)(2)(ii) of this section.

(c) *Approval of a fiscal year.* A personal service corporation must establish to the satisfaction of the Commissioner a business purpose for using a fiscal year under paragraph (a)(2) of this section. Business purpose is established to the satisfaction of the Commissioner in the case of a personal service corporation that—

(1) Requests to use, or is using, a fiscal year that coincides with its natural business year, as defined in section 4.01(1) of Rev. Proc. 87–32, or successor revenue procedures, or

(2) Receives permission from the Commissioner to use the fiscal year by establishing a business purpose for the fiscal year under section 6.02 of Rev. Proc. 87–32, or successor revenue procedures. See also Rev. Rul. 87–57, 1987–28 I.R.B. 7. See Announcement 87–82 for modifications to Rev. Proc. 87–32 regarding due dates for personal service corporations filing applications and income tax returns for certain short taxable years beginning after December 31, 1986.

(d) *Personal service corporation for a taxable year*—(1) *In general.* For purposes of this section, a taxpayer is a personal service corporation for a taxable year only if—

(i) The taxpayer is a C corporation (as defined in section 1361(a)(2)) for the taxable year;

(ii) The principal activity of the taxpayer during the testing period for the taxable year is the performance of personal services;

(iii) During the testing period for the taxable year, such services are substantially performed by employee-owners; and

(iv) Employee-owners, as defined in paragraph (h) of this section, own (as determined under the attribution rules of section 318, except that "any" shall be substituted for "50 percent" in section 318(a)(2)(C)) more than 10 percent of the fair market value of the outstanding stock in the taxpayer on the last day of the testing period for the taxable year.

(2) *Testing period*—(i) *In general.* Except as otherwise provided in paragraph (d)(2)(ii) of this section, the testing period for a taxable year is the taxable year preceding such taxable year.

(ii) *New corporations.* The testing period for a taxpayer's first taxable year is the period beginning on the first day of such taxable year and ending on the earlier of—

(A) The last day of such taxable year; or

(B) The last day of the calendar year in which such taxable year begins.

(3) *Examples.* The provisions of paragraph (d)(2) of this section may be illustrated by the following examples.

Example (1). Corporation A has been in existence since 1960 and has used a January 31 taxable year for all taxable years beginning before 1987. For purposes of determining whether A is a personal service corporation for the taxable year beginning February 1, 1987, A's testing period under paragraph (d)(2)(i) of this section is the taxable year ending January 31, 1987.

Example (2). B corporation's first taxable year begins on June 1, 1987, and B desires to use a September 30 taxable year. However, if B is a personal service corporation, it must obtain the Commissioner's approval to use a September 30 taxable year. Pursuant to paragraph (d)(2)(ii) of this section, B's testing period for its first taxable year beginning June 1, 1987, is the period June 1, 1987 through September 30, 1987. Thus, if, based upon such testing period, B is a personal service corporation, B must obtain the Commissioner's permission to use a September 30 taxable year.

Example (3). The facts are the same as in Example (2), except that B desires to use a March 31 taxable year. Pursuant to paragraph (d)(2)(ii) of this section, B's testing period for its first taxable year beginning June 1, 1987, is the period June 1, 1987, through December 31, 1987. Thus, if, based upon such testing period, B is a personal service corporation, B must obtain the Commissioner's permission to use a March 31 fiscal year.

(e) *Determination of whether an activity during the testing period is treated as the performance of personal services*—(1) *Activities described in section 448(d)(2)(A).* For purposes of this section, any activity of the taxpayer described in section 448(d)(2)(A) or the regulations thereunder will be treated as the performance of personal services. Therefore, any activity of the taxpayer that involves the performance of services in the fields of health, law, engineering, architecture, accounting, actuarial science, performing arts, or consulting (as such fields are defined in the regulations interpreting section 448) will be treated as the performance of personal services for purposes of this section.

(2) *Activities not described in section 448(d)(2)(A).* For purposes of this section, any activity of the taxpayer not described in section 448(d)(2)(A) or the regulations thereunder will not be treated as the performance of personal services.

(f) *Principal activity*—(1) *General rule.* For purposes of this section, the principal activity of a corporation for any testing period will be considered to be the performance of personal services if the cost of the corporation's compensation (the "compensation cost") for such testing period that is attributable to its activities that are treated as the performance of personal services under paragraph (e) of this section exceeds 50 percent of the corporation's total compensation cost for such testing period.

(2) *Compensation cost.* For purposes of this section, the compensation cost of a corporation for a taxable year is equal to the sum of the following amounts allowable as a deduction, allocated to a long-term contract, or otherwise chargeable to a capital account by the corporation during such taxable year—

(i) Wages and salaries, and

(ii) Any other amounts attributable to services performed for or on behalf of the corporation by a person who is an employee of the corporation (including an owner of the corporation who is treated as an employee under paragraph (h)(2) of this section) during the testing period. Such amounts include, but are not limited to, amounts attributable to deferred compensation, commissions, bonuses, compensation includible in income under section 83, compensation for services based on a percentage of profits, and the cost of providing fringe benefits that are includible in income. However, for purposes of this section, compensation cost does not include amounts attributable to a plan qualified under section 401(a) or 403(a), or to a simplified employee pension plan defined in section 408(k).

(3) *Attribution of compensation cost to personal service activity*—(i) *Employees involved only in the performance of personal services.* The compensation cost for employees involved only in the performance of activities that are treated as personal services under paragraph (e) of this section, or employees involved only in supporting the work of such employees, shall be considered to be attributable to the corporation's personal service activity.

(ii) *Employees involved only in activities that are not treated as the performance of personal services.* The compensation cost for employees involved only in the performance of activities that are not treated as personal services under paragraph (e) of this section, or for employees involved only in supporting the work of such employees, shall not be considered to be attributable to the corporation's personal service activity.

(iii) *Other employees.* The compensation cost for any employee who is not described in either paragraph (f)(3)(i) or paragraph (f)(3)(ii) of this section ("a mixed activity employee") shall be allocated as follows—

(A) *Compensation cost attributable to personal service activity.* That portion of the compensation cost for a mixed activity employee that is attributable to the corporation's personal service activity equals the compensation cost for such employee multiplied by the percentage of the total time worked for the corporation by such employee during the year that is attributable to activities of the corporation that are treated as the performance of personal services under paragraph (e) of this section. Such percentage shall be determined by the taxpayer in any reasonable and consistent manner. Time logs are not required unless maintained for other purposes;

(B) *Compensation cost not attributable to personal service activity.* That portion of the compensation cost for a mixed activity employee that shall not be considered to be attributable to the corporation's personal service activity is the compensation cost for such employee less the amount determined in paragraph (f)(3)(iii)(A) of this section.

(g) *Services substantially performed by employee-owners*—(1) *General rule.* Personal services are substantially performed during the testing period by employee-owners of the corporation if more than 20 percent of the corporation's compensation cost for such period attributable to its activities that are treated as the performance of personal services (within the meaning of paragraph (e) of this section), is attributable to personal services performed by employee-owners.

(2) *Compensation cost attributable to personal services.* For purposes of paragraph (g)(1) of this section—

(i) The corporation's compensation cost attributable to its activities that are treated as the performance of personal services shall be determined under paragraph (f)(3) of this section; and

(ii) The portion of the amount determined under paragraph (g)(2)(i) of this section that is attributable to personal services performed by employee-owners shall be determined by the taxpayer in any reasonable and consistent manner.

(3) *Examples.* The provisions of paragraph (g) of this section may be illustrated by the following examples.

Example (1). For its taxable year beginning February 1, 1987, Corporation A's testing period is the taxable year ending January 31, 1987. During such testing period, A's only activity was the performance of personal services. The total compensation cost of A (including compensation cost attributable to employee-owners) for the testing period was $1,000,000. The total compensation cost attributable to employee-owners of A for the testing period was $210,000. Pursuant to paragraph (g)(1) of this section, the employee-owners of A substantially performed the personal services of A during the testing period because the compensation cost of A's

employee-owners was more than 20 percent of the total compensation cost for all of A's employees (including employee-owners).

Example (2). Corporation B has the same facts as corporation A in example (1), except that during the taxable year ending January 31, 1987, B also participated in an activity that would not be characterized as the performance of personal services under this section. The total compensation cost of B (including compensation cost attributable to employee-owners) for the testing period was $1,500,000 ($1,000,000 attributable to B's personal service activity and $500,000 attributable to B's other activity). The total compensation cost attributable to employee-owners of B for the testing period was $250,000 ($210,000 attributable to B's personal service activity and $40,000 attributable to B's other activity). Pursuant to paragraph (g)(1) of this section, the employee-owners of B substantially performed the personal services of B during the testing period because more than 20 percent of B's compensation cost during the testing period attributable to its personal service activities was attributable to personal services performed by employee-owners ($210,000).

(h) *Employee-owner defined*—(1) *General rule.* For purposes of this section, a person is an employee-owner of a corporation for a testing period if—

(i) The person is an employee of the corporation on any day of the testing period, and

(ii) The person owns any outstanding stock of the corporation on any day of the testing period.

(2) *Special rule for independent contractors who are owners.* Any person who is an owner of the corporation within the meaning of paragraph (h)(1)(ii) of this section and who performs personal services for or on behalf of the corporation shall be treated as an employee for purposes of this section, even if the legal form of that person's relationship to the corporation is such that he or she would be considered an independent contractor for other purposes.

(i) *Special rules for affiliated group filing consolidated return*—(1) *In general.* For purposes of applying this section to the members of an affiliated group of corporations filing a consolidated return for the taxable year—

(i) The members of the affiliated group shall be treated as a single corporation;

(ii) The employees of the members of the affiliated group shall be treated as employees of such single corporation; and

(iii) All of the stock, of the members of the affiliated group, that is not owned by any other member of the affiliated group shall be treated as the outstanding stock of such corporation.

(2) *Examples.* The provisions of this paragraph (i) may be illustrated by the following examples.

Example (1). The affiliated group AB, consisting of corporation A and its wholly owned subsidiary B, filed a consolidated Federal income tax return for the taxable year ending January 31, 1987, and AB is attempting to determine whether it is affected by this section for its taxable year beginning February 1, 1987. During the testing period (i.e., the taxable year ending January 31, 1987), A did not perform personal services while B's only activity was the performance of personal services. On the last day of the testing period, employees of A did not own any stock in A while some of B's employees own stock in A. In the aggregate, B's employees own 9 percent of A's stock on the last day of the testing period. Pursuant to paragraph (i)(1) of this section, this section is effectively applied on a consolidated basis to members of an affiliated group filing a consolidated Federal income tax return. Since the only employee-owners of AB are the employees of B and since B's employees do not own more than 10 percent of AB on the last day of the testing period, AB is not subject to the provisions of this section. Thus, AB is not required to determine on a consolidated basis whether, during the testing period, (a) its principal activity is the providing of personal services, or (b) the personal services are substantially performed by employee-owners.

Example (2). The facts are the same as in example (1), except that on the last day of the testing period A owns only 80 percent of B. The remaining 20 percent of B is owned by employees of B. The fair market value of A, including its 80 percent interest in B, as of the last day of the testing period, is $1,000,000. In addition, the fair market value of the 20 percent interest in B owned by B's employees is $5,000 as of the last day of the testing period. Pursuant to paragraph (d)(1)(iv) and paragraph (i)(1) of this section, AB must determine whether the employee-owners of A and B (*i.e.*, B's employees) own more than 10 percent of the fair market value of A and B as of the last day of the testing period. Since the $14.000 [($100,000.09) + $5,000] fair market value of the stock held by B's employees is greater than 10 percent of the $105,000 ($100,000 + $5,000) aggregate fair market value of A and B as of the last day of the testing period, AB may be subject to this section if, on a consolidated basis during the testing period, (a) the principal activity of AB is the performance of personal services and (b) the personal services are substantially performed by employee-owners.

(j) *Effective date.* This section applies to taxable years beginning after December 31, 1986.

Par. 6. Section 1.702–3T is added in the appropriate place.

§ 1.702–3T 4-year spread (temporary).

(a) *Applicability.* This section applies to a partner in a partnership if—

(1) The partnership is required by section 806 of the Tax Reform Act of 1986 (the 1986 Act), Pub. L. 99–514, 100 Stat. 2362, to change its taxable year for the first taxable year beginning after December 31, 1986 (partnership's year of change); and

(2) As a result of such change in taxable year, items from more than one taxable year of the partnership would, but for the provisions of this section, be included in the taxable year of the partner with or within which the partnership's year of change ends.

(b) *Partner's treatment of items from the partnership's year of change*—(1) *In general.* Except as provided in paragraph (c) of this section, if a partner's share of "income items" exceeds the partner's share of "expense items," the partner's share of each and every income and expense item shall be taken into account ratably (and retain its character) over the partner's first 4 taxable years beginning with the partner's taxable year with or within which the partnership's year of change ends.

(2) *Definitions*—(i) *Income items.* For purposes of this section, the term "income items" means the sum of—

(A) The partner's distributive share of taxable income (exclusive of separately stated items) from the partnership's year of change,

(B) The partner's distributive share of all separately stated income or gain items from the partnership's year of change, and

(C) Any amount includible in the partner's income under section 707(c) on account of payments during the partnership's year of change.

(ii) *Expense items.* For purposes of this section, the term "expense items" means the sum of—

(A) The partner's distributive share of taxable loss (exclusive of separately stated items) from the partnership's year of change, and

(B) The partner's distributive share of all separately stated items of loss or deduction from the partnership's year of change.

(c) *Electing out of 4-year spread.* A partner may elect out of the rules of paragraph (b) of this section by meeting the requirements of § 5h.5 (temporary regulations relating to elections under the Tax Reform Act of 1986).

(d) *Special rules for a partner that is a partnership or S corporation*—(1) *In general.* Except as provided in paragraph (d)(2) of this section, a partner that is a partnership or S corporation may, if otherwise eligible, use the 4-year spread (with respect to partnership interests owned by the partner) described in this section.

(2) *Certain partners prohibited from using 4-year spread*—(i) *In general.* Except as provided in paragraph (d)(2)(ii) of this section, a partner that is a partnership or S corporation may not use the 4-year spread (with respect to partnership interests owned by the partner) if such partner is also changing its taxable year pursuant to section 806 of the 1986 Act.

(ii) *Exception.* If a partner's year of change does not include any income or expense items with respect to the partnership's year of change, such partner may, if otherwise eligible, use the 4-year spread (with respect to such partnership interest) described in this section even though the partner is a partnership or S corporation. See examples (13) and (14) in paragraph (h) of this section.

(e) *Basis of partner's interest.* The basis of a partner's interest in a partnership shall be determined as if the partner elected not to spread the partnership items over 4 years, regardless of whether such election was in fact made. Thus, for example, if a partner is eligible for the 4-year spread and does not elect out of the 4-year spread pursuant to paragraph (c) of this section, the partner's basis in the partnership interest will be increased in the first year of the 4-year spread period by an amount equal to the excess of the income items over the expense items. However, the partner's basis will not be increased again, with respect to the unamortized income and expense items, as they are amortized over the 4-year spread period.

(f) *Effect on other provisions of the Code.* Except as provided in paragraph (e) of this section, determinations with respect to a partner, for purposes of other provisions of the Code, must be made with regard to the manner in which partnership items are taken into account under the rules of this section. Thus, for example, a partner who does not elect out of the 4-year spread must take into account, for purposes of determining net earnings from self-employment under section 1402(a) for a taxable year, only the ratable portion of partnership items for that taxable year.

(g) *Treatment of dispositions*—(1) *In general.* If a partnership interest is disposed of before the last taxable year in the 4-year spread period, unamortized income and expense items that are attributable to the interest disposed of and that would be taken into account by the partner for subsequent taxable years in the 4-year spread period shall be taken into account by the partner as determined under paragraph (g)(2) of this section. For purposes of this section, the term "disposed of" means any transfer, including (but not limited to) transfers by sale, exchange, gift, and by reason of death.

(2) *Year unamortized items taken into account*— (i) *In general.* If, at the end of a partner's taxable year, the fraction determined under paragraph (g)(2)(ii) of this section is—

(A) Greater than ⅔, the partner must continue to take the unamortized income and expense items into account ratably over the 4-year spread period;

(B) Greater than ⅓ but less than or equal to ⅔, the partner must, in addition to its ratable amortization, take into account in such year 50 percent of the income and expense items that would otherwise be unamortized at the end of such year (however, this paragraph (g)(2)(i)(B) is only applied once with respect to a partner's interest in a particular partnership); or

(C) Less than or equal to ⅓, the partner must take into account the entire balance of unamortized income and expense items in such year.

(ii) *Determination of fraction.* For purposes of paragraph (g)(2)(i) of this section, the numerator of the fraction is the partner's proportionate interest in the partnership at the end of the partner's taxable year and the denominator is the partner's proportionate interest in the partnership as of the last day of the partnership's year of change.

(h) *Examples.* The provisions of this section may be illustrated by the following examples.

Example (1). Assume that P1, a partnership with a taxable year ending September 30, is required by the 1986 Act to change its taxable year to a calendar year. All of the partners of P1 are individual taxpayers reporting on a calendar year. P1 is required to change to a calendar year for its taxable year beginning October 1, 1987, and to file a return for the short taxable year ending December 31, 1987. Based on the above facts, the partners of P1 are required to include the items from more than one taxable year of P1 in income for their 1987 taxable year. Thus, under paragraph (b) of this section, if a partner's share of income items exceeds the partner's share of expense items, the partner's share of each and every income and expense item shall be taken into account ratably by such partner in each of the partner's first four taxable years' beginning with the partner's 1987 taxable year, unless such partner elects under paragraph (c) of this section to include all such amounts in his 1987 taxable year.

Example (2). Assume the same facts as in example (1), except P1 is a personal service corporation with all of its employee-owners reporting on a calendar year. Although P1 is required to change to a calendar year for its taxable year beginning October 1, 1987, neither P1 nor its employee-owners obtain the benefits of a 4-year spread. Pursuant to section 806(e)(2)(C) of the 1986 Act, the 4-year spread provision is only applicable to short taxable years of partnerships and S corporations required to change their taxable year under the 1986 Act.

Example (3). Assume the same facts as example (1) and that I is one of the individual partners of P1. Further assume that I's distributive share of P1's taxable income for the short taxable year ended December 31, 1987 (*i.e.*, P1's year of change), is $10,000. In addition, I has $8,000 of separately stated expense from P1's year of change. Since I's income items (*i.e.*, $10,000 of taxable income) exceed I's expense items (*i.e.*, $8,000 of separately stated expense) attributable to P1's year of change, I is eligible for the 4-year spread provided by this section. If I does not elect out of the 4-year spread, I will recognize $2,500 of taxable income and $2,000 of separately stated expense in his 1987 calendar year return. Assuming I does not dispose of his partnership interest in P1 by December 31, 1989, the remaining $7,500 of taxable income and $6,000 of separately stated expense will be amortized (and retain its character) over I's next three taxable years (*i.e.*, 1988, 1989 and 1990).

Example (4). Assume the same facts as example (3), except that I disposes of his entire interest in P1 during 1988. Pursuant to paragraph (g) of this section, I would recognize $7,500 of taxable income and $6,000 of separately stated expense in his 1988 calendar year return.

Example (5). Assume the same facts as in example (3), except that I disposes of 50 percent of his interest in P1 during 1989. Pursuant to paragraph (g) of this section, I would recognize $3,750 of taxable income in his 1989 calendar year return ($2,500 ratable portion for 1989 plus 50 percent of the $2,500 of income items that would otherwise be unamortized at the end of 1989). I would also recognize $3,000 of separately stated expense items in 1989 ($2,000 ratable portion for 1989 plus 50 percent of the $2,000 of separately stated expense items that would otherwise be unamortized at the end of 1989).

Example (6). Assume the same facts as in example (1), except that X, a personal service corporation as defined in section 441(i), is a partner of P1. X is a calendar year taxpayer, and thus is not required to change its taxable year under the 1986 Act. The same result occurs as in example 1 (*i.e.*, unless X elects to the contrary, X is required to include one fourth of its share of income and expense items from P1's year of change in the first four taxable years of X beginning with the 1987 taxable year).

Example (7). Assume the same facts as in example (6), except that X is a fiscal year personal service corporation with a taxable year ending September 30. X is required under the 1986 Act to change to a calendar year for its taxable year beginning October 1, 1987, and to file a return for its short year ending December 31, 1987. Based on the above facts, X is not required to include the items from more than one taxable year of P1 in any one taxable year of X. Thus, the provisions of this section do not apply to X, and X is required to include the full amount of income and expense items from P1's year of change in X's taxable income for X's short year ending December 31. Under section 443

of the Code, X is required to annualize the taxable income for its short year ending December 31, 1987.

Example (9). Assume that P2 is a partnership with a taxable year ending September 30. Under the 1986 Act, P2 would have been required to change its taxable year to a calendar year, effective for the taxable year beginning October 1, 1987. However, P2 properly changed its taxable year to a calendar year for the year beginning October 1, 1986, and filed a return for the short period ending December 31, 1986. The provisions of the 1986 Act do not apply to P2 because the short year ending December 31, 1986, was not required by the amendments made by section 806 of the 1986 Act. Thus, the partners of P2 are required to take all items of income and expense for the short taxable year ending December 31, 1986, into account for the taxable year with or within which such short year ends.

Example (9). Assume that P3 is a partnership with a taxable year ending March 31 and I, a calendar year individual, is a partner in P3. Under the 1986 Act, P3 would have been required to change its taxable year to a calendar year. However, under Rev. Proc. 87–32, P3 establishes and changes to a natural business year beginning with the taxable year ending June 30, 1987. Thus, P3 is required to change its taxable year under section 806 of the 1986 Act, and I is required to include items from more than one taxable year of P3 in one of her taxable years. Furthermore, I's share of P3's income items exceeds her share of P3's expense items for the short period April 1, 1987 through June 30, 1987. Accordingly, under this section, unless I elects to the contrary, I is required to take one fourth of her share of items of income and expense from P3's short taxable year ending June 30, 1987 into account for her taxable year ending December 31, 1987.

Example (10). Assume that P4 is a partnership with a taxable year ending March 31. Y, a C corporation, owns a 51 percent interest in the profits and capital of P4. Y reports its income on the basis of a taxable year ending March 31. P4 establishes and changes to a natural business year beginning with the taxable year ending June 30, 1987, under Rev. Proc. 87–32. Under the above facts, P4 is not required to change its taxable year because its March 31 taxable year was the taxable year of Y, the partner owning a majority of the partnership's profits and capital. Therefore, the remaining partners of P4 owning 49 percent of the profits and capital are not permitted the 4-year spread of the items of income and expense with respect to the short year, even though they may be required to include their distributive share of P4's items from more than one taxable year in one of their years.

Example (11). Assume that X and Y are C corporations with taxable years ending June 30. Each owns a 50-percent interest in the profits and capital of partnership P5. P5 has a taxable year ending March 31. Assume that P5 cannot establish a business purpose in order to retain a taxable year ending March 31, and thus P5 must change to a June 30 taxable year, the taxable year of its partners. Furthermore, assume that X's share of P5's income items exceeds its share of P5's expense items for P5's short taxable year ending June 30, 1987. Unless X elects out of the 4-year spread, the taxable year ending June 30, 1987, is the first of the four taxable years in which X must take into account its share of the items of income and expense resulting from P5's short taxable year ending June 30, 1987.

Example (12). Assume that I, an individual who reports income on the basis of the calendar year, is a partner in two partnerships, P6 and P7. Both partnerships have a taxable year ending September 30. Neither partnership can establish a business purpose for retaining its taxable year. Consequently, each partnership will change its taxable year to December 31, for the taxable year beginning October 1, 1987. The election to avoid a 4-year spread is made at the partner level; in addition, a partner may make such elections on a partnership-by-partnership basis. Thus, assuming I is eligible to obtain the 4-year spread with respect to income and expense items from partnerships P6 and P7, I may use the 4-year spread with respect to items from P6, while not using the 4-year spread with respect to items from P7.

Example (13). I, an individual taxpayer using a calendar year, owns an interest in P8, a partnership using a taxable year ending June 30. Furthermore, P8 owns an interest in P9, a partnership with a taxable year ending March 31. Under section 806 of the 1986 Act, P8 will be required to change to a taxable year ending December 31, while P9 will be required to change to a taxable year ending June 30. As a result, P8's year of change will be July 1 through December 31, 1987, while P9's year of change will be from April 1 through June 30, 1987. Since P9's year of change does not end with or within P8's year of change, paragraph (d)(2) of this section does not prevent P8 from obtaining a 4-year spread with respect to its interest in P9.

Example (14). The facts are the same as in example (13), except that P9 has a taxable year ending September 30, and under the 1986 Act P9 is required to change to a taxable year ending December 31. Therefore, P9's year of change will be from October 1, 1987 through December 31, 1987. Although P8's year of change from July 1, 1987 through December 31, 1987 includes two taxable years of P9 (*i.e.*, October 1, 1986 through September 30, 1987 and October 1, 1987 through December 31, 1987), paragraph (d)(2) of this section prohibits P8 from using the 4-year spread with respect to its interest in P9, because P9's year of change ends with or within P8's year of change.

PART 18—[AMENDED]

Par. 7. The authority for Part 18 continues to read in part:

Authority: 26 U.S.C. 7805. * * *

§§ 18.1366–1 through § 18.1366–4 [Reserved].

Par. 8. Sections 18.1366–1, 2, 3 and 4 are added and reserved and § 18.1366–5 is added in the appropriate place.

§ 18.1366–5 4-year spread.

(a) *Applicability.* This section applies to a shareholder in an S corporation if—

(1) The S corporation is required by section 806 of the Tax Reform Act of 1986 (the 1986 Act), Pub. L. 99–514, 100 Stat. 2362, to change its taxable year for the first taxable year beginning after December 31, 1986 (S corporation's year of change);

(2) As a result of such change in taxable year, items from more than one taxable year of the S corporation would, but for the provisions of this section, be included in the taxable year of the shareholder with or within which the S corporation's year of change ends; and

(3) The corporation was an S corporation for a taxable year beginning in 1986.

(b) *Shareholder's treatment of items from the S corporation's year of change*—(1) *In general.* Except as provided in paragraph (c) of this section, if a shareholder's share of "income items" exceeds the shareholder's share of "expense items," the shareholder's share of each and every income and expense item shall be taken into account ratably (and retain its character) over the shareholder's first 4 taxable years beginning with the shareholder's taxable year with or within which the S corporation's year of change ends.

(2) *Definitions*—(i) *Income items.* For purposes of this section, the term "income items" means the sum of—

(A) The shareholder's pro rata share of the nonseparately computed income from the S corporation's year of change, and

(B) The shareholder's pro rata share of the items of income (including tax-exempt income), from the S corporation's year of change, the separate treatment of which items of income could affect the liability for tax of any shareholder.

(i) *Expense items.* For purposes of this section, the term "expense items" means the sum of—

(A) The shareholder's pro rata share of the nonseparately computed loss from the S corporation's year of change, and

(B) The shareholder's pro rata share of the items of loss and deduction from the S corporation's year of change, the separate treatment of which items of loss and deduction could affect the liability for tax of any shareholder.

(c) *Electing out of 4-year spread.* A shareholder may elect out of the rules of paragraph (b) of this section by meeting the requirements of § 5h.5 (temporary regulations relating to elections under the Tax Reform Act of 1986).

(d) *Basis of shareholder's interest.* The basis of a shareholder's interest in an S corporation shall be determined as if the S corporation shareholder elected not to spread the partnership items over

4 years, regardless of whether such election was in fact made. Thus, for example, if an S corporation shareholder is eligible for the 4-year spread and does not elect out of the 4-year spread pursuant to paragraph (c) of this section, the shareholder's basis in the S corporation interest will be increased in the first year of the 4-year spread period by an amount equal to the excess of the income items over the expense items. However, the shareholder's basis will not be increased again, with respect to the unamortized income and expense items, as they are amortized over the 4-year spread period.

(e) *Effect on other provisions of the Code.* Except as provided in paragraph (d) of this section, determinations with respect to a shareholder, for purposes of other provisions of the Code, must be made with regard to the manner in which S corporation items are taken into account under the rules of this section. Thus, for example, a shareholder who does not elect out of the 4-year spread must take into account, for purposes of determining his or her charitable contribution deduction limitations for a taxable year, only the ratable portion of S corporation items for that taxable year.

(f) *Treatment of dispositions*—(1) *In general.* If S corporation stock is disposed of before the last taxable year in the 4-year spread period, unamortized income and expense items that are attributable to the interest disposed of and that would be taken into account by the shareholder for subsequent taxable years in the 4-year spread period shall be taken into account by the shareholder as determined under paragraph (f)(2) of this section. For purposes of this section, the term "disposed of" means any transfer, including (but not limited to) transfers by sale, exchange, gift, and by reason of death.

(2) *Year unamortized items taken into account*—(i) *In general.* If, at the end of a shareholder's taxable year, the fraction determined under paragraph (f)(3)(ii) of this section is—

(A) Greater than ⅔, the shareholder must continue to take the unamortized income and expense items into account ratably over the 4-year spread period;

(B) Greater than ⅓ but less than or equal to ⅔, the shareholder must, in addition to its ratable amortization, take into account in such year 50 percent of the income and expense items that would otherwise be unamortized at the end of such year (however, this paragraph (f)(2)(i)(B) is only applied once with respect to an S shareholder's interest in a particular S corporation); or

(C) Less than or equal to ⅓, the shareholder must take into account the entire balance of unamortized income and expense items in such year.

(ii) *Determination of fraction.* For purposes of paragraph (f)(2)(i) of this section, the numerator of the fraction is the shareholder's proportionate interest in the S corporation at the end of the shareholder's taxable year and the denominator is the shareholder's proportionate interest in the S corporation as of the last day of the S corporation's year of change.

(g) *Examples.* The provisions of this section may be illustrated by the following examples.

Example (1). Assume that S1, an S corporation with a taxable year ending September 30, is required by the 1986 Act to change its taxable year to a calendar year. All of the shareholders of S1 are individual taxpayers reporting on a calendar year. S1 is required to change to a calendar year for its taxable year beginning October 1, 1987, and to file a return for the short taxable year ending December 31, 1987. Based on the above facts, the shareholders of S1 are required to include the items from more than one taxable year of S1 in income for their 1987 taxable year. Thus, under paragraph (b) of this section, if a shareholder's share of income items exceeds the shareholder's share of expense items, the shareholder's share of each and every income and expense item shall be taken into account ratably by such shareholdler in each of the shareholder's first four taxable years beginning with the shareholder's 1987 taxable year, unless such shareholder elects under paragraph (c) of this section to include all such amounts in his 1987 taxable year.

Example (2). Assume the same facts as in example (1), except S1 is a personal service corporation with all of its employee-owners reporting on a calendar year. Although S1 is required to change to a calendar year for its taxable year beginning October 1, 1987, neither S1 nor its employee-owners obtain the benefits of a 4-year spread. Pursuant to section 806(e)(2)(C) of the 1986 Act, the 4-year spread provision is only applicable to short taxable years of partnerships and S corporations required to change their taxable year under the 1986 Act.

Example (3). Assume the same facts as example (1) and that I is one of the individual shareholders of S1. Further assume that I's share of the nonseparately computed income from S1's taxable income for the short taxable year ended December 31, 1987 (*i.e.*, S1's year of change) is $10,000. In addition, I has $8,000 of nonseparately computed loss from S1's year of change. Since I's income items (*i.e.*, $10,000 of taxable income) exceed I's expense items (*i.e.*, $8,000 of loss) attributable to S1's year of change, I is eligible for the 4-year spread provided by this section. If I does not elect out of the 4-year spread, I will recognize $2,500 of taxable income and $2,000 of loss in his 1987 calendar year return. Assuming I does not dispose of his S corporation interest in S1 by December 31, 1988, the remaining $7,500 of taxable income and $6,000 of loss will be amortized (and retain its character) over I's next three taxable years (*i.e.*, 1988, 1989 and 1990).

Example (4). Assume the same facts as in example (3), except that I disposes of his entire interest in S1 during 1988. Pursuant to paragraph (f) of this section, I would recognize $7,500 of taxable income and $6,000 of loss in his 1988 calendar year return.

Example (5). Assume the same facts as in example (3), except that I disposes of 50 percent of his stock in S1 during 1988. Pursuant to paragraph (f) of this section, I would recognize $3,750 of taxable income in his 1988 calendar year return ($2,500 ratable portion for 1988 plus 50 percent of the $2,500 of income items that would otherwise be unamortized at the end of 1988). I would also recognize $3,000 of separately stated expense items in 1988 ($2,000 ratable portion for 1988 plus 50 percent of the $2,000 of separately stated expense items that would otherwise be unamortized at the end of 1988).

Example (6). Assume that S2 is an S corporation with a taxable year ending September 30. Under the 1986 Act, S2 would have been required to change its taxable year to a calendar year, effective for the taxable year beginning October 1, 1987. However, S2 properly changed its taxable year to a calendar year for the year beginning October 1, 1986, and filed a return for the short period ending December 31, 1986. The provisions of the Act do not apply to S2 because the short year ending December 31, 1986 was not required by the amendments made by section 806 of the 1986 Act. Thus, the shareholders of S2 are required to take all items of income and expense for the short taxable year ending December 31, 1986, into account for the taxable year with or within which such short year ends.

Example (7). Assume that S3 is an S corporation with a taxable year ending March 31 and I, a calendar year individual, is a shareholder in S3. Under the 1986 Act, S3 would have been required to change its taxable year to a calendar year. However, under Rev. Proc. 87–32, S3 establishes and changes to a natural business year beginning with the taxable year ending June 30, 1987. Thus, S3 is required to change its taxable year under section 806 of the 1986 Act, and I is required to include items from more than one taxable year of S3 in one of her taxable years. Furthermore, I's share of S3's income items exceeds her share of S3's expense items for the short period April 1, 1987 through June 30, 1987. Accordingly, under this section, unless I elects to the contrary, I is required to take one-fourth of her share of items of income and expense from S3's short taxable year ending June 30, 1987, into account for her taxable year ending December 31, 1987.

Example (8). Assume that S4 is an S corporation with a taxable year ending March 31. I, an individual, owns 51 percent of the stock of S4. I reports her income on the basis of a taxable year ending March 31. S4 establishes and changes to a natural business year beginning with the taxable year ending June 30, 1987, under Rev. Proc. 87–32. Under the above facts, S4 is not required to change its taxable year because its March 31 taxable

year is allowed pursuant to Rev. Proc. 87–32. Therefore, the remaining shareholders of S4 owning 49 percent of the stock are not permitted the 4-year spread of the items of income and expense with respect to the short year, even if they are required to include their share of S4's items of income and expense from more than one taxable year in one of their years.

Example (9). Assume that C and D are individuals with a taxable year ending June 30. Each owns 50 percent of the stock of corporation S5, an S corporation. S5 has a taxable year ending March 31. S5 cannot establish a business purpose in order to retain a taxable year ending March 31, and thus S5 must change to either a calendar year or a June 30 taxable year (the taxable year of more than 50 percent of its shareholders). Assume that S5 changes to a June 30 taxable year. Furthermore, assume that C's share of S5's income items exceeds C's share of S5's expense items for S5's short taxable year ending June 30, 1987. Unless C elects out of the four-year spread, C's taxable year ending June 30, 1987, is the first of the four taxable years in which C must take into account its share of the items of income and expense resulting from S5's short taxable year ending June 30, 1987.

Example (10). Assume that I, an individual who reports income on the basis of the calendar year, is a shareholder in two S corporations, S8 and S7. Both S corporations have a taxable year ending September 30. Neither S corporation can establish a business purpose for retaining its taxable year. Consequently, each S corporation will change its taxable year to December 31, for the taxable year beginning October 1, 1987. The election to avoid a 4-year spread is made at the shareholder level; in addition, a shareholder may make such elections on an S corporation-by-S corporation basis. Thus, assuming I is eligible to obtain the 4-year spread with respect to income and expense items from S corporations S6 and S7, I may use the 4-year spread with respect to items from S6, while not using the 4-year spread with respect to items from S7.

Example (11). Corporation S8 elected subchapter S status for its taxable year beginning July 1, 1986 and had a short taxable year for the period July 1 through December 31, 1986. S8's shareholders use a calendar year. The shareholders of S8 are not entitled to a 4-year spread with respect to S8's short taxable year ended December 31, 1986, because (a) S8 was not required to change its taxable year for the first taxable year beginning after December 31, 1986, and (b) S8's shareholders did not have items from more than one taxable year of S8 included in their 1986 taxable year.

Example (12). The facts are the same as in example (12), except S8 elected subchapter S status for its taxable year beginning July 1, 1987 and will have a short taxable year for the period July 1 to December 31, 1987. The shareholders of S8 are not entitled to a 4-year spread with respect to S8's short taxable year ended December 31, 1987, because (a) S8's shareholders did not have items from more than one taxable year of S8 included in their 1987 return, and (b) S6 was not an S corporation for a taxable year beginning in 1986.

There is need for immediate guidance with respect to the provisions contained in this Treasury decision. For this reason it is impracticable to issue the Treasury decision with notice and public procedure under subsection (b) of section 553 of Title 5 of the United States Code or subject to the effective date limitation of subsection (d) of that section.

Lawrence B. Gibbs,

Commissioner of Internal Revenue.

Approved: December 16, 1987.

O. Donaldson Chapoton,

Assistant Secretary of the Treasury.

BILLING CODE 4830-01-M

NATIONAL LABOR RELATIONS BOARD

29 CFR Part 103

Election Procedures

AGENCY: National Labor Relations Board.

ACTION: Clarification of the Supplementary Information statement to the final rule.

SUMMARY: This revision eliminates the suggested informal procedure whereby the Board's Regional Offices would orally remind employers of their notice-posting obligations and substitutes in place thereof a second written notice to employers. It also clarifies the procedure by specifically indicating that failure of a Board agent to so notify will constitute neither grounds for an election objection nor a defense thereto.

EFFECTIVE DATE: December 23, 1987.

FOR FURTHER INFORMATION CONTACT: John C. Truesdale, Executive Secretary, 1717 Pennsylvania Avenue NW., Room 701, Washington, DC 20570, Telephone: (202) 254–9430.

SUPPLEMENTARY INFORMATION: On July 6, 1987, a final rule was published in the **Federal Register** (52 FR 25213–25215) wherein the Board amended its rules to include a provision requiring employers to post a notice of election 3 full working days before an election is conducted.

The Supplementary Information accompanying the final rule stated that the Regional Offices would provide both a written notification to the employer of its notice-posting obligations and an oral reminder. It was anticipated that the written notice would be accomplished by amending the cover letter accompanying the service of an election petition to refer specifically to the employer's notice-posting obligations. Thereafter, the Board agent was to orally remind the employer of the notice-posting rule shortly before the notices were mailed and to indicate such reminder by initialing the Election Order Sheet (Form 706).

Upon further consideration, the Board has decided that a second written notification to the employer, rather than an oral reminder, is a preferable way to apprise employers of their notice-posting obligations. Accordingly, instead of giving an oral reminder, Board Regional Offices will undertake to send out a second written reminder of the notice-posting requirement by attaching a copy of the rule to the Decision and Direction of Election or the approved election agreement at the time these documents are mailed to the employer. For those Regions which send a cover letter with the Decision or election agreement, the letter may be amended to include a reference to the attachment. In those instances where it is unnecessary to mail an election agreement, as the parties have already been given a copy of the agreement at the Regional Office, the Region may mail (or otherwise provide) a copy of the rule to the employer as a separate document.

This second reminder, sent at the time of the Decision and Direction of Election or election agreement, together with the first written notification given in the cover letter accompanying the service of the election petition, will help ensure that employers are reminded of their notice-posting obligations. The Board wishes to clarify, however, that both of these reminders are merely an effort by the Board to keep employers apprised of their obligations under the notice-posting rule and in no event will the failure of the Board or its agents to provide such notice be the basis for an election objection or constitute a defense to an election objection based on an employer's failure to post election notices or otherwise perform its obligations as set forth in the Board's rule. The rule itself is not amended or changed in any way by this revision to the Supplementary Information.

Dated, Washington, DC, December 18, 1987.

By direction of the Board.

National Labor Relations Board.

John C. Truesdale,

Executive Secretary.

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[Region II Docket No. 79; FRL–3289–1]

Approval and Promulgation of Implementation Plans; Revision to the State of New Jersey Implementation Plan for Lead

AGENCY: Environmental Protection Agency.

ACTION: Final rule.

SUMMARY: This notice announces that the Environmental Protection Agency is approving a revision to the New Jersey State Implementation Plan (SIP) for lead. This revision consists of material prepared by the New Jersey Department of Environmental Protection (NJDEP) pursuant to a SIP commitment to conduct studies and implement appropriate actions to maintain the ambient air quality standard for lead in the vicinity of two facilities: Delco Remy in New Brunswick and Heubach Inc. in Newark. Among the actions approved are specific revised emission limitations for Delco Remy and Heubach.

DATES: This action will be effective January 22, 1988.

ADDRESSES. Copies of the SIP revision are available at the following addresses for inspection during normal business hours:

Environmental Protection Agency, Region II Office, Air Programs Branch, Room 1005, 26 Federal Plaza, New York, New York 10278

Public Information Reference Unit, Environmental Protection Agency, 401 M Street SW., Washington, DC 20460

New Jersey Department of Environmental Protection, Division of Environmental Quality, 401 East State Street, Trenton, New Jersey 08625

FOR FURTHER INFORMATION CONTACT: William S. Baker, Chief, Air Programs Branch, Environmental Protection Agency, Room 1005, 26 Federal Plaza, New York, New York 10278, (212) 264–2517.

SUPPLEMENTARY INFORMATION:

Background

On November 25, 1986 (51 FR 42565) the Environmental Protection Agency (EPA) approved (with the exception of one small geographic area) the New Jersey State Implementation Plan (SIP) for the attainment and maintenance of the national ambient air quality standard for lead. As a part of its control strategy, the State committed in its SIP to conduct studies of lead emissions in the vicinity of facilities owned by Delco Remy (New Brunswick) and Heubach (Newark) and to implement appropriate actions to maintain the standard in both areas. These studies, known as "reasonably available control technology (RACT)-plus" studies, were designed to determine what control measures in addition to RACT, if any, were needed to attain and maintain the ambient standard for lead.

The State Submittal

To meet its SIP commitment, on December 1, 1986 the State of New Jersey sent EPA a draft SIP revision for Delco Remy and Heubach and requested that EPA conduct its approval process concurrent with the State's.

Following this, New Jersey published in the March 2, 1987 issue of the *New Jersey Register* a public announcement requesting comments on this SIP submittal. The State received no comments and, on May 8, 1987, informed EPA that its December 1, 1986 submittal should be considered final. As a result, on May 14, 1987 (52 FR 18244) EPA published a **Federal Register** notice proposing approval of New Jersey's submittal. No comments were received on this notice. Today's action finalizes EPA's May 14 proposal. As such, it only discusses the adequacy and approvability of the New Jersey lead SIP with respect to the Delco Remy and Heubach facilities.

The specific revision submitted by the New Jersey Department of Environmental Protection (NJDEP) and the results of EPA's review are discussed as follows:

NJDEP submitted to EPA its "RACT-plus" study report on Heubach in February 1986 and on Delco Remy in June 1986. The reports conclude that stack test emission rates were less than the allowable emission rate under existing emission limitations, predicted concentrations from dispersion modeling of actual stack and fugitive emissions were below the lead standard, and monitored ambient lead concentrations near the facilities are below the ambient lead standard. However, for maintenance of the ambient standard for lead, NJDEP has revised the facilities' operating permits to reflect only the lower, current actual lead emission rates at these facilities. For the Delco Remy facility, the permits were revised to specify an overall allowable emission reduction of sixty percent and, for the Heubach facility, an overall reduction of eighty percent. EPA finds that these lower allowable emissions limits for these two facilities will insure continued maintenance of the lead standard at these locations. These permits are already in effect and both Delco Remy and Heubach are in compliance with the revised emission limits. NJDEP will continue to monitor the air in the vicinity of the two facilities. This will be done at least until the end of September 1988, or until such time that NJDEP and EPA mutually agree that ambient monitoring is no longer necessary.

Conclusion

EPA is approving the revision pertaining to the Delco Remy and Heubach facilities as a part of the New Jersey SIP. Today's action expressly incorporates the lead emission limitations in the State permits for Delco Remy and Heubach into the SIP for the State of New Jersey. Such limitations presented in Table A of today's notice may only be revised by appropriate procedures under the Clean Air Act. This revision has been found to fulfill the commitment made by New Jersey in its lead SIP to study the facilities and to implement additional control measures, if necessary.

TABLE A.—REVISED ALLOWABLE EMISSION LIMITS CONTAINED IN PERMITS

NJ Stack No.	Allowable lead emission rate (lbs/hr)
Delco Remy:	
005	0.050
006	.150
009	.160
014	.150

035	.002
036	.008

This notice is issued as required by section 110 of the Clean Air Act, as amended. The Administrator's decision regarding the approval of this plan revision is based on its meeting the requirements of section 110 of the Clean Air Act and 40 CFR Part 51.

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

Under section 307(b)(1) of the Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit within 60 days of publication. This action may not be challenged later in proceedings to enforce its requirements (See section 307(b)(2)).

List of Subjects in 40 CFR Part 52

Air pollution control, Lead, Incorporation by reference.

Note:—Incorporation by reference of the State Implementation Plan for the State of New Jersey was approved by the Director of the Federal Register on July 1, 1982.

Date: September 29, 1987.

Lee M. Thomas,

Administrator, Environmental Protection Agency.

Title 40, Chapter I, Subchapter C, Part 52, Code of Federal Regulations is amended as follows:

PART 52—APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

Subpart FF—New Jersey

1. The authority citation for Part 52 continues to read as follows:

Authority: 42 U.S.C. 7401–7642.

2. Section 52.1570 is amended by adding new paragraph (c)(41) to read as follows:

§ 52.1570 Identification of plan.

* * * * *

(c) * * *

(41) A revision to the New Jersey State Implementation Plan (SIP) for lead was submitted on December 1, 1986, by the New Jersey Department of Environmental Protection.

(i) Incorporated by reference:

(A) The following operating permit amendments for the Delco Remy facility in New Brunswick:

Permit amendment numbers	Permit amendment dates
286–1166 through 286–1184.	All permits effective 9/24/86.

(B) The following operating permit amendments for the Heubach Inc. facility in Newark:

Permit amendment numbers	Permit amendment dates
286–0523 through 286–0531.	All permits effective 4/30/86.
286–0266, 286–0267, 286–0269, 286–0290.	All permits effective 2/26/86.

(ii) Additional material:

(A) Technical documentation of ambient modeling and monitoring for lead in the vicinity of Delco Remy, New Brunswick.

(B) Technical documentation of ambient modeling and monitoring for lead in the vicinity of Heubach Inc., Newark.

[FR Doc. 87–29900 Filed 12–22–87; 8:45 am]

BILLING CODE 6560–50–M

40 CFR Part 180

[OPP–00251; FRL–3305–3]

Pesticide Tolerances for Benomyl; Technical Amendment and Correction

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule; technical amendment and correction.

SUMMARY: This technical amendment clarifies duplicative amendatory language in an amendment to 40 CFR 180.294 by setting out the section in its entirety. No new regulatory requirements are added. Also, a correction of a typographical error is made in the entry for rutabagas in § 180.294(a).

EFFECTIVE DATE: December 23, 1987.

FOR FURTHER INFORMATION CONTACT: Hoyt Jamerson, Emergency Response and Minor Use Section (TS–767C), Registration Division, Environmental Protection Agency, 401 M Street SW., Washington, DC 20460.

Office location and telephone number: Rm. 716H, CM #2, 1921 Jefferson Davis Highway, Arlington, VA 22202, (703)–557–2310.

SUPPLEMENTARY INFORMATION: In the **Federal Register** of September 2, 1987 (52 FR 33238), EPA amended 40 CFR 180.294 by designating the existing text as paragraph (a) and adding a new paragraph (b). In the **Federal Register** of October 7, 1987 (52 FR 37454), EPA amended 40 CFR 180.294 to add a commodity, watercress, to paragraph (b). The second amendment, which appeared as item 3 on page 37454, inadvertently repeated components of the amendment of September 2, 1987; 52 FR 33238, i.e., designating the existing text as paragraph (a) and adding new paragraph (b): This technical amendment clarifies § 180.294 by republishing it. No new regulatory requirements are being set forth, and advance notice and public comment are not necessary.

In addition, the entry for rutabagas in § 180.294(a) is corrected to read 0.2. The preamble to the rule published in the **Federal Register** of November 12, 1981 (46 FR 55693), which added the entry, specifies that the tolerance is 0.2, but a typographical error caused it to be listed as 0. in the table to § 180.294 (46 FR 55695). This document corrects that typographical error.

List of Subjects in 40 CFR Part 180

Administrative practice and procedure, Agricultural commodities, Pesticides and pests, Reporting and recordkeeping requirements.

Dated: December 16, 1987.

Douglas D. Campt,

Director, Office of Pesticide Programs.

Therefore, Part 180 is amended as follows:

PART 180—[AMENDED]

1. The authority citation continues to read as follows:

Authority: 21 U.S.C. 346a.

2. Section 180.294 is revised in its entirety, to read as follows:

§ 180.294 Benomyl; tolerances for residues.

(a) Tolerances are established for the combined residues of the fungicide benomyl (methyl 1-(butylcarbamoyl)-2-benzimidazolecarbamate) and its metabolites containing the benzimidazole moiety (calculated as benomyl) in or on the following raw agricultural commodities:

Commodities	Parts per million
Almond hulls	1.0
Apples (pre- and post-H)	7.0
Apricots (pre- and post-H)	15.0
Avocados	3.0
Bananas (pre- and post-H): (NMT 0.2 ppm (N) shall be present in the pulp after peel is removed and discarded)	1.0
Barley, grain	0.2
Barley, straw	0.2
Beans	2.0
Bean vine forage	50.0
Beets, sugar, roots	0.2
Beets, sugar, tops	15.0
Blackberries	7.0
Blueberries	7.0
Boysenberries	7.0
Broccoli	0.2
Brussels sprouts	15.0
Cabbage	0.2
Carrots	0.2
Cattle, fat	0.1
Cattle, meat	0.1
Cattle, mbyp	0.1
Cauliflower	0.2
Celery	3.0
Cherries (pre- and post-H)	15.0
Chinese cabbage	15.0
Citrus fruit (pre-and post-H)	15.0
Collards	0.2
Corn, fresh (inc. sweet K+CWHR)	0.2
Corn, sweet, fodder and forage	0.2
Cucumbers	1.0
Currants	7.0
Dandelions	10.0
Dewberries	7.0
Eggplants	0.2
Eggs	0.1
Garlic	0.2
Goats, fat	0.1
Goats, meat	0.1
Goats, mybp	0.1
Grapes	10.0
Hogs, fat	0.1
Hogs, meat	0.1
Hogs, mbyp	0.1
Horses, fat	0.1
Horses, meat	0.1
Horses, mbyp	0.1
Kale	0.2
Kohlrabi	0.2
Kogerberries	7.0
Mangoes	5.0
Melon	1.0
Milk	0.1
Mushrooms (pre-and post-H)	10.0
Mustard greens	0.2
Nectarines (pre- and post-H)	15.0
Nuts	0.2 (N)
Oats, grain	0.2
Oats, straw	0.2
Papayas	5.0
Peaches (pre- and post-H)	15.0
Peanuts	0.2
Peanut forage	15.0
Peanut hay	14.0
Peanut hulls	5.0
Pears (pre-and post-H)	7.0
Peppers	0.2
Pineapples (post-H)	25.0
Plums (including fresh prunes) (pre- and post-H)	15.0
Poultry, fat	0.1
Poultry, liver	0.2
Poultry, meat	0.1
Poultry, mbyp	0.1
Pumpkins	1.0
Raspberries	7.0
Rice	5.0
Rice straw	15.0
Rutabagas	0.2
Rye, grain	0.2
Rye, straw	0.2
Sheep, fat	0.1
Sheep, meat	0.1
Sheep, mbyp	0.1
Soybeans	5.0
Spinach	0.2
Squash, summer	1.0
Squash, winter	1.0
Strawberries	5.0
Sweet potatoes	0.2
Tomatoes	5.0
Turnips, roots	0.2
Wheat, grain	0.2
Wheat, straw	15.0
Turnip greens	5.0
Watercress	10.0

(b) Tolerances with regional registration, as defined in § 180.1(n), are established for residues of the fungicide benomyl (methyl 1-[butylcarbamoyl]-2-benzimidazolecarbamate) and its metabolites containing the benzimidazole moiety (calculated as benomyl) in or on the raw agricultural commodities.

[FR Doc. 87–29367 Filed 12–22–87; 8:45 am]

BILLING CODE 6560–50–M

40 CFR Part 180

[PP 7E3467/R908; FRL–3305–7]

Pesticide Tolerance for Benomyl

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: This rule establishes a tolerance for residues of the fungicide benomyl in or on the raw agricultural commodity pistachios. The Interregional Research Project No. 4 (IR–4) petitioned for this tolerance.

EFFECTIVE DATE: December 23, 1987.

ADDRESS: Written objections, identified by the document control number, [PP 7E3467/R908], may be submitted to: Hearing Clerk (A–110), Environmental Protection Agency, Rm. 3708, 401 M St., SW., Washington, DC 20460.

FOR FURTHER INFORMATION CONTACT: By mail: Donald R. Stubbs, Emergency Response and Minor Use Section (TS–767C), Registration Division (TS–767C), Environmental Protection Agency, 401 M St., SW., Washington, DC 20460.

Office location and telephone number: Rm. 716H, CM #2, 1921 Jefferson Davis Highway, Arlington, VA 22202, (703)–557–1806.

SUPPLEMENTARY INFORMATION: EPA issued a proposed rule, published in the **Federal Register** of July 29, 1987 (52 FR 28313), in which it was announced that the Interregional Research Project No. 4 (IR–4), New Jersey Agricultural Experiment Station, P.O. Box 231, Rutgers University, New Brunswick, NY 08903, had submitted pesticide petition 7E3467 to EPA on behalf of Dr. Robert H. Kupelian, National Director, IR–4 Project, and the Agricultural Experiment Station of California.

The petition requested that the Administrator, pursuant to section 408(e) of the Federal Food, Drug, and Cosmetic Act, propose the establishment of a tolerance for the combined residues of the fungicide benomyl (methyl 1-[butylcarbamonyl]-2-benzimidazolecarbamate) and its metabolites containing the benzimidazole moiety (calculated as benomyl) in or on the raw agricultural commodity pistachios at 0.2 part per million (ppm). The petitioner proposed that this use of benomyl on pistachios be limited to California based on the geographical representation of the residue data submitted. Additional residue data will be required to expand the area of usage. Persons seeking geographically broader registration should contact the Agency's Registration Division at the address provided above.

There were no comments or requests for referral to an advisory committee received in response to the proposed rule.

The data submitted in the petition and all other relevant material have been evaluated and discussed in the proposed rule. Based on the data and information considered, the Agency concludes that the tolerance will protect the public health. Therefore, the tolerance is established as set forth below.

Any person adversely affected by this regulation may, within 30 days after publication of this document in the **Federal Register**, file written objections with the Hearing Clerk, at the address given above. Such objections should specify the provisions of the regulation deemed objectionable and the grounds for the objections. A hearing will be granted if the objections are supported by grounds legally sufficient to justify the relief sought.

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

Pursuant to the requirements of the Regulatory Flexibility Act (Pub. L. 96–354, 94 Stat. 1164, 5 U.S.C. 601–612), the Administrator has determined that regulations establishing new tolerances or raising tolerance levels or establishing exemptions from tolerance requirements do not have a significant economic impact on a substantial number of small entities. A certification statement to this effect was published in the **Federal Register** of May 4, 1981 (46 FR 24950).

List of Subjects in 40 CFR Part 180

Administrative practice and procedure, Agricultural commodities, Pesticides and pests, Reporting and recordkeeping requirements.

Dated: December 16, 1987.

Douglas D. Campt,

Director, Office of Pesticide Programs.

Therefore, 40 CFR Part 180 is amended as follows:

PART 180—[AMENDED]

1. The authority citation for Part 180 continues to read as follows:

Authority: 21 U.S.C. 346a.

2. Section 180.294 is amended by adding and alphabetically inserting the listing for the raw agricultural commodity pistachios in paragraph (b), to read as follows:

§ 180.294 Benomyl; tolerances for residues.

* * * * *

(b) * * *

Commodity	Parts per million
* * * * *	
Pistachios	0.2
* * * * *

40 CFR Part 180

[PP 4E3100/R925; FRL-3305-5]

Pesticide Tolerance for Fluazifop-Butyl

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: This rule establishes a tolerance for residues of the herbicide fluazifop-butyl in or on the raw agricultural commodity sweet potatoes. The Interregional Research Project No. 4 (IR-4) petitioned for this tolerance.

EFFECTIVE DATE: December 23, 1987.

ADDRESS: Written objections, identified by the document control number, [PP 4E3100/R925], may be submitted to: Hearing Clerk (A-110), Environmental Protection Agency, Rm. 3708, 401 M St., SW., Washington, DC 20460.

FOR FURTHER INFORMATION CONTACT: By mail: Hoyt Jamerson, Emergency Response and Minor Use Section (TS-767C), Registration Division (TS-767C), Environmental Protection Agency, 401 M St., SW., Washington, DC 20460.

Office location and telephone number: Rm. 716, CM #2, 1921 Jefferson Davis Highway, Arlington, VA 22202, (703)-557-2310.

SUPPLEMENTARY INFORMATION: EPA issued a proposed rule, published in the Federal Register of November 6, 1987 (52 FR 42684), in which it was announced that the Interregional Reearch Project No. 4 (IR-4), New Jersey Agricultural Experiment Station, P.O. Box 231, Rutgers University, New Brunswick, NJ 08903, had submitted pesticide petition 4E3100 to EPA on behalf of Dr. Robert H. Kupelian, National Director, IR-4 Project, and the Agricultural Experiment Stations of Florida, North Carolina, and Louisiana.

The petition requested that the Administrator, pursuant to section 408(e) of the Federal Food, Drug, and Cosmetic Act, propose the establishment of a tolerance for the residues of the herbicide [R]-2-[4-[[5-(trifluoromethyl-2-pyridinyl]oxy]phenoxy]propanoic acid (fluazifop), both free and conjugated, and of butyl [R]-2-[4-[[5-(trifluoromethyl)-2-pyridinyl]oxy]phenoxy]p ropanoate(fluazifop-P-butyl), all expressed as fluazifop, in or on the raw agricultural commodity sweet potatoes at 0.5 part per million (ppm).

There were no comments or requests for referral to an advisory committee received in response to the proposed rule.

The data submitted in the petition and all other relevant material have been evaluated and discussed in the proposed rule. Based on the data and information considered, the Agency concludes that the tolerance will protect the public health. Therefore, the tolerance is established as set forth below.

Any person adversely affected by this regulation may, within 30 days after publication of this document in the Federal Register, file written objections with the Hearing Clerk, at the address given above. Such objections should specify the provisions of the regulation deemed objectionable and the grounds for the objections. A hearing will be granted if the objections are supported by grounds legally sufficient to justify the relief sought.

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

Pursuant to the requirements of the Regulatory Flexibility Act (Pub. Pesticide Tolerance for N-(Mercaptomethyl) Phthalimide S- (O,O-Dimethyl Phosphorodithioate)

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: This rule establishes a tolerance for residues of the insecticide *N*-(mercaptomethyl) phthalimide *S*-(*O,O*-dimethyl phosphorodithioate) (referred to in this document as phosmet) and its oxygen analog in or on the raw agricultural commodity pistachios. The Interregional Research Project No. 4 (IR-4) petitioned for this tolerance.

EFFECTIVE DATE: December 23, 1987.

ADDRESS: Written objections, identified by the document control number, [PP 6E3425/R924], may be submitted to: Hearing Clerk (A-110), Environmental Protection Agency, Rm. 3708, 401 M Street SW., Washington, DC 20460.

FOR FURTHER INFORMATION CONTACT: By mail:

Donald R. Stubbs, Emergency Response and Minor Use Section (TS-767C), Registration Division (TS-767C), Environmental Protection Agency, 401 M Street SW., Washington, DC 20460.

Office location and telephone number: Rm. 716H, CM #2, 1921 Jefferson Davis Highway, Arlington, VA 22202, (703)-557-1806.

SUPPLEMENTARY INFORMATION: EPA issued a proposed rule, published in the Federal Register of November 6, 1987 (52 FR 42685), in which it was announced that the Interregional Research Project No. 4 (IR-4), New Jersey Agricultural Experiment Station, P.O. Box 231, Rutgers University, New Brunswick, NJ 08903, had submitted pesticide petition 6E3425 to EPA on behalf of Dr. Robert H. Kupelian, National Director, IR-4 Project, and the Agricultural Experiment Station of California.

The petition requested that the Administrator, pursuant to section 408(e) of the Federal Food, Drug, and Cosmetic Act, propose the establishment of a tolerance for cholinesterase-inhibiting residues of the insecticide phosmet and its oxygen analog *N*-(mercaptomethyl) phthalimide *S*-(*O,O*-dimethyl phosphorothioate in or on the raw agricultural commodity pistachios at 0.1 par per million (ppm).

The petitioner proposed that the use of phosmet on pistachios be limited to California based on the geographical representation of the residue data submitted. Additional residue data will be required to expand the area of usage. Persons seeking geographically broader registration should contact the Agency's Registration Division at the address provided above.

There were no comments or requests for referral to an advisory committee received in response to the proposed rule.

The data submitted in the petition and all other relevant material have been evaluated and discussed in the proposed rule. Based on the data and information considered, the Agency concludes that the tolerance will protect the public health. Therefore, the tolerance is established as set forth below.

Any person adversely affected by this regulation may, within 30 days after publication of this document in the Federal Register, file written objections with the Hearing Clerk, at the address given above. Such objections should specify the provisions of the regulation deemed objectionable and the grounds for the objections. A hearing will be granted if the objections are supported by grounds legally sufficient to justify the relief sought.

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

Pursuant to the requirements of the Regulatory Flexibility Act (Pub. L. 96-354, 94 Stat. 1164, 5 U.S.C. 601-612), the Administrator has determined that regulations establishing new tolerances or raising tolerance levels or establishing exemptions from tolerance requirements do not have a significant economic impact on a substantial number of small entities. A certification statement to this effect was published in the Federal Register of May 4, 1981 (46 FR 24950).

SUPPLEMENTARY INFORMATION: EPA issued a proposed rule, published in the Federal Register of June 3, 1987 (52 FR 20753), which announced that the Interregional Research Project No. 4 (IR-4), New Jersey Agricultural Experiment Station, P.O. Box 231, Rutgers University, New Brunswick, NJ 08903, had submitted pesticide petition 6E3360 to EPA on behalf of Dr. Robert H. Kupelian, National Director, IR-4 Project, and the Agricultural Experiment Stations of Georgia, Florida, North Carolina, Oklahoma, and Texas.

The petition requested that the Administrator, pursuant to section 408(e) of the Federal Food, Drug, and Cosmetic Act, propose the establishment of tolerances for the combined residues of the insecticide permethrin [(3-phenoxyphenyl)methyl-3-(2,2-dichloroethenyl)2-,2-dimethylcyclopropane carboxylate] and the sum of its metabolites 3-(2,2-dichloroethenyl)-2,2-dimethylcyclopropane carboxylic acid (DCVA) and (3-phenoxyphenyl) methanol (3-PBA) in or on the following raw agricultural commodities: collards and turnip greens at 20 parts per million (ppm) and turnip roots at 1 ppm.

There were no comments or requests for referral to an advisory committee

received in response to the proposed rule.

The data submitted in the petition and all other relevant material have been evaluated and discussed in the proposed rule. Based on the data and information considered, the Agency concludes that the tolerances will protect the public health. Therefore, the tolerances are established as set forth below.

Any person adversely affected by this regulation may, within 30 days after publication of this document in the **Federal Register**, file written objections with the Hearing Clerk, at the address given above. Such objections should specify the provisions of the regulation deemed objectionable and the grounds for the objections. A hearing will be granted if the objections are supported by grounds legally sufficient to justify the relief sought.

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

Pursuant to the requirements of the Regulatory Flexibility Act (Pub. L. 96–354, 94 Stat. 1164, 5 U.S.C. 601–612), the Administrator has determined that regulations establishing new tolerances or raising tolerance levels or establishing exemptions from tolerance requirements do not have a significant economic impact on a substantial number of small entities. A certification statement to this effect was published in the **Federal Register** of May 4, 1981 (46 FR 24950).

List of Subjects in 40 CFR Part 180

Administrative practice and procedure, Agricultural commodities, Pesticides and pests, Reporting and recordkeeping requirements.

Dated: December 10, 1987.

Douglas D. Campt,

Director, Office of Pesticide Programs.

Therefore, 40 CFR Part 180 is amended as follows:

PART 180—[AMENDED]

1. The authority citation for Part 180 continues to read as follows.

Authority: 21 U.S.C. 346a.

2. Section 180.378 is amended by adding new paragraph (d) to read as follows:

§ 180.378 Permethrin; tolerances for residues.

* * * * *

(d) Tolerances with regional registration, as defined in § 180.1(n), are established for residues of permethrin [(3-phenoxyphenyl)methyl-3-(2,2-dichloroethenyl)-2,2-dimethylcyclopropane carboxylate] and the sum of its metabolites 3-(2,2-dischloroethenyl(-2,2-dimethylcyclopropane carboxylic acid (DCVA) and (3-phenoxyphenyl)methanol (3-PBA) in or on the following raw agricultural commodities:

Commodities	Parts per million
Collards	20
Turnip greens	20
Turnip roots	1

GENERAL SERVICES ADMINISTRATION

41 CFR Part 101–38

[FPMR Temp. Reg. G–48, Supp. 1]

Federal Motor Vehicle Expenditure Control

AGENCY: Federal Supply Service, GSA.

ACTION: Temporary regulation.

SUMMARY: FPMR Temp. Reg. G–48, dated August 6, 1986, established policy, procedures, and reporting requirements concerning the implementation of Subtitle C—Federal Motor Vehicle Expenditure Control, Pub. L. 99–272, Consolidated Omnibus Budget Reconciliation Act of 1985. This supplement advises agencies that the performance of a study to consolidate agency-owned vehicles into the Interagency Fleet Management System (IFMS) will not satisfy the cost comparison study requirements of subparagraph 8d unless consolidation occurs. GSA will consider agency plans for the performance of studies required by subparagraph 8d prior to beginning new consolidation studies. This supplement also specifies that GSA, with the assistance of the using agencies, will conduct the studies comparing the cost of IFMS vehicles, including newly consolidated vehicles, with the cost of vehicles obtained from the commercial sector and other alternatives. These revisions require the owning agency to perform any cost comparison studies for its own vehicles. The revisions ensure that all vehicle resources are included in the cost comparison study process to determine the Government's most cost-effective and efficient motor vehicle fleet operation.

DATES: *Effective date:* December 23, 1987.

Expiration date: June 30, 1988.

Comment date: Comments must be received on or before January 29, 1988.

ADDRESS: Comments should be addressed to the General Services Administration (FBF), Washington, DC 20406.

FOR FURTHER INFORMATION CONTACT: Mr. William Rivers, Fleet Management Division (703) 557–1278.

SUPPLEMENTARY INFORMATION: The General Services Administration has determined that this is not a major rule for the purposes of E.O. 12291 of February 17, 1981, because it is not likely to result in an annual effect on the economy of $100 million or more; a major increase in cost to consumers or others; or significant adverse effects. Therefore, a Regulatory Impact Analysis has not been prepared. The General Services Administration has based all administrative decisions underlying this rule on adequate information concerning the need for, and the consequences of, this rule; has determined that the potential benefits to society from this rule outweigh the potential costs and has maximized the net benefits; and has chosen the alternative approach involving the least net cost to society.

List of Subjects in 41 CFR Part 101–38

Government property management, Motor vehicles.

PART 101–38—[AMENDED]

The authority citation for Part 101–38 continues to read as follows:

Authority: Sec. 205(c), 63 Stat. 390; 40 U.S.C. 486(c).

In 41 CFR Ch. 101, the following supplement to FPMR Temp. Reg. G–48 is added to the appendix at the end of Subchapter G to read as follows:

Federal Property Management Regulations, Temporary Regulation G–48, Supplement 1

December 14, 1987.

To: Heads of Federal agencies.

Subject: Federal motor vehicle expenditure control.

1. *Purpose.* This supplement amends FPMR Temporary Regulation G–48 to revise the requirements for conducting the cost comparison studies referenced in subparagraphs 8d and 9b and to add a new subparagraph 9f to specify a new General Services Administration (GSA) responsibility to perform cost comparison studies of Interagency Fleet Management System (IFMS) operations.

2. *Effective date.* This supplement is effective upon publication in the **Federal Register.**

3. *Expiration date.* This supplement expires June 30, 1988, unless sooner superseded or canceled.

4. *Explanation of changes.* a. Subpar. 8d is revised to remove the exception of agency vehicles which are being studied for consolidation into the IFMS and to add that GSA will perform the private sector cost comparison of agency vehicles provided from the IFMS as follows:

d. Each executive agency shall conduct or have conducted a comprehensive and detailed study to compare the agency's current motor vehicle operations with: (1) use of the IFMS, (2) contracting with a qualified private fleet management firm or other private contractor, and (3) use of any other means less costly to the Government. In performing a study, an agency shall consider all agency-owned and leased motor vehicles as defined in attachment A, with the exception of vehicles provided from the IFMS. The IFMS vehicles shall be compared with alternatives (2) and (3) above by GSA, as set forth in subpar. 9f, with the assistance of the agency if requested by GSA. Studies conducted pursuant to this subpar shall compare the full costs (accrual based, of the cost elements specified in attachment B), benefits, and feasibility of relying on the alternatives described above in (1), (2), and (3) if available, to meet the agency's fleet requirements. Agencies should consider the provisions of OMB Circular A–76, Performance of Commercial Activities, when performing the studies required by this subpar.

b. Subpar. 9b is revised to indicate that performance of a fleet consolidation study will not satisfy the comprehensive and detailed study requirements of subpar. 8d and to indicate that GSA will perform the cost comparsion study focusing on the private sector if consolidation occurs as follows:

b. GSA will continue to review and identify interagency opportunities for the consolidation of motor vehicles, related equipment, and facilities. GSA will also consolidate those functions relating to the administration and management of such vehicles, equipment, and facilities to reduce the size and cost of the Government's motor vehicle fleet in accordance with the provisions of section 211 of the Federal Property and Administrative Services Act, as amended (40 U.S.C. 491). Where one or more agencies request to consolidate their vehicles with the GSA IFMS fleet, either into an existing or new Fleet Management Center, and the action is mutually agreeable, the study process required by section 211 will be conducted by GSA and the requesting agencies. If consolidation would result in a cost savings, that action can be taken and GSA will perform the cost comparison segment focusing on the private sector, as set forth in subpar. 9f. Performance of a consolidation study will not exempt an agency from performing the other study segments of subpar. 8d unless consolidation occurs. In identifying consolidation opportunities, GSA will consider agency plans for the performance of studies required by subpar. 8d. At locations where an agency has scheduled the study required by subpar. 8d, that study shall take precedence over the performance of a section 211 consolidation study.

c. Subpar. 9f is added to indicate GSA will perform cost comparison studies focusing on the private sector for IFMS vehicles as follows:

f. GSA, with the assistance of the agencies utilizing IFMS vehicles, will conduct comprehensive and detailed studies to compare the full costs (accrual based, of the cost elements specified in attachment B) and benefits of the IFMS operations with the costs, benefits, and feasibility of entering into contracts with qualified private fleet management firms, other private contractors, or any other means less costly to the Government, if available, to meet its fleet requirements. The performance of these studies should consider the provisions of OMB Circular A–76.

5. *Comments.* Comments or inquiries concerning the impact of this regulation should be submitted to the General Services Administration (FBF), Washington, DC 20406, not later than January 29, 1988, for consideration and possible incorporation into a permanent regulation.

T.C. Golden,

Administrator of General Services.

BILLING CODE 6820-34-M

Proposed Rules

Federal Register
Vol. 52, No. 246
Wednesday, December 23, 1987

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 86-ASW-39]

Airworthiness Directives; Hercules; Lenair Corporation; Smith Helicopters; and West Coast Fabrications; Model UH-1E, UH-1L, and TH-1L Helicopters

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This notice proposes to adopt an airworthiness directive (AD) that would require repetitive inspections and impose a maximum service life on certain rod end bearing assemblies in the flight control system on Model UH-1E, UH-1L, and TH-1L helicopters (modified by Hercules; Lenair Corporation; Smith Helicopters; and West Coast Fabrications).

The proposed AD is needed to preclude possible failure of the main rotor assembly and possible loss of the helicopter.

DATES: Comments must be received on or before February 1, 1988.

ADDRESSES: Comments on the proposal may be mailed in duplicate to: Office of the Regional Counsel, FAA, Southwest Region, Forth Worth, Texas 76193-0007, or delivered in duplicate to: Office of the Regional Counsel, FAA Southwest Region, Room 158, Building 3B, 4400 Blue Mound Road, Fort Worth, Texas. Comments delivered must be marked: Docket No. 86-ASW-39. Comments may be inspected in Room 158, Building 3B, Office of the Regional Counsel, Southwest Region, between 8 a.m. and 4 p.m., weekdays, except Federal holidays.

FOR FURTHER INFORMATION CONTACT: Mr. Tom Henry, Helicopter Certification Branch, ASW-170, Federal Aviation Administration, Fort Worth, Texas 76193-0170, telephone (817) 624-5166.

SUPPLEMENTARY INFORMATION: Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications should identify the regulatory docket number and be submitted in duplicate to the address specified above. All communications received on or before the closing date for comments will be considered by the Director before taking action on the proposed rule. The proposal contained in this notice may be changed in light of comments.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposed rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket, Office of the Regional Counsel, 4400 Blue Mound Road, Fort Worth, Texas, for examination by interested persons. A report summarizing each FAA-public contact, concerned with the substance of the proposed AD, will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this notice must submit a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket No. 86-ASW-39." The postcare will be date/time stamped and returned to the commenter.

The U.S. military has ordered corrective actions on certain rod end bearings on their "Cobra" and "Huey" series helicopters. A few aircraft from the affected models have been certified under subparagraph 21.25(a)(2) of the Federal Aviation Regulations as civil, restricted category helicopters.

The FAA was informed by U.S. Army Aviation System Command Message 142140Z, November 1986, that the Army had ordered the reduction in service life of rod end bearing assemblies on military AH-1, TH-1, UH-1C, and UH-1H helicopters from 1650 to 600 hours' time in service. A rod end bearing assembly, Bell Helicopter Textron, Inc. (BHTI) Part Number (P/N) 204-076-428-5, on an AH-1 helicopter failed in fatigue at 790 hours' time in service, due to a crack which originated near a staking mark on the bearing housing.

The FAA was also informed by Message 082043Z, May 87, from the Pensacola Naval Aviation Depot that the U.S. Navy would require review of service life history on the P/N 204-076-428 rod end bearing assemblies for all UH-1E, UH-1L, TH-1L, and HH-1K helicopters. Bearings with 600 or more hours' time in service were to be replaced when serviceable parts became available.

The bearing assemblies involved in these actions are BHTI P/N's 204-076-428-1, -3, and -5. The -1 and -3 bearings are not serialized and the service history is therefore not documented. In addition, until recently the service history of the serialized improved design -5 bearing may not have been recorded. Thus, the time in service of many of the affected 204-076-428 bearings may be unknown.

Since this condition is likely to exist on FAA Certified UH-1E, UH-1L, and TH-1L helicopters of the same military design, the AD would require repetitive inspections of the rod end bearing assembly to check for cracks and would establish a 600 hours service life on newly added parts.

The manager of Military Spares Administration at BHTI informed the FAA that an 11 month lead time is required to supply the part to civilian operators of surplus military helicopters. Therefore, the inspection/replacement intervals have been adjusted accordingly.

The FAA has determined that this proposed regulation involves approximately 19 aircraft, with an estimated cost of approximately $6,500 per aircraft and would not exceed $26,000 per operator. Therefore, I certify that this action (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034;' February 26, 1979); and (3) if promulgated, would not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the draft evaluation prepared for this action is contained in the regulatory docket. A copy of it may be obtained by contacting the person identified under the caption "FOR FURTHER INFORMATION CONTACT."

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety.

THE PROPOSED AMENDMENT

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend § 39.13 of Part 39 of the FAR as follows:

PART 39—[AMENDED]

1. The authority citation for Part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421, and 1423; 49 U.S.C. 106(g) (Revised, Pub. L. 97-449, January 12, 1983); and 14 CFR 11.89.

§ 39.13 [Amended]

2. By adding the following new AD:

Hercules; Lenair Corporation; Smith Helicopters; and West Coast Fabrications; Applies to Model UH-1E, UH-1L, and TH-1L helicopters modified by Hercules; Lenair Corporation: Smith Helicopters, and West Coast Fabrications certified in any category that have P/N 204-076-428-1, -3, or -5 rod end bearing assemblies installed.

Compliance is required as indicated, unless already accomplished.

To detect possible cracks in the collective and cyclic rod end bearing assemblies, P/N 204-076-428-1, -3, or -5, installed on Model UH-1E, UH-1L, and TH-1L helicopters, accomplish the following:

(a) Prior to the next flight after the effective date of this AD and thereafter at intervals not to exceed 10 hours' time in service from the last inspection, visually inspect the rod end bearing assemblies for cracks. Perform the visual inspections by disconnecting the cyclic and collective control tube assemblies from the swashplate horns and the collective pitch control lever.

(b) Whenever the rod end bearing assemblies are removed for any reason, inspect for cracks using a fluorescent penetrant or equivalent method.

Note: Inspections specified by paragraphs (a) and (b) above are not required on rod end bearing assembly P/N 204-076-428-5 having documented time in service of less than 600 hours.

(c) If a crack is found during these inspections replace the rod end bearing with a serviceable part prior to further flight.

(d) Replace rod end bearing assemblies, P/N 204-076-428-1 or -3 within 11 calendar months from the effective date of this AD with rod end bearing assembly, P/N 204-076-428-5, having a documented known service life of less than 600 hours' time in service.

(e) Replace rod end bearing assembly P/N 204-076-428-5, not having a documented known service life, or those with greater than 600 hours' time in service, within 11 calendar months from the effective date of this AD with rod end bearing assembly P/N 204-076-428-5 having a documented service life of less than 600 hours' time in service.

(f) Retire from service rod end bearing assembly, P/N 204-076-428-5 at 600 hours' time in service or less after initial replacement described in paragraphs (d) and (e).

(g) An alternate method of compliance which provides an equivalent level of safety with this AD may be used when approved by the Manager, Helicopter Certification Branch, Federal Aviation Administration, Fort Worth, Texas, 76193-0170.

Issued in Fort Worth, Texas on December 1, 1987.

Don P. Watson,

Acting Director, Southwest Region.

BILLING CODE 4910-13-M

FEDERAL TRADE COMMISSION

16 CFR Part 13

[File No. 852-3213]

Sun Industries, Inc.; Proposed Consent Agreement With Analysis To Aid Public Comment

AGENCY: Federal Trade Commission.

ACTION: Proposed consent agreement.

SUMMARY: In settlement of alleged violations of federal law prohibiting unfair acts and practices and unfair methods of competition, this consent agreement, accepted subject to final Commission approval, would prohibit, among other things, a Jonesboro, AR, manufacturer and seller of tanning devices and related products from misrepresenting that the use of a tanning device does not pose a risk of any harmful side effects to users. Respondent would be required to include a warning statement in any ads and promotional materials for its tanning devices.

DATE: Comments must be received on or before February 22, 1988.

ADDRESS: Comments should be addressed to: FTC/Office of the Secretary, Room 136, 6th St. and Pennsylvania Ave. NW., Washington, DC 20580.

FOR FURTHER INFORMATION CONTACT: FTC/S-4002, C. Lee Peeler, Washington, DC 20580, (202) 326-3090.

SUPPLEMENTARY INFORMATION: Pursuant to section 6(f) of the Federal Trade Commission Act, 38 Stat. 721, 15 U.S.C. 46 and § 2.34 of the Commission's Rules of Practice (16 CFR 2.34), notice is hereby given that the following consent agreement containing a consent order to cease and desist, having been filed with and accepted, subject to final approval, by the Commission, has been placed on the public record for a period of sixty (60) days. Public comment is invited. Such comments or views will be considered by the Commission and will be available for inspection and copying at its principal office in accordance with § 4.9(b)(14) of the Commission's Rules of Practice (16 CFR 4.9(b)(14)).

Before Federal Trade Commission

[File No. 852-3213]

Agreement Containing Consent Order To Cease and Desist

In the Matter of Sun Industries, Inc., a corporation.

The Federal Trade Commission having initiated an investigation of certain acts and practices of Sun Industries, Inc., a corporation, hereinafter sometimes referred to as proposed respondent, and it now appearing that the proposed respondent is willing to enter into an agreement containing an order to cease and desist from the use of the acts and practices being investigated.

It is hereby agreed by and between Sun Industries, Inc., by its duly authorized officer, and its attorney, and counsel for the Federal Trade Commission that:

1. Proposed respondent Sun Industries, Inc., is a corporation organized, existing and doing business under and by virtue of the laws of the State of Arkansas, with its office and principal place of business located at 2409 Industrial Drive, P.O. Box 2026, Jonesboro, Arkansas 72403-2026.

2. Proposed respondent admits all the jurisdictional facts set forth in the draft of the complaint attached hereto.

3. Proposed respondent waives:

(a) Any further procedural steps;

(b) The requirement that the Commission's decision contain a statement of findings of fact and conclusions of law; and

(c) All rights to seek judicial review or otherwise to challenge or contest the validity of the order entered pursuant to this agreement.

4. This agreement shall not become part of the public record of the proceeding unless and until it is accepted by the Commission. If this agreement is accepted by the Commission, it, together with the proposed complaint contemplated thereby, will be placed on the public record for a period of sixty (60) days and information in respect thereto publicly released. The Commission thereafter may either withdraw its acceptance of this agreement and action as it may consider appropriate, or issue and serve its complaint (in such form as the circumstances may require) and decision, in disposition of the proceeding.

VOL 52 ISS 246 DEC 23 1987 UMI

5. This agreement is for settlement purposes only and does not constitute an admission by proposed respondent that the law has been violated as alleged in the proposed complaint attached hereto.

6. This agreement contemplates that, if it is accepted by the Commission, and if such acceptance is not subsequently withdrawn by the Commission pursuant to the provisions of § 2.34 of the Commission's Rules, the Commission may, without further notice to proposed respondent: (1) Issue its complaint corresponding in form and substance with the proposed complaint attached hereto and its decision containing the following order to cease and desist in disposition of the proceeding, and (2) make information public in respect hereto. When so entered, the order to cease and desist shall have the same force and effect and may be altered, modified or set aside in the same manner and within the same time provided by statute for other orders. The order shall become final upon service. Delivery by the U.S. Postal Service of the complaint and decision containing the agreed-to-order to proposed respondent's address as stated in this agreement shall constitute service. Proposed respondent waives any right it may have to any other manner of service. The complaint may be used in construing the terms of the order, and no agreement, understanding, representation, or interpretation not contained in the order or the agreement may be used to vary or contradict the terms of the order.

7. Proposed respondent has read the proposed complaint and order contemplated hereby. It understands that once the order has been issued, it will be required to file one or more compliance reports showing that it has fully complied with the order. Proposed respondent further understands that it may be liable for civil penalties in the amount provided by law for each violation of the order after it becomes final.

Order

Definition

For the purpose of this Order, the following definition shall apply:

"Tanning device" means any product designed to incorporate one or more ultraviolet lamps and intended for irradiation of any part of the living human body by ultraviolet radiation to induce skin tanning.

I

It is ordered that respondent Sun Industries, Inc., a corporation, its successors and assigns, and its officers, agents, representatives, and employees, directly or through any corporation, subsidiary, division or other device, in connection with the advertising, offering for sale, sale or distribution of any tanning device, in or affecting commerce, as "commerce" is defined in the Federal Trade Commission Act, do forthwith cease and desist from misrepresenting, directly or by implication, through the use of the word safe or any other word or words of similar meaning, that use of any such tanning device does not pose a risk of any harmful side effect to the user.

II

It is further ordered that respondent Sun Industries, Inc., a corporation, its successors and assigns, and its officers, agents, representatives, and employees, directly or through any corporation, subsidiary, division or other device, in connection with the advertising, offering for sale, sale or distribution of any tanning device, in or affecting commerce, as "commerce" is defined in the Federal Trade Commission Act, do forthwith cease and desist from misrepresenting, directly or by implication, that:

a. Use of any such device does not increase the risk of developing skin cancer; and

b. Protective eye wear is not needed when using any such device.

III

It is further ordered that for one year after the date of service of this Order respondent Sun Industries, Inc., a corporation, its successors and assigns, and its officers, agents, representatives, and employees, directly or through any corporation, subsidiary, division or other device, in connection with the advertising, offering for sale, sale or distribution of any tanning device, in or affecting commerce, as "commerce" is defined in the Federal Trade Commission Act, do forthwith cease and desist from failing to prominently disclose in any print advertisement, film, video tape or any other promotional material the following statement:

Notice.—Read the mandatory FDA warning label found on every tanning machine for important information on potential eye injury, skin cancer, skin aging and photosensitive reactions.

The above-required language shall be included in printed material printed in a typeface and color that are clear and conspicuous, and, in multipage documents, shall appear on the cover or first page; and in any film, video tape, or slide promotional material shall be included either orally or visually in a manner designed to ensure clarity and prominence; provided, further, that nothing contrary to, inconsistent with, or in mitigation of the above-required statement shall be used in any advertising or promotional materials.

IV

It is further ordered that commencing one year after the date of service of this Order respondent Sun Industries, Inc., a corporation, its successors and assigns, and its officers, agents, representatives, and employees, directly or through any corporation, subsidiary, division or other device, in connection with the advertising, offering for sale, sale or distribution of any tanning device, in or affecting commerce, as "commerce" is defined in the Federal Trade Commission Act, do forthwith cease and desist from making in any print advertisement, film, video tape or any other promotional material any representation, directly or by implication, that the tanning device is safe or safer than other devices or methods of tanning or that the device has health benefits unless the following statement is given:

Notice.—Read the mandatory FDA warning label found on every tanning machine for important information on potential eye injury, skin cancer, skin aging and photosensitive reactions.

The above-required language shall be included in printed material printed in a typeface and color that are clear and conspicuous, and, in multipage documents, shall appear on the cover or first page; and in any film, video tape, or slide promotional material shall be included either orally or visually in a manner designed to ensure clarity and prominence; provided, further, that nothing contrary to, inconsistent with, or in mitigation of the above-required statement shall be used in any advertising or promotional materials.

V

It is further ordered that respondent Sun Industries, Inc., its successors and assigns and its officers, agents, representatives and employees, directly or through any corporation, subsidiary, division, or other device, in connection with the advertising, offering for sale, sale, or distribution of any product for personal or household use, in or affecting commerce, as "commerce" is defined in the Federal Trade Commission Act, do forthwith cease and desist from making, directly or by implication, any health or safety representation unless, at the time of such representation, respondent possesses and relies upon a reasonable basis for each such representation, consisting of reliable and competent scientific evidence that substantiates such representation; provided however, that to the extent such evidence of a reasonable basis consists of scientific or professional tests, analyses, research, studies or any other evidence based on expertise of professionals in the relevant area, such evidence shall be "reliable and competent" only if these tests, analyses, research, studies, or other evidence are conducted and evaluated in an objective manner by persons qualified to do so, and using procedures generally accepted in the profession to yield accurate and reliable results.

VI

It is further ordered that respondent shall distribute a copy of this Order to each current officer, employee, agent and/or representative having sales or promotional responsibilities with respect to the subject matter of this Order, and to each dealer, distributor, and purchaser or lessee for commercial use, of its tanning devices (such as health clubs, tanning salons, beauty salons, catalogue houses, and tanning device retailers) known through existing company records to be in operation on the effective date of this order.

VII

It is further ordered that for three (3) years from the date that the respesentations to which they pertain are last disseminated, respondent, its successors and assigns shall maintain and upon request make available to the Federal Trade Commission for inspection and copying:

A. All materials relied upon to substantiate any claim or representation covered by this Order; and

B. All test reports, studies, surveys, or other materials in its possession or control or of which it has knowledge that contradict, qualify, or call into question such representation or the basis upon which respondent relied for such representation, including complaints from consumers.

VIII

It is further ordered that for ten (10) years after the date of service of this Order respondent, its successors and assigns shall maintain for three (3) years from the last date of dissemination of the material a copy of each nonidentical form of promotional and training material disseminated by respondent and upon request make such material available to the Federal Trade Commission or its staff for inspection and copying.

IX

It is further ordered that for ten (10) years after the date of service of this Order respondent, its successors and assigns shall maintain, for three (3) years and upon request make available to the Federal Trade Commission for inspection and copying records of the name and last known address of each dealer, distributor and purchaser or lessee for commercial use of respondent's sunlamp products.

X

It is further ordered that respondent, its successors and assigns shall notify the Commission at least thirty (30) days prior to any proposed change in the corporate respondent such as dissolution, assignment, or sale resulting in the emergence of a successor corporation, the creation or dissolution of subsidiaries, or any other change in the corporation which may affect compliance obligations arising out of the Order.

XI

It is further ordered that respondent shall, within sixty (60) days after service of this Order upon it and at such other times as the Commission may require, file with the Commission a report, in writing, setting forth in detail the manner and form in which it has complied or intends to comply with this Order.

Analysis of Proposed Consent Order To Aid Public Comment

The Federal Trade Commission has accepted subject to final approval an agreement to a proposed consent order from Sun Industries, Inc. (Sun Industries).

The proposed consent order has been placed on the public record for sixty (60) days for receipt of comments by interested persons. Comments received during this period will become part of the public record. After sixty (60) days, the Commission will again review the agreement and the comments received and will decide whether it should withdraw from the agreement and take other appropriate action, or make final the proposed order contained in the agreement.

This matter concerns advertisements for Sun Industries' tanning devices which use lamps emitting ultraviolet (UV) radiation to cause tanning of the user's skin.

The Commission's complaint in this matter charges Sun Industries with disseminating advertisements containing false and unsubstantiated representations regarding the safety of its tanning devices. According to the complaint, advertisements for Sun Industries' tanning devices falsely claimed that the devices can be used without risking the harmful side effects associated with exposure to the sun, including the risk of developing skin cancer, and that the devices could safely be used without eye protection. The complaint alleges that these claims are, in fact, false and that Sun Industries' tanning devices cannot be used without risking the harmful side effects associated with the sun, including skin cancer, and that the devices cannot be safely used without eye protection.

The complaint also alleges that the advertisements contained false representations that Sun Industries had a reasonable basis for the claims that its devices could be used without the risk of the harmful side effects associated with exposure to the sun and that its devices could safely be used without eye protection when, in fact, Sun Industries did not have a reasonable basis for these representations.

The consent order contains provisions designed to remedy the advertising violations charged as well as to prevent Sun Industries from engaging in similar acts and practices in the future. Part I of the consent order prohibits Sun Industries from misrepresenting, directly or by implication, through the use of the word "safe" or any other word or words of similar meaning, that use of its tanning devices does not pose a risk of any harmful side effect to the user.

Part II of the consent order prohibits Sun Industries from misrepresenting, directly or by implication, that its devices do not increase the user's risk of skin cancer and that protective eye wear is not needed when using the devices.

Part III of the consent order requires that for one year Sun Industries include in all advertisements and promotional materials a notice statement alerting users to read the mandatory FDA warning label for important information on potential eye injury, skin cancer, skin aging and photosensitive reactions.

Part IV of the consent order requires that commencing one year after the date of service of this order Sun Industries include a notice statement in any advertisement making a claim that its tanning devices are safe or safer than other devices or methods of tanning or that the device has health benefits. The statement alerts users to read the mandatory FDA warning label for important information on potential eye injury, skin cancer, skin aging and photosensitive reactions.

Part V of the consent order requires Sun Industries to have reliable and

BEST COPY AVAILABLE

competent scientific evidence to support any health or safety representations contained in an advertisement.

Part VI of the consent order requires Sun Industries to send a copy of the consent order to each of its dealers and distributors and to each entity which has purchased or leased its devices for commercial use (such as health clubs, tanning salons, beauty salons, catalogue houses, and retail outlets) known through existing company records to be in operation on the effective date of the consent order.

Parts VII through XI of the consent order are standard order provisions requiring Sun Industries to retain certain business records, report to the Commission certain corporate changes and provide a report to the Commission on its compliance with the provisions of the consent order.

The purpose of this analysis is to facilitate public comment on the proposed order. It is not intended to constitute an official interpretation of the agreement and proposed order or to modify in any way their terms.

Emily H. Rock,

Secretary.

BILLING CODE 6750-01-M

DEPARTMENT OF THE TREASURY

Internal Revenue Service

26 CFR Parts 1 and 18

[LR-45-87]

Income Taxes; Taxable Years of Certain Entities

AGENCY: Internal Revenue Service, Treasury.

ACTION: Notice of proposed rulemaking by cross-reference to temporary regulations.

SUMMARY: In the Rules and Regulations portion of this issue of the **Federal Register**, the Internal Revenue Service is issuing temporary regulations relating to taxable years of personal service corporations, partnerships and S corporations (and owners of those entities). Changes to the applicable law were made by the Tax Reform Act of 1986. The text of those temporary regulations also serves as the comment document for this proposed rulemaking.

DATES: Written comments and requests for a public hearing must be mailed or delivered by February 22, 1988. The amendments are proposed to be effective for taxable years beginning after December 31, 1986.

ADDRESS: Send comments and requests for public hearing to: Commissioner of Internal Revenue, Attention: CC:LR:T (LR-45-87) Washington, DC 20224.

FOR FURTHER INFORMATION CONTACT: Arthur E. Davis III of the Legislation and Regulations Division, Office of Chief Counsel, Internal Revenue Service, 1111 Constitution Avenue NW., Washington, DC 20224 (Attention: CC:LR:T), (202) 566-3238, not a toll-free call.

SUPPLEMENTARY INFORMATION:

Background

The temporary regulations (designated by a "T" following the section citation) in the Rules and Regulations portion of this issue of the **Federal Register** amend Part 1 of Title 26 of the Code of Federal Regulations. These amendments are proposed to conform the regulations to the requirements of section 806 of the Tax Reform Act of 1986 (Pub. L. 99-514), 100 Stat. 2362. For the text of the temporary regulations, see FR Doc. (T.D. 8167) published in the Rules and Regulations portion of this issue of the **Federal Register**. The preamble to the temporary regulations provides a discussion of the rules. The final regulations, which this document proposes to base on those temporary regulations, would amend Part 1 of Title 26 of the Code of Federal Regulations.

Special Analysis

The Commissioner of Internal Revenue has determined that this proposed rule is not a major rule as defined in Executive Order 12291. Accordingly, a Regulatory Impact Analysis is not required. Although this document is a notice of proposed rulemaking that solicits public comments, the Internal Revenue Service has concluded that the regulations proposed herein are interpretative and that the notice and public procedure requirements of 5 U.S.C. 553 do not apply. Accordingly, a regulatory flexibility analysis is not required under the Regulatory Flexibility Act (5 U.S.C. chapter 6).

Comments and Requests for a Public Hearing

Before adopting these proposed regulations, consideration will be given to any written comments that are submitted (preferably eight copies) to the Commissioner of Internal Revenue. All comments will be available for public inspection and copying. A public hearing will be held upon written request to the Commissioner by any person who has submitted comments. If a public hearing is held, notice of the time and place will be published in the **Federal Register**.

Drafting Information

The principal author of these regulations is Arthur E. Davis III of the Legislation and Regulations Division, Office of Chief Counsel, Internal Revenue Service. However, personnel from other offices of the Internal Revenue Service and Treasury Department participated in developing the regulations on matters of both substance and style.

List of Subjects

26 CFR 1.441-1—1.483-2

Income taxes, Accounting, Deferred compensation plans.

26 CFR 1.701—1.771-1

Income taxes, Partnerships.

26 CFR Part 18

Sale of residence, Income taxes.

Lawrence B. Gibbs,

Commissioner of Internal Revenue.

BILLING CODE 4830-01-M

ARCHITECTURAL AND TRANSPORTATION BARRIERS COMPLIANCE BOARD

36 CFR Part 1150

Practice and Procedures for Compliance Hearings

AGENCY: Architectural and Transportation Barriers Compliance Board.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Architectural and Transportation Barriers Compliance Board proposes to amend its regulations regarding the informal resolution of complaints by allowing the Board to make a rebuttable presumption of jurisdiction in those cases in which jurisdictional information is not timely provided by the persons or agencies responsible for the alleged violation. The amendment is designed to promote the expeditious processing of complaints.

DATES: Comments must be received by February 22, 1988.

ADDRESSES: Comments should be sent to the Office of General Counsel, Architectural and Transportation Barriers Compliance Board, 330 C Street SW., Room 1010, Washington, DC 20202.

FOR FURTHER INFORMATION CONTACT: Nicholas Chiarkas, General Counsel at (202) 245-1591 or FTS 245-1591 (voice or TDD). This proposed rule is available at the above address on cassette for persons with visual impairments.

SUPPLEMENTARY INFORMATION: The current regulations set forth procedures to ensure compliance with standards issued under the Architectural Barriers Act of 1968, 42 U.S.C. 4151 *et seq.* The regulation provides for an informal resolution period of one hundred and eighty (180) days. Complaints are deemed informally resolved if the persons or agencies responsible for the alleged violation (the respondents) either demonstrate to the Executive Director that no violation has occurred, or alternatively that compliance action will be taken to correct an existing violation. The threshold determination that must be made in resolving any complaint is whether the Board has jurisdiction over the facility in question. The proposed rule allows the Board to make a rebuttable presumption of jurisdiction in those cases in which the respondents do not provide, within sixty (60) days of a written request, the information necessary to resolve the jurisdictional issue.

The proposed rule was adopted by the Board at its September 1987 meeting in the interest of enhancing the speed and efficiency of the ATBCB's complaint processing function.

List of Subjects in 36 CFR Part 1150

Administrative practice and procedure, Buildings, Handicapped.

For the reasons set forth in the preamble, the ATBCB proposes to amend 36 CFR Part 1150 as follows:

PART 1150—PRACTICE AND PROCEDURES FOR COMPLIANCE HEARINGS

1. The authority citation for Part 1150 is revised to read as follows:

Authority: 29 U.S.C. 792(b).

2. Section 1150.41 is proposed to be amended by revising paragraph (e) to read as follows:

§ 1150.41 Informal resolution.

* * * * *

(e) Complaints should be resolved informally and expeditiously, by the interested persons or agencies.

(1) If the interested persons or agencies fail to provide, within sixty (60) days of a written request, the information necessary for the Executive Director or his/her designee to determine whether the ATBCB has jurisdiction over a particular complaint, then the Executive Director or his/her designee will make a rebuttable presumption of jurisdiction and proceed accordingly.

(2) If compliance with the applicable standards is not achieved informally or an impasses concerning the allegations of compliance or noncompliance is reached, the Executive Director will review the matter, including previous attempts by agencies to resolve the complaint, and take actions including, but not limited to, surveying and investigating buildings, monitoring compliance programs of agencies, furnishing technical assistance, such as standard interpretation, to agencies, and obtaining assurances, certifications, and plans of action as may be necessary to ensure compliance.

* * * * *

Thomas E. Harvey,

Chairperson, Architectural and Transportation Barriers Compliance Board.

BILLING CODE 8820-BP-M

GENERAL SERVICES ADMINISTRATION

41 CFR Part 101-41

Prepayment Transportation Audit Procedures

AGENCY: Federal Supply Service, GSA.

ACTION: Proposed rule.

SUMMARY: The General Services Administration (GSA) proposes to amend the Federal Property Management Regulations for the purpose of implementing Pub. L. 99-617 relating to prepayment audits of selected transportation bills. This rule also prescribes procedures, conditions, and limitations relevant to any delegation of authority to another agency for the purpose of conducting prepayment audits.

DATE: Written comments must be received no later than 4:00 p.m. February 22, 1988.

ADDRESS: Comments should be sent to the General Services Administration (FWCP), Washington, DC 20405.

FOR FURTHER INFORMATION CONTACT: John W. Sandfort, Collections, Accounts, and Procedures Division, Office of Transportation Audits, (202) 786-3065 or FTS 786-3065.

SUPPLEMENTARY INFORMATION: The General Services Administration has determined that this rule is not a major rule for the purposes of Executive Order 12291 of February 17, 1981, because it is not likely to result in an annual effect on the economy of $100 million or more; a major increase in costs to consumers or others; or significant adverse effects. Therefore, a regulatory impact analysis has not been prepared. GSA has based all administrative decisions underlying this rule on adequate information concerning the need for, and consequences of, this rule; has determined that the potential benefits to society from this rule outweigh the potential costs; has maximized the net benefits; and has chosen the alternative approach involving the least net cost to society.

Paperwork Reduction Act of 1980: This regulation requires no recordkeeping or reporting beyond that which is usual and customary for the ordinary conduct of business.

Initial Regulatory Flexibility Analysis

In accordance with the provisions of the Regulatory Flexibility Act (5 U.S.C. 603), the following initial regulatory flexibility analysis is provided:

(a) A description of the reasons why action by GSA is being considered is provided by the "Background" paragraphs of this proposed rule.

(b) The objective of the proposed rule is set forth in the "Summary" paragraph. The legal basis is provided by law, 31 U.S.C. 3726. Activities conducted pursuant to this proposed rule will be cost-effective or otherwise in the public interest.

(c) This rule may affect all transportation firms doing business with the United States Government to the extent that their bills are selected for prepayment audit by either GSA or its designee. For the most part, it is not expected that the effect will be either adverse or noticeable. There is, however, the distinct possibility that prepayment audit activity could occasionally delay otherwise proper payments to carriers. On those occasions, the Government is obligated to pay interest in accordance with provisions of the Prompt Payment Act. Delegations may involve any mode of transportation and/or type of bill, and in particular instances, may affect a lesser or greater number of similar entities, possibly including, small general commodity or other freight trucking, trip lease or forwarding firms; small air carriers/forwarders of freight and/or passengers; small domestic household goods carriers/forwarders (including office and electronic movers).

(d) No recordkeeping or reporting is required beyond that which is usual and customary for the ordinary conduct of business.

(e) There are no known Federal rules which duplicate, overlap, or conflict with the proposed rule.

(f) The only known alternative to the proposed rule is not to publish it. This alternative may result in the Government initially paying more for a transportation service than what it is legally required to do. Providing exemptions from the rule would be discriminatory and counterproductive.

Background

Public Law 99-627, dated November 7, 1986, amended section 3726 of Title 31 of the United States Code to provide the Administrator of General Services with authority to audit selected transportation bills prior to payment, and to allow the delegation of any authority conferred by section 3726 to another agency or agencies if the Administrator determined that such a delegation would be "cost-effective or otherwise in the public interest."

Since 1975, GSA's Office of Transportation Audits has had Governmentwide responsibility for the postpayment audit of all freight and passenger transportation invoices and recovery of charges paid by Federal agencies that are not based on the lowest applicable rates. Prior to 1975, the General Accounting Office (GAO) performed the Government's rate audit function.

Historically, there were significant delays from the date of the transportation service to the date the Government made payment, because of the time required by GAO to perform the very intricate rate audit. In the 1940's, in reaction to industry complaints, Congress directed agencies to pay bills for transportation services upon presentation by the carrier, with audit after payment.

Determining whether a transportation charge is correct is a complex process. An auditor must possess a thorough knowledge of tariffs (published commercial rates), tenders (special, lower Government rates), contracts (negotiated rates for specific shipments or groups of shipments), and other rate authorities, to properly audit a carrier's bill.

During fiscal year 1986, GSA's Office of Transportation Audits identified $50.9 million in rate overcharges. GSA employs 187 professional and support staff members to handle the large volume of transportation invoices paid by civilian and military activities.

While GSA, for the most part, intends to exercise its prepayment audit authority primarily in those selected instances where the failure to do so may prevent the Government from subsequently collecting overcharges, GSA may exercise its prepayment audit authority over selected bills on behalf of itself and other individual agencies.

Many agencies believe that a prepayment audit would prevent overpayments. However, knowledgeable of the complexities of auditing transportation payments, GSA concludes that prepayment audit authority should be delegated only to those agencies which clearly demonstrate they are capable of performing a timely, accurate, and cost-effective audit within the requirements of the Prompt Payment Act. Further, GSA is of the opinion that it is the intention of the Congress that prepayment audit rely on automation rather than a duplication of GSA's staffing and operations as a prerequisite to any delegation of authority. Consequently, GSA will require that any request for the delegation of prepayment audit authority foster the use of automation.

It is not GSA's intention to relinquish its postpayment audit or oversight role.

List of Subjects in 41 CFR Part 101-41

Air carriers, Accounting, Claims, Freight, Freight forwarders, Government property management, Maritime carriers, Moving of household goods, Passenger services, Railroads, Transportation.

GSA proposes to amend Part 101-41 as follows:

PART 101-41—TRANSPORTATION DOCUMENTATION AND AUDIT

1. The authority citation for 41 CFR Part 101-41 continues to read:

Authority: 31 U.S.C. 3726, and 40 U.S.C. 486(c).

2. The table of contents for Part 101-41 is amended by adding § 101-41.103 and revising § 101-41.401 as follows:

Sec.

* * * * *

101-41.103 Procedures, conditions, and limitations relevant to the delegation of authority to perform prepayment audits of selected transportation bills.

101-41.401 Payment of transportation bills.

Subpart 101-41.1—General

3. Section 101-41.101 is amended by revising the introductory text and paragraph (a) to read as follows:

§ 101-41.101 Examination of payments, settlement of claims, and review of requirements.

Section 322 of the Transportation Act of 1940, as amended (31 U.S.C. 3726), permits transportation bills to be paid prior to audit by the Administrator of General Services or his/her designee in accordance with regulations that the Administrator shall prescribe.

(a) The authority vested in the Administrator of General Services by 31 U.S.C. 3726, as amended, enables the Administrator, or his/her designee, to:

(1) Audit selected transportation bills prior to payment;

(2) Examine, settle, and adjust accounts involving payment for transportation and related services for the account of the United States;

(3) Adjudicate and settle transportation claims by and against the United States;

(4) Deduct the amount of any overcharge by any carrier or forwarder from any amount subsequently found to be due such carrier or forwarder; and

(5) Delegate any authority conferred on the Administrator to another agency or agencies if the Administrator determines that such a delegation would be cost-effective, accurate, timely, or otherwise in the public interest.

* * * * *

4. Section 101-41.103 is added to read as follows:

§ 101-41.103 Procedures, conditions, and limitations relevant to the delegation of authority to perform prepayment audits of selected transportation bills.

(a) Requests for a delegation of authority from the Administrator of General Services to conduct prepayment audits shall be accompanied by a specific and complete description of the organization to perform the audit, the character of the bills to be audited, and the manner whereby the audit will be conducted. Such requests shall demonstrate cost-effectiveness or other public benefits.

(b) Unless prepayment audit of certain bills is required under § 101-41.401, prepayment audits by GSA on behalf of itself and/or other agencies, will not be approved by the Administrator unless he finds that the official responsible for such audits meets the same requirements as specified in this paragraph for GSA's designees.

(c) Requests shall include a detailed model of the audit process from receipt of carrier bills to disbursement and the submission of paid vouchers to GSA for postpayment audit. The model shall evidence use of automated techniques as a means of performing the audit process.

(d) The proponent shall demonstrate the capability not only to complete an accurate audit within 15 calendar days of receipt of a carrier's bill, but also evidence the ability to generate an accurate notice to the carrier which specifically describes the reason for any full or partial rejection of the carrier's charges, citing the rate authority applicable thereto.

(e) The proposal shall contain a mechanism to report savings, on a monthly basis, and in a manner acceptable to GSA, accomplished by identifying overcharges/overbillings through prepayment audit.

(f) Public notice of delegated authorities will be effected by publication in the **Federal Register** Notices section. Such Notices will specify the type of bills that are subject to prepayment audit; the Government department/agency whose bills are subject to such audit; and the organization or command, i.e., the authority, which will conduct such audits.

(g) Authority delegated in accordance with this section is subject to complete oversight by GSA. This oversight and a test of accuracy will normally be made through the postpayment audit process.

(h) Except as provided in § 101-41.604-2, when a prepayment audit results in a reduction to a properly presented invoice, interest penalties will be paid if required by the Prompt Payment Act. The designee must approve for payment the amount he deems to be proper.

(i) Should GSA receive information that any carrier is bankrupt or is otherwise in such economic condition that its ability to pay debts owing to the Government is questionable, then GSA may request that amounts approved for payment after prepayment audit shall be remitted to GSA in lieu of payment to the carrier.

(j) All forms utilized by the designee or its audit authority in performing the prepayment audit must be approved by GSA (Attn: FWC) prior to usage, and no rules or procedures relative to the prepayment audit may be published by them without GSA approval.

(k) The designee and any audit authority under him is required to follow Comptroller General decisions and GSA Federal Property Management Regulations, instructions and precedents regarding substantive and procedural matters.

(l) The designee may utilize contractors to accomplish the prepayment audit, but contractors are subject to all of the requirements that apply to the designee and its audit authority.

Subpart 101-41.4—Standards for the Payment of Charges for Transportation Services Furnished for the Account of the United States

5. Section 101-41.401 is amended by revising paragraph (a) to read as follows:

§ 101-41.401 Payment of transportation bills.

(a) Unless GSA's Office of Transportation Audits determines that a prepayment audit is necessary, each agency or department shall pay any properly documented bill (claim) for freight or passenger transportation charges that is not excepted by the provisions of § 101-41.604-2.

* * * * *

Subpart 101-41.6—Claims Against the United States Relating to Transportation Services

6. Section 101-41.604-1 is amended by revising the introductory paragraph to read as follows:

§ 101-41.604-1 Transportation claims payable by agencies.

Unless GSA's Office of Transportation Audits determines that a prepayment audit is necessary, each agency or department shall pay any properly documented bill (claim) for freight or passenger transportation charges that is not excepted by the provisions of § 101-41.604-2, provided the following guidelines are observed:

* * * * *

7. Section 101-41.604-2 is amended by adding paragraph (b)(7) to read as follows:

§ 101-41.604-2 Transportation claims not payable by agencies.

* * * * *

(b) * * *

(7) Irreconcilable claims disputing prepayment audit positions of agencies subject to a delegation of authority by the Administrator under § 101-41.103. All claims protesting an audit authority's prepayment audit position will be addressed to that authority. The authority shall promptly acknowledge the claim in writing and stamp it with its date of receipt. The authority must adjudicate the claim within 30 days of receipt, but if the authority fails to approve all or any portion of the carrier's claim, it shall make a final decision providing a clear, specific and detailed written explanation of its position. If the carrier is dissatisfied with the authority's final decision, it may appeal that decision to GSA, providing a copy of all documentation involved in the record, including a copy of the audit authority's decision. All such appeals shall be forwarded by the carrier to GSA, Attn: FWC (Code PA), Washington, DC 20405.

Dated: October 16, 1987.

Donald C.J. Gray,

Commissioner, Federal Supply Service.

[FR Doc. 87-28601 Filed 12-22-87; 8:45 am]

BILLING CODE 6820-34-M

DEPARTMENT OF DEFENSE

48 CFR Parts 228 and 252

Federal Acquisition Regulation Supplement; Separate Bid Bonds for Construction

AGENCY: Department of Defense (DOD).

ACTION: Proposed rule and request for public comment.

SUMMARY: The Defense Acquisition Regulatory Council has approved proposed revisions to the DOD FAR Supplement Parts 228 and 252. A clause is proposed at 252.228-7007 which permits submission of separate bid bonds vice separate bid guarantees for construction contracts. If adopted, the revisions will require that DOD prime contractors furnish a separate bid bond by the time set for opening of bids.

DATE: Interested parties are invited to submit written comments on or before February 22, 1988, to the Executive Secretary, DAR Council, at the address below, to be considered in formulation of a final rule. Please cite DAR Case 84-149D in all correspondence related to this subject.

ADDRESS: Interested parties should submit written comments to: Defense Acquisition Regulatory Council, Attn: Mr. Charles W. Lloyd, Executive Secretary, DAR Council, OASD (P)/DARS, c/o OASD (A&L) (M&RS), Room 3D139, The Pentagon, Washington, DC 20301-3062.

FOR FURTHER INFORMATION CONTACT: Mr. Charles W. Lloyd, Executive Secretary, DAR Council, telephone (202) 697-7266.

SUPPLEMENTARY INFORMATION:

A. Background

On May 27, 1987, the Department of Defense (DOD), General Services Administration and National Aeronautics and Space Administration published Federal Acquisition Circular (FAC) 84-26. Within that FAC was a change to the Federal Acquisition Regulation (FAR), Part 28, which permitted only separate bid guarantees in connection with construction

contracts. However, the FAR further allows agencies to specify that only separate bid bonds are acceptable in connection with construction. The rationale for the FAR coverage is to permit agencies the latitude to avoid the additional risk and burden of safekeeping an asset pledged as a bid guarantee and in returning it to the contractor. Accordingly, DOD proposes to amend the DFARS to continue DOD's past practices.

B. Regulatory Flexibility Act Information

The proposed rule is not expected to have significant economic impact on a substantial number of small entities within the meaning of the Regulatory Flexibility Act, 5 U.S.C. 601 *et seq.*, because it merely continues a DoD policy which has been in effect since May 6, 1988. An initial regulatory flexibility analysis has therefore not been performed. Comments are invited from small businesses and other interested parties. Comments from small entities concerning the affected DFARS Subpart will also be considered in accordance with section 610 of the Act. Such comments must be submitted separately and cite DAR Case 87–610D in correspondence.

C. Paperwork Reduction Act Information

The Paperwork Reduction Act (Pub. L. 99–511) does not apply because the proposed rule does not impose any additional recordkeeping or information collection requirements or collection of information from offerors, contractors, or members of the public which require the approval of OMB under 44 U.S.C. 3501, *et seq.*

List of Subjects in 48 CFR Parts 228 and 252

Government procurement.

Charles W. Lloyd,

Executive Secretary, Defense Acquisition Regulatory Council.

Therefore, it is proposed that 48 CFR Parts 228 and 252 be amended as follows:

1. The authority citation for 48 CFR Part 228 and 252 continues to read as follows:

Authority: 5 U.S.C. 301, 10 U.S.C. 2202, DoD Directive 5000.35, and DoD FAR Supplement 201.301.

PART 228—BONDS AND INSURANCE

2. Sections 228.101, 228.101–1 and 228.101–3 are added to read as follows:

228.101 Bid guarantee.

228.101–1 Policy on use.

(b) Only separate bids bonds are acceptable for construction contracts.

228.101–3 Contract clause.

(b) The contracting officer shall insert the clause at 252.228–7007, Bid Bond, in lieu of FAR clause 52.228–1, in solicitations and contracts for construction.

PART 252—SOLICITATION PROVISIONS AND CONTRACT CLAUSE

3. Section 252.228–7007 is added to read as follows:

252.228–7007 Bid bond.

As prescribed in 228.101–3(b), insert the following clause in solicitations and contracts:

Bid Bond ( )

(a) The offeror (bidder) shall furnish a separate bid bond, in the proper form and amount, by the time set for opening of bids. Failure to do so may be cause for rejection of the bid.

(b) If the successful bidder, upon acceptance of its bid by the Government within the period specified for acceptance, fails to execute all contractual documents or give a bond(s) as required by the solicitation within the time specified, the Contracting Officer may terminate the contract for default.

(c) Unless otherwise specified in the bid, the bidder will (1) allow 60 days for acceptance of its bid and (2) give bond within 10 days after receipt of the forms by the bidder.

(d) In the event the contract is terminated for default, the bidder is liable for any cost of acquiring the work that exceeds the amount of its bid, and the bid bond is available to offset the difference.

(End of clause).

[FR Doc. 87–29371 Filed 12–22–87; 8:45 am]
BILLING CODE 3810–01–M

Department of the Navy

48 CFR Parts 5215 and 5252

Navy Acquisition Regulations Supplement; Policy Concerning Use of Cost and Pricing Data and Cost Analysis Where Adequate Price Competition Exists

AGENCY: Department of the Navy, DOD.

ACTION: Proposed rule.

SUMMARY: The Department of the Navy is adding language to Parts 5215 and 5252 of the Navy Acquisition Regulations Supplement (NARSUP) to the Federal Acquisition Regulations (FAR). Part 5215 of the NARSUP is being supplemented to clarify existing language contained in FAR Part 15 on Adequate Price Competition, and on the type of cost data and cost analysis that might be required when there is adequate price competition. A provision is also being added to Part 5252 of the NARSUP for use in all solicitations where it is anticipated that an award will be based on adequate price competition.

DATE: Public comments are solicited and should be received by January 22, 1988.

ADDRESS: Interested parties should submit written comments to: Office of the Assistant Secretary of the Navy (Shipbuilding & Logistics), Contracts and Business Management, Washington DC 20361, ATTN: Ms. Linda E. Greene or Mr. Dick Moye.

FOR FURTHER INFORMATION CONTACT: The telephone is 202–692–3324 for Ms. Greene and 202–692–3558 for Mr. Moye.

SUPPLEMENTARY INFORMATION:

A. Background

As a result of the passage of the Competition in Contracting Act of 1984, competition has become the rule of doing business in DoD; negotiations supported by detailed cost analysis have become the exception. Competition has become the cornerstone of Navy acquisition policy. As a result, the Navy has found that not only does competition generate more favorable prices, but significant time and effort can be saved by relying on the forces of competition to establish prices, as opposed to the use of detailed cost analysis.

Even though the Navy has been a strong advocate of competition, there is still a tendency for some contracting officers to require the submission of cost or pricing data when there is an expectation that adequate price competition will result, or has resulted on a given procurement. Both the Assistant Secretary of the Navy, Shipbuilding and Logistics (ASN) (S&L) and the Deputy Assistant Secretary of Defense, Procurement (DASD)(P), issued memorandums stating that contracting officers were not to require certified cost or pricing data, other than selected data for cost realism analysis purposes, when adequate price competition is anticipated. This practice undermines the competitive process, increases bid and proposal costs, unnecessarily burdens the government support offices with requirements for detailed audit and proposal reviews, and extends procurement lead time.

The principal cause of this problem is a failure to distinguish between requiring detailed cost and pricing data necessary in the sole source situation to negotiate a fair and reasonable price versus a requirement for only that data necessary to conduct a cost realism analysis in a competition for the purposes of determining the realism of the offeror's price. The current coverage offers little guidance to distinguish between these two types of situations. The clarifying language provides needed guidance.

B. Regulatory Flexibility Act

The proposed rule is not expected to have a significant impact on a substantial number of small entities within the meaning of the Regulatory Flexibility Act, 5 U.S.C. 601 *et seq.* because although most contracts are awarded to small entities on a competitive basis, the dollar value of these contracts is usually under $100,000, which has been the threshold at which the detailed cost or pricing data has been erroneously required.

Paperwork Reduction Act Analysis

Because the majority of small businesses generally do not receive contracts where the requirement to submit the detailed cost or pricing data would be applicable ($100,000 or greater), the Paperwork Reduction Act analysis is not applicable. However, for those small businesses that would reach or exceed the $100,000 threshold, there will be a significant beneficial impact because the requirement to submit detailed cost or pricing data in a competitive procurement would be further limited.

List of Subjects in 48 CFR Parts 5215 and 5252

Government procurement.

For the reasons set out in the preamble, Chapter 52 of Title 48 of the Code of Federal Regulations is proposed to be amended as follows:

1. Part 5215 is added to read as follows:

PART 5215—CONTRACTING BY NEGOTIATION

Subpart 5215.4—Solicitation and Receipt of Proposals and Quotations

Sec.
5215.402 General.
5215.407 Solicitation provisions.

Subpart 5215.6—Source Selection.

5215.605 Evaluation factors.
5215.608 Proposal evaluations.

Subpart 5215.8—Price Negotiation.

5215.804–3 Exemptions from or waiver of submission of certified cost of pricing data.
5215.805–5 Field pricing support.

Authority: 5 U.S.C. 301, 10 U.S.C. 2202, DOD Directive 5000.35.

Subpart 5215.4—Solicitation and Receipt of Proposals and Quotations

5215.402 General.

(a) Competition is the cornerstone of Navy acquisition policy. As such, the preferred and predominant method of pricing in the Navy is through the use of competition, without the need for cost and pricing data and cost analysis. This approach is not only consistent with the Competition in Contracting Act (CICA), but it affords the opportunity for significant efficiencies and reduction of procurement leadtime as a result of minimizing the requirement for cost and pricing data and associated audit reports. As competition is increasingly relied upon and the need for cost and pricing data is reduced, there is a corresponding requirement for performing a cost realism analysis for many competitive procurements to guard against unrealistically low prices which can lead to quality deficiencies, late deliveries, performance shortfalls, and cost overruns. In performing cost realism analysis, only the minimum selected data to perform the cost realism analysis is to be obtained, as opposed to full cost and pricing data which would be required when it is necessary to perform cost-based negotiations.

5215.407 Solicitation provisions.

(S–90) During acquisition planning, an assessment shall be made as to the likelihood that adequate price competition will exist. If it is anticipated that an award will be based on adequate price competition, the solicitation shall include the provisions at 5252.215–9000. If the procurement schedule is critical, this provision with its Alternate I shall be used so that there will be a minimum delay in the event that adequate price competition does not materalize and it is necessary to obtain cost and pricing data. Contracting officers must be judicious in the use of the Alternate I provision, and it may cause offerors to incure certain costs in preparing standby cost and pricing data in anticipation that it may be subsequently requested.

SUBPART 5215.6—Source Selection

5215.605 Evaluation factors.

(a) When a cost realism analysis will be performed in accordance with 5215.805–5(S–90), it shall be evaluated and scored as a part of the source selection evaluation criteria.

(b) Technical criteria may include quality standards that are based on either a minimally acceptable approach or a cost/benefit approach. When the quality desired is that necessary to meet minimum needs, proposals should be evaluated for acceptability and award made to the lowest priced, technically acceptable offer. When the quality desired is the highest affordable or that representing the best value, proposals should be evaluated on a cost/benefit basis that would permit an award based on paying appropriate premiums for measured increments of quality. When a cost/benefit approach is used, cost must carry a weight of not less than 40% unless thoroughly justified.

5215.608 Proposal evaluation

(a) When a cost realism analysis will be performed in accordance with 5215.805–5(S–90), it shall be evaluated and scored as a part of the source selection evaluation criteria.

Subpart 5215.8—Price Negotiation

5215.804–3 Exemptions from or waiver of submission of certified cost or pricing data.

(a) General. As explained in 5215.402, certified cost and pricing data would not normally be obtained in the Navy because the predominant portion of Navy procurements are awarded on the basis of adequate price competition.

(b)(1)(iii) Adequate price competition may also exist where price is a secondary factor in the evaluation of proposals, as long as price is a substantial factor (at least 20%). Price, as used herein, means cost plus any fee or profit applicable to the contract price. Thus, in competitive acquisitions where adequate price competition is contemplated, the contracting officer shall not require the submission of cost and pricing data, as defined in FAR 15.801, regardless of the type of contract.

(b)(3) Examples of contract awards for which prices may be based on adequate price competition and/or to have been established by adequate price competition are:

(i) Contracts for items in production for which there are a limited number of sources and the prices at which award will be made are within a reasonable amount of each other and compare favorably with independent Government estimates and with prior prices paid; and

(ii) Any contract, including cost-type contracts, when cost is a significant evaluation factor (at least 20%).

5215.805-5 Field pricing support.

(S-90) Cost realism analysis.

(1) Cost realism analysis involves a summary level review of the cost portion (excluding profit/fee) of the offerors' proposals to determine if the overall costs proposed are realistic for the work to be performed. Cost realism analysis differs from the detailed cost analysis usually undertaken in a noncompetitive procurement to determine the reasonableness of the various cost elements and profit/fee to arrive at a fair and reasonable price.

(2) The purpose of cost realism analysis is to:

(i) Verify the offeror's understanding of the requirements;

(ii) Assess the degree to which the cost/price proposal reflects the approaches and/or risk assessments made in the technical proposal; and

(iii) Assess the degree to which the end cost included in the cost/price proposal accurately represents the work effort included in the technical proposal.

(3) Some examples of data and information that may be obtained to perform cost realism analysis are:

(i) Manloading (quantity and mix of labor hours); and

(ii) Engineering, labor and overhead rates.

A price analysis approach where there is adequate price history may also be a suitable and efficient means to assess cost realism. The amount of data required will be dependent upon the complexity of the procurement and the data already obtained by the contracting officer (e.g. information on recent Forward Pricing Rate Agreements (FPRAs)).

(4) Cost realism analysis shall be performed as a part of the proposal evaluation process (see 5215.605) for all competitive solicitations where a cost reimbursement contract is contemplated. For competitive solicitations contemplating a fixed price type contract, a cost realism analysis would be the exception and not the rule, although its use may be appropriate where the proposal evaluation process will encompass both a cost/price evaluation and a technical evaluation. Also, where the contracting officer suspects a "buy-in" (see FAR 3.501) or a misunderstanding of the requirements as a result of reviewing the initial offers, data and information should be obtained and a cost realism analysis performed.

(5) When cost realism data are required, the contracting officer shall not request a formal field pricing report but rather, shall request a review of only those specific areas of information necessary to allow the contracting officer to perform a cost realism analysis. For example, the contracting officer may only need to know the current or FPRA labor and/or overhead rates. In these instances, the request for information may be oral or written.

PART 5252—SOLICITATION PROVISIONS AND CONTRACT CLAUSES

2. The authjority citation for Part 5252 continues to read as follows:

Authority: 5 U.S.C. 301, 10 U.S.C. 2202, DOD Directive 5000.35.

3. Section 5252.215–9000 is added to read as follows:

5252.215–9000 Submission of Cost or Pricing Data.

As prescribed at 5215.407, insert the following provision:

Submission of Cost or Pricing Data (Nov. 1987)

(a) In is expected that this contract will be awarded based upon a determination that there is adequate price competition and therefore the offeror is not required to submit or certify cost or pricing data (SF 1411) with its proposal.

(b) If the contracting officer, after receipt of the proposals, determines that adequate price competition does not exist, the offeror shall, upon request, submit such cetified cost and pricing data deemed necessary by the contracting officer.

(End of Clause)

Alternate I (Nov. 1987). As prescribed at 5215.407, substitute the following paragraph (b):

(b) If after receipt of the proposals, the contracting officer determines that adequate price competition does not exist, the offeror shall provide certified cost and pricing data as requested by the contracting officer. The offeror shall provide the requested data within [1] _____ calendar days from the date of the contracting officer's request.

Date: December 15, 1987

W.R. Babington, Jr.,

Commander, JAGC, U.S. Navy, Federal Register Liaison Officer.

[1] To be completed by the contracting officer.

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

50 CFR Part 17

Endangered and Threatened Wildlife and Plants; Finding on Northern Spotted Owl Petition

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of petition finding.

SUMMARY: The Service announces its 12-month finding on the petition to list the northern spotted owl as an endangered species. A finding was made that listing of the owl throughout its range is not warranted. Additional data will be reviewed to monitor the owl's population status.

DATE: The finding announced in this notice was made on December 17, 1987.

ADDRESS: Information, comments or questions should be submitted to the Regional Director, Region 1, U.S. Fish and Wildlife Service, 500 NE. Multnomah Street, Suite 1692, Portland, Oregon 97232. The petition, finding, supporting data and comments are available for public inspection, by appointment, during normal business hours at the Service's Endangered Species Division at the above address.

FOR FURTHER INFORMATION CONTACT: Mr. Wayne White, Chief, Division of Endangered Species, at the above address (503/231–6131 or FTS 429–6131).

SUPPLEMENTARY INFORMATION:

Background

The Endangered Species Act of 1973, as amended (16 U.S.C. 1531 *et seq.*) requires a finding to be made within 12 months of a petition receipt for any petition accepted for review in accordance with section 4(b)(3) of the Act. In accordance with the Act, this finding determines whether or not the action requested in a petition is warranted in light of the Service's status review and all other information in our administrative record.

A petition was submitted by Green World of Cambridge, Massachusetts, requesting the listing of the northern spotted owl (*Strix occidentalis caurina*) as an endangered species. This petition was dated November 28, 1986, but was not received by the Service until January 28, 1987. A second petition requesting the listing of this species was received on August 4, 1987, from the Sierra Club Legal Defense Fund, Inc. The Service's policy is to treat subsequent petitions as comments to be considered in the process of evaluating the original petitioned action, and it has done so.

The Service made a preliminary finding July 23, 1987, that substantial data were available to indicate that the petitioned action may be warranted. The Service announced this finding and initiated a status review of the owl with a notice in the **Federal Register** (52 FR 34396; September 11, 1987). In addition, the Service's Portland Regional Office solicited information from over 800 sources. Most of the biological data on the owl's status were submitted by the Bureau of Land Management, the U.S. Forest Service, the fish and wildlife agencies of the States of Washington, Oregon, and California, and independent researchers.

The Service has conducted a thorough evaluation of the currently available data regarding the status of the northern spotted owl. The status review report was completed December 14, 1987. This review considered information presented by the petitioners, from commentors, from the affected land management agencies (both biological and management data), and from biologists studying the owl. Based upon this comprehensive study of the owl's status, the Service finds that the northern spotted owl does not warrant listing at this time. However, the Service intends to continue to utilize all of its existing authorities to help to ensure that the species does not decline to the point where listing would be warranted. The majority of the owl's habitat occurs on Federally managed lands and the Service has been working with these resource agencies for some time to monitor and protect the northern spotted owl. The Service believes that through proper management a viable population of northern spotted owls will be maintained throughout its present range.

Three subspecies of spotted owls are currently recognized by the American Ornithological Union: The northern spotted owl, the California spotted owl, and the Mexican spotted owl. For purposes of this finding the terms owl or spotted owl will refer to the northern spotted owl. The range of the northern spotted owl extends over western Washington and Oregon and south to the San Francisco Bay area in northern California. The owl has most often been found in old-growth or mature forests. The petition cited habitat destruction from commercial timber harvesting as the primary threat to the owl. As with most wildlife species, the owl has suffered habitat losses, but it is unknown how this habitat loss is affecting the subspecies' overall population or long-term viability. Though data indicate a reduction in the number of owls in areas previously logged, the owl still occurs over a large range and more owls are being found within its range due to the increase in the inventory effort.

It is undetermined how many acres of suitable owl habitat exist, since owls are being found with more frequency in a wider array of habitat types. Of the 5 to 6 million acres of old-growth and mature forest in Washington and Oregon, about 2 million acres are reserved from timber harvesting with the remainder scheduled for harvest at about 1.5 percent per year. Although exact figures are not available, the situation is similar for California. Figures are not available on acreages of younger growth forest that may be suitable habitat or may become so over time.

Fragmentation, isolation, and reduction of existing forest have resulted from timber harvesting practices. Population trend data do not yet exist to assess the long-term impacts of habitat fragmentation or reduction on the owl population. Though it is assumed that there has been a reduction in the overall numbers of birds within the northern population in relation to habitat loss within its range, historic figures do not exist and a direct correlation between habitat loss and population reduction cannot be accurately made. The potential isolation of the Olympic Peninusla habitat is a concern, although owls have been observed in the intervening lands and more data are necessary to determine the effect on the overall population. With proper management, corridors can be maintained between the Olympic Peninsula and other populations.

Questions over the recent variability in reproductive outcome and juvenile survivorship raise concerns, but insufficient data exist to determine if these are different than expected for a long-lived species. Data collected during recent poor reproductive years may affect the sensitivity of trend analyses. Population viability projections indicate that the population may be stable to declining over the long-term. The Service believes that more accurate projections can be made with the additional data which are needed and which are presently being collected. It is not felt that variability in reproduction and juvenile suvivorship are presently determinative of instability in the inventoried spotted owl population.

The Service recognizes that key data gaps exist with regard to the northern spotted owl. Competition impacts of the barred owl *(Strix varia)*, whose range is expanding into that of the northern spotted owl, are unknown and need to be studied further. Trend data are needed to determine long-term population viability. Specific biological and habitat requirements of the bird are also not completely understood, leading to wide interpretations of present data. Research and monitoring efforts have been initiated by biologists and resource agencies in recent years to gather the information to better address these issues. This information is needed as the basis for future direction in habitat management.

The U.S. Forest Service administers the largest percentage (approximately 70 percent) of the lands that are either currently occupied by or presently considered as suitable habitat for the northern spotted owl. The Forest Service's planning regulations require the agency to maintain viable populations of existing native vertebrates within National Forest areas. The agency is currently planning for the management of habitats on National Forest System lands to provide for a distribution of an adequate number of spotted owls to insure the continued existence of a well-distributed population within its present range. It is also carrying out habitat and population inventories, research, and monitoring studies on the owl, as part of the Forest Service's Spotted Owl Research, Development, and Application Program. This information will be vital to determine more clearly the long-term status of this owl and to assess and direct future habitat management efforts.

The Forest Service is preparing a final Supplemental Environmental Impact Statement concerning its management of the northern spotted owl. The preferred alternative identified through this document will guide the agency's owl management efforts. Individual forest plans are to be brought into compliance with the preferred alternative. The Fish and Wildlife Service is assigning a biologist to review the draft forest plans specifically for spotted owl concerns.

The Forest Service entered into an Interagency Agreement with the U.S. Fish and Wildlife Service on December 1, 1987, by which both agencies have agreed to coordinate efforts to support the common goal of ensuring population viability for the spotted owl. The agreement commits the Forest Service to continue efforts to inventory and monitor the owl population and requires an annual report by both agencies on the status of this species. This mutual effort will help decide future planning activities and will provide close scrutiny

VOL 52 ISS 246 DEC 23 1987 UMI

of the northern spotted owl's status. The agreement provides for emergency action if the owl's situation deteriorates, allowing for the immediate invocation of Endangered Species Act protections, including emergency listing, if necessary.

The National Park Service and the Bureau of Land Management also administer portions of the owl's habitat. National Park Service policies and practices are compatible with owl preservation. The Bureau of Land Management has instituted a plan to manage and monitor habitat to support owls. All of the involved resource agencies have been and will continue to be encouraged to work closely with the Service to develop comprehensive studies and plans for research and protection of the spotted owl. For example, the Fish and Wildlife Service will initiate interagency coordination with the Forest Service and the National Park Service to address owl habitat and biology questions for the Olympic Peninsula physiographic province.

In 1982, the Service undertook a status review of the northern spotted owl and concluded that listing it as an endangered species was not then warranted. Based on the 1987 status review conducted by the Service's Portland Regional Office, the Service continues to find that the currently available date do not support listing the owl at this time. The Service is committed to cooperation and leadership in plans and actions that will reduce the likelihood of any species becoming endangered. Based on the 1987 status review, the northern spotted owl merits continued attention and monitoring by the Service and resource management agencies. If at any time new data indicate a decline in the owl's overall population status, the Service can then use its authorities under the Endangered Species Act to increase the owl's protection status.

Finding

A finding is made that a proposed listing of the northern spotted owl is not warranted at this time. Due to the need for population trend information and other biological data, priority given by the Service to this species for further research and monitoring will continue to be high. Interagency agreements and Service initiatives support continued conservation efforts. This finding will be published in the **Federal Register** and the petitioner will be notified.

Author

This notice was prepared by Robyn Thorson, U.S. Fish and Wildlife Service, Endangered Species Division, 500 NE. Multnomah Street, Suite 1692, Portland, Oregon 97232 (503/231–6131 or FTS 429–6131).

Authority

The authority for this action is the Endangered Species Act (16 U.S.C. 1531 *et seq.*; Pub. L. 93–205, 87 Stat. 884; Pub. L. 94–359, 90 Stat. 911; Pub. L:. 95–632, 92 Stat. 3751; Pub. L. 96–159, 93 Stat. 1225; Pub. L. 97–304, 96 Stat. 1411).

DEPARTMENT OF AGRICULTURE

Forms Under Review by Office of Management and Budget

December 18, 1987.

The Department of Agriculture has submitted to OMB for review the following proposals for the collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35) since the last list was published. This list is grouped into new proposals, revisions, extensions, or reinstatements. Each entry contains the following information:

(1) Agency proposing the information collection; (2) Title of the information collection; (3) Form number(s), if applicable; (4) How often the information is requested; (5) Who will be required or asked to report; (6) An estimate of the number of responses; (7) An estimate of the total number of hours needed to provide the information; (8) An indication of whether section 3504(h) of Pub. L. 96–511 applies; (9) Name and telephone number of the agency contact person.

Questions about the items in the listing should be directed to the agency person named at the end of each entry. Copies of the proposed forms and supporting documents may be obtained from: Department Clearance Officer, USDA, OIRM, Room 404–W Admin. Bldg., Washington, DC 20250, (202) 447–2118.

Comments on any of the items listed should be submitted directly to: Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503, Attn: Desk Officer for USDA.

If you anticipate commenting on a submission but find that preparation time will prevent you from doing so promptly, you should advise the OMB Desk Officer of your intent as early as possible.

DEPARTMENT OF COMMERCE

Foreign-Trade Zones Boards

[Docket No. 44–87]

Proposed Foreign-Trade Zone, Anchorage, AK; Application and Public Hearing

An application has been submitted to the Foreign-Trade Zones Board (the Board) by the Municipality of Anchorage, Alaska, requesting authority to establish a general-purpose foreign-trade zone in Anchorage, within the Anchorage Customs port of entry. The application was submitted pursuant to the provisions of the Foreign-Trade Zones Act, as amended (19 U.S.C. 81a–81u), and the regulations of the Board (15 CFR Part 400). It was formally filed on December 15, 1987. The City is authorized to make the proposal under section 45.77.010 of the Alaska Statutes.

The proposal requests general-purpose zone status for eight parcels, totalling 994 acres, at two sites.

Site 1 (Port of Anchorage—3 parcels) would be located at the marine facilities of the Port of Anchorage and will consist of (a) 8.5 acres on Lot 12–B within the Port Industrial Park, (b) 30,000 square feet within the Port of Anchorage Transit Shed, and (c) 6,000 square feet within the Port of Anchorage Administration building.

Site 2 (Achorage International Airport—5 parcels) would consist of (a) 320 acres at the North Air Park Area, west of Postmark Drive and east of the North-South runway, (b) 135 acres at the North Apron Area, south of International Airport Road and north of the East-West runways, (c) 295 acres at the West Air Park area, west of the North-South runway and north of the East-West runways, (d) 120 acres at the South Air Park, south of the East-West runway and north of Raspberry Road, and (e) 115 acres south of Raspberry Road.

The application contains evidence of the need for zone services in the Anchorage area. Thus far, several firms have indicated an interest in using zone procedures for warehousing/distribution activity involving computer components, recreational boats, and automobiles. Manufacturing approvals would be requested from the Board on a case-by-case basis as proposed activities arise.

In accordance with the Board's regulations, an examiners committee has been appointed to investigate the application and report to the Board. The committee consists of: John J. Da Ponte, Jr. (Chairman), Director, Foreign-Trade Zones Staff, U.S. Department of Commerce, Washington, DC 20230; Duane Oveson, District Director, U.S. Customs Service, Pacific Region, 620 East 10th Avenue, Suite 101, Anchorage, Alaska 99501; and, Colonel Wilbur T. Gregory, Jr., District Engineer, U.S. Army Engineer District Alaska, P.O. Box 898, Anchorage, Alaska 99506–0898. The examiners are being assisted by Richard Lenahan, District Director, U.S. Department of Commerce, 701 C St., Anchorage, Alaska 99513.

As part of its investigation, the examiners committee will hold a public hearing on February 3, 1988 beginning at 10 a.m. (AST), in the Anchorage Municipal Assembly Chambers, Loussac

Library, 3600 Denali St., Anchorage, Alaska.

Interested parties are invited to present their views at the hearing. Persons wishing to testify should notify the Board's Executive Secretary in writing at the address below or by phone (202/377–2862) by January 22, 1988. Instead of an oral presentation, written statements may be submitted in accordance with the Board's regulations to the examiners committee, care of the Executive Secretary, at any time from the date of this notice through March 7, 1988.

A copy of the application and accompanying exhibits will be available during this time for public inspection at each of the following locations:

U.S. Department of Commerce, District Office, 701 C Street, Anchorage, Alaska 99513

Office of the Executive Secretary, Foreign-Trade Zones Board, U.S. Department of Commerce, Room 1529, 14th and Pennsylvania Avenue, NW., Washington, DC 20230

Dated: December 16, 1987.

John J. Da Ponte, Jr.,

Executive Secretary.

[FR Doc. 87–29393 Filed 12–22–87; 8:45 am]

BILLING CODE 3510–DS–M

[Docket No. 43–87]

Proposed Foreign-Trade Zone, St. Paul, AK; Application and Public Hearing

An application has been submitted to the Foreign-Trade Zones Board (the Board) by the City of St. Paul, Alaska, requesting authority to establish a general-purpose foreign-trade zone on St. Paul Island. The application was submitted pursuant to the provisions of the Foreign-Trade Zones Act, as amended (19 U.S.C. 81a–81u), and the regulations of the Board (15 CFR Part 400). It was formally filed on December 14, 1987. The City is authorized to apply for a foreign-trade zone under section 45.77.010 of the Alaska Statutes.

The municipality of St. Paul encompasses St. Paul Island, one of the two inhabitated Pribilof Islands in the Bering Sea, off the southwest coast of Alaska, some 275 miles northwest of the City of Unalaska (Dutch Harbor). The island covers 44 square miles and has a population of 750 people. The St. Paul Municipal Airport was designated a "user fee" airport by the U.S. Customs Service in September 1987.

The proposal requests general-purpose zone status for four sites (629 acres). Site 1 (Harbor Site—386 acres) adjoins Village Cove Harbor and the Salt Lagoon. Site 2 (Gravel Pit Site—93 acres) adjoins the Harbor Site, on its north. Site 3 (Airport Site—70 acres) is immediately adjacent to the west side of the St. Paul Municipal Airport. Site 4 (LORAN Site—80 acres) is located on the Airport road on a site adjoining the base camp of ARCO, Exxon and Amoco, near the LORAN navigation facility.

The application contains evidence of the need for a zone to assist the City in its economic development efforts. Several firms have indicated an interest in using zone procedures for warehousing/distribution activity involving ships stores, spare parts for vessels, and oil and gas production equipment. Also, the City is engaged in discussions with two foreign firms interested in establishing fish processing plants primarily for export operations, if they can operate under foreign zone procedures. Zone procedures would be used mainly to obtain exemption from Customs duties on the ingredients and packaging materials used in processing fish for export (foreign-trade zones are subject to the Nicholson Act). Requests for manufacturing approvals would be made to the Board on a case-by-case basis as other proposed activities arise.

In accordance with the Board's regulations, an examiners committee has been appointed to investigate the application and report to the Board. The committee consists of: John J. Da Ponte, Jr. (Chairman), Director, Foreign-Trade Zones Staff, U.S. Department of Commerce, Washington, DC 20230; Duane Oveson, District Director, U.S. Customs Service, Pacific Region, 620 East 10th Avenue, Suite 101, Anchorage, Alaska 99501; and, Colonel Wilbur T. Gregory, Jr., District Engineer, U.S. Army Engineer District Alaska, P.O. Box 898, Anchorage, Alaska 99506–0898. the examiners are being assisted by Richard Lenahan, District Director, U.S. Department of Commerce, 701 C St., Anchorage, Alaska 99513.

As part of its investigation, the examiners committee will hold a public hearing on February 2, 1988, beginning at 10 a.m. (AST), at the Anchorage Legislative Affairs Office, 3111 C St., Anchorage, Alaska. The hearing will be conducted under a simultaneous teleconference format, which will allow St. Paul Island residents to participate in the proceeding at the City Manager's Office, City Hall, St. Paul. There will also be a teleconference connection to the hearing from Room 121, Capitol Bldg., Juneau, Alaska 99811.

Interested parties are invited to present their views at the hearing, including comments as to whether a Customs "user-fee" airport may be considered the equivalent of a port of entry under the FTZ Act and as to environmental impact. Persons wishing to testify should notify the Board's Executive Secretary in writing at the address below or by phone (202/377–2862) by January 22, 1988. Instead of an oral presentation, written statements may be submitted in accordance with the Board's regulations to the examiners committee, care of the Executive Secretary, at any time from the date of this notice through March 4, 1988.

Copies of the application and accompanying exhibits will be available during this time for pubic inspection at each of the following locations:

City Manager's Office, City Hall, St. Paul, Alaska

U.S. Department of Commerce, District Office, 701 C Street, Room B–116, Anchorage, Alaska 99513

Office of the Executive Secretary, Foreign-Trade Zones Board, U.S. Department of Commerce, Room 1529, 14th and Pennsylvania Avenue, NW., Washington, DC 20230

Dated: December 18, 1987.

John J. Da Ponte, Jr.,

Executive Secretary.

International Trade Administration

Applications for Duty-Free Entry of Scientific Instruments; Lawrence Berkeley Laboratory et al.

Pursuant to section 6(c) of the Educational, Scientific and Cultural Materials Importation Act of 1966 (Pub. L. 89–651; 80 Stat. 897; 15 CFR Part 301), we invite comments on the question of whether instruments of equivalent scientific value, for the purposes for which the instruments shown below are intended to be used, are being manufactured in the United States.

Comments must comply with § 301.5(a)(3) and (4) of the regulations and be filed within 20 days with the Statutory Import Programs Staff, U.S. Department of Commerce, Washington, DC 20230. Applications may be examined between 8:30 a.m. and 5:00 p.m. in Room 1523, U.S. Department of Commerce, 14th and Constitution Avenue, NW., Washington, DC.

Docket No.: 86–304R–2. *Applicant:* Lawrence Berkeley Laboratory, Division of Biology and Medicine, 1 Cyclotron Road, Berkeley, CA 94720. *Instrument:* Circular Dichroism Spectropolarimeter, Model J–600A. *Manufacturer:* JASCO, Japan. Original notice of this resubmitted application was published in the **Federal Register** of May 14, 1987.

Docket No.: 87–104R. *Applicant:* Boston University, Department of Chemistry, 390 Commonwealth Avenue, Boston, MA 02215. *Instrument:* Rapid Kinetics Accessory for UV-Visible Spectrophotometer, Model SFA–11. *Manufacturer:* Hi-Tech Scientific, United Kingdom. Original notice of this resubmitted application was published in the **Federal Register** of March 13, 1987.

Docket No.: 87–105R. *Applicant:* University of Texas at Austin, Department of Chemistry, Austin, TX 78716. *Instrument:* CD and LD Spectropolarimeter, Model J–600. *Manufacturer:* Jasco Inc., Japan. Original notice of this resubmitted application was published in the **Federal Register** of March 13, 1987.

Docket No.: 87–140R. *Applicant:* Rutgers University, Department of Psychology, New Brunswick, NJ 08903. *Instrument:* Magnetic Field-Sensor Coil Eye Movement Monitoring Instrument, Model 3000. *Manufacturer:* Skalar Instrumenten B.V., The Netherlands. Original notice of this resubmitted application was published in the **Federal Register** of April 15, 1987.

Docket No.: 87–211R. *Applicant:* Princeton University, Chemistry Department, Princeton, NJ 08544. *Instrument:* Surface Science Facility and Accessories. *Manufacturer:* University of Waterloo, Canada. Original Notice of this resubmitted application was published in the **Federal Register** of July 17, 1987.

Docket No.: 88–034. *Applicant:* Bethesda Eye Institute, St. Louis University School of Medicine, 3655 Vista Ave., St. Louis, MO 63110. *Instrument:* Electron Microscope, Model JEM–1200EX. *Manufacturer:* JEOL, Ltd., Japan. *Intended Use:* The instrument will be used for the study of the substructural morphology of ocular tissues including the retina, choroid, vitreous body, lens and cornea. *Application Received by Commissioner of Customs:* November 13, 1987.

Docket No.: 88–035. *Applicant:* University of Utah, Department of Geology and Geophysics, 719 William Browning Building, Salt Lake City, UT 84112. *Instrument:* Electron Microprobe, Model CAMEBAX SX 50. *Manufacturer:* Cameca, France. *Intended Use:* Studies of rocks, minerals, natural glass, and synthetic inorganic compounds. The data obtained with this instrument forms the basis for studying the formation of the various rocks and minerals on the Earth and in ore deposits and other mineral occurrences. In addition, the instrument will be used in the course "Electron Microprobe Analysis" to teach the students the proper techniques for performing analyses on their individual specimens which they are investigating. *Application Received by Commissioner of Customs:* November 13, 1987.

Docket No.: 88–036. *Applicant:* University of Oklahoma, 660 Parrington Oval, Norman, OK 73109. *Instrument:* Scanning Electron Microscope and Accessories, Model JSM–880. *Manufacturer:* JEOL, Ltd., Japan. *Intended Use:* The instrument will be used to examine biological, ceramic, chemical, geological and metallurgical specimens to determine their superficial characteristics and elemental composition. In addition, the instrument will be used for classroom and laboratory instruction, video-taped instruction, experiments and supervised hands-on equipment usage in various botany courses. *Application Received by Commissioner of Customs:* November 13, 1987.

Docket No.: 88–037. *Applicant:* California State University, Chico, College of Natural Sciences, Department of Biology, Chico, CA 95929. *Instrument:* Electron Microscope, Model H–300. *Manufacturer:* Hitachi Scientific Instruments, Japan. *Intended Use:* The instrument will be used for science-related educational purposes in the following courses: Bio 295: Electron Microscopy, Bio 395: Electron Microscope Operation Laboratory, Bio 396: Biological Preparations for Electron Microscopy Preparation and Bio 399T: Master's Thesis. *Application Received by Commissioner of Customs:* November 16, 1987.

Docket No: 88–038. *Applicant:* University of California, Lawrence Livermore National Laboratory, P.O. Box 5012, L–650, Livermore, CA 94550. *Instrument:* Streak Camera, Model Imacon 500. *Manufacturer:* Hadland Photonics, United Kingdom. *Intended Use:* The instrument will be used to study the picosecond response times of photoconductors, laser diode bandwidth in the 2–6 GHz range, properties of lithium niobate integrated optical waveguides and material dispersion in optical waveguides/optical fibers. *Application Received by Commissioner of Customs:* November 17, 1987.

Docket No.: 88–039. *Applicant:* U.S. Department of Energy, Argonne National Laboratory, 9700 South Cass Avenue, Argonne, IL 60439–4812. *Instrument:* Stopped-flow Spectrophotometer, Model SU–40A. *Manufacturer:* Hi-Tech Scientific, United Kingdom. *Intended Use:* The instrument will be used for studies of the 5f-transition elements, U, Np, Pu, Am, and Cm. The primary objectives of these studies are to provide data which will expand the phenomenological base of actinide ion oxidation-reduction and substitution reactions. In addition, linear free energy relationships will be explored within the theoretical basis of the Moreus formalism. *Application Received by Commissioner of Customs:* November 18, 1987.

Docket No: 88–040. *Applicant:* New York University, Department of Chemistry, 4 Washington Place, New York City, NY 10003. *Instrument:* Stopped Flow Module, Model SFM–3. *Manufacturer:* Bio-Logic, France. *Intended Use:* The instrument will be used for studies of nucleic acids and proteins during experiments which involve solvent transfers from D_20 to H_20 to detect exchange of proteins. *Application Received by Commissioner of Customs:* November 19, 1987.

Docket No: 88–041. *Applicant:* University of Arizona, Tuscon, AZ 85721. *Instrument:* Stopped-Flow Sample Handling Unit, Model SF–51. *Manufacturer:* Hi-Tech Scientific, United Kingdom. *Intended Use:* The instrument will be used to measure the kinetic properties of proteins. The systems to be studied are the kinetics of electron transfer between biological redox proteins with the goal of understanding the mechanism and kinetics of ATP hydrolysis by cardiac myosin from normal and diseased tissue. The goal of these studies is to understand the molecular basis of the physiological alterations induced by heart disease. *Application Received by Commissioner of Customs:* November 19, 1987.

Frank W. Creel,

Director, Statutory Import Programs Staff.

National Oceanic and Atmospheric Administration

Endangered Species; Proposed Modification of Permit; Southwest Fisheries Center NMFS (P77#18)

Notice is hereby given that the Southwest Fisheries Center, National Marine Fisheries Service, P.O. Box 271, La Jolla, California 92038, has requested a modification of Permit No. 555 issued on June 27, 1987 (51 FR 23456), under the authority of the Marine Mammal Protection Act of 1972 (16 U.S.C. 1361–1407), the Endangered Species Act of 1973 (16 U.S.C. 1531–1543), the Regulations Governing the Taking and Importing of Marine Mammals (50 CFR Part 216) and the regulations governing

endangered species permits (50 CFR Parts 217 through 222).

The Permit Holder is requesting authorization to test temporary and permanent marking techniques. For temporary marking purposes the Holder proposes to test commercial hair lighteners and commercial livestock dyes or paint. For permanent marking, the Holder proposes to test different tags for their retention, durability, and legibility over time. Cryogenic marking will also be tested.

Concurrent with the publication of this notice in the Federal Register, the Secretary of Commerce is forwarding copies of the modification request to the Marine Mammal Commission and the Committee of Scientific Advisors.

Written data or views, or requests for a public hearing on this proposed modification should be submitted to the Assistant Administrator for Fisheries, National Marine Fisheries Service, U.S. Department of Commerce, Washington, DC 20235, within 30 days of the publication of this notice. Those individuals requesting a hearing should set forth the specific reasons why a hearing on this particular Modification would be appropriate. The holding of such hearing is at the discretion of the Assistant Administrator for Fisheries.

Documents submitted in connection with the above modification are available for review by interested persons in the following offices:

Office of Protected Resources and Habitat Programs, National Marine Fisheries Service, 1825 Connecticut Avenue NW., Rm 805, Washington, DC; and

Director, Southwest Region, National Marine Fisheries Service, 300 South Ferry Street, Terminal Island, California 90731–7415.

Dr. Nancy Foster,

Director, Office of Protected Resources and Habitat Programs, National Marine Fisheries Service.

Date: December 15, 1987.

BILLING CODE 3510-22-M

Marine Mammals; Application for Permit; Horizons West Ltd. d.b.a. Marine Life Aquarium (P158C)

Notice is hereby given that an Applicant has applied in due form for a Permit to take marine mammals as authorized by the Marine Mammal Protection Act of 1972 (16 U.S.C. 1361–1407), and the Regulations Governing the Taking and Importing of Marine Mammals (50 CFR Part 216).

1. *Applicant:*

a. *Name:* Horizons West Ltd.

b. *Address:* Keystone Route Box 385, Rapid City, South Dakota 57701.

2. *Type of Permit:* Public Display.

3. *Name and Number of Marine Mammals:* Atlantic bottlenose dolphin *(Tursiops truncatus)*—2.

4. *Type of Take:* Capture/Maintain.

5. *Location of Activity:* West Coast of Florida.

6. *Period of Activity:* 2 Years.

The arrangements and facilities for transporting and maintaining the marine mammals requested in the above described application have been inspected by a licensed veterinarian, who has certified that such arrangements and facilities are adequate to provide for the well-being of the marine mammals involved.

Concurrent with the publication of this notice in the Federal Register, the Secretary of Commerce is forwarding copies of this application to the Marine Mammal Commission and the Committee of Scientific Advisors.

Written data or views, or requests for a public hearing on this application should be submitted to the Assistant Administrator for Fisheries, National Marine Fisheries Service, U.S. Department of Commerce, Washington, DC 20235, within 30 days of the publication of this notice. Those individuals requesting a hearing should set forth the specific reasons why a hearing on this particular application would be appropriate. The holding of such hearing is at the discretion of the Assistant Administrator for Fisheries.

All statements and opinions contained in this application are summaries of those of the Applicant and do not necessarily reflect the views of the National Marine Fisheries Service.

The Permit is available for review by interested persons in following offices:

Office of Protected Resources and Habitat Programs, National Marine Fisheries Service, 1825 Connecticut Avenue NW., Rm 805, Washington, DC;

Director, Southeast Region, National Marine Fisheries Service, 9450 Koger Boulevard, St. Petersburg, Florida 33702; and

Director, Northwest Region, National Marine Fisheries Service, 7600 Sand Point Way NE., BIN C15700, Seattle, Washington, 98115.

Dr. Nancy Foster,

Director, Office of Protected Resources and Habitat Programs, National Marine Fisheries Service.

Date: December 15, 1987.

BILLING CODE 3510-22-M

Marine Mammals; Proposed Permit Modification: The North Wind Undersea Institute (P539A)

Notice is hereby given that the North Wind Undersea Institute, 610 City Island Avenue, City Island, New York 10464 has requested a modification of Permit No. 541 issued on February 19, 1986 (51 FR 7485), under the authority of the Marine Mammal Protection Act of 1972 (16 U.S.C. 1361–1407), and the Regulations Governing the Taking and Importing of Marine Mammals (50 CFR Part 216).

Permit No. 541 authorized the taking of three (3) rehabilitated beached/stranded harbor seals (*Phoca vitulina*) for public display.

The Permit Holder is requesting authorization to conduct a comprehensive research program that will measure and document the cognitive and behavioral skills of the three harbor seals held under the Permit, and their ability to perform useful functions under realistic conditions. The Applicant anticipates that during this research the seals eventually will be acclimated to, and that research would be conducted for short periods of time in, open water.

Concurrent with the publication of this notice in the Federal Register, the Secretary of Commerce is forwarding copies of the modification request to the Marine Mammal Commission and the Committee of Scientific Advisors.

Written data or views, or requests for a public hearing on this modification should be submitted to the Assistant Administrator for Fisheries, National Marine Fisheries Service, U.S. Department of Commerce, Washington, DC 20235, within 30 days of the publication of this notice. Those individuals requesting a hearing should set forth the specific reasons why a hearing on this particular Modification would be appropriate. The holding of such hearing is at the discretion of the Assistant Administrator for Fisheries.

All statements and opinions contained in this modification are summaries of those of the Applicant and do not necessarily reflect the views of the National Marine Fisheries Service.

Documents submitted in connection with the above modification are available for review by interested persons in the following offices:

Office of Protected Resources and Habitat Programs, National Marine Fisheries Service, 1825 Connecticut Avenue NW., Rm 805, Washington, DC; and

Director, Northeast Region, National Marine Fisheries Service, 14 Elm Street, Federal Building, Gloucester, Massachusetts 01930–3799.

Date: December 15, 1987.

Dr. Nancy Foster,

Director, Office of Protected Resources and Habitat Programs, National Marine Fisheries Service.

BILLING CODE 3510-22-M

COMMODITY FUTURES TRADING COMMISSION

Chicago Board of Trade; Proposed Amendments Relating to the GNMA Futures Contract and a Proposal To Recommence Trading in That Contract

AGENCY: Commodity Futures Trading Commission.

ACTION: Notice of proposed contract market rule changes.

SUMMARY: The Chicago Board of Trade ("CBT" or "Exchange") has submitted for the GNMA futures contract a number of proposed changes in the standards and procedures relating to the selection of the coupons used as the basis for cash settlement of the contract and to the listing of contract months. In accordance with section 5a(12) of the Commodity Exchange Act and acting pursuant to the authority delegated by Commission Regulation 140.96, the Director of the Division of Economic Analysis ("Division") of the Commodity Futures Trading Commission ("Commission") has determined, on behalf of the Commission, that these proposals are of major economic significance. In addition, the CBT has submitted a proposal to recommence trading in the GNMA futures contract, which now is dormant within the meaning of Commission Regulation 5.2.[1] On behalf of the Commission, the Division is requesting comment on these proposals.

DATE: Comments must be received on or before January 22, 1988.

ADDRESS: Interested persons should submit their views and comments to Jean A. Webb, Secretary, Commodity Futures Trading Commission, 2033 K Street NW., Washington, DC 20581. Reference should be made to the amendments to the CBT GNMA futures contract.

FOR FURTHER INFORMATION CONTACT: Naomi Jaffe, Division of Economic Analysis, Commodity Futures Trading Commission, 2033 K Street NW., Washington, DC 20581 (202) 254–7227.

SUPPLEMENTARY INFORMATION: The Exchange submitted proposed amendments to the GNMA futures contract that would:.

(1) Limit the number of contract months listed to five consecutive months, rather than the current contract provisions for listing seven consecutive months and the March quarterly cycle months for a 42-month period;

(2) Change the last day of trading to the Friday before the third Wednesday of the delivery month from the Monday before the third Wednesday of the delivery month;

(3) Specify that the designated coupon will be that coupon trading closest to but not greater than par, instead of that coupon which a majority of the surveyed GNMA dealers specifies as the coupon trading nearest to par;

(4) Provide for procedures under which the Exchange, on a monthly basis, prior to listing contracts expiring two, three, and four months later, would select the coupon that will be used for determining the cash settlement price of such contracts, instead of listing contract months and subsequently selecting the coupon for each contract month at least 45 days prior to cash settlement;

(5) Since more than one coupon futures may be trading for a single contract month, clarify that, for each contract month, futures contracts based on different coupons will be settled under the cash settlement procedures on the same day, that is, the last day of trading;

(6) Change the price basis to a single GNMA coupon rather than the average of two coupons;

(7) Amend the cash settlement pricing procedures to use the median instead of the average of the fifteen quoted prices;

(8) Empower the Board or its designated Committee to conduct an extraordinary coupon determination in addition to regularly scheduled determinations;

(9) Change the name of the contract to mortgage-backed futures;

(10) Modify contract language to permit the Exchange to trade during the evening session.

With regard to these proposals to amend the contract, the CBT noted that:

The proposed revisions are intended to enhance the usefulness of the futures for hedging by cash market participants. Basing the settlement on a single coupon provides the cash market with a risk shifting tool that incorporates as few distortions as possible. Cash market traders, investors and mortgage banking operations all deal in specific securities and futures with transparent pricing should allow them to hedge with a much clearer basis relationship.

Many mortgage bankers and dealers conduct their business in the coupon trading right around par. The present proposal will assure that the so-called current coupon is available for trading and will be available for a long period to provide for orderly liquidation of hedges.

The GNMA futures contract is not currently listed for trading and is dormant under Commission Regulation 5.2. Under Regulation 5.2, an exchange must submit for Commission review and approval, pursuant to section 5a(12) of the Commodity Exchange Act (Act) and CFTC Regulation 1.41(b), an appropriate bylaw, rule, regulation or resolution to recommence trading in a dormant contract. Accordingly, the Exchange has submitted, pursuant to section 5a(12) of the Act and Commission Regulation 1.41(b), a proposal to list additional months in the contract.

The Commission is seeking comment on the proposed amendments and with respect to the CBT's proposal to recommence trading in the contract.

Copies of the proposed amendments will be available for inspection at the Office of the Secretariat, Commodity Futures Trading Commission, 2033 K Street NW., Washington, DC 20581. Copies of the amended terms and conditions can be obtained through the Office of the Secretariat by mail at the above address or by phone at (202) 254–6314.

The materials submitted by the Exchange in support of the proposed amendments may be available upon request pursuant to the Freedom of Information Act (5 U.S.C. 552) and the Commission's regulations thereunder (17 CFR Part 145 (1987)). Requests for copies of such materials should be made to the FOI, Privacy and Sunshine Acts Compliance Staff of the Office of the Secretariat at the Commission's headquarters in accordance with 17 CFR 145.7 and 145.8.

Any person interested in submitting written data, views or arguments on the proposed amendments should send such comments to Jean A. Webb, Secretary, Commodity Futures Trading Commission, 2033 K Street NW., Washington, DC, by the specified date.

Issued in Washington, DC, on December 18, 1987.

Paula A. Tosini,

Director, Division of Economic Analysis.

[FR Doc. 87–29402 Filed 12–22–87; 8:45 am]

BILLING CODE 6351-01-M

[1] The GNMA (CDR) futures contract is currently listed for trading at the CBT.

Minneapolis Grain Exchange; Proposed Amendments Relating to the High Fructose Corn Syrup-55 Futures Contract

AGENCY: Commodity Futures Trading Commission.

ACTION: Notice of proposed contract market rule changes.

SUMMARY: The Minneapolis Grain Exchange ("MGE" or "Exchange") has proposed major rule amendments for the High Fructose Corn Syrup-55 (HFCS–55) futures contract. The principal proposed amendments include the following changes: A redefinition of the par delivery area; a modification of delivery procedures; a provision for delivery at the seller's plant at the buyer's election; an increase in the number of trading months listed per year; a decrease in the daily premium charge for outstanding shipping certificates; a change in the specification of the trading unit; and amendments to the criteria governing the acceptability of approved bulk break stations and HFCS–55 production plants.

In accordance with section 5a(12) of the Commodity Exchange Act ("Act") and acting pursuant to the authority delegated by Commission Regulation 140.96, the Director of the Division of Economic Analysis of the Commodity Futures Trading Commission ("Commission") has determined, on behalf of the Commission, that the proposals are of major economic significance and that, accordingly, publication of the proposals is in the public interest, will assist the Commission in considering the views of interested persons, and is consistent with the purposes of the Commodity Exchange Act.

DATE: Comments must be received on or before January 22, 1988.

ADDRESS: Interested persons should submit their views and comments to Jean A. Webb, Secretary, Commodity Futures Trading Commission, 2033 K Street, NW., Washington, DC 20581. Reference should be made to the MGE HFCS–55 futures contract rule amendments.

FOR FURTHER INFORMATION CONTACT: Fred Linse, Division of Economic Analysis, Commodity Futures Trading Commission, 2033 K Street, NW., Washington, DC 20581 (202) 254–7303.

SUPPLEMENTARY INFORMATION: The MGE is proposing to modify the specifications regarding futures delivery of HFCS–55. MGE rules specify that delivery must be made at approved bulk break stations located within the Chicago "Intrastate, Industrial, Commercial and Terminal Area," or within the city limits of Gary or Hammond, Indiana. All deliveries are at par. Delivery costs to approved bulk break stations must be pre-paid by the seller.[1]

The proposed amendments would give the buyer two means of taking futures delivery. The buyer could require the seller to deliver HFCS–55 to an address designated by the buyer within Cook County, Illinois,[2] or the buyer could choose to accept HFCS–55 f.o.b. at the seller's production facility. Deliveries at the seller's production facilities would be subject to a discount of $0.25 per pound.

The MGE indicates that the proposed amendments will increase the number of marketing options available to the buyer of HFCS–55 shipping certificates and will ensure the acceptability to soft drink bottlers of HFCS–55 delivered against HFCS–55 shipping certificates. The Exchange also states that the proposal would "rectify a dual price and dual quality problem" in a recent delivery period. According to the MGE, "the f.o.b. bulk break stations delivery created a dual tier of HFCS–55 pricing on the board."

The MGE's proposed amendments also would provide for the listing for trading months for all calendar months up to eighteen months out from the current spot month. Currently, the trading months for HFCS–55 futures contracts are: March, May, July, September, and December up to eighteen months out from the current month.

According to the Exchange, industry participants indicated that the current trading month cycle which corresponds to "corn months" is not always adequate for the HFCS Market. It was noted that "often times quarterly pricing negotiations which take place in the cash market tend to negate the efficacy of the futures pricing mechanism rather than supplement its efficient development. This is due to the fact that bottlers are often booked forward for 90 days and this creates particular problems for March delivery, May delivery, September delivery and occasionally in December. Bottlers have indicated a preference for delivery months that complement their cash negotiating periods more closely."

The MGE also is proposing amendments to its rules governing the acceptability of bulk break stations and production plants for delivery. Current rules require that HFCS–55 delivered at bulk break stations meet certain quality standards, and that the bulk break stations be located in the par delivery area, handle HFCS–55, and meet basic health standards. The proposals would require, in addition, that product delivered at HFCS–55 production facilities and HFCS–55 delivered through bulk break stations to locations in Cook County be acceptable to 75 percent of the Chicago soft drink market. The MGE proposes to poll major soft drink bottlers in Chicago on an annual basis to ensure that all eligible delivery facilities meet this standard.

The MGE proposes to change the HFCS–55 trading unit from 48,000 pounds, commercial basis, to 37,000 pounds, dry basis.[3] In conjunction with this change, the MGE is proposing to change the minimum price fluctuation from $0.01 per hundredweight ($4.80 per contract) to $0.02 per hundredweight ($7.40 per contract). The futures contract's maximum daily price fluctuation trading limits would not be changed. However, since the pricing basis would be stated on a "dry" rather than a "commercial" basis, the value of a limit move would be reduced to $370 from $480 per contract.

The MGE noted that the purpose for this amendment is to change the trading unit to more correctly correspond to the cash market practice of quoting prices on a dry solids weight basis rather than the present commercial basis. The Exchange further noted that industry participants have noted that this might be a beneficial change to the contract and would help trading of the contract given that the main users of 55–HFCS are bottlers who quote all their purchases in the cash market on a dry weight basis.

The MGE is proposing to decrease the daily premium for an outstanding shipping certificate from $0.0003 per pound to $0.00015 per pound. The Exchange justified this proposal by stating that:

* * * [Buyers] felt that such a charge was prohibitive from their standpoint, because there is presently no such penalty in the cash market. They would be discouraged from trading if they had to take delivery and pay $14.40 per contract per day which over 30 days amounted to $432.00 per truck or at [$]12.00/cwt. HFCS would amount to a loss of 13.33% ($5,760=worth of contract truck) of the total value of their contract per delivery period * * *. Although it is a disincentive to buy side participation, sellers noted that storage in a jumbo rail tanker costs them somewhere in the neighborhood of $700.00 per month or $175.00 per tank truck (although tank trucks do not act as storage tanks, 4 tank trucks are the equivalent of one jumbo). Sellers felt that .015/cwt was reasonable as a "cost of storage premium" as it calculates out $700.00=one jumbo/mo. divided by 4=$175.00 divided by 30 days=[$]5.83/day per truck. This is slightly less than [$]7.20 or [$].015/cwt/day.

The MGE is also proposing a requirement that all tank trucks used in futures contract deliveries of HFCS–55 must be sealed in accordance with commercial practices. The Exchange stated that the purpose for this proposed provision is "to provide a clearer understanding and guarantee to the buyer by ensuring that normal commercial quality practices regarding tank truck and rail tanker seals follows through into futures deliveries."

The MGE proposes to implement the proposed amendments on a date specified by the MGE Board of Directors following Commission approval. The proposed amendments will apply only to delivery months which have no open interest at the time the amendments are implemented.

The Commission has determined that publication of the proposed amendments is in the public interest, will assist it in considering the view of interested persons, and is consistent with the purposes of the Commodity Exchange Act.

Copies of the proposed amendments to the terms and conditions of the HFCS–55 futures contract will be available for inspection at the Office of the Secretariat, Commodity Futures Trading Commission, 2033 K Street NW. Washington, DC 20581. Copies of the terms and conditions may be obtained through the Office of the Secretariat by mail at the above address or by phone at (202) 254–6314. Other materials submitted by the MGE in support of the proposed amendments may be available upon request pursuant to the Freedom of Information Act (5 U.S.C. 552) and the Commission's regulations thereunder (17 CFR Part 145 (1987)), except to the extent that they are entitled to confidential treatment as set forth in 17 CFR 145.5 and 145.9. Requests for copies of such materials should be made to the FOI, Privacy and Sunshine Acts Compliance Staff of the Office of the Secretariat at the Commission's headquarters in accordance with 17 CFR 145.7 and 145.8.

Any person interested in submitting written data, views or arguments on the proposed amendments should send such comments to Jean A. Webb, Secretary, Commodity Futures Trading Commission, interest, will assist the Commission in considering the views of interested persons, and is consistent with the purposes of the Commodity Exchange Act.

DATE: Comments must be received on or before January 22, 1988.

ADDRESS: Interested persons should submit their views and comments to Jean A. Webb, Secretary, Commodity Futures Trading Commission, 2033 K Street NW., Washington, DC 20581. Reference should be made to the MGE HFCS–55 futures contract rule amendments.

FOR FURTHER INFORMATION CONTACT: Fred Linse, Division of Economic Analysis, Commodity Futures Trading Commission, 2033 K Street NW., Washington, DC 20581 (202) 254–7303.

SUPPLEMENTARY INFORMATION: The MGE is proposing to modify the specifications regarding futures delivery of HFCS–55. MGE rules specify that delivery must be made at approved bulk break stations located within the Chicago "Intrastate, Industrial, Commercial and Terminal Area," or within the city limits of Gary or Hammond, Indiana. All 2033 K Street NW., Washington, DC, 20581, by the specified date.

Issued in Washington, DC, on December 16, 1987.

Paula A. Tosini,

Director, Division of Economic Analysis.

[FR Doc. 87–29403 Filed 12–22–87; 8:45 am]

BILLING CODE 6351–01–M

---

[1] Under certain conditions, the buyer may declare a destination other than an approved bulk break station in Chicago, Illinois. To be eligible for this delivery alternative, the buyer and seller must negotiate a freight charge for delivery to the location other than Chicago, Illinois, within two business days of the cancellation of the shipping certificates. Otherwise, delivery will be made to approved break stations in Chicago, Illinois.

[2] The contract would continue to provide for the negotiation of another destination as described in footnote 1 above.

[3] 48,000 pounds, commercial basis, of HFCS–55 is equivalent to one tank truck filled with HFCS–55. The par (or average) solids content for HFCS–55 is 77 percent. Thus, the approximate dry basis equivalent of 48,000 pounds, commercial basis, is 37,000 pounds, dry weight.

DEPARTMENT OF DEFENSE

Office of the Secretary

Public Information Collection Requirement Submitted to OMB for Review

SUMMARY: The Department of Defense has submitted to OMB for review the following proposal for the collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35). Each entry contains the following information: (1) Type of submission; (2) Title of Information Collect and Form Number, if applicable; (3) Abstract statement of the need for the uses to be made of the information collected; (4) Type of Respondent; (5) An estimate of the number of responses; (6) An estimate of the total number of hours needed to provide the information; (7) To whom comments regarding the information collection are to be forwarded; and (8) The point of contact from whom a copy of the information proposal may be obtained.

Extension

Department of Defense Industrial Facility Survey Industrial Preparedness Planning Program (DD Form 1519–2)

The DD Form 1519–2 is used by Department of Defense officials to record production capabilities and physical properties of privately owned facilities. The data obtained is used to plan for effective utilization of the plant during mobilization.

Responses: 15,700.

Burden hours: 31,400.

OMB Desk Officer: Mr. Edward Springer.

Written comments and recommendations on the proposed information collection should be sent to Mr. Edward Springer at Office of Management and Budget, Desk Officer, Room 3235, New Executive Office Building, Washington, DC 20503.

DoD Clearance Officer: Mrs. Pearl Rascoe-Harrison.

A copy of the information collection proposal may be obtained from Mrs. Pearl Rascoe-Harrison at WHS/DIOR, 1215 Jefferson Davis Highway, Suite 1204, Arlington, Virginia 22202–4302, telephone 202/746–0933.

Linda Bynum,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

BILLING CODE 3810-01-M

Department of the Army

Record of Decision; Site Selection for Binary Munitions Chemical Facilities

AGENCY: Department of the Army, DOD.

ACTION: Availability of Decision Memorandum.

SUMMARY: This announces the availability of a Decision Memorandum regarding the site selection for construction and operation of binary munitions chemical facilities at Pine Bluff Arsenal (PBA), Pine Bluff, Arkansas. The memorandum is the Record of Decision regarding the Final Supplemental Environmental Impact Statement on the Binary Chemical Munitions Program QL and DC Production Facilities.

SUPPLEMENTARY INFORMATION: On December 16, 1987 the Under Secretary of the Army approved the selection of PBA as the site for production of chemicals which are used in binary munitions manufacturing and are not available in quantity from commercial sources. These chemicals will be used in manufacturing three binary munition systems: An artillery projectile, a multiple launch rocket warhead and an aerial bomb. The two chemicals for which production plants are needed are methylphosphonic dichloride (DC), a feedstock used in making methylphosphonic difluoride (DF), the binary precursor for the projectile and rocket warhead; and O-(2-diisopropylaminoethyl) O'-ethylmethylphosphonite (QL), a precursor for the bomb. DF production will be continued at PBA in an existing Army plant. The Army is establishing a production base to fulfill its mission of acquiring, storing and maintaining binary munitions to meet the national security requirement to modernize our chemical warfare deterrent stockpile. The range of alternatives considered in the Army's decision analysis included five candidate sites for DC. Three of these sites were also considered for QL production. Industry, as a part of the Army's solicitation process, was allowed to nominate other environmentally suitable and commercially visable sites. The other sites considered were:

—Lake chalres (LC), Louisiana, a commercial site for DC. LC was withdrawn by the owner-operator for business reasons.

—Phosphate Development Works (PDW), Muscle Shoals, Alabama, a government site for DC, located on a Tennessee Valley Authority installation. PDW was withdrawn by TVA for business reasons.

—West Helena (WH), Arkansas, a commercial site for DC and OL. WH was withdrawn by the owner-operator for business reasons.

—Newport Army Ammunition Plant (NAAP), Indiana, a government site for DC and QL. This site was found to be environmentally suitable but was not the best choice from a program management perspective. No additional commercial alternative sites were identified as a result of the Army's solicitation process. A "No Action" alternative was eliminated because the Army's mission could not be accomplished. Pine Bluff Arsenal was selected because it is environmentally suitable and has significant advantages for government management including a less complicated management chain; a reduced cost growth and schedule delay risk; lesser requirements for transportation of materials in the public domain; and opportunities for better coordinated use resources and labor.

The Decision Memorandum summarizes the environmental and acquisition management factors considered and measures planned to minimize environmental effects. Interested individuals may obtain copies of this Decision Memorandum by contacting the Office of the Project Manager for Binary Munitions. ATTN: Mr. George T. Balunis (AMCPEO-CNB), Aberdeen Proving Ground, MD 21010-5401. Telephone (301) 671-3351.

Robert A. Stern,

Washington Representative, Program Executive Officer, Chemical/Nuclear.

BILLING CODE 3710-08-M

Army Science Board; Closed Meeting

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463), announcement is made of the following Committee Meeting:

Name of the Committee: Army Science Board (ASB).

Dates of Meeting: 12 and 13 January 1988.

Times of Meetings:

0900-1630 hours, 12 January 1988
0800-1715 hours, 13 January 1988

Place: Bldg. 305 at CNVEO, Ft. Belvoir, VA.

Agenda: The Army Science Board Ad Hoc Subgroup for Focal Plane Array (FPA) will meet for briefings on the DOD FPA Initiative, the Services and SDIO requirements for FPA, and the Army position on the seven Terms of Reference. This meeting will be closed to the public in accordance with section 552b(c) of Title 5, U.S.C., specifically subparagraph (1) thereof, and Title 5, U.S.C., Appendix 1, subsection 10(d). The classified and unclassified matters and proprietary information to be discussed are so inextricably intertwined so as to preclude opening any portion of the meeting. Contact the Army Science Board Administrative Officer, Sally Warner, for further information at (202) 695-3039 or 695-7046.

Sandra F. Gearhart,

Acting Administrative Officer, Army Science Board.

BILLING CODE 3710-08-M

Department of the Navy

Naval Research Advisory Committee; Closed Meeting

Pursuant to the provisions of the Federal Advisory Committee Act (5 U.S.C. App.), notice is hereby given that the Naval Research Advisory Committee will meet on January 20-22, 1988. The meeting will be held at offices of the Commander-in-Chief, U.S. Pacific Fleet, Pearl Harbor, Hawaii. The meeting will commence at 8:00 a.m. and terminate at 5:00 p.m. on January 20; commence at 8:00 a.m. and terminate at 3:30 p.m. on January 21; and commence at 8:00 a.m. and terminate at 12:00 noon on January 22, 1988. All sessions of the meeting will be closed to the public.

The purpose of the meeting is to provide briefings and tours for the committee members on command and control systems capabilities. The agenda will include technical briefings, tours and discussions addressing C2 and communications and interoperability issues. These briefings, tours and discussions will contain classified information that is specifically authorized under criteria established by Executive Order to be kept secret in the interest of national defense and is in fact properly classified pursuant to such Executive Order. The classified and nonclassified matters to be discussed are so inextricably intertwined as to preclude opening any portion of the meeting. Accordingly, the Secretary of the Navy has determined in writing that the public interest requires that all sessions of the meeting be closed to the public because they will be concerned with matters listed in section 552b(c)(1) of title 5, United States Code.

For further information concerning this meeting contact: Commander L.W. Synder, U.S. Navy, Office of Naval Research, 800 North Quincy Street, Arlington, VA 22217-5000, Telephone Number: (202) 696-4870.

Date: December 16, 1987.

Jane Virga,

Lieutenant, JAGC, U.S. Navy Reserve, Federal Register Liaison Officer.

[FR Doc. 87-29335 Filed 12-22-87; 8:45 am]

BILLING CODE 3810-AE-M

DEPARTMENT OF ENERGY

Office of Conservation and Renewable Energy

Energy Conservation Program for Consumer Products; Representative Average Unit Costs of Energy

AGENCY: Department of Energy.

ACTION: Notice.

SUMMARY: In this notice, the Department of Energy is forecasting the representative average unit costs of five residential energy sources for the year 1988. The five sources are electricity, natural gas, No. 2 heating oil, propane and kerosene. The representative unit costs of these energy sources are used in the Energy Conservation Program for Consumer Products established by the Energy Policy and Conservation Act, as amended by the National Energy Conservation Policy Act and by the National Appliance Energy Conservation Act.

EFFECTIVE DATE: The representative average unit costs of energy contained in this notice will become effective January 22, 1988 and will remain in effect until further notice.

FOR FURTHER INFORMATION CONTACT:

Michael J. McCabe, U.S. Department of Energy, Office of Conservation and Renewable Energy, Forrestal Building, Mail Station CE-132, 1000 Independence Avenue SW., Washington, DC 20585, (202) 586-9127

Eugene Margolis, Esq., U.S. Department of Energy, Office of General Counsel, Forrestal Building, Mail Station GC-12, 1000 Independence Avenue SW., Washington, DC 20585, (202) 586-9507.

SUPPLEMENTARY INFORMATION:

Section 323 of the Energy Policy and Conservation Act (Pub. L. 94-163), as amended by the National Energy Conservation Policy Act (Pub. L. 95-619) and by the National Appliance Energy Conservation Act (Pub. L. 100-12), (Act)[1] requires that the Department of Energy (DOE) prescribe test procedures for the determination of the estimated annual operating cost and other measures of energy consumption for certain consumer products specificed in the Act. DOE has prescribed test procedures for the major household products listed in section 322(a) of the Act. These test procedures are found in 10 CFR Part 430, Subpart B.

Section 323(b) of the Act requires that the estimated annual operating cost of a covered product be computed from measurements of energy use in a representative average-use cycle and from representative average unit costs of the energy needed to operate such product during such cycle. The section further requires DOE to provide information regarding the representative average unit costs of energy for use wherever such costs are needed to perform calculations in accordance with the test procedures. Most notably, these costs are used under the Federal Trade Commission labeling program established by section 324 of the Act and in connection with advertisements of appliance energy used and energy costs which are covered by section 323(c) of the Act.

DOE last published representative average unit costs of residential energy for use in the Energy Conservation Program for Consumer Products on April 2, 1987 (52 FR 10606). Effective January 22, 1988, the cost figures published on April 2, 1987, will be superseded by the cost figures set forth in this notice.

DOE's Energy Information Administration (EIA) has develped the 1988 representative average unit costs of electricity, natural gas and No. 2 hearing oil found in this notice. These costs were taken from the October 1987 "EIA Short-Term Energy Outlook," DOE/EIS-0202 (87/4Q), which forecasts the retail cost of selected energy products based on changes in world oil prices, wellhead natural gas prices, seasonal patterns in retail prices and established trends in margins and operating expenses. The development of these costs is discussed in detail in the October 1987 issue of this report, which is EIA's quarterly Publication of historical and forecasted energy consumption and prices. The costs appear in Table 5 of "EIA Short-Term Energy Outlook." Copies of this report are available at the National Energy Information Center, Forrestal Building, Room 1E-190, 1000 Independence Avenue SW., Washington, DC 20585, (202) 586-6020.

In the cases of kerosene and propane, the 1988 representative average unit costs found in this notice were developed by other means since EIA's "Short-Term Energy Outlook" does not provide a forecast of the retail costs of these fuels. However, historical refiner and gas plant operator sales prices for kerosene and propane, and residential prices for No. 2 heating oil are available from another EIA publication, "Petroleum Marketing Monthly," DOE/EIA-0380. Referring to Table 2 and Table 15 of the June 1987 issue of "Petroleum Marketing Monthly," DOE obtained refiner and gas plant operator average sales prices to end users for kerosene and No. 2 heating oil prices to residential consumers for 1986. To forecast a 1988 representative average change in 1988 from the 1986 annual average (last complete year of available data) for No. 2 heating oil prices to residential customers also would be applied to kerosene. Propane prices were assumed to change at the same rate as the residential price of natural gas. The 1988 annual average residential natural gas prices appear in Table 4 of EIA's June 1987 issue of "Natural Gas Monthly," DOE/EIA-0130. Refiner and gas plant operator prices to end users for kerosene and propane were used

[1] References to the "Act" refer to the Energy Policy and Conservation Act, as amended by the National Energy Conservation Policy Act and by the National Appliance Energy Conservation Act.

since, of the comparable recent data available, these are believed to be most representative of prices to residential consumers. On the basis of this assumption, DOE computed the relative difference between the 1988 representative average unit cost of No. 2 hearing oil (taken from the October 1987 issue of "Short-Term Energy Outlook") and the average annual residential price for No. 2 heating oil for 1986. DOE then applied this computed value to the average annual refiner and gas plant operator sales prices to end users for kerosene for 1986 to forecast its 1988 representative average unit cost. For propane, the same method was used except that the price forecast was based on changes in the residential price of natural gas, rather than heating oil. The price change of propane to the residential customer reflects more closely the residential price change of natural gas rather than that of No. 2 heating oil.

The 1988 representative average unit costs stated in Table 1 are provided pursuant to section 323(b)(4) of the Act and will become effective January 22, 1988. They will remain in effect until further notice.

Issued in Washington, DC. December 10, 1987.

Donna R. Fitzpatrick,

Assistant Secretary, Conservation and Renewable Energy.

TABLE 1.—REPRESENTATIVE AVERAGE UNIT COSTS OF ENERGY FOR FIVE RESIDENTIAL ENERGY SOURCES

[1988]

Type of energy	In common terms	As required by test procedure	Dollars per million Btu[1]
Electricity	8.04¢/kWh[2,3]	$0.0804/KWh	$23.56
Natural Gas	56.2¢/therm[4] or $5.80/MCF[5,6]	0.0000562/Btu	5.62
No. 2 Heating Oil	$0.83/gallon[7]	0.0000598/Btu	5.98
Propane	70¢/gallon[8]	0.0000769/Btu	7.69
Kerosene	$0.78/gallon[9]	0.0000578/Btu	5.78

[1] Btu stands for British thermal units
[2] KWh stands for kilowatt hour
[3] 1 kWh = 3,412 Btu
[4] 1 therm = 100,000 Btu
[5] MCF stands for 1,000 cubic feet
[6] For the purposes of this table, one cubic foot of natural gas has an energy equivalence of 1,032 Btu.
[7] For the purposes of this table, one gallon of No. 2 heating oil has an energy equivalence of 138,700 Btu.
[8] For the purposes of this table, one gallon of liquid propane has an energy equivalence of 91,000 Btu.
[9] For the purposes of this table, one gallon of kerosene has an energy equivalence of 135,000 Btu.

[FR Doc. 87-29397 Filed 12-22-87; 8:45 am]

BILLING CODE 6450-01-M

Economic Regulatory Administration

[ERA Docket No. 87-59-NG]

LOUTEX Energy Inc.; Application To Import Natural Gas From Canada

AGENCY: Economic Regulatory Administration, DOE.

ACTION: Notice of application for blanket authorization to import natural gas

SUMMARY: The Economic Regulatory Administration (ERA) of the Department of Energy (DOE) gives notice of receipt on October 23, 1987, of an application filed by LOUTEX Energy Inc. (LOUTEX) for blanket authorization to import Canadian natural gas for sale to purchasers in the United States, on a short-term, spot basis, including pipelines, local distribution companies and commercial and industrial end-users. Authorization is requested to import up to 500 MMcf of natural gas per day and a maximum of 182.5 Bcf annually for a term of two years beginning on the date of first delivery. LOUTEX, a Louisiana corporation and wholly owned subsidiary of LEDCO Inc., intends to utilize existing facilities of U.S. and Canadian pipelines for the transportation of its imported gas supplies. LOUTEX proposes to file quarterly reports with the ERA.

The application is filed with the ERA pursuant to section 3 of the Natural Gas Act and DOE Delegation Order No. 0204-111. Protests, motions to intervene, notices of intervention and written comments are invited.

DATE: Protests, motions to intervene, or notices of intervention, as applicable, and written comments are to be filed no later than January 22, 1988.

FOR FURTHER INFORMATION CONTACT:

Frank Duchaine, Natural Gas Division, Economic Regulatory Administration, Forrestal Building, Room GA-076, 1000 Independence Avenue SW., Washington, DC 20585, (202) 586-8233.
Michael T. Skinker, Natural Gas and Mineral Leasing, Office of General Counsel, U.S. Department of Energy, Forrestal Building, Room 6E-042, 1000 Independence Avenue SW., Washington, DC 20585, (202) 586-6667.

SUPPLEMENTARY INFORMATION: The decision on this application will be made consistent with the DOE's gas import policy guidelines, under which the competitiveness of an import arrangement in the markets served is the primary consideration in determining whether it is in the public interest (49 FR 6684, February 22, 1984). Parties that may oppose this application should comment in their responses on the issue of competitiveness as set forth in the policy guidelines. The applicant asserts that this import arrangement is competitive. Parties opposing the arrangement bear the burden of overcoming this assertion. All parties should be aware that if the ERA approves this requested blanket import, it may designate a total authorized volume for the term without fixing a daily or annual limit that can be imported in order to provide the applicant with maximum flexibility of operation.

It is also requested that the authorization be granted on an expedited basis.

Public Comment Procedures

In response to this notice, any person may file a protest, motion to intervene or notice of intervention, as applicable, and written comments. Any person wishing to become a party to the proceeding and to have the written comments considered as the basis for any decision on the application must, however, file a motion to intervene or notice of intervention, as applicable. The filing of a protest with respect to this application will not serve to make the protestant a party to the proceeding, although protests and comments received from persons who are not parties will be considered in determining the appropriate action to be taken on the application. All protests, motions to intervene, notices of intervention, and written comments must meet the requirements that are specified by the regulations in 10 CFR Part 590. They should be filed with the Natural Gas Division, Office of Fuels Programs, Economic Regulatory Administration, Room GA076, RG-23, Forrestal Building, 1000 Independence Avenue SW., Washington, DC 20585, (202) 586-9478. They must be filed no later than 4:30 p.m. e.s.t., January 22, 1988.

The Administrator intends to develop a decisional record on the application through responses to this notice by parties, including the parties' written comments and replies thereto. Additional procedures will be used as necessary to achieve a complete understanding of the facts and issues. A party seeking intervention may request that additional procedures be provided, such as additional written comments, an oral presentation, a conference, or trial-type hearing. Any request to file additional written comments should explain why they are necessary. Any request for an oral presentation should identify the substantial question of fact, law, or policy at issue, show that it is material and relevant to a decision in the proceeding, and demonstrate why an oral presentation is needed. Any request for a conference should demonstrate why the conference would materially advance the proceeding. Any request for a trial-type hearing must show that there are factual issues genuinely in dispute that are relevant and material to a decision and that a trial-type hearing is necessary for a full and true disclosure of the facts.

If an additional procedure is scheduled, the ERA will provide notice to all parties. If no party requests additional procedures, a final opinion and order may be issued based on the official record, including the application and responses filed by parties pursuant to this notice, in accordance with 10 CFR 590.316.

A copy of LOUTEX's application is available for inspection and copying in the Natural Gas Division Docket Room, GA-076-A at the above address. The docket room is open between the hours of 8:00 a.m. and 4:30 p.m., Monday through Friday, except Federal holidays.

Issued in Washington, DC, December 15, 1987.

Constance L. Buckley,

Director, Natural Gas Division, Office of Fuels Program, Economic Regulatory Administration.

[FR Doc. 87-29396 Filed 12-22-87; 8:45 am]

BILLING CODE 6450-01-M

Economic Regulatory Administration

[ERA Docket No. 87-64-NG]

Poco Petroleum, Inc.; Application To Import Natural Gas From Canada

AGENCY: Economic Regulatory Administration, DOE.

ACTION: Notice of application for blanket authorization to import natural gas.

SUMMARY: The Economic Regulatory Administration (ERA) of the Department of Energy (DOE) gives notice of receipt on November 18, 1987, of an application filed by Poco Petroleum, Inc. (Poco), requesting that the blanket authorization previously granted in DOE/ERA Opinion and Order No. 103, issued on January 17, 1986 (ERA Docket No. 85-33-NG), be amended to extend the blanket authorization for a term of two years beginning on January 21, 1988. Poco requests authorization to import up to a maximum of 150 Bcf during the two-year period, either for its own account or as an agent for U.S. purchasers and/or Canadian suppliers. Poco intends to utilize the existing facilities of U.S. pipelines. Poco will continue to file quarterly reports with the ERA. Poco's prior quarterly reports filed with the ERA indicate that approximately 16.5 Bcf of natural gas were imported under Order No. 103 as of September 30, 1987.

The application is filed with the ERA pursuant to section 3 of the Natural Gas Act and DOE Delegation Order No. 0204-111. Protests, motions to intervene or notices of intervention, and written comments are invited.

DATE: Protests, motions to intervene, or notices of intervention, as applicable, and written comments are to be filed no later than January 22, 1988.

FOR FURTHER INFORMATION CONTACT:

Frank Duchaine, Natural Gas Division, Economic Regulatory Administration, Forrestal Building, Room GA-076, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 586-8233.
Diane Stubbs, Natural Gas and Mineral Leasing, Office of General Counsel, U.S. Department of Energy, Forrestal Building, Room 6E-042, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 586-6667.

SUPPLEMENTARY INFORMATION: The decision on this application will be made consistent with the DOE's gas import policy guidelines, under which the competitiveness of an import arrangement in the markets served is the primary consideration in determining whether it is in the public interest (49 FR 6684, February 22, 1984). Parties that may oppose this application should comment in their responses on the issue of competitiveness as set forth in the policy guidelines. The applicant asserts that the extension of its import arrangement is competitive. Parties opposing the arrangment bear the burden of overcoming this assertion.

Public Comment Procedures

In response to this notice, any person may file a protest, motion to intervene or notice of intervention, as applicable, and written comments. Any person wishing to become a party to the proceeding and to have the written comments considered as the basis for any decision on the application must, however, file a motion to intervene or notice of intervention, as applicable. The filing of a protest with respect to this application will not serve to make the protestant a party to the proceeding, although protests and comments received from persons who are not parties will be considered in determining the appropriate procedural action to be taken on the application. All protests, motions to intervene, notices of intervention, and written comments must meet the requirements that are specified by the regulations in 10 CFR Part 590. They should be filed with the Natural Gas Division, Office of Fuels Programs, Economic Regulatory Administration, Room GA-076, RG-23, Forrestal Building, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 586-9478. They must be filed no later than 4:30 p.m. e.s.t., January 22, 1988.

The Administrator intends to develop a decisional record on the application through responses to this notice by parties, including the parties' written comments and replies thereto. Additional procedures will be used as necessary to achieve a complete understanding of the facts and issues. A party seeking intervention may request that additional procedures be provided, such as additional written comments, an oral presentation, a conference or a

BEST COPY AVAILABLE

VOL 52 ISS 246 DEC 23 1987 UMI

trial-type hearing. A request to file additional written comments should explain why they are necessary. Any request for an oral presentation should identify the substantial question of fact, law, or policy at issue, how that it is material and relevant to a decision in the proceeding, and demonstrate why an oral presentation is needed. Any request for a conference should demonstrate why the conference would materially advance the proceeding. Any request for a trial-type hearing must show that there are factual issues genuinely in dispute that are relevant and material to a decision and that a trial-type hearing is necessary for a full and true disclosure of the facts.

If an additional procedure is scheduled, the ERA will provide notice to all parties. If no party requests additional procedures, a final opinion and order may be issued based on the official record, including the application and responses filed by parties pursuant to this notice, in accordance with 10 CFR 590.316.

A copy of Poco's application is available for inspection and copying in the Natural Gas Division Docket Room, GA-076-A, at the above address. The docket room is open between the hours of 8:00 a.m. and 4:30 p.m., Monday through Friday, except Federal holidays.

Issued in Washington, DC December 16, 1987.

Constance L. Buckley,

Director, Natural Gas Division, Office of Fuels Programs, Economic Regulatory Administration.

BILLING CODE 6450-01-M

Federal Energy Regulatory Commission

[Docket No. CI88-108-000 et al.]

J. Cleo Thompson and James Cleo Thompson, Jr. et al.; Natural Gas Companies; Applications for Certificates, Abandonment of Service and Petitions To Amend Certificates [1]

December 17, 1987.

Take notice that each of the Applicants listed herein has filed an application or petition pursuant to section 7 of the Natural Gas Act for authorization to sell natural gas in interstate commerce or to abandon service as described herein, all as more fully described in the respective applications and petitions which are on file with the Commission and open to public inspection.

Any person desiring to be heard or to make any protest with reference to said applications should on or before December 30, 1987, file with the Federal Energy Regulatory Commission, Washington, DC 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party in any proceeding herein must file a petition to intervene in accordance with the Commission's rules.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicants to appear or to be represented at the hearing.

Lois D. Cashell,

Acting Secretary.

[1] Applicant requests permanent abandonment with three-year pregranted abandonment for any sales for resale in interstate commerce under its small producer certificate in Docket No. CS67-24.

In support of its application Applicant states the gas contract will not expire until July, 1990. However, Applicant and purchaser have entered into a release agreement. Deliverability is approximately 58 Mcf/d. The gas is NGPA section 104 post-1974 gas. Applicant desires to sell gas in the spot market.

[2] Applicant requests permanent abandonment with three-year pregranted abandonment for any sales for resale in interstate commerce under its small producer certificate in Docket No. CS67-24.

In support of its application Applicant states the gas contract expired in 1984. Applicant and purchaser have entered into a release agreement. Deliverability is approximately 781 Mcf/d. The gas is NGPA section 104 1973-1974 biennium gas and flowing gas.

[3] Applicant requests amendment of its existing LTA to reflect that NGPA section 109 gas is incuded since all jurisdictional gas is covered by the release agreement with Trunkline.

[4] Acreage has been assigned to Bass Enterprises Production Company, effective 10-1-87.

[5] Acreage has been assigned to Tidemark Enterprises Inc., effective 11-1-86.

[6] Acreage has been assigned to Chesapeake Production Company, effective 9-1-87.

[7] By Partial Assignment executed 4-3-87, effective 12-1-86, Conoco Inc. conveyed unto Santa Fe Energy Company certain acreage.

[8] A portion of the acreage subject to Rate Schedule No. 85 was conveyed unto Santa Fe Exploration Company, effective 12-1-86.

[9] Sun assigned its interest in Property No. 529758, Mallet Land & Cattle, to Flag-Redfern Oil Co., effective 7-1-86.

[10] By Assignment executed 6-20-86, effective April 1, 1986, MPTM assigned to Cities Service Oil and Gas Corporation all of its right, title and interest in certain acreage.

[11] By Assignment effective 10-1-87, Sohio Petroleum Company assigned certain acreage to Maynard Oil Company.

[12] Union Oil Company of California assigned a certain lease under Docket No. CI67-560 to Vance Production Company, effective 9-1-87.

[13] ARCO sold certain acreage covered by Rate Schedule No. 148 to Essenjay Petroleum Coporation, effective 8-29-83. Certain other acreage has been released effective 5-1-84.

[14] On 2-5-86, Mitchell assigned its interest in the leases that are under the 5-15-68 contract to Mr. David Diiger.

[15] Applicant alleges that the wells are not capable of delivering gas into Cimarron's gathering system at the pressure maintained by Cimarron at the delivery point. The price paid by Cimarron to Lincoln Rock under their Agreement for the six-month period beginning 7-1-87 and ending 12-31-87 is 95% of 88 cents/Mcf (at 1,000 Btu), less a treating charge of 2 cents/Mcf. At that price, Lincoln Rock alleges that it cannot continue to bear the compression costs.

[16] Additional material received December 8, 1987.

Filing Code: A—Initial Service; B—Abandonment; C—Amendment to add acreage; D—Amendment to delete acreage; E—Total Succession; F—Partial Succession.

BILLING CODE 6717-01-M

[Docket No. ES88-24-000]

Cambridge Electric Light Co.; Application

December 17, 1987.

Take notice that on December 9, 1987, Cambridge Electric Light Company filed an application with the Federal Energy Regulatory Commission seeking authority, pursuant to section 204 of the Federal Power Act, to issue not more than $40,000,000 of short-term debt and other borrowings on or before December 31, 1989, with maturities on or before December 31, 1990.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All such motions or protests should be filed on or before December 30, 1987. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make the protestants parties to the proceeding. Any persons wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717-01-M

[Docket No. ES88-23-000]

Commonwealth Electric Co.; Application

December 17, 1987.

Take notice that on December 9, 1987, Commonwealth Electric Company (Applicant) filed an application with the Federal Energy Regulatory Commission seeking authority, pursuant to section 204 of the Federal Power Act, to issue not more than $125,000,000 of short-term debt and other borrowings on or before December 31, 1989, with maturities on or before December 31, 1990.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All such motions or protests should be filed on or before December 30, 1987. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party

must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Acting Secretary.

BILLING CODE 6717-01-M

[Docket No. CI88-154-000 and CI88-157-000]

Conoco Inc.; Application

December 17, 1987.

Take notice that on November 27, 1987, Conoco Inc. (Conoco), P.O. Box 2197, Houston, Texas 77252, filed an application pursuant to sections 4 and 7 of the Natural Gas Act (15 U.S.C. 717c and f) and Part 157 of the Commission's Regulations under the Natural Gas Act (18 CFR Part 157), for authorization to permanently abandon certificates of public convenience and necessity issued to Conoco heretofore authorizing the sales of natural gas to United Gas Pipe Line Company (United) under various contracts covering gas sales subject to the Commission's Natural Gas Act jurisdiction as shown on Exhibit A. Conoco additionally requests the issuance of a permanent blanket certificate with pregranted abandonment authorizing sales for resale of natural gas in interstate commerce from sources formerly committed to United. Conoco also requests abandonment of individual sales made pursuant to the requested blanket certificate upon expiration of the term of such sales.

Conoco states that these authorities are necessary to enable Conoco to implement a comprehensive settlement agreement between Conoco and United to settle, compromise and release certain claims arising from various contractual relationships. Part of the settlement is the mutual understanding and agreement to rescind, terminate and cancel as of October 31, 1987 the contracts covering sales for which abandonment authorization is requested.

Any person desiring to be heard or to make any protest with reference to said applications should, on or before December 31, 1987, file with the Federal Energy Regulatory Commission, Washington, DC 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to the proceeding herein must file a petition to intervene in accordance with the Commission's rules.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or to be represented at the hearing.

Lois D. Cashell,

Acting Secretary.

BILLING CODE 6717-01-M

[Docket No. RP85-125-003]

Distrigas of Massachusetts Corp.; Proposed Changes in FERC Gas Tariff

December 16, 1987.

Take notice that on December 8, 1987, Distrigas of Massachusetts Corporation ("DOMAC") tendered for filing the below listed tariff sheets to be a part of its FERC Gas Tariff, First Revised Volume No. 1:

Original Sheet No. 16
Substitute Eighth Revised Sheet No. 17
Substitute Second Revised Sheet No. 17A
Sheet No. 18
Substitute Fourth Revised Sheet No. 19
Substitute Original Sheet No. 20
Sheet No. 21
Substitute First Revised Sheet No. 22
Substitute First Revised Sheet No. 23
Substitute First Revised Sheet No. 24

DOMAC states that the tariff sheets were submitted in compliance with the Commission's Opinion No. 291 issued November 23, 1987 in Docket No. RP85-125-000. DOMAC also states that the submission of this compliance filing is without prejudice to DOMAC's rights to seek rehearing of the November 23, 1987 Opinion or to any position DOMAC may take in further proceedings.

A copy of the filing was mailed to DOMAC's jurisdictional customers and all parties set out on the official service list at Docket No. RP85-125-000.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with §§ 384.214 and 385.211. All such motions or protests must be filed on or before December 23, 1987. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file

with the Commission and are available for public inspection.

Lois D. Cashell,

Acting Secretary.

[FR Doc. 87-29328 Filed 12-22-87; 8:45 am]

BILLING CODE 6717-01-M

[Docket Nos. RP86-69-007, TA87-3-15-001 and RP88-15-001]

Mid Louisiana Gas. Co.; Compliance Filing

December 18, 1987.

Take notice that Mid Louisiana Gas Company (Mid Louisiana) on December 15, 1987, tendered for filing as a part of First Revised Volume No. 1 of its FERC Gas Tariff the following Tariff Sheets:

To become effective September 1, 1987:

Sixtieth Revised Sheet No. 3a
Third Revised Sheet No. 3a.1
Sixth Revised Sheet No. 23a
Second Revised Sheet No. 26g

To become effective November 1, 1987:

Sixty-first Revised Sheet No. 3a
Fourth Revised Sheet No. 3a.1

Mid Louisiana states that the purpose of the filing of the revised Tariff Sheets to become effective September 1, 1987, is to comply with the Commission's Orders issued in Docket Nos. RP86-69-000 *et al.*, and TA87-3-15-000.

Mid Louisiana further states that the purpose of the filing of the revised Tariff Sheets to become effective November 1, 1987, is to incorporate the changes resulting from the compliance filing with its annual charge adjustment (ACA) clause approved by the Commission in Docket No. RP88-15-000.

Copies of this filing have been mailed to Mid Louisiana's jurisdictional customers and interested state commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 214 and 211 of the Commission's Rules of Practice and Procedure (18 CFR 385.214, 385.211). All such motions or protests should be filed on or before December 28, 1987. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Acting Secretary.

[FR Doc. 87-29406 Filed 12-22-87; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. RP87-143-002]

MIGC, Inc.; Compliance Filing

December 18, 1987.

Take notice that on December 14, 1987, MIGC, Inc. ("MIGC") tendered for filing Substitute Second Revised Sheet No. 39, Fourth Revised Sheet No. 102, Fourth Revised Sheet No. 140, and First Revised Sheet No. 250, all to MIGC's FERC Gas Tariff, Original Volume No. 1. These tariff sheets are proposed to become effective October 1, 1987.

MIGC states that the instant filing is being submitted in further compliance with Commission Order No. 472-B and the Commission's October 16, 1987 Order which accepted MIGC's ACA filing in this docket effective October 1, 1987. MIGC further states that the additional revisions to its initial ACA filing which are reflected in the instant submission broaden the applicability of MIGC's ACA charge to certain individually certificated rate schedules which were inadvertently excluded in its earlier filings in this docket.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 214 and 211 of the Commission's Rules of Practice and Procedure (18 CFR 385.214 and 385.211). All such motions or protests should be filed on or before December 28, 1987. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Acting Secretary.

BILLING CODE 6717-01-M

[Docket No. RP88-41-000]

Northwest Pipeline Corp.; Filing Annual Compliance Report

December 18, 1987.

Take notice that on December 15, 1987, Northwest Pipeline Corporation ("Northwest") tendered for filing Twenty-First Revised Sheet No. 10-A to be a part of its FERC Gas Tariff, First Revised Volume No. 1. Such tariff sheet reflects Northwest's Annual Compliance Report and Cost-of-Service Study pursuant to sections 13 and 14 of its Rate Schedudle T-1.

Northwest proposes a change in its Rate Schedule T-1 Facility Charge effective February 1, 1988, in accordance with section 13 of Rate Schedule T-1, as supported by its Cost-of-Service Study and to implement an Amortizing Adjustment effective February 1, 1988, in accordance with section 14 of Rate Schedule T-1.

Copies of this filing have been served on Pacific Interstate Transmission Company and all jurisdictional customers and affected state agencies.

Any persons desiring to be heard or protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 211 or 214 of the Commission's Rules of Practice and Procedure. All such motions or protests should be filed on or before December 28, 1987. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with Commission and are available for public inspection.

Lois D. Cashell,

Acting Secretary.

BILLING CODE 6717-01-M

[Docket No. ES88-25-000]

PacificCorp, Application

December 17, 1987.

Take notice that on December 11, 1987, PacifiCorp doing business as Pacific Power & Light Company (Pacific) filed its application with the Federal Energy Regulatory Commission, pursuant to section 204 of the Federal Power Act, seeking an order (1)

authorizing it to borrow the proceeds of up to $165,000,000 of Pollution Control Revenue Bonds to be issued severally by the Counties of Sweetwater and Converse, Wyoming (the "Counties") and the Cities of Forsyth, Montana and Gillette, Wyoming (the "Cities"), (2) authorizing it to enter into such agreements or arrangements with the Counties and the Cities and with other entities as may be reasonably necessary to effect the borrowing and provide credit enhancement for the said Bonds, (3) authorizing it to replace or modify, from time to time, existing letters of credit supporting the Bonds and other Pollution Control Revenue Bonds and (4) exempting the transactions from competitive bidding pursuant to 18 CFR 34.2(b)(2). The borrowings will be in connection with the refunding of outstanding Pollution Control Revenue Bonds that were issued to finance certain air and water pollution control and solid waste disposal facilities at the Jim Bridger, Dave Johnston, Colstrip and Wyodak Generating Plants.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All such motions or protects should be filed on or before December 31, 1987. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make the protestants parties to the proceeding. Any persons wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,
Acting Secretary.

[FR Doc. 87-29331 Filed 12-22-87; 8:45 am]
BILLING CODE 6717-01-M

[Docket No. RP88-17-001]

Southern Natural Gas Co.; Proposed Changes in FERC Gas Tariff

December 18, 1987.

Take notice that on December 14, 1987, Southern Natural Gas Company (Southern) tendered for filing the following tariff sheets to its FERC Gas Tariff, Sixth Revised Volume No., 1, to be effective December 1, 1987:

First Revised Sheet Nos. 30M–300
First Revised Sheet Nos. 30R–30AA
First Revised Sheet Nos. 30EE–30GG
First Revised Sheet Nos. 30JJ–30TT
First Revised Sheet Nos. 45R.9–45R.15
First Revised Sheet No. 45R.19
First Revised Sheet Nos. 45R.22–45R.25
First Revised Sheet Nos. 45R.27–45R.28
First Revised Sheet Nos. 53I.30–53I.31
First Revised Sheet No. 53I.33
First Revised Sheet No. 53I.40
First Revised Sheet Nos. 53I.46–53I.47
First Revised Sheet No. 53I.49
First Revised Sheet Nos. 53I.56

Southern states that on October 30, 1987, it filed in this proceeding revisions to its FERC Gas Tariff to establish as part of its Tariff Rate Schedules FT and IT, the General Terms and Conditions for Rate Schedules FT and IT, and Forms of Service Agreement under Rate Schedules FT and IT. On November 27, 1987, the Commission issued its Order Accepting Filing and Suspending Tariff Sheets, Subject to Refund and Conditions, Convening Technical Conference and Granting Late Interventions (Order). Ordering paragraph (A) required Southern to file within 15 days of the date of the issuance of the Order to make revisions prescribed by the Order. Accordingly, Southern has submitted the revised tariff sheets listed above and has requested a waiver of the Commission's Regulations to make the revised sheets effective December 1, 1987.

Southern states that copies of the filing were mailed to all of Southern's jurisdictional purchasers, shippers, and interested state commissions, as well as the parties listed on the Commission's official service list compiled in this proceeding.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with the Commission's Rules of Practice and Procedure (18 CFR 385.211 or 385.214). All such motions or protests should be filed on or before December 28, 1987. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,
Acting Secretary.

BILLING CODE 6717-01-M

[Docket Nos. CI88-87-000 and CI88-88-000]

Sun Exploration and Production Co. et al.; Applications for Permanent Abandonment and Blanket Limited-Term Certificate With Pregranted Abandonment

December 17, 1987.

Take notice that on November 2, 1987, as supplemented on November 23 and December 7, 1987, Sun Exploration and Production Company, *et al.*[1] (Sun, *et al.*), P.O. Box 2880, Dallas, TX 75221–2880 filed applications in Docket No. CI88–88–000 requesting permanent abandonment of sales of gas to ANR Pipeline Company from various fields located in Oklahoma and Louisiana, and requesting in Docket No. CI88–87–000 a three-year blanket limited-term certificate with pregranted abandonment for sales for resale in interstate commerce of the released gas to other purchasers.

Sun, *et al.* state expedited relief is sought for the reason that takes of gas under the terms of the gas purchase contracts have been substantially reduced and ANR has entered into a settlement agreement to, among other things, release from these contracts all NGA gas listed in the Appendix. Deliverability for Sun's interest in 12,821 Mcf per day. The gas is NGPA section 108(a) gas (86.3%) and 104 flowing (6.9%), replacement (0.1%), 1973–1974 biennium (1.5%) and post-1974 (5.2%) gas. Sales have been made under Sun, *et al.*'s certificates and FERC Gas Rate Schedules listed in the attached Appendix. Applicants request that their applications be considered on an expedited basis under procedures established by Order No. 436, Docket No. RM85–1–000, at 18 CFR 2.77.[2]

Since Sun, *et al.*, have requested that their applications be considered on an expedited basis, all as more fully described in the applications which are on file with the Commission and open to

[1] The *et al.* parties are listed in the attached Appendix. Sun Exploration and Production Company operates under the listed FERC Gas Rate Schedules and is filing jointly with the listed co-owners which are selling under these rate schedules.

[2] The United States Court of Appeals for the District of Columbia vacated the Commission's Order No. 436 on June 23, 1987. In vacating Order No. 436, the Court rejected challenges to the Commission's statement of policy in § 2.77 of its Regulations. Section 2.77 states that the Commission will consider on an expedited basis applications for certificate and abandonment authority where the producers assert they are subject to substantially reduced takes without payment or where the parties have entered into a take-or-pay buy-out pursuant to § 2.76.

public inspection, any person desiring to be heard or to make any protest with reference to said applications should on or before 15 days after the date of publication of this notice in the **Federal Register**, file with the Federal Energy Regulatory Commission, Washington, DC 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to the proceeding herein must file a petition to intervene in accordance with the Commission's rules.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Sun, *et al.*, to appear or to be represented at the hearing.

Lois D. Cashell,
Acting Secretary.

[Docket No. CI88-143-000 and CI88-146-000]

Texaco Inc. and Texaco Producing Inc.; Application

December 17, 1987.

Take notice that on November 20, 1987, Texaco Inc. and Texaco Producing Inc. (Applicant), of P.O. Box 52332, Houston, Texas 77052, filed applications pursuant to section 7 (b) and (c) of the Natural Gas Act and §§ 157.23 and 157.30 of the Commission's Regulations thereunder, requesting (1) permanent abandonment of sales to Natural Gas Pipeline Company of America (NGPL) of gas produced from various fields in Louisiana, Oklahoma, Texas and New Mexico, as more fully described on Exhibit "A" attached hereto, and (2) a three-year blanket limited-term certificate with pregranted abandonment in order to make sales for resale in interstate commerce of the abandoned gas, without market restrictions. Applicant also seeks authorization to include sales by co-interest owners in the same wells to the extent the joint owners agree.

In support of its applications Applicant states that the authorizations being sought are as a result of a comprehensive settlement agreement with NGPL dated June 1, 1987. Under the settlement agreement Applicant and NGPL agreed to terminate the contracts or portions thereof listed on Exhibit "A" effective the date abandonment authorization is received. Deliverability is approximately 5,330 Mcf/d of section 104 minimum rate gas, 8,400 Mcf/d of section 102(d) gas, and 10,000 Mcf/d of section 109 gas.

Any person desiring to be heard or to make any protest with reference to said application should on or before December 31, 1987, file with the Federal Energy Regulatory Commission, Washington, DC 20426 a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party in any proceeding herein must file a petition to intervene in accordance with the Commission's Rules.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or to be represented at the hearing.

Lois D. Cashell,
Acting Secretary.

Exhibit "A"

Previously certificated gas sales of Texaco Inc. and Texaco Producing Inc. to Natural Gas Pipeline Company from various fields in Louisiana, New Mexico, Oklahoma and Texas.

Williams Natural Gas Co.; Proposed Changes in FERC Gas Tariff

December 16, 1987.

Take notice that on December 11, 1987, Williams Natural Gas Company (WNG) tendered for filing as part of its FERC Gas Tariff, Original Volume No. 1, the following tariff sheets:

Revised Original Sheet No. 6A
Revised First Revised Sheet Nos. 11, 14 and 29

The proposed effective date of these tariff sheets is January 1, 1988. WNG states that the purpose of these sheets is to include in its currently effective firm sales rate schedules (Rate Schedules F and P) a Standby Charge to recover costs associated with standing by to serve its firm sales customers that do not reduce their full requirements service or contract demand where such customers obtain and have transported on WNG's system gas abandoned by WNG's producers under the Good Faith Negotiation procedures in § 270.201 of the Commission's Regulations as promulgated in Order No. 451.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with §§ 385.211 and 385.214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before December 23, 1987. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,
Acting Secretary.

BILLING CODE 6717-01-M

Office of Hearings and Appeals

Extension of Deadline for Filing Crude Oil Refund Claims

AGENCY: Office of Hearings and Appeals, DOE.

ACTION: Extension of deadline for filing crude oil refund claims.

SUMMARY: The Office of Hearings and Appeals (OHA) of the Department of Energy (DOE) announces that the deadline for filing applications for crude oil refunds in all crude oil refund proceedings implemented to date under the DOE's Modified Statement of Restitutionary Policy (the MSRP), 51 FR 27889 (August 4, 1986), has been extended. The new filing deadline will be no earlier than June 30, 1988.

ADDRESS: Applications for refund should be addressed to: Subpart V Crude Oil Refunds, Office of Hearings and Appeals, U.S. Department of Energy, 1000 Independence Avenue, SW., Washington, DC 20585.

FOR FURTHER INFORMATION CONTACT: Thomas O. Mann, Deputy Director, Roger Klurfeld, Assistant Director, Office of Hearings and Appeals, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 586-2094 (Mann); 586-2383 (Klurfeld).

SUPPLEMENTARY INFORMATION: In *A. Tarricone, Inc.*, 15 DOE § 85,495 (1987), 52 FR 13291 (April 22, 1987), the OHA established refund proceedings for alleged crude oil violation amounts received form 42 firms. *Tarricone* set December 31, 1987 as the deadline for filing refund applications for claims against those 42 accounts. A similar deadline was established in all of the other crude oil refund proceedings implemented to date under the MSRP. A list of these cases is set forth in the Appendix to the Supplemental Order reproduced below.

In the Supplemental Order, issued December 14, 1987, the OHA announced that the former December 31, 1987 deadline for filing crude oil refund applications has been extended by at least six months. OHA's decision cited the need to give consumers injured by crude oil overcharges sufficient notice of the opportunity to file refund claims as the main reason for the extension. A new filing deadline—no earlier than June 30, 1988—will be established by the OHA in a future crude oil refund decision. All applications for refund should be sent to the address indicated above.

Dated: December 16, 1987.

George B. Breznay,
Director, Office of Hearings and Appeals.

December 14, 1987.

Decision and Order of the Department of Energy

Supplemental Order

Name of Petitioner: A. Tarricone, Inc., *et al.*
Date of Filing: December 9, 1987.
Case Number: KFX-0047.

On July 7, 1986, the United States District Court for the District of Kansas approved an historic settlement in *In re: The Department of Energy Stripper Well Exemption Litigation*, MDL No. 378 (D. Kan. 1987) (hereinafter referred to as the Settlement Agreement). The Settlement Agreement required the Department of Energy (DOE) to modify its prior restitutionary policy, and implement a refund process for crude oil overcharges based on the procedural regulations codified at 10 CFR Part 205, Subpart V. As required by the agreement, the DOE issued a Modified Statement of Restitutionary Policy in Crude Oil Cases (the MSRP) on August 4, 1986. 51 Fed. Reg. 27899 (1986).

The DOE's Office of Hearings and Appeals (OHA) is applying the MSRP in all cases involving crude oil overcharges. *See* Order Implementing the MSRP, 51 FR 29689 (August 20, 1986). OHA also issued a Notice on April 6, 1987, which discussed the general procedures the OHA would follow in crude oil refund proceedings. 52 FR 11737 (April 10, 1987) (the OHA Notice). The OHA Notice stated that standards and procedures governing the evaluation of crude oil refund claims would be contained in Final Decisions and Orders issued in specific refund proceedings. *Id.*

On April 15, 1987, the OHA established refund proceedings for funds received from A. Tarricone, Inc. and 41 other firms listed in the Appendix to that determination. *A. Tarricone, Inc.*, 15 DOE ¶ 85,495 (1987) (hereinafter referred to as *Tarricone*). All of these proceedings involve alleged crude oil violations, and the *Tarricone* decision permitted persons to file one refund application for claims against all 42 funds. The *Tarricone* decision established December 31, 1987, as the deadline for filing refund applications for claims against the 42 accounts.[1] For the reasons explained below, we have concluded that the December 31, 1987 filing deadline should be extended.

First, the influx of crude oil refund applications has generated an unprecedented workload for OHA as the deadline approaches. In the first week of December alone, the OHA received more than 2,400 crude oil claims. The inflow of crude oil claims needs to be spread out over a longer period.

Second, and more importantly, sufficient notice must be given to injured parties of the opportunity to file crude oil refund claims. Although we have received over 16,000 crude oil claims to date, there is a much larger total nationwide pool of potential refund applicants, which includes small businesses, farmers, and local governmental entities such as cities, counties, and school districts. They should be given every reasonable opportunity to apply. Many efforts have been made to notify them of the refund process. For example, notices have been published in the Federal Register, press releases have been issued, trade associations and all 535 congressional offices have been informed about the refund process, and thousands of information packets have been mailed to interested parties. Nevertheless, OHA's experience with the oil overcharge refund process indicates that it often takes a long time—well over a year—for information to reach potential applicants, especially those who have no prior knowledge of the Department's program for restitution of oil overcharges. Representative Bill Shuette, a Michigan Congressman with many farmers in his district, recently has requested that the Department extend the deadline. Writing to alert the Secretary to "an unfair situation that has developed," Mr. Schuette says:

> Only recently have many of the possible recipients of the crude oil overcharge claims been made aware of this settlement for which applications are presently due in your Office of Hearings and Appeals by December 31, 1987. This deadline does not allow damaged Michigan consumers an adequate opportunity to file claims for their intended restitution * * *

December 8, 1987 Letter from Rep. Bill Schuette to the Secretary of Energy.

Finally, there are a number of large crude oil refund proceedings in which refund procedures are about to be established. For ease of administration, and to avoid confusion, a similar filing deadline should be established. For example, in *Ernest A. Allerkamp, et al.*, Case Nos KFX-0033, *et al.*, (Proposed Decision issued October 19, 1987), 52 F.R. 39988 (October 26, 1987), OHA has proposed procedures for refunding an additional $119 million in principal, plus $68.2 million in interest. *Allerkamp* has also proposed to implement the "full policy" volumetric refund calculation discussed in the OHA notice, and for purposes of administrative efficiency, to combine the volumetric refund amounts of all the crude oil subject to the December 31, 1987 deadline.

Under these circumstances, we believe that good cause exists for extending the filing deadline. *See generally* 10 CFR Part 205, Subpart V. In order to alleviate workload problems, provide better notice to interested parties, and to implement final refund procedures in *Allerkamp*, we will extend the filing deadline beyond December 31, 1987 to correspond to the deadline to be established in the final *Allerkamp* decision. The new deadline will be no earlier than June 30, 1988.

It is therefore ordered that:

The filing deadline for crude oil refund applications submitted pursuant to *A. Tarricone, Inc.* and the other cases listed in the Appendix to this Decision will be extended. The new deadline will be established by the Office of Hearings and Appeals in the final decision issued in *Ernest A. Allerkamp, et al.*, and will be no earlier than June 30, 1988.

George B. Breznay,
Director, Office of Hearings and Appeals.

Date: December 14, 1987.

Appendix

Crude Oil Refund Proceedings To be subject to the new *Allerkamp* Filing Deadline:
A. Tarricone, Inc., 15 DOE ¶ 85,495 (1987)
Mountain Fuel Supply Co., 14 DOE ¶ 85,475 (1986)
MAPCO, Inc., 15 DOE ¶ 85,097 (1986)
Kent Oil & Trading Co., 15 DOE ¶ 85,100 (1987)
O.B. Mobley, Jr., 16 DOE ¶ 85,006 (1987)
Berry Holding Co., 16 DOE ¶ 85,405 (1987)

BILLING CODE 6450-01-M

[1] The December 31, 1987 deadline was also applied to the other crude oil refund proceedings in which OHA has issued final orders authorizing the submission of claims. *See* Mountain Fuel Supply Co., 14 DOE ¶ 85,475 (1986); MAPCO, Inc., 15 DOE ¶ 85,097 (1986); Kent Oil & Trading Co., 15 DOE ¶ 85,100 (1987); O.B. Mobley, Jr., 16 DOE ¶ 85,006 (1987); and Berry Holding Co., 16 DOER ¶ 85,405 (1987).

ENVIRONMENTAL PROTECTION AGENCY

[PF-490; FRL-3305-4]

Pesticide Tolerance Petition; Abbott Laboratories

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: This notice announces the filing of a pesticide petition by Abbott Laboratories proposing an exemption from the requirement of a tolerance for the insecticide thuringiensin or Beta-exotoxin [2-O-(4'-O-5-L-deoxyadenosine-5'-yl-beta-O-glucopyransyl)-4-O-phospho-O-allaric acid) for use in chicken manure under poultry cages for control of flies.

ADDRESS: By mail, submit written comments to:

Information Services Section, Program Management and Support Division (TS-757C), Office of Pesticide Programs, Environmental Protection Agency, 401 M Street SW., Washington, DC 20460.

In person, bring comments to: Rm. 236, CM#2, 1921 Jefferson Davis Highway, Arlington, VA 22202.

Information submitted as a comment concerning this notice may be claimed confidential by marking any part or all of that information as "Confidential Business Information" (CBI). Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR Part 2. A copy of the comment that does not contain CBI must be submitted for inclusion in the public record. Information not marked confidential may be disclosed publicly by EPA without prior notice. All written comments will be available for public inspection in Rm. 236 at the address given above, from 8 a.m. to 4 p.m., Monday through Friday, excluding holidays.

FOR FURTHER INFORMATION CONTACT: By mail:

Phil Hutton, Product Manager (PM) 17, Registration Division (TS-767C), Environmental Protection Agency, Office of Pesticide Programs, 401 M Street SW., Washington, DC 20460.

Office location and telephone number: Rm. 200, CM #2, 1921 Jefferson Davis Hwy., Arlington, VA 22202, (703)-557-2690.

SUPPLEMENTARY INFORMATION: EPA gives notice that the Abbott Laboratories, 14th and Sheridan Rd., North Chicago, IL 60064, has submitted a

pesticide petition (PP 7H3492) proposing to amend 40 CFR Part 180 by establishing an exemption from the requirement of a tolerance for thuringiensin or Beta-exotoxin for use in chicken manure under poultry cages to control flies.

EPA issued a related notice on thuringiensin or Beta-exotoxin for an exemption from the requirement of a tolerance for all raw agricultural commodities, which appeared in the **Federal Register** of May 14, 1987 (52 FR 18280).

Authority: 21 U.S.C. 346a.

Dated: December 14, 1987.

Edwin F. Tinsworth,

Director, Registration Division, Office of Pesticide Programs.

Emergency Exemptions

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA has granted specific exemptions for the control of various pests to the 10 States listed below and two crisis exemptions were initiated by the Texas Department of Agriculture. The exemptions, issued during the months of August and September, are subject to application and timing restrictions and reporting requirements designed to protect the environment to the maximum extent possible. Information on these restrictions is available from the contact persons in EPA listed below.

DATES: See each specific or crisis exemption for its effective dates.

FOR FURTHER INFORMATION CONTACT: See each emergency exemption for the name of the contact person: By mail:

Registration Division (TS-767C), Office of Pesticide Programs, Environmental Protection Agency, 401 M Street SW., Washington, DC 20460.

Office location and telephone number: Rm. 716, CM#2, 1921 Jefferson Davis Highway, Arlington, VA, (703-557-1806).

SUPPLEMENTARY INFORMATION: EPA has granted specific exemptions to the:

1. Arkansas State Plant Board for the use of dicamba to control redvine on land for plant back of cotton; September 17, 1987, to December 1, 1987. (Gene Asbury)

2. California Department of Food and Agriculture for the use of propargite on avocadoes to control avocado brown mite and six-spotted mite; September 3, 1987, to December 1, 1987. (Libby Pemberton)

3. California Department of Food and Agriculture for the use fenamiphos on plums and prunes to control nematodes; September 11, 1987, to September 1, 1988. (Stan Austin)

4. California Department of Food and Agriculture for the use of sodium chlorate on dry edible beans as desiccant/harvest aid; September 21, 1987, to December 31, 1987. (Robert Forrest)

5. California Department of Food and Agriculture for the use fenamiphos on kiwi fruit to control nematodes; August 14, 1987, to July 30, 1988. (Stan Austin)

6. Delaware Department of Agriculture for the use of glyphosate on marshes to control phragmites; September 24, 1987, to October 30, 1987. (Libby Pemberton)

7. Florida Department of Agriculture for the use of sodium chlorate on southern peas as desiccant/harvest aid; September 21, 1987, to December 15, 1987. (Robert Forrest)

8. Florida Department of Agriculture and Consumer Services for the use of anilazine on watercress to control leaf spot; September 23, 1987, to August 31, 1988. (Stan Austin)

9. Florida Department of Agriculture and Consumer Services for the use of thiobencarb on celery and lettuce to control parslane and barnyardgrass; September 2, 1987, to August 31, 1988. (Jim Tompkins)

10. Louisiana Department of Agriculture for the use of paraquat on grain sorghum to control regrowth vegetation; September 30, 1987, to November 15, 1987. (Gene Asbury)

11. Mississippi Department of Agriculture for the use of dicamba to control redvine on land to be planted back to cotton; September 17, 1987, to December 1, 1987. (Gene Asbury)

12. Missouri Department of Agriculture for the use of thiabendazole on stored corn in temporary storage to control fungus; September 17, 1987, to January 1, 1988. (Jim Tompkins)

13. Missouri Department of Agriculture for the use of sodium chlorate on southern peas as desiccant/harvest aid; September 24, 1987, to December 31, 1987. (Robert Forrest)

14. Oklahoma Department of Agriculture for the use of botran on peanuts to control sclerotinia blight; August 20, 1987, to September 30, 1987 (Stan Austin)

15. Oregon Department of Agriculture for the use of fenamiphos on blueberries to control nematodes; September 28, 1987, to March 15, 1988. (Stan Austin)

16. Texas Department of Agriculture for the use of cyromazine on peppers (bell, chili, and jalapeno) to control vegetable leafminers; September 17, 1987, to June 30, 1988. Texas had initiated a crisis exemption for this use. (Robert Forrest)

Crisis exemptions were initiated by the:

1. Texas Department of Agriculture on September 18, 1987, for the use of sodium chlorate on southern peas as preharvest aid. The need for this program has ended. (Donald Stubbs)

2. Texas Department of Agriculture on September 4, 1987, for the use of permethrin on kale, kohlrabi, mustard greens, and turnip greens to control cabbage looper. Since it was anticipated that this program would be needed for more that 15 days, Texas has requested a specific exemption to continue it. The need for this program is expected to last until March 31, 1988. (Libby Pemberton)

Authority: 7 U.S.C. 136.

Dated: December 14, 1987.

Susan H. Wayland,

Acting Director, Office of Pesticide Programs.

EPN, Decision Not To Initiate a Special Review

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice; decision not to initiate special review.

SUMMARY: On July 21, 1987, EPA issued a Proposed Decision Not to Initiate a Special Review of EPN. The proposed decision was based on the fact that there were no remaining viable registrations for EPN. Since EPA received no comments on the Proposed Decision Not to Initiate Special Review, EPA is today, publicly announcing its decision not to initiate a Special Review of EPN.

FOR FURTHER INFORMATION CONTACT: By mail: Ron Cannarella, Special Review Branch, Registration Division (TS-767C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW, Washington, DC 20460.

Office location and telephone number: Rm. 1006, Crystal Mall Building #2, 1921 Jefferson Davis Highway, Arlington, VA, (703-557-5488).

SUPPLEMENTARY INFORMATION: On March 20, 1987, the Environmental Protection Agency (EPA, Agency) sent a written notice to the registrants of O-Ethyl O-(p-nitrophenyl) phenylphosphonothioate (EPN) pursuant to 40 CFR 154.21 in which the registrants were informed that the Agency was planning to initiate a Special Review of EPN based on data showing that EPN causes delayed neurotoxic effects in laboratory animals. On April 30, 1987, EPA issued a Registration Standard for EPN in which it announced its decision to initiate the Special Review based on the determination that the risk criterion for delayed neurotoxic effects set forth in 40 CFR 154.7(a)(2) had been met. Subsequent to that time, all registrations of technical EPN and formulated products containing EPN have been voluntarily cancelled. Under section 6(a)(1) of The Federal Insecticide, Fungicide and Rodenticide Act (FIFRA) as amended (7 U.S.C. 136, *et seq.*) the sale and use of existing stocks of a cancelled pesticide are permitted under such terms as the Administrator may prescribe. EPA has allowed the sale, distribution, and use of such existing stocks until August 31, 1988. After that date, all remaining stocks must be disposed of as permitted by state law.

Since there were no remaining viable registrations for EPN, on July 21, 1987, the Agency issued a Proposed Decision Not To Initiate a Special Review (52 FR 27453) pursuant to 40 CFR 154.23. The 30 day comment period provided for in that Notice has expired. No comments were submitted to EPA. Accordingly, this Notice is being issued pursuant to 40 CFR 154.25 to publicly announce EPA's decision not to initiate a Special Review of EPN.

Dated: December 11, 1987.

John A. Moore,

Assistant Administrator, Office of Pesticides and Toxic Substances.

BILLING CODE 6560-50-M

FEDERAL HOME LOAN BANK BOARD

[No. 87-1254]

FSLIC Insurance Premium

Date: December 14, 1987.

AGENCY: Federal Home Loan Bank Board.

ACTION: Notice.

SUMMARY: The Federal Home Loan Bank Board, as operating head of the Federal Savings and Loan Insurance Corporation ("FSLIC" or "Corporation"), has adopted a resolution pursuant to which the Corporation ordered the assessment against each insured institution of an additional premium for FSLIC insurance in an amount equal to one thirty-second of one percent of the total amount of the accounts of the insured members of each insured institution determined as of September 30, 1987.

EFFECTIVE DATE: December 23, 1987.

FOR FURTHER INFORMATION CONTACT: Mary A. Creedon, Director, Insurance Division, Office of the FSLIC, (202) 254-2029; or JoAnne Morris, Attorney, Office of General Counsel (202) 377-7396, Federal Home Loan Bank Board, 1700 G Street NW., Washington, DC 20552.

SUPPLEMENTARY INFORMATION:

Whereas, The Federal Home Loan Bank Board ("Bank Board"), as operating head of the Federal Savings and Loan Insurance Corporation ("Corporation" or "FSLIC"), may authorize the Corporation, pursuant to section 404(c) of the National Housing Act, as amended ("NHA"), 12 U.S.C. 1727(c) (1982), to assess against each institution the accounts of which are insured by the Corporation pursuant to Section 403 of the NHA, 12 U.S.C. 1726 (1982) ("insured institution"), additional premiums of such insurance until the amount of such premiums equals the amount of all losses and expenses of the Corporation, *provided* that the total amount so assessed in any one year against any insured institution shall not exceed one eighth of one per centum of the total amount of the accounts of the insured members of such institution and *provided further* that the amount of the additional premium for the year 1987 may not exceed 5/48 of one percentum of the total amount of the accounts of the insured members of such institution unless the Bank Board determines that severe pressures on the Corporation exist which necessitate an infusion of additional funds; and

Whereas, The Bank Board, as operating head of the Corporation, by Resolution No. 85-142, dated February 22, 1985, by Resolution No. 85-437, dated June 5, 1985, by Resolution No. 85-770, dated August 27, 1985, by Resolution No. 85-1142, dated December 9, 1985, by Resolution No. 86-213, dated March 6, 1986, by Resolution No. 86-582, dated June 10, 1986, by Resolution No. 86-941, dated September 2, 1986, by Resolution No. 86-1253, dated December 15, 1986, by Resolution No. 87-281 dated March 16, 1987, by Resolution No. 87-610 dated May 27, 1987, and by Resolution No. 87-950 dated September 9, 1987, ordered assessments against each insured institution of an additional premium for insurance in an amount equal to one thirty-second of one per centum of the total amount of the accounts of the insured members of each insured institution determined as of December 31, 1984, for the first assessment, as of March 31, 1985, for the second, as of June 30, 1985, for the third, as of September 30, 1985, for the fourth, as of December 31, 1985, for the fifth, as of March 31, 1986, for the sixth, as of June 30, 1986, for the seventh, as of September 30, 1986, for the eighth, as of December 31, 1986, for the ninth, as of March 31, 1987, for the tenth, and as of June 30, 1987, for the eleventh; and

Whereas, The total insurance premiums assessed for the first three quarters of 1987 equal four and one half forty-eights of one percentum of the total amount of the accounts of the insured members of the insured institutions; and

Whereas, The Bank Board has considered memoranda of the Corporate Accounting Branch and the Chief Financial and Administrative Officer, Office of the FSLIC, (a copy of which memoranda are in the Minute Exhibit file), describing the impact of the collection of the additional premiums for insurance assessed pursuant to Resolution No. 85-142, dated February 22, 1985, Resolution No. 85-437, dated June 5, 1985, Resolution No. 85-770, dated August 28, 1985, Resolution No. 85-1142, dated December 9, 1985, Resolution No. 86-213, dated March 6, 1986, Resolution No. 86-582, dated June 10, 1986, Resolution No. 86-941, dated September 2, 1986, Resolution No. 86-1253, dated December 15, 1986, Resolution No. 87-281, dated March 16, 1987, Resolution No. 87-610 dated May 27, 1987, and Resolution No. 87-950 dated September 9, 1987, upon the Corporation's insurance reserves:

Now, therefore, it is resolved, That on the basis of the administrative record, the Bank Board finds and determines that the Corporation has incurred substantial losses during calendar years 1981 through 1986 and the first three quarters of 1987; and

Resolved further, That the Bank Board finds and determines that:

1. Losses and expenses incurred by the Corporation, as defined in Resolution No. 85-142, require the assessment of additional insurance premiums pursuant to section 404(c) of the NHA in addition to the additional insurance premiums assessed pursuant to Resolutions No. 85-142, No. 85-437, No. 85-770, No. 85-1142, No. 86-213, No. 86-582, No. 86-941, No. 86-1253, No. 87-281, No. 87-610, and No. 87-950, in order to maintain the insurance reserves of the Corporation at a level adequate to meet in part the Corporation's losses and expenses and to protect the insured members of insured institutions;

2. Severe pressures on the Corporation exist which necessitate an infusion of additional funds;

3. Postponement of a reduction in the assessment of an additional premium, as provided in section 404(c)(2) of the NHA, will improve the financing environment for selling obligations of the Financing Corporation organized pursuant to the Federal Savings and Loan Insurance Corporation Recapitalization Act of 1987;

4. It is appropriate, therefore, to provide for the assessment of an additional insurance premium at this time, pursuant to section 404(a)(2) and 404(c)(1) of the NHA, by order of the Corporation; and

Resolved further, That the Corporation hereby orders the assessment against each insured institution of an additional premium for insurance for the fourth quarter of 1987, in an amount equal to one thirty-second of one per centum of the total amount of the accounts of the insured members of such insured institution determined as of September 30, 1987; and

Resolved further, That the additional insurance premium assessed pursuant to this Resolution shall be payable on or about December 31, 1987; and

Resolved further, That the Executive Director or a Deputy Director of the FSLIC, or a designee of either of them ("Director"), shall determine the amount of the additional premium due to be paid on December 31, 1987, by each insured institution and shall notify each insured institution of such amount at least fifteen (15) days prior to the date such amount is due; and

Resolved further, That the Director, on behalf of the Corporation, is hereby authorized to take all other actions necessary or appropriate to determine and collect the additional insurance premium authorized and ordered by this Resolution; and

Resolved further, That the Secretary shall forward this Resolution for publication in the **Federal Register**.

By the Federal Home Loan Bank Board.

John F. Ghizzoni,

Assistant Secretary.

BILLING CODE 6720-01-M

FEDERAL RESERVE SYSTEM

Edward Belfer; Change in Bank Control; Acquisition of Shares of Banks or Bank Holding Companies

The notificant listed below has applied under the Change in Bank Control Act (12 U.S.C. 1817(j)) and § 225.41 of the Board's Regulation Y (12 CFR 225.41) to acquire a bank or bank holding company. The factors that are considered in acting on notices are set forth in paragraph 7 of the Act (12 U.S.C. 1817(j)(7)).

The notices are available for immediate inspection at the Federal Reserve Bank indicated. Once the notices have been accepted for processing, they will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank indicated for that notice or to the offices of the Board of Governors. Comments must be received not later than January 15, 1988.

A. **Federal Reserve Bank of Kansas City** (Thomas M. Hoenig, Vice President) 925 Grand Avenue, Kansas City, Missouri 64198:

1. *Edward Belfer*, Sherman Oaks, California, to acquire 75 percent of the voting shares of Peoples State Bank of Meeker, Meeker, Colorado.

Board of Governors of the Federal Reserve System, December 17, 1987.

James McAfee,

Associate Secretary of the Board.

BILLING CODE 6210-01-M

The Mitsubishi Ban Limited; Application To Engage de Novo in Permissible Nonbanking Activities

The company listed in this notice has filed an application under § 225.23(a)(1) of the Board's Regulation Y (12 CFR 225.23(a)(1)) for the Board's approval under section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.21(a) of Regulation Y (12 CFR 225.21(a)) to commence or to engage *de novo*, either directly or through a subsidiary, in a nonbanking activity that is listed in § 225.25 of Regulation Y as closely related to banking and permissible for bank holding companies. Unless otherwise noted, such activities will be conducted throughout the United States.

The application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

Unless otherwise noted, comments regarding the application must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than January 15, 1988.

A. **Federal Reserve Bank of San Francisco** (Harry W. Green, Vice President) 101 Market Street, San Francisco, California 94105:

1. *The Mitsubishi Ban Limited*, Tokyo, Japan, and BanCal Tri-State Corporation, San Francisco, California, to engage *de novo* in commercial and mortgage lending, sales finance and factoring pursuant to § 225.25(b)(1) of the Board's Regulation Y.

Board of Governors of the Federal Reserve System, December 17, 1987.

James McAfee,

Associate Secretary of the Board.

BILLING CODE 6210-01-M

St. Joseph Bancorporation, Inc., et al.; Formations of; Acquisitions by; and Mergers of Bank Holding Companies

The companies listed in this notice have applied for the Board's approval under section 3 of the Bank Holding Company Act (12 U.S.C. 1842) and § 225.14 of the Board's Regulation Y (12 CFR 225.14) to become a bank holding company or to acquire a bank or bank holding company. The factors that are considered in acting on the applications are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Each application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank or to the offices of the Board of Governors. Any comment on an application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

Unless otherwise noted, comments regarding each of these applications must be received not later than January 8, 1988.

A. **Federal Reserve Bank of Cleveland** (John J. Wixted, Jr., Vice President) 1455 East Sixth Street, Cleveland, Ohio 44101:

1. *St. Joseph Bancorporation, Inc.*, South Bend, Indiana; to acquire 100 percent of the voting shares of Citizens Bank, Indianapolis, Indiana.

B. **Federal Reserve Bank of Atlanta** (Robert E. Heck, Vice President) 104 Marietta Street, NW., Atlanta, Georgia 30303:

1. *WeBanc, Inc.*, Wedowee, Alabama; to become a bank holding company by acquiring 100 percent of the voting shares of Bank of Wedowee, Wedowee, Alabama.

Board of Governors of the Federal Reserve System, December 17, 1987.

James McAfee,

Associate Secretary of the Board.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. 87F-0361]

The Dow Chemical Co.; Filing of Food Additive Petition

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing that The Dow Chemical Co. has filed a petition proposing that the food additive regulations be amended to provide for the safe use of 1,6-hexanediol; 1,4-cyclohexanedimethanol; *alpha*-hydro-*omega*-hydroxy poly[oxy-1,4-butanediyl]; methyl oxirane polymer with oxirane; and methyl oxirane polymer with 1,2,3-propanetriol as reactants, and tetrakis[methylene(2,5-di-*tert*-butyl-4-hydroxyhydrocinnamate)]methane as an optional adjuvant in the production of polyurethane resins for use in contact with dry bulk food.

FOR FURTHER INFORMATION CONTACT: Hortense S. Macon, Center for Food Safety and Applied Nutrition (HFF-335), Food and Drug Administration, 200 C St. SW., Washington, DC 20204, 202-472-5690.

SUPPLEMENTARY INFORMATION: Under the Federal Food, Drug, and Cosmetic Act (sec. 409(b)(5), 72 Stat. 1786 (21 U.S.C. 348(b)(5))), notice is given that a petition (FAP 7B4038) has been filed by The Dow Chemical Co., Midland, MI 48674, proposing that § 177.1680 *Polyurethane resins* (21 CFR 177.1680) be amended to provide for the safe use of 1,6-hexanediol; 1,4-cyclohexanedimethanol; *alpha*-hydro-*omega*-hydroxy poly[oxy-1,4-butanediyl]; methyl oxirane polymer with oxirane; and methyl oxirane polymer with 1,2,3-propanetriol as reactants, and tetrakis[methylene (2,5-di-*tert*-butyl-4-hydroxyhydrocinnamate)]methane as an optional adjuvant in the production of polyurethane resins for use in contact with dry bulk food.

The potential environmental impact of this action is being reviewed. If the agency finds that an environmental impact statement is not required and this petition results in a regulation, the notice of availability of the agency's finding of no significant impact and the evidence supporting that finding will be published with the regulation in the **Federal Register** in accordance with 21 CFR 25.40(c).

Dated: December 10, 1987.

Richard J. Ronk,

Acting Director, Center for Food Safety and Applied Nutrition.

BILLING CODE 4160-01-M

Health Resources and Services Administration

Advisory Council; Meetings

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463), announcement is made of the following National Advisory bodies scheduled to meet during the month of January 1988:

Name: National Advisory Council on Health Professions Education.

Date and Time: January 20, 22, 1988, 9:00 a.m.

Place: Conference Room G, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20857.

Open on January 20, 9:00 a.m.-5:00 p.m.

Closed on January 22, 9:00 a.m.-5:00 p.m.

Purpose: The Council advises the Secretary with respect to the administration of programs of financial assistance for the health professions and makes recommendations based on its review of applications requesting such assistance. This also involves advice in the preparation of regulations with respect to policy matters.

Agenda: The open portion of the meeting will cover welcome and opening remarks, report of the Administrator, Health Resources and Services Administration, report of the Director, Bureau of Health Professions, financial management update, discussion on Council issues and priorities, and update on: Minority initiatives, a report on Osteopathic medical education, a report on Pharmacy education and future agenda items. The meeting will be closed January 22, 1988, for the review of grant applications for the Family Medicine Residency Training and Area Health Education Center programs. The closing is in accordance with the provisions set forth in section 552b(c)(6), Title 5 U.S.C. Code, and the Determination by the Administrator, Health Resources and Services Administration, pursuant to Pub. L. 92-463.

Anyone requiring information regarding the subject Council should contact Mr. Robert Belsley, Executive Secretary, National Advisory Council on Health Professions Education, Room 8C-22, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20857, Telephone (301) 443-6880.

Name: National Advisory Council on Nurse Training.

Date and Time: January 20, 22, 1988, 9:00 a.m.

Place: Conference Room G, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20857.

Open on January 20, 9:00 a.m.-12:00 p.m.

Closed for remainder of meeting.

Purpose: The Council advises the Secretary and Administrator, Health Resources and Services Administration, concerning general regulations and policy matters arising in the administration of the Nurse Education Amendments of 1985 (Pub. L. 99-92). The Council also preforms final review of grants applications for Federal Assistance, and makes recommendations to the Administrator, HRSA.

Agenda: The open portion of the meeting will cover announcements; considerations of minutes of previous meeting; report by the Director, Bureau of Health Professions, the Director, Division of Nursing and staff reports. The meeting will be closed to the public on January 20, at 12:30 p.m. for the remainder of the meeting for the review of grant applications for Advance Nurse Education applications, Nurse Practitioner/Nurse Midwifery applications, and Special Project Grants applications. The closing is in accordance with the provisions set forth in section 552b(c)(6), Title 5 U.S.C. Code, and the Determination by the

Administrator, Health Resources and Services Administration, pursuant to Pub. L. 92–463.

Anyone requiring information regarding the subject Council should contact Dr. Mary S. Hill, Executive Secretary, National Advisory Council on Nurse Training, Room 5C–14, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20857, Telephone (301) 443–6193.

Name: Joint Meeting of the National Advisory Council on Health Professions Education and the National Advisory Council on Nurse Training.

Date and Time: January 21, 1988, 9:00 a.m.

Place: Room 800, Hubert Humphrey Building, 200 Independence Avenue, SW., Washington, DC 20201.

The entire meeting is open.

Purpose: The Councils advise the Secretary concerning general regulations and policy matters arising in the administration of Title VII and VIII of the Public Health Service Act. The Council also perform final reviews of grant applications for Federal assistance and make recommendations to the Secretary.

Agenda: The morning session will be devoted to administrative and special reports, including reports from the National Center for Nursing Research, the Presidents Commission on AIDS and the council on Graduate Medical Education. The afternoon session will include discussions of reimbursement and financing health care delivery.

Agenda Items are subject to change as priorities dictate.

Date: December 17, 1987.

Jackie E. Baum,

Advisory Committee Management Officer, HRSA.

[AA-250-08-4321-02]

Information Collection Submitted to the Office of Management and Budget for Review Under the Paperwork Reduction Act

The proposal for the collection of information listed below has been submitted to the Office of Management and Budget for approval under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35). Copies of the proposed information collection requirement and related forms and explanatory material may be obtained by contacting the Bureau of Land Management's (BLM) clearance officer at the phone number listed below. Comments and suggestions on the requirement should be made directly to the BLM's clearance officer and the Office of Management and Budget's reviewing official at (202) 395–7340.

Title: 43 CFR Part 4700 Protection, Management, and Control of Wild Free-Roaming Horses and Burros.

Abstract: Respondents furnish documentation about the following:

1. Removal of wild horses and burros from private land (non form item).

2. Qualifications of applicants related to adoption of 1 to 4 wild horses or burros (form 4710–10).

3. Qualifications of applicants related to adoption of 5 or more wild horses or burros (non form item).

The request for removal of animals from private land is necessary to determine the need for removing wild horses and burros from these lands. The documentation about adoption allows the BLM to determine if an applicant will be given the opportunity to adopt wild horses or burros. Adoption applicants provide information about their qualifications and capability to provide humane care and treatment for wild horses and burros under conditions specified by Federal regulations. Applicants for adoption of more than 4 wild horses or burros are requested to provide additional information related to their capability to provide proper care for the number of wild horses or burros requested.

Bureau Form Numbers: "Application for Adoption of Wild Horse(s) and Burro(s), Form 4710–10.

Frequency: On occasion.

Description of Respondents: Landowners requesting the BLM to remove wild horses or burros from their property. Applicants desiring to adopt wild horses or burros.

Annual Response: 40,250.

Annual Burden Hours: 6,893.

Bureau Clearance Officer: Richard Iovaine, (202) 653–8853.

Date: December 14, 1987.

[WY-920-08-4111-15; W-84937]

Proposed Reinstatement of Terminated Oil and Gas Lease; Wyoming

December 15, 1987.

Pursuant to the provisions of Pub. L. 97–451, 96 Stat. 2462–2466, and Regulation 43 CFR 3108.2–3(a) and (b)(1), a petition for reinstatement of oil and gas lease W–84937 for lands in Johnson County, Wyoming, was timely filed and was accompanied by all the required rentals accruing from the date of termination.

The lessee have agreed to the amended lease terms for rentals and royalties at rates of $7 per acre, or fraction thereof, per year and 16⅔ percent, respectively.

The lessees have paid the required $500 administrative fee and $125 to reimburse the Department for the cost of this Federal Register notice. The lessees have met all the requirements for reinstatement of the lease as set out in section 31 (d) and (e) of the Mineral Lands Leasing Act of 1920 (30 U.S.C. 188), and the Bureau of Land Management is proposing to reinstate lease W–84937 effective July 1, 1987, subject to the original terms and conditions of the lease and the increased rental and royalty rates cited above.

Andrew L. Tarshis,

Chief, Leasing Section.

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of intent.

SUMMARY: Notice is hereby given in accordance with 43 CFR 1610.2 (c) that the Burley District is proposing to amend the Malad Hills Management Framework Plan to allow the exchange of the following public and private lands:

T.14S., R.30E., Boise Meridian

Section 16: N½—320 acres (private land).

T.15S., R.29E., Boise Meridian

Section 6: SE¼SW¼, NE¼NW¼, NW¼SE¼, NE¼SE¼, SW¼SE¼, Part of SE¼SE¼—220 acres (public land).

The general location of the private lands is about 28 miles southeast of Malta, Idaho and three miles northeast of Juniper, Idaho (Exit I–84). The public lands are located four miles south of the private lands.

A Land Use Plan Amendment Document and Land Report will be prepared for the subject lands. The documents will be reviewed by the Bureau of Land Management Interdisciplinary Resource Specialists. Public participation will involve the publication of this notice in the Federal Register and local newspapers. The adjoining landowners, grazing permittees, County Commissioners, the Burley District Grazing Advisory Board members and Advisory Council members, and the Idaho Fish and Game Department will be asked for comments. As public controversy is anticipated to be low for the proposed action, no public meetings, hearing, or conferences are planned.

The main issue that is anticipated for the exchange is whether it is in the public interest to exchange 220 acres of public land having potential for dry farming, for 320 acres of private land having value of livestock grazing, wildlife habitat, and public access values.

The existing land use plan and maps are available for review at the Deep Creek Resource Area Office in Malad, Idaho.

The public may obtain additional information about this exchange proposal by contacting the Bureau of Land Management, Attn: John R. Crhistensen, Deep Creek Resource Area Office in Malad, Idaho, 83252, (208) 766–4766.

Date: December 14, 1987.

John S. Davis,

District Manager.

BILLING CODE 4310-GG-M

[NV-930-08-4212-14; N-47766]

Realty Action; Battle Mountain District, Tonopah Resource Area; Nevada

AGENCY: Bureau of Land Management, Interior.

ACTION: Realty action; Noncompetitive sale of federal lands in Nye County, NV.

SUMMARY: In response to a request from the Nye County Board of County Commissioners, the following described Federal lands have been identified as suitable for direct sale under sections 203 and 209 of the Federal Land Policy and Management Act of 1976 at not less than the appraised fair market value.

Mount Diablo Meridian

Section 24, S½SW¼SW¼

A parcel of land containing 20 acres.

Nye County plans to use these lands for an expansion of the Beatty Airport.

These lands are not required for any Federal purpose. Disposal is consistent with the Bureau's planning for this area and would be in the public interest. No conflicts with State or local plans have been identified. The grazing lessee will be given the two-year notification prescribed in section 402(g) of the Federal Land Policy and Management Act of 1976.

Minimum bid for this parcel will be fair market value which will be determined by an appraisal and which will be made available prior to the sale.

The lands described in the Notice will not be offered for sale until all required environmental, archaeological, and mineral clearances are completed. Under no circumstances will these lands be sold sooner than 60 days after publication of this notice.

Segregation: Upon publication of this Notice in the Federal Register the above-described Federal lands will be segregated from all forms of appropriation under the public land laws, including locations under the mining laws, except as to application under mineral leasing laws.

Comments: For a period of 45 days from the date of publication of this Notice in the **Federal Register**, interested parties may submit comments to the District Manager, Bureau of Land Management, P.O. Box 1420, Battle Mountain, NV 89820. Objections will be reviewed by the State Director who may sustain, vacate, or modify this realty action. In the absence of any objections, this realty action will become the final determination of the Department of the Interior.

Date: December 11, 1987.

Terry L. Plummer,

District Manager, Battle Mountain, Nevada.

Minerals Management Service

Information Collection Submitted for Review

The proposal for the collection of information listed below has been submitted to the Office of Management and Budget for approval under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35). Copies of the proposed collection of information and related forms and explanatory material may be obtained by contacting Jeane Kalas at 303-231-3046. Comments and suggestions on the requirements should be made directly to the Bureau Clearance Officer at the telephone number listed below and to the Office of Management and Budget Interior Department Desk Officer, Washington DC 20503, telephone 202-395-7340.

Title: Production Accounting and Auditing System Oil and Gas Reports.

Abstract: Production Accounting and Auditing System information is needed to provide comprehensive production and disposition data on oil and gas produced from Federal onshore and offshore leases, and from Indian leases. The Minerals Management Service (MMS) uses the date to monitor production, for audits, and to compare reported production with sales data reported in the MMS Auditing and Financial System. Lessees, lease operators, and plan operators are affected.

Bureau Form Number: MMS-3160 and MMS-3160A, MMS-4051, MMS-4052, MMS-4053, MMS-4054-A,B,C, MMS-4055, MMS-4056-A,B,C, MMS-4057, MMS-4058, MMS-4061.

Frequency: Monthly, annually.

Description of Respondents: Companies producting and processing oil and gas from Federal onshore and offshore leases, and from Indian leases.

Annual Responses: 244,289.

Annual Burden Hours: 163,973.

Bureau Clearance Officer: Dorothy Christopher, 703-435-6213.

Dated: September 11, 1987.

Jerry D. Hill,

Associate Director for Royalty Management.

Oil and Gas and Sulphur Operations in the Outer Continental Shelf; Availability of Investigation Report

AGENCY: Minerals Management Service, Interior.

ACTION: Notice of availability.

SUMMARY: Notice is hereby given that an investigation report of structural failures that occurred on oil and gas facilities located on the Outer Continental Shelf is available to the public upon request.

ADDRESSES: Copies of the report may be obtained from Minerals Management Service; Offshore Rules and Operations Division, Mail Stop 646; 12203 Sunrise Valley Drive; Reston, Virginia 22091, or Public Information Section; Gulf of Mexico OCS Region; Minerals Management Service; 1420 Elmwood Park Boulevard; New Orleans, Louisiana 70123; Telephone (504) 736-2519, (FTS) 680-9519.

FOR FURTHER INFORMATION CONTACT: Mr. Price McDonald, Chief, Offshore Rules and Operations Division; Minerals Management Service; 12203 Sunrise Valley Drive, Mail Stop 646; Reston, Virginia 22091; Telephone (703) 648-7813, (FTS) 959-7813.

SUPPLEMENTARY INFORMATION: The available accident investigation report is identified as follows:

Open file No.	Event and date	Area & Block	Region
87-0075	Structural failures October 27-28, 1987.	South Timbalier, Block 96; South Pelto, Block 19.	Gulf of Mexico.

Dated: December 10, 1987.

John B. Rigg,

Associate Director for Offshore Minerals Management.

BILLING CODE 4310-MR-M

Outer Continental Shelf; Availability, Proposed Notice of Sale, Chukchi Sea, Oil and Gas Lease Sale 109

The proposed Notice of Sale for Sale 109, Chukchi Sea, may be obtained by written request to the Alaska Outer Continental Shelf (OCS) Region, Minerals Management Service, Room 544, 949 East 36th Avenue, Anchorage, Alaska 99508-4302, or by telephone (907) 261-4891.

The final Notice of Sale will be published in the **Federal Register** at least 30 days prior to the date of bid opening. Bid opening is scheduled for May 1988.

With regard to oil and gas leasing on the OCS, the Secretary of the Interior, pursuant to section 19 of the OCS Lands Act, as amended, has provided the affected States the opportunity to review the proposed Notice of Sale.

Comments should be submitted to the Minerals Management Service, 18th and C Streets, NW., Room 4230 (MS-645), Washington DC 20240, no later than 60 days after signature of this Notice.

This Notice of Availability is hereby published pursuant to 30 CFR 256.29, as amended (51 FR 37177 on October 20, 1986), as a matter of information to the public.

Date: December 16, 1987.

Wm. D. Bettenberg,

Director, Minerals Management Service.

INTERNATIONAL TRADE COMMISSION

[Investigation No. 337-TA-272]

Certain Electronic Chime Modules; Commission Decision Not To Review an Initial Determination Terminating Investigation on the Basis of a Settlement Agreement

AGENCY: International Trade Commission.

ACTION: Nonreview of an initial determination (ID) terminating the above-captioned investigation on the basis of a settlement agreement.

SUMMARY: The Commission has determined not to review an ID terminating the investigation on the basis of a settlement agreement.

FOR FURTHER INFORMATION CONTACT: Tim Yaworski, Esq., telephone (202) 523-0311, Office of the General Counsel, U.S. International Trade Commission.

SUPPLEMENTARY INFORMATION: On June 30, 1987, complainant Lectron Products, Inc., and respondents Modu-Tronics Inc. and Aimco, Inc., the only remaining respondents in the investigation, filed a joint motion (Motion No. 272-3) to terminate the investigation on the basis of a settlement agreement between the parties. The presiding administrative law judge (ALJ) issued an ID (Order No. 3) granting the motion on November 17, 1987. No petitions for review of the ID were received, nor were any comments received from other government agencies or the public.

This action is taken under the authority of section 337 of the Tariff Act of 1930 (19 U.S.C. 1337) and Commission rule 210.53 (19 CFR 210.53).

Copies of the nonconfidential version of the ALJ's ID and all other nonconfidential documents filed in connection with this investigation are available for inspection during official business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 701 E Street NW., Washington, DC 20436, telephone 202-523-0161. Hearing-impaired persons are advised that information on the matter can be obtained by contacting the Commission's TDD terminal on 202-724-0002.

By order of the Commission.

Issued: December 16, 1987.

Kenneth R. Mason,

Secretary.

BILLING CODE 7020-02-M

[Investigation No. 337-TA-253]

Certain Electrically Resistive Monocomponent Toner and "Black Powder" Preparations Therefor; Commission Determination To Extend the Deadline

AGENCY: International Trade Commission.

ACTION: Notice is hereby given that the U.S. International Trade Commission has determined to extend until February 22, 1988, the deadline for deciding whether to review an initial determination (ID) finding a violation of section 337 in the above-captioned investigation. The parties to the investigation are requested to file written submissions on specified issues pertaining to violation of section 337 and on the issues of remedy, the public interest, and bonding.

SUMMARY: On November 10, 1987, the presiding administrative law judge (ALJ) issued an ID finding that there is a violation of section 337 of the Tariff Act of 1930 (19 U.S.C. 1337) in the importation and sale of electrically resistive monocomponent toner compatible with the Canon NP 210—NP 500 line of photocopiers (ERMT), consisting of disparagement of competing toners as "pirate" by respondents in such a manner as to restrain or monopolize trade or commerce in the United States. The ID found no violation of section 337 with respect to numerous other alleged unfair acts or methods of competition.

On November 23, 1987, complainant Aunyx Corp. (Aunyx) and the Commission investigative attorney (IA) filed petitions for review of the ID. On November 25, 1987, respondents Canon, Inc. and Canon U.S.A., Inc. (the Canon respondents) also filed a petition for review. Responses to the petitions for review were filed by the Canon respondents on December 4, 1987, and by Aunyx and the IA on December 7, 1987. Government agency comments are not due until December 22, 1987. The previous deadline for deciding whether to review the ID was December 28, 1987. The statutory deadline for completion of this investigation is February 22, 1988.

Authority: This action is taken under the authority of section 337 of the Tariff Act of 1930 (19 U.S.C. 1337) and §§ 210.54-210.58 of the Commission's Rules of Practice and Practice and Procedure (19 CFR 210.54-210.58).

FOR FURTHER INFORMATION CONTACT: Edwin J. Madaj, Jr., Esq., Office of the General Counsel, U.S. International Trade Commission, telephone 202-523-0148.

SUPPLEMENTARY INFORMATION: If the Commission reviews the ID and affirms the ID's conclusion that a violation of section 337 has ocurred, or finds that other violations have occurred, the Commission may issue (1) an order that could result in the exclusion of the subject articles from entry into the United States and/or (2) cease and desist orders that could result in respondents being required to cease and desist from engaging in unfair acts or methods of competition in the importation and sale of such articles. Accordingly, the Commission is interested in receiving written submissions that address the form of relief, if any, that should be ordered.

If the Commission concludes that some form of relief is appropriate, it must consider the effect of that relief upon the public health and welfare, competitive conditions in the U.S. economy, the U.S. production of articles that are like or directly competitive with those that are subject to investigation, and U.S consumers. The Commission is therefore interested in receiving written submission concerning the effect, if any, that granting relief would have on the enumerated public interest factors.

If the Commission orders belief, the President has 60 days to approve or disapprove the Commission's action. During this period, the subject articles would be entitled to enter the United States under a bond in an amount determined by the Commission and prescribed by the Secretary of the Treasury. The Commission is therefore interested in receiving written submissions concerning the amount of the bond that should be imposed.

Written Submissions: The parties to the investigation, interested Government agencies and other persons are requested to file written submissions on the issues of remedy, the public interest, and bonding. Complainant and the Commission investigative attorney are also requested to submit proposed remedial orders for the Commission's consideration. The parties are also requested to brief the following specific issues relevant to the question of whether a violation of section 337 has occurred:

(1) Is there a sufficient nexus between importation or sale of ERMT and the unfair act or method of competition found to exist in this case to warrant the exercise of jurisdiction under section 337;

(2) Cite any cases which have considered whether reference to a competitor in terms such as "pirate," or reference to a competitor's product in terms such as "pirated," is an actionable business tort or antitrust violation;

(3) Cite any cases which have considered whether disparagement by a monopolist, apart from any other antitrust violation, such as conspiracy to monopolize, was found to be sufficient for liability under the antitrust laws;

(4) The ID appears to assume that Canon can be held responsible for the fact that "the terms 'pirate toner' and 'toner pirates' pervaded the entire distribution system for the Canon copiers in question." ID at 170-71. What facts in the record support this finding? As a matter of law, can Canon be held liable for any disparagement committed by others, such as Canon's dealers?

(5) Cite and discuss specific evidence in the record, if any, that indicates that a domestic industry composed of all U.S. producers of ERMT, not just Aunyx, is efficiently and economically operated; and

(6) Cite and discuss specific evidence in the record indicating that a domestic industry composed of all U.S. producers of ERMT was destroyed or substantially injured, or prevented from being established. Would such evidence be sufficient to prove an effect or tendency to destroy, substantially injure or prevent the establishment of that industry? Would such evidence be sufficient if information with respect to Aunyx cannot be considered as a result of the sanctions imposed on Aunyx for failure to obey discovery orders?

Interested Government agencies may also file written submissions on these questions, to the extent such submissions are feasible without access to the confidential record.

Written submissions on these issues, and on the issues of remedy, the public interest, and bonding must be filed by the parties no later than the close of business on December 31, 1987. Reply submissions must be filed by the parties no later than the close of business on January 7, 1988. Interested Government agencies must file any written submissions by no later than the close of business on January 7, 1988. Interested persons other than the parties and Government agencies may file written submissions addressing the issues of remedy, the public interest, and bonding. Such submissions must be filed not later than the close of business on January 7, 1988. No further submissions will be permitted.

Commission Hearing: The Commission does not plan to hold a public hearing, and denies the request filed by the Canon respondents for oral argument.

Additional Information: Persons submitting written submissions must file the original document and 14 clear copies thereof with the Office of the Secretary on or before the deadlines stated above. Any person desiring to submit a document (or a portion thereof) to the Commission in confidence must request confidential treatment unless the information has already been granted such treatment during the proceedings. All such requests should be directed to the Secretary of the Commission and must include a statement of the reasons why the Commission should grant such treatment. Documents containing confidential information approved by the Commission for confidential treatment will be treated accordingly. All nonconfidential submissions will be available for public inspection at the Office of the Secretary.

Copies of the nonconfidential version of the ALJ's ID and all other nonconfidential documents filed in connection with this investigation are available for inspection during official business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 701 E Street NW., Washington, DC 20436, telephone 202–523–0161. Hearing-impaired by contacting the Commission's TDD terminal on 202–742–[illegible].

All interested persons are hereby notified that effective January 11, 1988, the Commission's address will be 500 E Street, SW., Washington, DC 20436.

By order of the Commission.

Issued: December 18, 1987.

Kenneth R. Mason,

Secretary.

[FR Doc. 87–29414 Filed 12–22–87; 8:45 am]

BILLING CODE 7020–02–M

[Investigation No. 731–TA–377 (Final)]

Internal Combustion Engine Industrial Fork-Lift Trucks From Japan

AGENCY: International Trade Commission.

ACTION: Institution of a final antidumping investigation and scheduling of a hearing to be held in connection with the investigation.

SUMMARY: The Commission hereby gives notice of the institution of final antidumping investigation No. 731–TA–377 (Final) under section 735(b) of the Tariff Act of 1930 (19 U.S.C. 1673d(b)) to determine whether an industry in the United States is materially injured, or is threatened with material injury, or the establishment of an industry in the United States is materially retarded, by reason of imports from Japan of internal combustion engine industrial fork-lift trucks provided for in item 692.40 of the Tariff Schedules of the United States (TSUS),[1] that have been found by the Department of Commerce, in a preliminary determination, to be sold in the United States at less than fair value (LTFV). Commerce will make its final LTFV determination not later than April 7, 1988 [2] and the Commission will make its final injury determination by May 23, 1988 (see sections 735(a) and 735(b) of the act (19 U.S.C. 1673d(a) and 1673d(b))).

For further information concerning the conduct of this investigation, hearing procedures, and rules of general application, consult the Commission's Rules of Practice and Procedure, Part 207, Subparts A and C (19 CFR Part 207), and Part 201, Subparts A through E (19 CFR Part 201).

EFFECTIVE DATE: November 24, 1987.

FOR FURTHER INFORMATION CONTACT: Lawrence Rausch (202–523–0300), Office of Investigations, U.S. International Trade Commission, 701 E Street NW., Washington, DC 20436. Hearing-impaired individuals are advised that information on this matter can be obtained by contacting the Commission's TDD terminal on 202–724–0002. Persons with mobility impairments who will need special assistance in gaining access to the Commission should contact the Office of the Secretary at 202–523–0161.

SUPPLEMENTARY INFORMATION:

Background

This investigation is being instituted as a result of an affirmative preliminary determination by the Department of Commerce that imports of certain internal combustion engine fork-lift trucks from Japan are being sold in the United States at less than fair value within the meaning of section 731 of the act (19 U.S.C. 1673). The investigation was requested in a petition filed on April 22, 1987, by Hyster Company of Portland, OR, a U.S. producer of internal combustion engine fork-lift trucks, the Independent Lift Truck Builders Union, the International Association of Machinists and Aerospace Workers, the International Union, Allied Industrial Workers of America (AFL–CIO), and the United Shop and Service Employees. In response to that petition the Commission conducted a preliminary antidumping investigation and, on the basis of information developed during the course of that investigation, determined that there was a reasonable indication that an industry in the United States was materially injured by reason of imports of the subject merchandise (52 FR 23725, June 24, 1987).

Participation in the Investigation

Persons wishing to participate in this investigation as parties must file an entry of appearance with the Secretary to the Commission, as provided in § 201.11 of the Commission's rules (19 CFR 201.11), not later than twenty-one (21) days after the publication of this notice in the **Federal Register**. Any entry of appearance filed after this date will be referred to the Chairman, who will determine whether to accept the late entry for good cause shown by the person desiring to file the entry.

[1] The products covered by this investigation are certain internal combustion engine industrial fork-lift trucks, with lifting capacity of 2,000 to 15,000 pounds. For purposes of this investigation, "internal combustion engine industrial fork-lift trucks" include both assembled, not assembled, and less than complete, finished and not finished, operator-riding fork-lift trucks, powered by gasoline, propane, or diesel fuel internal combustion engines, of off-the-highway types used in factories, warehouses, or transportation terminals for short-distance transport, towing, or handling of articles. Less than complete fork-lift trucks are defined as imports which include a frame by itself or a frame assembled with one or more component parts.

[2] Commerce extended the date for its final determination in response to a request by respondents, pursuant to section 735(a)(2)(A) of the Act. Commerce's formal notice concerning the date for its final determination will be published in the **Federal Register**.

Service List

Pursuant to § 201.11(d) of the Commission's rules (19 CFR 201.11(d)), the Secretary will prepare a service list containing the names and addresses of all persons, or their representatives, who are parties to the investigation upon the expiration of the period for filing entries of appearance. In accordance with §§ 201.16(c) and 207.3 of the rules (19 CFR 201.16(c) and 207.3), each document filed by a party to the investigation must be served on all other parties to the investigation (as identified by the service list), and a certificate of service must accompany the document. The Secretary will not accept a document for filing without a certificate of service.

Staff Report

A public version of the prehearing staff report in this investigation will be placed in the public record on March 29, 1988, pursuant to § 207.21 of the Commission's rules (19 CFR 207.21).

Hearing

The Commission will hold a hearing in connection with this investigation beginning at 9:30 a.m. on April 13, 1988, at the U.S. International Trade Commission Building, 500 E Street SW., Washington, DC. Requests to appear at the hearing should be filed in writing with the Secretary to the Commission not later than the close of business (5:15 p.m.) on April 5, 1988. All persons desiring to appear at the hearing and make oral presentations should file prehearing briefs and attend a prehearing conference to be held at 9:30 a.m. on April 8, 1988, at the U.S. International Trade Commission Building. The deadline for filing prehearing briefs is April 8, 1988.

Testimony at the public hearing is governed by § 207.23 of the Commission's rules (19 CFR 207.23). This rule requires that testimony be limited to a nonconfidential summary and anaylsis of material contained in prehearing briefs and to information not available at the time the prehearing brief was submitted. Any written materials submitted at the hearing must be filed in accordance with the procedure described below and any confidential materials must be submitted at least three (3) working days prior to the hearing (see § 201.6(b)(2) of the Commission's rules (19 CFR 201.6(b)(2))).

Written Submissions

All legal arguments, economic analyses, and factual materials relevant to the public hearing should be included in prehearing briefs in accordance with § 207.22 of the Commission's rules (19 CFR 207.22). Posthearing briefs must conform with the provisions of section 207.24 (19 CFR 207.24) and must be submitted not later than the close of business on April 20, 1988. In addition, any person who has not entered on appearance as a party to the investigation may submit a written statement of information pertinent to the subject of the investigation on or before April 20, 1988.

A signed original and fourteen (14) copies of each submission must be filed with the Secretary to the Commission in accordance with § 201.8 of the Commission's rules (19 CFR 201.8). All written submissions except for confidential business data will be available for public inspection during regular business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary to the Commission.

Any business information for which confidential treatment is desired must be submitted separately. The envelope and all pages of such submissions must be clearly labeled "Confidential Business Information." Confidential submissions and requests for confidential treatment must conform with the requirements of § 201.6 of the Commission's rules (19 CFR 201.6).

Authority

This investigation is being conducted under authority of the Tariff Act of 1930, title VII. This notice is published pursuant to §207.20 of the Commission's rules (19 CFR 207.20).

By order of the Commission.

Issued: December 15, 1987.

Kenneth R. Mason,

Secretary.

BILLING CODE 7020–02–M

[Investigation No. 751–TA–14]

Liquid Crystal Display Television Receivers From Japan

Determination

On the basis of the record [1] developed in the subject investigation, the Commission determines,[2] pursuant to section 751(b) of the Tariff Act of 1930 (19 U.S.C. 1675(b)), not to modify or revoke the antidumping order with regard to liquid crystal display television receivers (LCD TV's) from Japan.

Background

On April 28, 1987, the Commission received a request from counsel on behalf of Casio Computer Co., Ltd.; Casio, Inc.; Citizen Watch Co., Ltd.; Hitachi, Ltd.; Hitachi Sales Corp. of America; Hitachi Sales Corp. of Hawaii, Inc.; Matsushita Electrical Industrial Co., Ltd.; Matsushita Electric Corp. of America; NEC Corp.; NEC Home Electronics (U.S.A.), Inc.; Seiko Epson Corp.; Sharp Corp.; Sharp Electronics Corp.; Toshiba Corp.; and Toshiba America, Inc.; to modify T.D. 71–76 to exclude LCD TV's from the scope thereof. After consideration of the request for review and of responses to a **Federal Register** notice inviting comments (52 FR 21630), the Commission instituted investigation No. 751–TA–14 effective August 20, 1987, for the purpose of reviewing the Commission's affirmative determination in Television Receiving Sets from Japan, investigation No. AA1921–66 (T.C. Pub. No. 367 (1971)). Notice of the investigation and the Commission's hearing was published in the **Federal Register** of August 20, 1987 (52 FR 31454). A hearing was held in the Commission's hearing room on November 12, 1987, at which time all interested parties were afforded the opportunity to present information for consideration by the Commission.

The Commission transmitted its determination in this investigation to the Secretary of Commerce on December 16, 1987. The views of the Commission are contained in USITC Publication 2042 (December 1987), entitled "Liquid Crystal Display Television Receivers from Japan: Determination of the Commission in Investigation No. 751–TA–14 Under the Tariff Act of 1930, Together With the Information Obtained in the Investigation."

By order of the Commission.

Issued: December 17, 1987.

Kenneth R. Mason,

Secretary.

[FR Doc. 87–29416 Filed 12–22–87; 8:45 am]

BILLING CODE 7020–02–M

[1] The record is defined in § 207.2(i) of the Commission's Rules of Practice and Procedure (19 CFR 207.2(i)).

[2] Chairman Liebeler and Vice Chairman Brunsdale determine that an industry in the United States would not be materially injured or threatened with material injury, and the establishment of an industry in the United States would not be materially retarded, by reason of imports of LCD TV's from Japan if the antidumping order regarding such merchandise were to be modified.

[Investigation No. 337-TA-267]

Certain Minoxidil Power, Salts and Compositions for Use in Hair Treatment; Initial Determination Terminating Respondent on the Basis of Settlement Agreement

AGENCY: U.S. International Trade Commission.

ACTION: Notice is hereby given that the Commission has received an initial determination from the presiding officer in the above-captioned investigation terminating the following respondent on the basis of a settlement agreement: Health International Laboratories, Inc.

SUPPLEMENTARY INFORMATION: This investigation is being conducted pursuant to section 337 of the Tariff Act of 1930 (19 U.S.C. 1337). Under the Commission's rules, the presiding officer's initial determination will become the determination of the Commission thirty (30) days after the date of its service upon the parties, unless the Commission orders review of the initial determination. The initial determination in this matter was served upon the parties on December 14, 1987.

Copies of the initial determination, the settlement agreement, and all other nonconfidential documents filed in connection with this investigation are available for inspection during official business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 701 E Street NW., Washington, DC 20436, telephone 202-523-0161. Hearing impaired individuals are advised that information on this matter can be obtained by contacting the Commission's TDD terminal on 202-724-0002.

WRITTEN COMMENTS: Interested persons may file written comments with the Commission concerning termination of the aforementioned respondent. The original and 14 copies of all such comments must be filed with the Secretary to the Commission, 701 E Street, NW., Washington, DC 20436, no later than 10 days after publication of this notice in the **Federal Register**. Any person desiring to submit a document (or portion thereof) to the Commission in confidence must request confidential treatment. Such requests should be directed to the Secretary to the Commission and must include a full statement of the reasons why confidential treatment should be granted. The Commission will either accept the submission in confidence or return it.

FOR FURTHER INFORMATION CONTACT: Ruby J. Dionne, Office of the Secretary, U.S. International Trade Commission, telephone 202-523-0176.

By order of the Commission.
Issued: December 14, 1987.

Kenneth R. Mason,
Secretary.

INTERSTATE COMMERCE COMMISSION

[Ex Parte No. 473]

Railroad Cost of Capital—1987; Limited Revenue Adequacy Proceeding

AGENCY: Interstate Commerce Commission.

ACTION: Notice of decision instituting a proceeding to determine the railroads' 1987 cost of capital.

SUMMARY: The Commission is instituting a proceeding to determine the railroad industry's cost of capital rate for 1987. The decision solicits comments on: (1) The railroads' 1987 (i.e., current) cost of debt capital; (2) the railroads' 1987 (i.e., current) cost of preferred stock equity capital; (3) the railroads' 1987 cost of common stock equity capital; (4) the 1987 capital structure mix of the railroad industry on a market value basis. With respect to the cost of common equity capital, the decision seeks comment on the use of specific data to estimate the growth rate component of the discounted cash flow methodology.

DATES: Notices of intent to participate are due January 8, 1988. Statements of railroads due February 10, 1988. Statements of other interested parties due March 10, 1988. Rebuttal statements by railroads due March 25, 1988.

ADDRESSES: Send an original and 15 copies of statements and an original and 1 copy of the notice of intent to participate to: Office of the Secretary, Case Control Branch, Interstate Commerce Commission, Washington, DC 20412.

FOR FURTHER INFORMATION CONTACT: Ward L. Ginn, Jr., (202) 275-7489, (TDD for hearing impaired: (202) 275-1721).

SUPPLEMENTARY INFORMATION: Additional information is contained in the Commission's decision. To purchase a copy of the full decision, write to Dynamic Concepts, Inc., Room 2229, Interstate Commerce Commission Building, Washington, DC 20423; or call (202) 289-4357/4359, (DC Metropolitan area). (Assistance for the hearing impaired is available through TDD services (202) 275-1721, or by pick-up from Dynamic Concepts, Inc. in Room 2229 at Commission headquarters.)

This action will not significantly affect either the quality of the human environment or energy conservation. Nor will it have a significant economic impact on a substantial number of small entities.

Authority: 49 U.S.C. 10704(a).

Decided: December 15, 1987.

By the Commission, Chairman Gradison, Vice Chairman Lamboley, Commissioners Sterrett, Andre and Simmons.

Noreta R. McGee,
Secretary.

[Finance Docket No. 31136]

Louisville & Jefferson County Riverport Authority and CSX Transportation, Inc.; Construction and Operation Exemption in Jefferson City, KY

AGENCY: Interstate Commerce Commission.

ACTION: Notice of exemption.

SUMMARY: The Commission exempts from 49 U.S.C. 10901 the construction by the Louisville & Jefferson County Riverport Authority of 0.7 miles of rail line adjacent to and in the Riverport industrial facility located near Louisville, KY. CSX joined in the petition, and its operation over the line is also exempted. This decision is effective on December 31, 1987.

DATES: Petitions to reopen must be filed by January 12, 1988.

ADDRESS: Petitioners' representative: Betty Jo Christian, Steptoe & Johnson, 1330 Connecticut Avenue NW., Washington, DC 20036.

FOR FURTHER INFORMATION CONTACT: Joseph H. Dettmar, (202) 275-7245 [TDD for hearing impaired: (202) 275-1721].

SUPPLEMENTARY INFORMATION: Additional information is contained in the Commission's decision. To purchase a copy of the full decision, write to Dynamic Concepts, Inc., Room 2229, Interstate Commerce Commission Building, Washington, DC 20423 or call (202) 289-4357/4359 (DC Metropolitan area), assistance for the hearing impaired is available through TDD services (202) 275-1721 or by pickup from Dynamic Concepts, Inc. in Room 2229 at Commission headquarters.

This action will not significantly affect either the quality of the human environment or energy conservation.

Decided: December 16, 1987.

By the Commission, Chairman Gradison, Vice Chairman Lamboley, Commissioners Sterrett, Andre, and Simmons.

Noreta R. McGee,
Secretary

BILLING CODE 7035-01-M

DEPARTMENT OF JUSTICE

Lodging of Consent Decree Pursuant to the Clean Air Act; L & C Europa Contracting Co.

In accordance with departmental policy, 28 CFR 50.7, notice is hereby given that on December 4, 1987, a proposed consent decree in *United States of America v. L & C Europa Contracting Co.*, Civ. No. 86-3463, was lodged with the United States District Court for the District of New Jersey. The complaint filed by the United States sought civil penalties and injunctive relief under the Clean Air Act with respect to alleged violations of the National Emission Standards for Hazardous Air Pollutants ("NESHAP") during a renovation project to remove asbestos from a public school in Patterson, New Jersey.

Under the proposed consent decree, the renovation contractor and the Patterson School Board agree to the entry of an injunction requiring them to comply with the asbestos NESHAP in future projects and to pay a civil penalty of $25,000.

The Department of Justice will receive for a period of thirty (30) days from the date of this publication comments relating to the proposed consent decree. Comments should be addressed to the Assistant Attorney General, Land and Natural Resources Division, Department of Justice, Washington, DC 20530, and should refer to *United States v. L & C Europa Contracting Co.*, D.J. Ref. 90-5-2-1-929.

The proposed consent decree may be examined at the offices of the United States Attorney, Federal Building, 970 Broad Street, Newark, New Jersey 07102, and at the Region II office of the Environmental Protection Agency, 26 Federal Plaza, New York, NY 10278. A copy of the consent decree may be examined at the Environmental Enforcement Section, Land and Natural Resources Division, Department of Justice, Room 1517, Ninth Street and Pennsylvania Avenue, NW., Washington, DC 20530. Copies of the proposed consent decree may be obtained in person or by mail from the Environmental Enforcement Section, Land and Natural Resources Division of the Department of Justice.

Roger J. Marzulla,
Acting Assistant Attorney General, Land & Natural Resources Division.

BILLING CODE 4410-01-M

Drug Enforcement Administration

[Docket No. 86-94]

Parker Pharmacy; Revocation of Registration

On November 28, 1986, the Deputy Assistant Administrator, Office of Diversion Control, Drug Enforcement Administration (DEA) issued an Order to Show Cause to East Oglethorpe Pharmacy, Inc., d.b.a Parker Pharmacy (Respondent) proposing to revoke its DEA Certificate of Registration AE8391043 and to deny any pending applications for the renewal of such registration as a retail pharmacy under 21 U.S.C. 823(f). The Order to Show Cause alleged that the continued registration of the pharmacy would be inconsistent with the public interest, as set forth in 21 U.S.C. 823(f) and 21 U.S.C. 824(a)(4).

Respondent, through counsel, requested a hearing on the issues raised by the Order to Show Cause and the matter was docketed before Administrative Law Judge Francis L. Young. Following prehearing procedures, a hearing was held before Judge Young in Washington, DC on May 6 and 7, 1987. On September 2, 1987, the Administrative Law Judge issued his opinion and recommended ruling, findings of fact, conclusions of law and decision. Pursuant to 21 CFR 1316.66, both the Government and Respondent filed exceptions to Judge Young's opinion and recommended ruling. On October 27, 1987, the Administrative Law Judge transmitted the record to the Administrator. The Administrator has considered the record in its entirety and pursuant to 21 CFR 1316.67, hereby issues his final order in this matter, based upon findings of fact and conclusions of law as hereinafter set forth.

In 1976, the Georgia Drugs and Narcotics Agency initiated an investigation of Albany Drug Company, the predecessor to Respondent. The investigation was based on information that the pharmacist-in-charge of Albany Drug Company was ordering large quantities of Dilaudid and morphine sulfate, Schedule II controlled substances. A subsequent audit at the pharmacy conducted by the Georgia Drugs and Narcotics Agency of selected Schedule II controlled substances revealed significant shortages. Jonnie Parker, the pharmacist-in-charge, explained the shortages by stating that they were a result of his taking the substances from the pharmacy for his own personal use. As a result of the audit, Jonnie Parker surrendered his pharmacist license with the Georgia State Board of Pharmacy. Parker also agreed to seek medical help for his drug addiction, however he never received such treatment.

Jonnie Parker's pharmacist license was reinstated on March 31, 1976. On October 6, 1976, Jonnie Parker, as the managing pharmacist, submitted an application for registration as a retail pharmacy with the Georgia State Board of Pharmacy on behalf of Respondent. This registration was subsequently granted.

On May 10, 1983, a reliable informant purchased parafon forte, a non-controlled substance requiring a prescription, from Jonnie Parker, the owner and pharmacist of Respondent, without presenting a prescription for the drug. As a result of this sale, Jonnie Parker was arrested on August 30, 1983. Following his arrest, Jonnie Parker admitted to an agent of the Georgia Drugs and Narcotics Agency that he took Demerol, a Schedule II controlled substance, from Respondent for his own use without any legitimate medical need for the drug.

Subsequent to his arrest, Jonnie Parker agreed to submit to random urine tests. Percy Phillips, who at the time was Director of Pharmacy at an area hospital, was asked by a Georgia Drugs and Narcotics agent to help administer the urine screening program for Jonnie Parker. In November 1984, Percy Phillips stopped notifying the agent of the Georgia Drugs and Narcotics Agency of the results of Jonnie Parker's urine screens. At the time, Percy Phillips was negotiating a business partnership with Jonnie Parker and felt that administration of the screens created a conflict of interest. However, he did not notify the agent that he would no longer send the results of the screens to the agent. During November 1984, Percy Phillips became pharmacist-in-charge of Respondent and obtained 10% of the shares of stock in Respondent.

On November 27, 1984, Jonnie Parker entered into a Consent Order with the Georgia State Board of Pharmacy. Jonnie Parker admitted to taking drugs from Respondent for his own use and expressed a willingness to receive treatment for his drug addiction. The Board ordered that Jonnie Parker's

BEST COPY AVAILABLE

VOL 52 ISS 246 DEC 23 1987 UMI

license to practice pharmacy be suspended until he presented the board with evidence of successful completion of a drug rehabilitation program. The Board further ordered that Jonnie Parker not be on the premises of Respondent during the suspension of the pharmacist license.

On January 24, 1985, Percy Phillips, the pharmacist-in-charge of Respondent, reported an alleged theft of controlled substances from Respondent's narcotics locker. The lock of the locker was forced open, yet there were no signs of forcible entry into the building. Only Percy Phillips and Roseanna Parker, Jonnie Parker's wife, had keys to Respondent at that time.

In January 1985, an investigation by the Georgia Drugs and Narcotics Agency and the Albany Police Department revealed that several prescriptions written for Jonnie Parker for Demerol were altered or forged. Three of these prescriptions were filled by Percy Phillips. Percy Phillips filled these prescriptions even though he knew that Jonnie Parker was addicted to Demerol.

As a result of the altered or forged prescriptions and statements taken from two witnesses which revealed that Jonnie Parker had distributed Demerol to them without a prescription, Jonnie Parker was indicted by a Dougherty County, Georgia, Grand Jury. On April 17, 1985, Jonnie Parker pled guilty to one count of obtaining drugs by misrepresentation and *nolo contendere* to two counts of obtaining drugs by misrepresentation. These are felony offenses relating to controlled substances. Jonnie Parker was sentenced to 24 years probation and ordered to surrender all licenses to the Georgia State Board of Pharmacy, not to reapply for any licenses for seven years, and to divest himself of all interest in Respondent. On November 4, 1985, Jonnie Parker signed a Surrender of Registration document, whereby he complied with the court's order and surrendered his license to practice pharmacy. This surrender was accepted by the Georgia State Board of Pharmacy on November 21, 1985.

On March 31, 1986, the Georgia State Board of Pharmacy entered into a Consent Order with Respondent pharmacy, whereby, *inter alia*, Jonnie Parker was ordered to divest himself of all interest in Respondent pharmacy and ordered not to go on the premises of Respondent. Jonnie Parker gave his wife, Roseanna, his 90% interest in the corporation. He received no compensation for these shares.

Respondent submitted an application for registration as a retail pharmacy with the Georgia State Board of Pharmacy, which listed Percy Phillips as the president and treasurer and Roseanna Parker as secretary. Percy Phillips signed this application on behalf of Respondent on April 3, 1986, as president of the corporation. On April 10, 1986, Jonnie Parker signed, as president of Respondent, the 1986 Annual Registration of Respondent with the State of Georgia, Secretary of State.

On July 29, 1986, the Georgia State Board of Pharmacy accepted a Consent Order which was signed by Percy Phillips on July 10, 1986. The Consent Order states that Percy Phillips knew, or should have known, that certain prescriptions that he filled for Jonnie Parker were altered or forged. The board ordered that Percy Phillips pay a $500 fine and that the Consent Order serve as a public reprimand.

Jonnie Parker is currently unemployed. Roseanna Parker is employed by Respondent as a pharmacy technician and therefore has access to the controlled substances at Respondent. Roseanna Parker however, does not have a key to the pharmacy department, to the narcotics locker, or to the building itself.

The Administrative Law Judge concluded that based on the evidence presented, there is a lawful basis to revoke the pharmacy's DEA Certificate of Registration. The Administrator and his predecessors have consistently held that the registration of a corporate registrant may be revoked upon a finding that a natural person who is an owner, officer or key employee, or who had some responsibility for the operation of the registrant's business, has been convicted of a felony offense relating to controlled substances. See, *Leonard J. Cohen, t/a Senate Drug Store*, Docket No. 72–5, 38 FR 9522 (1973); *Norman Bridge Drug Co., Inc.*, Docket No. 74–22, 41 FR 3108 (1976); *Lawson & Son's Pharmacy and Fenwick Pharmacy*, 48 FR 16140 (1983). Jonnie Parker, Respondent's previous president, owner and pharmacist-in-charge, was convicted of controlled substance related felony offenses, therefore the Administrative Law Judge concluded that pursuant to 21 U.S.C. 824(a)(2), Respondent's registration could be revoked.

The Administrative Law Judge concluded that based on his past history with controlled substances, Jonnie Parker cannot be trusted. Jonnie Parker can still exert considerable influence over Respondent, since his wife, Roseanna, now owns 90% of Respondent. Judge Young further concluded that, "Jonnie Parker's lamentable history with respect to efforts to control his drug abuse problem requires that both he and his wife have absolutely no further connection with this operation." Therefore, the Administrative Law Judge recommended that a final order be entered, effective 90 days after it is published, revoking the subject registration unless, prior to that time, the DEA Field Office having jurisdiction over the pharmacy is satisfied that the pharmacy will continue to operate indefinitely with Percy Phillips as pharmacist-in-charge, and that neither Jonnie nor Roseanna Parker then retains any ownership interest in, or control over Respondent.

Both Government counsel and Respondent's counsel filed exceptions to the Administrative Law Judge's recommended ruling. The Government urged the Administrator to revoke Respondent's registration not only based on the Parkers' relationship with the pharmacy but also due to Percy Phillips' involvement with Respondent. Respondent, in its exceptions, contended that since Jonnie Parker is no longer an owner or pharmacist at Respondent, the problems have been solved and therefore Roseanna Parker should not be deprived of her right to own 90% of Respondent.

The Administrator rejects the recommended decision of the Administrative Law Judge. The Administrator concludes that in addition to the fact that there is a lawful basis to revoke Respondent's DEA Certificate of Registration pursuant to 21 U.S.C. 824(a)(2), another equally strong basis exists for the revocation of Respondent's registration; that the continued registration of Respondent is inconsistent with the public interest. 21 U.S.C. 824(a)(4). The Administrator bases this conclusion on the fact that Jonnie Parker continues to exert influence over Respondent through his wife's ownership of 90% of the pharmacy. In addition, since 1984, Percy Phillips has had a close working relationship with the Parkers. The Administrator further bases his conclusion on the fact that Percy Phillips, 10% owner and pharmacist-in-charge of Respondent, filled altered and forged prescriptions for Demerol for Jonnie Parker even though he was well aware that Jonnie Parker was addicted to the drug. Therefore, the Administrator concludes that Respondent's registration must be revoked.

Accordingly, the Administrator of the Drug Enforcement Administration, pursuant to the authority vested in him by 21 U.S.C. 823 and 824 and 28 CFR 0.100(b), hereby orders that DEA Certificate of Registration AE8391043, previously issued to East Oglethorpe Pharmacy, Inc., d/b/a Parker Pharmacy, be, and it hereby is, revoked. The Administrator further orders that any pending applications for the renewal of such registration, be, and they hereby are, denied. This order is effective January 22, 1988.

Date: December 16, 1987.

John C. Lawn,

Administrator.

[FR Doc. 87–29337 Filed 12–22–87; 8:45 am]

BILLING CODE 4410–09–M

NATIONAL CREDIT UNION ADMINISTRATION

Community Development Revolving Loan Program for Credit Unions

AGENCY: National Credit Union Administration (NCUA).

ACTION: Proposal to eliminate Community Development Revolving Loan Program for credit unions from coverage under Executive Order 12372.

DATE: Comments must be received on or before February 22, 1988.

ADDRESS: Send comments to Becky Baker, Secretary, NCUA Board, National Credit Union Administration, 1776 G Street, NW., Washington, DC 20456.

FOR FURTHER INFORMATION CONTACT: Hattie M. Ulan, Staff Attorney, Office of General Counsel, at the above address, or telephone (202) 357–1030.

SUPPLEMENTARY INFORMATION: Congress transferred the authority for implementation of the Community Development Revolving Loan Program for Credit Unions (Program) from the Department of Health and Human Services to the National Credit Union Administration in November, 1986. The NCUA promulgated a final rule implementing the Program in September, 1987 (See 12 CFR 705, 52 FR 34891, September 16, 1987). Executive Order 12372 entitled "Intergovernmental Review of Federal Programs" requires that "Federal agencies shall provide opportunities for consultation by elected officials of those state or local governments that would provide the non-Federal funds for, or that would be directly affected by, proposed Federal financial assistance or direct Federal development."

The Office of Management and Budget (OMB) provides oversight for Executive Order 12372. Pursuant to Pub. L. 98–169, the General Services Administration (GSA) publishes annually the Catalog of Federal Domestic Assistance (CFDA) listing all Federal government programs that are to comply with Executive Order 12372. The determination as to the applicability of programs to Executive Order 12372 is made by the Federal agency operating the program as submitted for publication in the CFDA. The Program was added to the CFDA by the Department of Health and Human Services and first appeared in the CFDA in 1987. (See CFDA #44.002.) As explained below, it is the position of the NCUA Board that the Program was mistakenly included in the CFDA and should be deleted.

The Program operates as follows. Credit unions (both federally- and state-chartered) may apply to the NCUA for a loan from the Program of up to $200,000. Loan decisions are made by the NCUA, and state-chartered credit unions that are approved for Program loans must obtain the written concurrence from their respective state regulator. (See 12 CFR 705.8.) State or local governments do not provide non-Federal funds under the Program.

In addition, loans from the Program do not directly affect state or local governments. State-chartered credit unions that receive a loan remain subject to examination and supervision by their state regulators. The fact that state regulators must approve state-chartered credit unions that receive loans pursuant to Part 705 provides state regulatory authorities sufficient notification and control over their state-chartered entities. The impact of the loan directly affects the credit union and its members and not be the state authorities.

Copies of this proposal to delete the Program from coverage of Executive Order 12372 will be sent to all state single points of contact (SPOC's). Any comments received from SPOC's or any other public commenters will be reviewed by the NCUA with input from the Office of Management and Budget before a final decision on this proposed deletion is made.

By the National Credit Union Administration Board on December 17, 1987.

Becky Baker,

Secretary of the Board.

[FR Doc. 87–29380 Filed 12–22–87; 8:45 am]

BILLING CODE 7535–01–M

NUCLEAR REGULATORY COMMISSION

Abnormal Occurrence Report; Section 208 Report Submitted to the Congress

Notice is hereby given that pursuant to the requirements of section 208 of the Energy Reorganization Act of 1974, as amended, the Nuclear Regulatory Commission (NRC) has published and issued another periodic report to Congress on abnormal occurrences (NUREG–0090, Vol. 10, No. 2).

Under the Energy Reorganization Act of 1974, which created the NRC, an abnormal occurrence is defined as "an unscheduled incident or event which the Commission (NRC) determines is significant from the standpoint of public health or safety." The NRC has made a determination, based on criteria published in the **Federal Register** (42 FR 10950) on February 24, 1977, that events involving an actual loss or significant reduction in the degree of protection against radioactive properties of source, special nuclear, and byproduct materials are abnormal occurrences.

The report to Congress is for the second calendar quarter of 1987. The report identifies the occurrences or events that the Commission determined to be significant and reportable; the remedial actions that were undertaken are also described. During the report period, there were no abnormal occurrences at the nuclear power plants licensed to operate. There were five abnormal occurrences at the other NRC licensees. Three involved medical misadministrations (two diagnostic and one therapeutic); one involved the issuance of an NRC Order to remove a hospital's radiation safety office due to falsification of certain records; and one involved a significant breakdown in management and procedural controls at an industrial radiography licensee. There was one abnormal occurrence reported by an Agreement State (Idaho). The item involved radiographer overexposures.

The report also contains information updating some previously reported abnormal occurrences.

A copy of the report is available for public inspection and/or copying at the NRC Public Document Room, 1717 H. Street, NW., Washington, DC 20555, or at any of the nuclear power plant Local Public Document Rooms throughout the country.

Copies of NUREG–0090, Vol. 10, No. 2 (or any of the previous reports in this series), may be purchased from the Superintendent of Documents, U.S. Government Printing Office, Post Office Box 37082, Washington, DC 20013–7082. A year's subscription to the NUREG–0090 series publication, which consists of four issues, is also available.

Copies of the report may also be purchased from the National Technical Information Service, 5285 Port Royal Road, Springfield, VA 22161.

Dated At Washington, DC, this 17th day of December 1987.

VOL 52 ISS 246 DEC 23 1987 UMI

For the Nuclear Regulatory Commission.
Samuel J. Chilk,
Secretary of the Commission.

BILLING CODE 7590-01-M

Advisory Committee on Reactor Safeguards; Meeting Agenda

In accordance with the purposes of sections 29 and 182b. of the Atomic Energy Act (42 U.S.C. 2039, 2232b), the Advisory Committee on Reactor Safeguards will hold a meeting on January 7-9, 1988, in Room 1046, 1717 H Street, NW., Washington, DC. Notice of this meeting was published in the Federal Register on December 14, 1987.

Thursday, January 7, 1988

8:30 a.m.-8:45 a.m.: Comments by ACRS Chairman (Open)—The ACRS Chairman will report briefly regarding items of current interest.

8:45 a.m.-11:00 a.m.: Advanced Boiling Water Reactor (Open)—Briefing by representatives of the General Electric Company regarding the proposed GE Advanced Boiling Water Reactor.

11:15 a.m.-12:30 p.m.: Operating Experience (Open)—Briefing regarding recent operating experience including incidents and transients at nuclear power plants.

1:30 p.m.-3:00 p.m.: Important Safety Related Issues (Open)—Discuss proposed hierarchal structure for important safety-related issues identified by members of the Committee.

3:15 p.m.-5:00 p.m.: ACRS Subcommittee Activities (Open)—Report of ACRS Subcommittee Chairman regarding the status of designated activities, including environmental qualification of nuclear power plant equipment, steam generator tube integrity, and inservice inspection of nuclear power plant systems and components.

5:00 p.m.-6:00 p.m.: Safety Implications of Control Systems (Open)—Discuss proposed ACRS report regarding proposed resolution of this generic matter.

Friday, January 8, 1988

8:30 a.m.-10:00 a.m.: Nuclear Industry Initiatives (Open)—Briefing by representatives of the nuclear industry regarding industry initiatives to improve the operation and regulation of nuclear reactors.

10:15 a.m.-12:15 p.m.: Renewal of Nuclear Power Plant Licenses (Open)—Briefing by representatives of the NRC Staff regarding proposed NRC policy regarding renewal of nuclear power plant licenses.

1:15 p.m.-2:15 p.m.: Analysis and Evaluation of Operational Data (Open/Closed)—Briefing by representatives of NRC Office for Analysis and Evaluation of Operational Data regarding their recent reports.

A portion of this session will be closed as required to discuss Proprietary Information applicable to the matter being discussed.

2:15 p.m.-3:00 p.m.: Anticipated ACRS Activities (Open)—Discuss recent and anticipated ACRS subcommittee activities and items proposed for consideration by the full Committee.

3:15 p.m.-4:15 p.m.: New ACRS Members (Open/Closed)—Discuss qualifications of ACRS members to be considered for appointment to the Committee.

Portions of this session will be closed as required to discuss information the release of which would represent a clearly unwarranted invasion of personal privacy and information that involves the internal personnel rules and practices of the agency.

4:15 p.m.-6:30 p.m.: Preparation of ACRS Reports (Open)—Discuss proposed reports to the NRC regarding items considered during this meeting.

Procedures for the conduct of and participation in ACRS meetings were published in the Federal Register on October 2, 1987 (51 FR 37241). In accordance with these procedures, oral or written statements may be presented by members of the public, recordings will be permitted only during those portions of the meeting when a transcript is being kept, and questions may be asked only by members of the Committee, its consultants, and Staff. Persons desiring to make oral statements should notify the ACRS Executive Director as far in advance as practicable so that appropriate arrangements can be made to allow the necessary time during the meeting for such statements. Use of still, motion picture and television cameras during this meeting may be limited to selected portions of the meeting as determined by the Chairman. Information regarding the time to be set aside for this purpose may be obtained by a prepaid telephone call to the ACRS Executive Director, Mr. Raymond F. Fraley, prior to the meeting. In view of the possibility that the schedule for ACRS meetings may be adjusted by the Chairman as necessary to facilitate the conduct of the meeting, persons planning to attend should check with the ACRS Executive Director if such rescheduling would result in major inconvenience.

I have determined in accordance with subsection 10(d) Pub. L. 92-463 that it is necessary to close portions of this meeting as noted above to discuss information related to the internal personnel rules and practices of the agency (5 U.S.C. 552b(c)(2)), information the release of which would represent a clearly unwarranted invasion of personal privacy (5 U.S.C. 552b(c)(6)), and Proprietary Information applicable to the matter being discussed (5 U.S.C. 552b(c)(4)).

Further information regarding topics to be discussed, whether the meeting has been cancelled or rescheduled, the Chairman's ruling on requests for the opportunity to present oral statements and the time allotted can be obtained by a prepaid telephone call to the ACRS Executive Director, Mr. Raymond F. Fraley (telephone 202/634-3265), between 8:15 a.m. and 5:00 p.m.

Date: December 18, 1987.

John C. Hoyle,
Advisory Committee Management Officer.
[FR Doc. 87-29420 Filed 12-22-87; 8:45 am]
BILLING CODE 7590-01-M

[Docket No. 50-482]

Receipt of Petition for Director's Decision Under 10 CFR 2.206; Wolf Creek Nuclear Operating Corp., Kansas Gas and Electric Co., and Kansas City Power and Light Co., Kansas Electric Power Cooperative, Inc., Wolf Creek Generating Station

Notice is hereby given that Ms. Stevi Stephens and Robert V. Eye on behalf of Nuclear Awareness Network have requested that the Nuclear Regulatory Commission institute an investigation pursuant to 10 CFR 2.206 to determine whether security is being satisfactorily maintained at the Wolf Creek Generating Station (WCGS) to protect the public from exposure to radiation and to prevent terrorist activities. The alleged basis for this requested action is that members of the public are presently trespassing into restricted WCGS areas to fish at the WCGS cooling lake and that there have been past examples of inadequate security at WCGS.

This petition is being handled as a request for action pursuant to 10 CFR 2.206 of the Commission regulations and, accordingly, appropriate action will be taken on the request within a reasonable time. Copies of the petition are available for inspection in the Commission's Public Document Room, 1717 H Street NW., Washington, DC 20555.

Dated at Bethesda, Maryland, this 16th day of December, 1987.

For the Nuclear Regulatory Commission.
Thomas E. Murley,
Director, Office of Nuclear Reactor Regulation.
[FR Doc. 87-29384 Filed 12-22-87; 8:45 am]
BILLING CODE 7590-01-M

[Docket No. 50-498]

Exemption; Houston Lighting and Power Co.[1] et al., (South Texas Project, Unit 1)

I

On August 21, 1987, the Commission issued Facility Operating License No. NPF-71 to Houston Lighting & Power Company, City Public Service Board of San Antonio, Central Power and Light Company, and City of Austin, Texas (the licensees) for South Texas Project, Unit 1. This license provided, among other things, that the facility is subject to all rules, regulations and Orders of the Commission.

II

Section 50.71(e)(3)(i) of 10 CFR Part 50 requires the licensees of nuclear power reactors to submit an Updated Final Safety Analysis Report (UFSAR) within 24 months of either July 22, 1980, or the date of issuance of the operating license, whichever is later. This would require submittal of the UFSAR for South Texas Project, Unit 1 by August 21, 1989 and would result in an entirely new document from the existing South Texas FSAR.

By letter dated October 5, 1987, the licensees requested an exemption from 10 CFR 50.71(e) which would defer submittal of the UFSAR until one year following receipt of a low-power operating license for South Texas Project, Unit 2. The licensees state that they will continue to maintain the South Texas Project FSAR as a description of both Units 1 and 2. The FSAR will be updated by periodic amendments during the periodic that Unit 2 is under construction, thus assuring that timely information regarding both units is provided.

III

The NRC staff has reviewed the licensees' request for an extension of the South Texas UFSAR submittal date. The 10 CFR 50.34 requires that, until South Texas Unit 2 receives an operating license, the information contained in the FSAR docketed with the operating license application be maintained current. Hence, if an extension to the submittal date for the UFSAR is not granted, the licensees would be required to maintain current both the present FSAR as well as the Unit 1 UFSAR until South Texas Unit 2 is licensed. Maintaining two versions of the same document for the two South Texas units would not serve the underlying purpose of 10 CFR 50.71(e), which is to assure that the final safety analysis report contains the latest material developed. Maintenance of a separate document to satisfy § 50.34 for Unit 2 to support licensing would not provide the NRC with significant additional information and could lead to ambiguities and confusion. Thus, an undue administrative burden would be imposed which results in no measurable gain.

Therefore an extension is needed to eliminate the hardship of maintaining two versions of the same document. Until South Texas Unit 2 receives an operating license, the licensees have committed to maintain the present FSAR current for both units by periodically amending the document. This will assure that the underlying purpose of 10 CFR 50.71(3), i.e., assurance that the safety analysis report contains the latest material developed, continues to be met.

For these reasons, the staff finds that the licensees have shown good cause for the requested extension of the date for submittal of the Updated Final Safety Analysis Report. Therefore, the requested extension to no later than one year after issuance of a low power license for South Texas, Unit 2 is acceptable. This extension will terminate, unless further extended, no later than the end of August 1990.

IV

Accordingly, the Commission has determined that, pursuant to 10 CFR 50.12(a)(1), this exemption is authorized by law, will not present an undue risk to the public health and safety, and is consistent with the common defense and security. The Commission further determines that special circumstances, as provided in 10 CFR 50.12(a)(2)(ii), are present justifying the exemption. The application of the regulation in the particular circumstances is not necessary to achieve the underlying purpose of the rule in that the licensees have updated the South Texas FSAR in support of licensing South Texas Unit 2 and will continue to update it periodically until Unit 2 is licensed.

Accordingly, the Commission hereby grants an exemption as described in Section III above from § 50.71(e)(3)(i) of 10 CFR Part 50 to extend the date for submittal of the updated FSAR to no later than one year after date of issuance of a low power license for South Texas project, Unit 2. This exemption granting the extension is effective until the end of August 1990.

Pursuant to 10 CFR 51.32, the Commission has determined that the granting of this Exemption will have no significant impact on the environment (52 FR 47805).

This Exemption is effective upon issuance.

For the Nuclear Regulatory Commission.

Dated at Bethesda, Maryland this 16th day of December, 1987.

Dennis M. Crutchfield,
Director, Division of Reactor Projects—III, IV, V and Special Projects, Office of Nuclear Reactor Regulation.
[FR Doc. 87-29385 Filed 12-22-87; 8:45 am]
BILLING CODE 7590-01-M

[Docket Nos. 50-352]

Philadelphia Electric Co.; Consideration of Issuance of Amendment to Facility Operating License and Proposed No Significant Hazards; Consideration Determination and Opportunity for Hearing

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of an amendment to Facility Operating License No. NPF-39 issued to Philadelphia Electric Company, for operation of the Limerick Generating Station, Unit No. 1 located in Montgomery County, Pennsylvania.

The proposed amendment would modify Section 6 of the facility Technical Specifications to reflect (I) a new corporate and (II) a new plant staff organizational structure, and (III) a revised composition of the Plant Operations Review Committee, in accordance with the licensee's application for amendment dated November 16, 1987. In connection with this matter the Commission has also issued, by letter dated December 16, 1987, a temporary waiver of compliance with respect to deviations from the organizational structure currently described in Section 6, Administrative Controls, of the Technical Specifications. This letter also permits initiation of implementation of the above proposal on an interim basis pending completion of consideration of the application for amendment.

The licensee's application is submitted as a result of corrective actions taken by the licensee in

[1] Houston Lighting & Power Company is authorized to act for the City Public Service Board of San Antonio, Central Power and Light Company and City of Austin, Texas and has exclusive responsibility and control over the physical construction, operation and maintenance of the facility.

response to an Order issued by the Nuclear Regulatory Commission (NRC) on March 31, 1987 which required the other nuclear power plant operated by the licensee, the Peach Bottom Atomic Power Station (PBAPS), to be shut down due principally to inattentiveness by control room licensed personnel. The proposed reorganization, particularly the corporate reorganization, is also reflected throughout the licensee's Plan for Restart of Peach Bottom Atomic Power Station, Section I, Corporate Action, (Plan) which was submitted on November 25, 1987. The information in the Plan has been considered by the staff to be supplementary to the licensee's application for amendment. In the Plan the licensee has identified four root causes for the declining performance at the PBAPS, the fourth root cause being: Corporate management failed to recognize the developing severity of the problems at PBAPS and thus, did not take sufficient corrective action. The November 25, 1987 submittal responds to the fourth root cause by describing the Corporate portion of the overall Plan which the licensee submits "will also ensure continued excellence of operations at the Limerick Generating Station (LGS)".

The licensee's Plan states that two concepts underlie its response to the fourth root cause. The first concept is that organization structure, management systems and managerial ability are interdependent elements; each impacts upon the varying degree of effectiveness of the others. The second concept deals with strengthening the licensee's self assessment activities. The proposed organizational structure identified in the licensee's amendment application is a principal factor in attaining the goals associated with both of these objectives.

I. Corporate Organizational Structure

The proposed revisions would reorganize the corporate staff between the plant manager and the senior vice president levels. The current Technical Specification (TS) Figure 6.2–1–1 showing the offices of the Senior Vice President-Nuclear Power, the Vice President (VP)-Electric Production, the Manager-Nuclear Production, the Superintendent-Nuclear Generation Division and the Superintendent-Quality Assurance Division would be revised. Replacing these offices would be a Senior Vice President-Nuclear with four Vice Presidents and a General Manager for Nuclear Quality Assurance reporting to him. This would reduce the organizational chain of command by removing two levels of offsite corporate management. Two of the VP's would be located on the Limerick and the Peach Bottom plant sites thus establishing a corporate office presence onsite. The VPs for Nuclear Services and for Nuclear Engineering would direct staffs who would have responsibility only for nuclear power plant related issues. The licensee indicates that these changes will focus corporate attention on station necessities, will enhance communications between the station organizations and the highest levels of corporate management and will provide better functional grouping of related disciplines.

The proposed position of Vice President-Nuclear Services will include certain responsibilities that were previously within the Offices of the VP-Electric Production Department, the Manager-Nuclear Production, and the Superintendent-Nuclear Services. The office of VP-Nuclear Services would have four organizations: (1) Nuclear Support, for licensing, fuel management, radiation protection, waste management, chemistry, emergency preparedness, security and the Operating Experience Assessment Program, (2) Nuclear Maintenance, for supplemental craft maintenance support, (3) Nuclear Training, for licensed, general employee and crafts training and the professional development programs and (4) Nuclear Administration, for personnel, budget, computer and record management. The benefits attributable to the reorganization of Nuclear Services are discussed in detail in Section 2.6 of the Plan. These benefits generally accrue from the provision of additional resources and the centralization of these functions to support the identification and meeting of needs in these areas in a focused, timely manner.

The proposed office of Vice President-Nuclear Engineering will include certain responsibilities that were previously within the office of the VP-Engineering and Research Department. This office would include four organizations: (1) Engineering, for design, analyses, studies and assistance, (2) Project Management, to manage engineering projects for each station, (3) Engineering Design, for conceptual design support and services, and (4) the Construction Superintendent for Limerick Unit 2. The licensee identifies the benefits of the reorganization of Nuclear Engineering in section 2.5 of its Plan as being (1) the dedication of a significant portion of its corporate engineering resources to the support of nuclear operations exclusively, and (2) establishing single point accountability for the management of engineering projects at appropriate management levels.

The corporate level Nuclear Review Board (NRB) will be revised to provide for an elevated reporting relationship to the office of the Chief Executive Officer on a quarterly basis in addition to reporting regularly to the Senior VP-Nuclear. The NRB chairmanship has been made a full time position and the NRB membership has been broadened by including three members from outside the Philadelphia Electric Company. The licensee states that this will strengthen the experience and expertise of the NRB and will ensure its direct access to the highest corporate management level.

The proposed position of General Manager-Nuclear Quality Assurance will include certain responsibilities that were previously within the offices of the Manager-Nuclear Production, the Superintendent-Nuclear Generation Division and the VP, Engineering and Research Department. This office would include five organizations: Peach Bottom Quality, Limerick Quality, Quality Support, Performance Assessment and the Independent Safety Engineering Group. The licensee states that this consolidation of quality assurance efforts will provide for a more coordinated quality assurance operation resulting in early identification, evaluation and resolution of potential safety concerns.

II. Plant Staff Organizational Structure

The onsite station organizational structure, below the Vice President level, will be expanded horizontally by increasing the number of positions at both the Manager and the Superintendent levels. Figure 6.2–2 would be revised to reflect these changes. The current Superintendent-LGS Plant will be renamed Plant Manager. A Project Manager will be added to provide separate management accountability and authority for plant outages, planning and scheduling, reporting and modifications. A Support Manager will be added to provide strengthened focus and accountability for such activities as security, emergency preparedness, administration and personnel. A Superintendent-Training will be added, reporting to the VP–LGS to ensure more attention to site training needs.

The Plant Manager will manage the positions of Superintendent-Operations, Superintendent-Plant Services, Superintendent-Maintenance and Instrumentation and Controls and Superintendent-Technical. The Superintendent-Operations will be assisted by an Assistant Superintendent-Operations position. The current shift superintendent, the Shift Technical Advisor, Shift Supervisor and operator positions remain essentially unchanged.

A new position of Operations Support Engineer will report to the Assistant Superintendent-Operations. This position will provide staff support in the areas of regulatory and licensing needs, coordination of shift training and certain administrative functions.

The current position of Superintendent-Plant Services will consolidate the existing chemistry and health physics groups and will also have a new position of radwaste engineer. A new position of Superintendent-Technical will manage a Technical Engineer and a Regulatory Engineer to provide techncial support for modification testing, reactor engineering, plant performance, process computer, regulatory and INPO interfaces, the LER program and commitment tracking. A new position of Superintendent-Maintenance and Instrumentation and Controls will manage several assistant superintendents, engineers and supervisors in the consolidation of these two areas from the current organization.

A Unit 2 Start-up Manager position will be added, reporting to the VP–LGS. This manager, with several superintendents, will be responsible for certain Unit 2 programs prior to fuel loading.

The licensee indicates that these onsite organization changes will establish a separation of responsibility that will better enable onsite management to concentrate their attention on each organizational function and will also delete various administrative duties from the Plant Manager, thereby allowing more focus on daily plant activities. All groups performing onsite activities which currently report to non-station organizations, except those involved in independent corporate assessment and oversight activities, and those involved in the construction of LGS-Unit 2 prior to start-up, will be integrated into the onsite station organization. The licensee states that this will improve communications and coordination among the groups and will provide accountability to the site vice president.

III. Plant Operations Review Committee (PORC)

The licensee proposes revisions to the PORC composition on TS page 6–7. The Superintendent-Operations will replace the Station Superintendent as Chairman. The other three Superintendents reporting to the Plant Manager will also be included as well as the Assistant Superintendent-Operations. The Maintenance Engineer and the Technical Engineer positions will be added to the PORC. The positions of Shift Superintendent and Regulatory Engineer will continue on the PORC.

The licensee indicates that the new representatives on the PORC will be a supervisor of the selected position and that the qualifications, experience and training requirements of previous PORC positions will be maintained. Disciplines previously represented on the PORC will continue to be represented. Relieving the Plant Manager as a member of the PORC will allow him to focus attention on those issues which affect personnel, plant and public safety as well as the efficiency of operations.

Before issuance of the proposed license amendments, the Commission will have made findings required by the Atomic Energy Act of 1954, as amended (the Act) and the Commission's regulations.

The Commission has made a proposed determination that the amendment request involves no significant hazards consideration. Under the Commission's regulations in 10 CFR 50.92, this means that operation of the facility in accordance with the proposed amendment would not (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety.

(1) These changes discussed above in section I regarding the corporate organization are proposed to shorten and strengthen the nuclear operations chain of command, provide an onsite corporate presence and ensure that all onsite employees, except independent oversight functions, and Unit 2 construction activities are accountable to the site vice president, establish support and engineering organizations that are focused on nuclear related activities only, enhance and evaluate Quality Assurance's role, strengthen the operating experience assessment program and to strengthen the independent assessment process. Accordingly, these changes are directed at bringing about improvements which will provide additional control of and reduce the probability or consequences of the spectrum of accidents previously evaluated in the Final Safety Analysis Report. For example, the reorganized Quality Assurance function under the General Manager-Nuclear Quality assurance will include an interface of the QA activities at each site with the corporate QA group and the results are provided with a higher level of visability. Independent assessment of operational performance and trend analysis of performance will be performed and will have a higher level of visibility. Therefore, on the bases discussed above and in Section I, the proposed changes will not result in an increase in the probability or consequences of any accident previously evaluated.

(2) The changes discussed above in section I, regarding the corporate organization do not involve any physical modifications in plant hardware, plant design or plant systems operation. For this reason and for the reasons stated above in part (1) the proposed changes will not create the possibility of a new or different kind of accident from any accident previously evaluated.

(3) The objective of the proposed corporate reorganization is to change the organizational structure to increase control, accountability and corporate direction for nuclear operations, to strengthen self-assessment and problem resolution capabilities and to strengthen the independent assessment process. Since the the proposed changes would be directed at providing the improved features and enhancements discussed in part (1) above, they do not involve a significant reduction in a margin of safety.

(4) The changes discussed above in section II regarding the onsite organization are proposed to provide a strong corporate presence onsite; to provide separate management accountability and authority for plant operations through the Plant Manager, and outage management through the Project Manager; to ensure more attention and responsiveness to site training needs through the Superintendent-Training; and to provide strengthened management focus and accountability for critical station support functions through the Support Manager. The licensee states that this will eliminate various administrative responsibilities from the Plant Manager, thereby allowing more focus on daily plant activities. The proposed organization will further provide the Plant Manager with a staff that, as discussed in section II above, will be expanded horizontally to include the Superintendents of Plant Services, Maintenance and Instrumentation and Controls, Technical and Operations. This is directed at establishing a separation of responsibility that will enable concentration on each organizational function. The proposed organization will provide better functional grouping of related

disciplines through the Superintendents of Plant Services and Maintenance, Instrumentation and Controls.

As stated in the licensee's application, the qualifications, education and training requirements for the positions in the organization meet or exceed the requirements of ANSI/ANS-3.1-1978. The changes are implemented by changes to Technical Specification Figures 6.2.1-1 and 6.2.2.-1; by changing the title of the Station Superintendent to Plant Manager on pages 6-1, 6-2, 6-7, 6-8 and 6-13; by adding the Plant Manager as a recipient of reports on pages 6-12 and 6-13; by changing the reporting levels for the Independent Safety Engineering Group on page 6-6; by changing the responsible licensee representative to the Senior Vice President—Nuclear on pages 6-9, 6-11, 6-12; by changing the designee for responsibility for direction of the site training program to reflect a generically titled site training organization on page 6-7; by adding additional designees to provide for the adequate control of shift coverage on page 6-2; and by adding the Plant Manager and by providing for an elevated level of reporting on pages 6-6, 6-9, 6-12 and 6-13.

The proposed changes do not involve physical changes in the design or operation of plant structures, systems or components. For this reason and for the reasons discussed above and in section II above, the proposed changes will not result in an increase in the probability or consequences of any accident previously evaluated.

(5) The changes discussed above in section II regarding onsite organization do not involve any physical changes in the design or operation of plant structures, systems or components. For this reason and for the reasons stated in part (4) above the proposed changes will not create the possibility of a new or different kind of accident from any accident previously evaluated.

(6) As discussed in part 4 above, the objective of the proposed onsite organization is to provide resources to strengthen the focus and accountability for plant activities, to provide better functional grouping of related disciplines and to enhance management-operated interaction and improve the professionalism of the operations organizations. For these reasons and as discussed in section II and part 4 above, the proposed changes do not involve a significant reduction in a margin of safety.

(7) The changes discussed above in section III regarding the Plant Operations Review Committee are proposed to increase the role of maintenance and operations; to decrease the role of disciplines not directly involved with operational safety; and to maintain a representation of the required technical disciplines. The proposed PORC composition also reflects the revised titles for certain positions. Therefore, on the bases discussed above and in section III, the proposed changes will not result in an increase in the probability or consequences of any accident previously evaluated.

(8) The changes discussed above in part 7 and section III regarding the PORC do not involve any physical changes in the plant structures, systems and components. For this reason and for the reasons stated in part 7 above the proposed changes will not create the possibility of a new or different kind of accident from any accident previously evaluated.

(9) The objective of the proposed revisions are to reflect the enhancements that have been proposed for the onsite organizations and to increase the emphasis on the roles of maintenance and operations in the PROC reviews. The size of the PROC and the quorum requirements are unchanged. On these bases, the proposed changes do not involve a significant reduction in a margin of safety.

Based on the above discussions in sections, I, II, and III and Parts 1-9 the staff proposes to determine that the requested amendment does not involve a signficant hazards consideration.

The Commission is seeking public comments on this proposed determination. Any comments received within 30 days after the date of publication of this notice will be considered in making any final determination. The Commission will not normally make a final determination unless it receives a request for a hearing.

Written comments should be addressed to the Rules and Procedures Branch, Division of Rules and Records, Office of Administration, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and should cite the publication date and page number of this Federal Register notice. Copies of comments received may be examined at the NRC Public Document Room, 1717 H Street, NW, Washington, DC.

By January 22, 1988, the licensee may file a request for a hearing with respect to issuance of the amendment to the subject facility operating license and any person whose interest may be affected by this proceeding and who wishes to participate as a party in the proceeding must file a written petition for leave to intervene. Request for a hearing and petitions for leave to intervene shall be filed in accordance with the Commission's "Rules of Practice for Domestic Licensing Proceedings" in 10 CFR Part 2. If a request for a hearing or petition for leave to intervene is filed by the above date, the Commission or an Atomic Safety and Licensing Board, designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board Panel, will rule on the request and/or petition and the Secretary or the designated Atomic Safety and Licensing Board will issue a notice of hearing or an appropriate order.

As required by 10 CFR 2.714, a petition for leave to intervene shall set forth with particularity the interest of the petitioner in the proceeding, and how that interest may be affected by the results of the proceeding. The petition should specifically explain the reasons why intervention should be permitted with particular reference to the following factors: (1) The nature of the petitioner's right under the Act to be made a party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any order which may be entered in the proceeding on the petitioner's interest. The petition should also identify the specific aspect(s) of the subject matter of the proceeding as to which petitioner wishes to intervene. Any person who has filed a petition for leave to intervene or who has been admitted as a party may amend the petition without requesting leave of the Board up to fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, but such an amended petition must satisfy the specificity requirements described above.

Not later than fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, a petitioner shall file a supplement to the petition to intervene which must include a list of the contentions which are sought to be litigated in the matter, and the bases for each contention set forth with reasonable specificity. Contentions shall be limited to matters within the scope of the amendment under consideration. A petitioner who fails to file such a supplement which satisfies these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing, including the opportunity to present evidence and cross-examine witnesses.

If a hearing is requested, the Commission will make a final determination on the issue of no significant hazards consideration. The final determination will serve to decide when the hearing is held.

If the final determination is that the amendment request involves no significant hazards consideration, the Commission may issue the amendment and make it effective, notwithstanding the request for a hearing. Any hearing held would take place after issuance of the amendment.

If the final determination is that the amendment involves a significant hazards consideration, any hearing held would take place before the issuance of any amendment.

Normally, the Commission will not issue the amendment until the expiration of the 30-day notice period. However, should circumstances change during the notice period such that failure to act in a timely way would result in derating or shutdown of the facility, the Commission may issue the license amendment before the expiration of the 30-day notice period, provided that its final determination is that the amemdment involves no significant hazards consideration. The final determination will consider all public and State comments received. Should the Commission take this action, it will publish a notice of issuance and provide for opportunity for a hearing after issuance. The Commission expects that the need to take this action will occur very infrequently.

A request for a hearing or a petition for leave to intervene must be filed with the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, DC 20555, Att: Docketing and Service Branch, or may be delivered to the Commission's Public Document Room, 1717 H Street NW., Washington, DC, by the above date. Where petitions are filed during the last ten (10) days of the notice period, it is requested that the petitioner promptly so inform the Commission by a toll-free telephone call to Western Union at (800) 325-6000 (in Missouri (800) 342-6700). The Western Union operator should be given Datagram Indentification Number 3737 and the following message addressed to Walter R. Butler, Director, Project Directorate I-2, Division of Reactor Projects I/II: Petitioner's name and telephone number; date petition was mailed; plant name; and publication data and page number of this Federal Register notice. A copy of the petition should also be sent to the General Counsel, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and to Conner and Wetterhahn, 1747 Pennsylvania Avenue NW., Washington, DC 20006, attorney for the licensee.

Nonetimely filings of petitions for leave to intervene, amended petitions, supplemental petitions and/or requests for hearing will not be entertained absent a determination by the Commission, the presiding officer or the presiding Atomic Safety and Licensing Board, that the petition and/or request should be granted based upon a balancing of factors specified in 10 CFR 2.714(a)(1)(i)-(v) and 2.714(d).

For further details with respect to this action, see the application for amendment dated November 18, 1987, which is available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, DC 20555, and at the Pottstown Public Library, 500 High Street, Pottstown, Pennsylvania 19464.

Dated at Bethesda, Maryland, this 18th day of December 1987.

Walter R. Butler,

Director, Project Directorate I-2, Division of Reactor Projects I/II, Office of Nuclear Reactor Regulations.

[FR Doc. 87-29388 Filed 12-22-87; 8:45 am]

BILLING CODE 7590-01-M

[Docket Nos. 50-277 and 50-278]

Philadelphia Electric Co.; et al; Consideration of Issuance of Amendment to Facility Operating License and Proposed No Significant Hazards; Consideration Determination and Opportunity for Hearing

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of amendments to Facility Operating License Nos. DPR-44 and DPR-56, issued to Philadelphia Electric Company, Public Service Electric and Gas Company, Delmarva Power and Light Company, and Atlantic City Electric Company for operation of the Peach Bottom Atomic Power Station, Unit Nos. 2 and 3, located in York County, Pennsylvania.

The proposed amendments would modify Section 6 of the facility Technical Specifications to reflect (I) a new corporate and (II) a new plant staff organizational structure, (III) a revised composition of the Plant Operations Review Committee and (IV) several administrative changes; in accordance with the licensee's application for amendment dated November 19, 1987. In connection with this matter the Commission has also issued, by letter dated December 18, 1987, a temporary waiver of compliance with respect to deviations from the organizational structure currently described in Section 6, Administrative Controls, of the Technical Specifications. This letter also permits initiation of implementation of the above proposal, on an interim basis pending completion of consideration of the application for amendment.

The licensee's application is submitted as part of its corrective actions in response to an Order issued by the Nuclear Regulatory Commission (NRC) on March 31, 1987 which required the plant to be shut down due principally to inattentiveness by control room licensed personnel. The proposed reorganization is also reflected throughout the licensee's Plan for Restart of Peach Bottom Atomic Power Station, Section I, Corporate Action, (Plan) which was submitted on November 25, 1987. The information in the Plan has been considered by the staff to be supplementary to the licensee's application for amendment. In the Plan the licensee has identified four root causes for the declining performance at the PBAPS and has also identified corrective action objectives in response to the root causes. The November 25, 1987 submittal responds to the fourth root cause by describing the Corporate portion of the overall Plan while a future submittal will provide further descriptions regarding site specific activities.

The licensee states in Section 1.2 of the Plan that two concepts underlie its response to the fourth root cause. The first concept is that organization structure, management systems and material ability are interdependent elements; each impacts upon the varying degree of effectiveness of the others. The second concept deals with strengthening the licensee's self assessment activities. The proposed organizational structure identifed in the licensee's amendment application is a principal factor in attaining the goals associated with both of these objectives.

I. Corporate Organizational Structure

The proposed revisions would reorganize the corporate staff between the plant manager and the senior vice president levels. The current Technical Specification (TS) Figure 6.2-1 showing the offices of the Senior Vice President-Nuclear Power, the Vice President (VP)-Electric Production, the Manager-Nuclear Production, the Superintendent-Quality Assurance Division would be revised. Replacing these offices would be a Senior Vice President-Nuclear with four Vice Presidents and a General Manager for Nuclear Quality Assurance reporting to him. This would reduce the

organizational chain of command by removing two levels of offsite corporate management. Two of the VP's would be located on the Limerick and the Peach Bottom plant sites thus establishing a corporate office presence onsite. The VPs for Nuclear Services and for Nuclear Engineering would direct staffs who would have responsibility only for nuclear power plant related issues. The licensee indicates that these changes will focus corporate attention on station necessities, will enhance communications between the station organizations and the highest levels of corporate management and will provide better functional grouping of related disciplines.

The proposed position of Vice President-Nuclear Services will include certain responsibilities that were previously within the Offices of the VP-Electric Production Department, the Manager-Nuclear Production, the Superintendent-Nuclear Services. The office of VP-Nuclear Services would have four organizations: (1) Nuclear Support, for licensing, fuel management, radiation protection, waste management, chemistry, emergency preparedness, security and the Operating Experience Assessment Program, (2) Nuclear Maintenance, for supplemental craft maintenance support, (3) Nuclear Training, for licensed, general employee and crafts training and the professional development programs and (4) Nuclear Administration, for personnel, budget, computer and record management. The benefits attributable to the reorganization of Nuclear Services are discussed in detail in Section 2.6 of the Plan. These benefits generally accrue from the provision of additional resources and the centralization of these functions to support the identification and meeting of needs in these areas in a focussed, timely manner.

The proposed office of Vice President-Nuclear Engineering will include certain responsibilities that were previously within the office of the VP-Engineering and Research Department. This office would include four organizations: (1) Engineering, for design, analyses, studies and assistance, (2) Project Management, to manage engineering projects for each station, (3) Engineering Design, for conceptual design support, and services, and (4) the Construction Superintendent for Limerick Unit 2. The licensee identifies the benefits of the reorganization of Nuclear Engineering in Section 2.5 of its Plan as being (1) the dedication of a significant portion of its corporate engineering resources to the support of nuclear operations exclusively, and (2) establishing single point accountability for the management of engineering projects at appropriate management levels.

The corporate level Nuclear Review Board (NRB) will be revised to provide for an elevated reporting relationship to the office of the Chief Executive Officer on a quarterly basis in addition to reporting regularly to the Senior VP-Nuclear. The NRB chairmanship has been made a full time position and the NRB membership has been broadened by including three members from outside the Philadelphia Electric Company. The licensee states that this will strengthen the experience and expertise of the NRB and will ensure its direct access to the highest corporate management level.

The proposed position of General Manager-Nuclear Quality Assurance will include certain responsibilities that were previously within the offices of the Manager-Nuclear Production, the Superintendent-Nuclear Generation Division and the VP, Engineering and Research Department. This office would include five organizations: Peach Bottom Quality, Limerick Quality, Quality Support, Performance Assessment and the Independent Safety Engineering Group. The licensee states that this consolidation of quality assurance efforts will provide for a more coordinated quality assurance operation resulting in early identification, evaluation and resolution of potential safety concerns.

II Plant Staff Organizational Structure

The onsite station organization structure, below the Vice President level, will be expanded horizontally by increasing the number of positions at both the Manager and Superintendent levels. An additional sheet has been added to Figure 6.2–2 to accommodate these changes. The current Manager-Nuclear Plant will be renamed Plant Manager. A Project Manager will be added to provided separate management accountability and authority for plant outages, planning and scheduling, reporting and modifications. A Support Manager will be added to provide strengthened focus and accountability for such activities as security, emergency prepardeness, administration and personnel. A Superintendent-Training will be added, reporting to the VP-Peach Bottom Atomic Power Station (PBAPS), to ensure more attention to site training needs.

The Plant Manager will manage the current positions of Superintendent-Operations and Superintendent-Plant Services as well as the new positions of Superintendent-Maintenance and Instrumentation and Contols and Superintendent-Technical. The Superintendent-Operations will be assisted by an Assistant Superintendent-Operations position which replaces the current Operations Engineer position. A new Shift Manager position, replacing the current Shift Superintendent and some of the duties of the current Operations Engineer, will provide a higher level of management authority on each shift, will prevent isolation of management from the operators and will provide career path opportunities for Operations personnel The Shift Technical Adviser, Shift Supervisor and operator positions remain essentially unchanged except to reflect new position titles. The number of non-licenses operators outside the control room will be increased from three to five.

A new position of Operations Support Engineer will report to the Assistant Superintendent-Operations. This position will provide the technical support formerly provided by the Operations Engineer and will, therefore, relieve the Shift Manager's staff of these functions. The Operations Support Engineer's staff will include a technical staff, a utility shift manager position which will be filled when shift schedules permit and an Operations Support Superintendent. The supporting staff consisting of utility shift operator's a blocking coordinator and an electrical supervisor will assist shift operators in developing equipment blocking permits for taking systems out of service, shift scheduling, procedure review and coordinating of maintenance and surveilance testing of electrical equipment to support operations.

The current position of Superintendent-Plant Services will consolidate the existing chemistry and health physics groups and will also have a new position or radwaste engineer. A new position of Superintendent-Technical will manage a Technical Engineer and a Regulatory Engineer to provide technical support for modification testing, reactor engineering, plant performance, process computer, regulatory and INPO interfaces, the LER program and commitment tracking. A new position of Superintendent-Maintenance and Instrumentation and Control's will manage several assistant superintendents, engineers and supervisors in the consolidation of these two areas from the current organization.

The licensee proposes to delete eight position designations on Figure 6.2–2 at the lower levels of the organization. The licensee states that all of the functions performed by these positions will be the responsibility of the organization which is shown on the proposed Figure 6.2–2. This would not be inconsistent with the BWR Standard Technical Specifications which simply require that the figure show the lines of responsibility and organizational structure.

The licensee did not propose any change in the interim relief granted by amendments 128 and 129 regarding the holding of an SRO license by either the PLant Manager or the Superintendent-Operations. Therefore, the relief provided by those amandments continues in effect and is shown on Figure 6.2–2.

The licensee indicates that these onsite organization changes will establish a separation of responsibility that will better enable onsite management to concentrate their attention on each organizational function and will also delete various administrative duties from the Plant Manager, thereby allowing more focus on daily activities. All groups performing onsite activities which currently report to non-station organizations, except those involved in independent corporate assessement and oversight activities, will be integrated into the onsite station organization. The licensee states that this will improve communications and coordinating among the groups and will provide accountability to the site vice president.

III. Plant Operations Review Committee (PORC)

The licensee proposes revisions to the PORC composition on TS page 246. The Superintendent-Operations will replace the Manager-Nuclear Plant as Chairman. The other three Superintendents reporting to the Pland Manager would also be included. The Assistant Superintendent-Operations would replace the equivalent position of Operations Engineer. The Maintenance Engineer and the Technical Engineer positions will continue on the PORC. The new position of Regulatory Engineer will be added. The Shift Manager would replace the comparable current Shift Superintendent position. The licensee states that these changes increase the roles of maintenance and operations and will maintain a representation of technical disciplines required for the appropriate review of safety issues.

IV. Administrative Changes

The licensee proposes miscellaneous changes which include: Updating the title of the corporate safety committee to reflect current nomenclature on pages 261, 266 and 267; renumbering a list on page 248 to eliminate the duplication of an index inadvertently made in a prior amendment; removing a reference on page 248 to a paragraph specifying reporting times which was deleted by a previous amendment. These changes also include: Extending Note 2 on Sheet 2 of Figure 6.2–2 to provide a reference to paragraph 6.1.1; amending the reporting requirements of paragraph 6.7.1 to provide specificity to the required reporting times consistent with the requirements in the Standard Technical Specifications and the Limerick TS; and to add an "s" to the word Operation where PORC is spelled out on pages 246, 247, 248, 248a and 251. The changes requested in this miscellaneous category to delete several lower level positions from Figure 6.2–2 and to add a second sheet to Figure 6.2–2 are addressed in section II above. The licensee also proposed to delete the designation of the Nuclear Generation Division (NGD) Superintendent as being responsible for the overall fire protection program. This change was made in amendment number 39 and the licensee does not provide sufficient specificity in its application regarding how this responsibility will otherwise be met. Therefore this request is denied. Designation of this responsibility will remain with the VP–PBAPS which is the approximate level of responsibility to the NGD Superintendent in this regard. This denial is without prejudice should the licensee wish to revisit the issue.

The licensee indicates that these onsite organization changes will establish a separation of responsibility that will better enable onsite management to concentrate their attention on each organizational function and will also delete various administrative duties from the Plant Manager, thereby allowing more focus on daily plant activities. All groups performing onsite activities which currently report to non-station organizations, except those involved in independent corporate assessment and oversight activities, will be integrated into the onsite station organization. The licensee states that this will improve communications and coordination among the groups and will provide accountability to the site vice president.

Before issuance of the proposed license amendments, the Commission will have made findings required by the Atomic Energy Act of 1954, as amended (the Act) and the Commission's regulations.

The Commission has made a proposed determination that the amendment request involves no significant hazards consideration. Under the Commission's regulations in 10 CFR 50.92, this means that operation of the facility in accordance with the proposed amendment would not (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety.

(1) The changes discussed above in section I regarding the corporate organization are proposed to shorten and strengthen the nuclear operations chain of command, provide an onsite corporate presence and ensure that all onsite employees, except independent oversight functions, are accountable to the site vice president, establish support and engineering organizations that are focussed on nuclear related activities only, enhance and elevate Quality Assurance's role, strengthen the operating experience assessment program and to strengthen the independent assessment process. Accordingly, these changes are directed at bringing about improvements which will provide further control of and reduce the probability or consequences of the spectrum of accidents previously evaluated in the Updated Final Safety Analysis Report. For example, the reorganized Quality Assurance function under the General Manager-Nuclear Quality Assurance will include an interface of the QA activities at each site with the corporate QA group and the results are provided with a higher level of visibility. Independent assessment of operational performance and trend analysis of performance will be performed and will have a higher level of visibility. Therefore, on the bases discussed above and in section I the proposed changes will not result in an increase in the probability or consequences of any accident previously evaluated.

(2) The changes discussed above in section I regarding the corporate organization do not involve any physical modifications in plant hardware, plant design or plant systems operation. For this reason and for the reasons stated above in part (1) the proposed changes will not create the possibility of a new or different kind of accident from any accident previously evaluated.

(3) The objective of the proposed corporate reorganization is to change the organizational structure to increase control, accountability and corporate direction for nuclear operations, to strengthen self-assessment and problem resolution capabilities and to strengthen the independent assessment process. Since the proposed changes would be

directed at providing the improved features and enhancements discussed in part (1) above, they do not involve a significant reduction in a margin of safety.

(4) The changes discussed above in section II regarding the onsite organization are proposed to provide a strong corporate presence onsite; to provide separate management accountability and authority for plant operations through the Plant Manager, and outage management through the Project Manager; to ensure more attention and responsiveness to site training needs through the Superintendent-Training; and to provide strengthened management focus and accountability for critical station support functions through the Support Manager. The Licensee states that this will eliminate various administrative responsibilities from the Plant Manager, thereby allowing more focus on daily plant activities. The proposed organization will further provide the Plant Manager with a staff that, as discussed in section II above, will be expanded horizontally to include the Superintendents of Plant Services, Maintenance and Instrumentation and Controls, Technical and Operations. This is directed at establishing a separation of responsibility that will enable concentration on each organizational function. The proposed organization will provide better functional grouping of related disciplines through the Superintendents of Plant Services and Maintenance, Instrumentation and Controls and will provide for onsite management of construction, field engineering, testing and Maintenance crafts.

The licensee states that the proposed organization under the Superintendent-Operations will establish additional supervisory positions, including implementation of the Shift Manager concept, and a division of responsibility that will enhance management-operator interaction. Flexibility would also be provided to accommodate periodic rotation and alternative career paths for shift personnel. This is directed at enhancing operator morale and motivation and improving the professionalism of the operations organization.

As stated in the licensee's application, the qualifications, education and training requirements for the positions in the proposed organization meet or exceed the requirements of ANSI N18.1–1971. The proposed changes would be implemented by changes to Technical Specification Figures 6.2–1 and 6.2–2, by changing the title of the Manager-Nuclear Plant to Plant Manager on TS pages 243, 246, 247, and 248; by adding the Plant Manager as the recipient of reports on TS pages 247, 248, and 248a; by changing the reporting level from Superintendent-Nuclear Generating Division to Vice President-PBAPS, which is a corporate officer level position, on TS pages 247, 248, 248a, 249, 252, 252a, and 253; by adding an elevated level of reporting on TS pages 248 and 252; and by changing titles to reflect the proposed Superintendent-Training's position on page 246 and the Shift Manager's position on page 262.

The proposed changes do not involve physical changes in the design or operation of plant structures, systems or components. For this reason and for the reason discussed above and in section II above, the proposed changes will not result in an increase in the probability or consequences of any accident previously evaluated.

(5) The changes discussed above in section II regarding onsite organization do not involve any physical changes in the design or operation of plant structures, systems or components. For this reasons and for the reasons stated in part (4) above the propsoed changes will not create the possibility of a new or different kind of accident from any accident previously evaluated.

(6) As discussed in part 4 above the objective of the proposed onsite organization is to provide resources to strengthen the focus and accountability for plant activities, to provide better functional grouping of related disciplines and to enhance management-operator interaction and improve the professionalism of the operations organization. For these reasons and as discussed in section II and part 4 above, the proposed changes do not involve a significant reduction in a margin of safety.

(7) The changes discussed above in section III regarding the Plant Operating Review Committee are proposed to increase the role of maintenance and operations; to decrease the role of disciplines not directly involved with operational safety; and to maintain a representation of the required technical disciplines. The proposed PORC composition also reflects the revised titles for certain positions. Therefore, on the bases discussed above and in section III, the proposed changes will not result in an increase in the probability or consequences of any accident previously evaluated.

(8) The changes discussed above in part 7 and section III regarding the PORC do not involve any physical changes in the plant structures, systems and components. For this reason and for the reasons stated in part 7 above the proposed changes will not create the possibility of a new or different kind of accident from any accident previously evaluated.

(9) The objective of the proposed revisions are to reflect the enhancements that have been proposed for the onsite organizations and to increase the emphasis on the roles of maintenance and operations in the PORC reviews. The size of the PORC and the quorum requirements are unchanged. On these bases, the proposed changes do not involve a significant reduction in a margin of safety.

(10) The changes discussed above in section IV include miscellaneous administrative revisions in nomenclature, corrections of errors, addition of a reference to another TS paragraph, and specification of a reporting time. The changes proposed by the licensee in this category dealing with deletion of operations staff positions from the organization charts have been addressed in the onsite organization discussions above and those dealing with the responsibility for the fire protection program have been denied for the reasons stated in section IV. The Commission has provided guidance concerning the application of standards in 10 CFR 50.92 by providing certain examples (March 6, 1986, 51 FR 7744) of amendments that are not likely to involve a significant hazards consideration. These proposed changes are enveloped by example (i) which relates to purely administrative changes for correction of an error, changes in nomenclature and changes to achieve consistency. On this basis these changes do not involve significant hazards considerations.

Based on the above discussions in section I, II, III and IV and Parts 1–10 the staff proposes to determine that the requested amendment does not involve a significant hazards consideration.

The Commission is seeking public comments on this proposed determination. Any comments received within 30 days after the date of publication of this notice will be considered in making any final determination. The Commission will not normally make a final determination unless it receives a request for a hearing.

Written comments should be addressed to the Rules and Procedures, Branch, Division of Rules and Records, Office of Administration, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and should cite the publication date and page number of this **Federal Register** notice. Copies of comments received may be examined at the NRC Public Document Room, 1717 H Street NW., Washigton, DC.

By January 22, 1988, the licensee may file a request for a hearing with respect to issuance of the amendment to the subject facility operating license and any person whose interest may be affected by this proceeding and who wishes to participate as a party in the proceeding must file a written petition for leave to intervene. Request for a hearing and petitions for leave to intervene shall be filed in accordance with the Commission's "Rules of Practice for Domestic Licensing Proceedings" in 10 CFR Part 2. If a request for a hearing or petition for leave to intervene is filed by the above date, the Commission or an Atomic Safety and Licensing Board, designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board Panel, will rule on the request and/or petition and the Secretary or the designated Atomic Safety and Licensing Board will issue a notice of hearing or an appropriate order.

As required by 10 CFR 2.714, a petition for leave to intervene shall set forth with particularity the interest of the petitioner in the proceeding, and how that interest may be affected by the results of the proceeding. The petition should specifically explain the reasons why intervention should be permitted with particular reference to the following factors: (1) The nature of the petitioner's right under the Act to be made a party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any order which may be entered in the proceeding on the petitioner's interest. The petition should also identify the specific aspect(s) of the subject matter of the proceeding as to which petitioner wishes to intervene. Any person who has filed a petition for leave to intervene or who has been admitted as a party may amend the petition without requesting leave of the Board up to fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, but such a amended petition must satisfy the specificity requirements described above.

Not later than fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, a petitioner shall file a supplement to the petition to intervene which must include a list of the contentions which are sought to be litigated in the matter, and the bases for each contention set forth with reasonable specificity. Contentions shall be limited to matters within the scope of the amendment under consideration. A petitioner who fails to file such a supplement which satisfies these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing, including the opportunity to present evidence and cross-examine witnesses.

If a hearing is requested, the Commission will make a final determination on the issue of no significant hazards consideration. The final determination will serve to decide when the hearing is held.

If the final determination is that the amendment request involves no significant hazards consideration, the Commission may issue the amendment and make it effective, notwithstanding the request for a hearing. Any hearing held would take place after issuance of the amendment.

If the final determination is that the amendment involves a significant hazards consideration, any hearing held would take place before the issuance of any amendment.

Normally, the Commission will not issue the amendment until the expiration of the 30-day notice period. However, should circumstances change during the notice period such that failure to act in a timely way would result in derating or shutdown of the facility, the Commission may issue the license amendment before the expiration of the 30-day notice period, provided that its final determination is that the amendment involves no significant hazards consideration. The final determination will consider all public and State comments received. Should the Commission take this action, it will publish a notice of issuance and provide for opportunity for a hearing after issuance. The Commission expects that the need to take this action will occur very infrequently.

A request for a hearing or a petition for leave to intervene must be filed with the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, DC 20555, Att: Docketing and Service Branch, or may be delivered to the Commission's Public Document Room, 1717 H Street NW. Washington, DC, by the above date. Where petitions are filed during the last ten (10) days of the notice period, it is requested that the petitioner promptly so inform the Commission by a toll-free telephone call to Western Union at (800) 325–6000 (in Missouri (800) 342–6700). The Western Union operator should be given Datagram Identification Number 3737 and the following message addressed to Walter R. Butler, Director, Project Directorate I–2, Division of Reactor Projects I/II: Petitioner's name and telephone number; date petition was mailed; plant name; and publication date and page number of this **Federal Register** notice. A copy of the petition should also be sent to the General Counsel, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and to Conner and Wetterhahn, 1747 Pennsylvania Avenue NW., Washington, DC 20006, attorney for the licensee.

Nontimely filings of petitions for leave to intervene, amended petitions, supplemental petitions and/or requests for hearing will not be entertained absent a determination by the Commission, the presiding officer or the presiding Atomic Safety and Licensing Board, that the petition and/or request should be granted based upon a balancing of factors specified in 10 CFR 2.714(a)(1)(i)–(v) and 2.714(d).

For further details with respect to this action, see the application for amendment dated November 19, 1987, as supplemented by the licensee's Plan for Restart, Section I, Corporate Action, dated November 25, 1987, which are available for public inspection at the Commission's Public Document Room, 1717 H Street NW. Washington, DC 20555, and at the Government Publications Section, State Library of Pennsylvania, Education Building, Commonwealth and Walnut Streets, Harrisburg, Pennsylvania 17126.

Dated at Bethesda, Maryland, this 18th day of December 1987.

For the Nuclear Regulatory Commission.

Walter R. Butler,

Director, Project Directorate I–2, Division of Reactor Projects I/II, Office of Nuclear Reactor Regulations.

[FR Doc. 87–29389 Filed 12–22–87; 8:45 am]

BILLING CODE 7590–01–M

[Docket No. 030–15183, License No. 45–18488–01, EA 87–127]

Order Imposing Civil Monetary Penalty; Tidewater Memorial Hospital, Tappahannock, VA

I

Tidewater Memorial Hospital (licensee) is the holder of Material License No. 45–18488–01 issued by the Nuclear Regulatory Commission (NRC/Commission) on July 26, 1979. The

license authorizes the licensee to employ the use of radioactive materials for diagnostic and therapeutic purposes in patients in accordance with the conditions specified therein.

II

A routine unannounced inspection of the licensee's activities was conducted on June 17, 1987. The results of this inspection indicated that the licensee had not conducted its activities in full compliance with NRC requirements. A written Notice of Violation and Proposed Imposition of Civil Penalty was served upon the licensee by letter dated September 11, 1987. The Notice stated the nature of the violations, the provisions of the NRC's requirements that the licensee had violated, and the amount of the civil penalty proposed for the violations. The licensee responded to the Notice of Violation and Proposed Imposition of Civil Penalty by letter dated October 7, 1987.

III

After consideration of the licensee's response and the statements of fact, explanation, and argument for mitigation contained therein, the NRC staff has determined as set forth in the Appendix to this Order that violation A.4 should be withdrawn, that the remaining examples of violation A and violation B occurred as stated, that the Severity Level III categorization is warranted, and that the majority of the penalty proposed for the violations designated in the Notice of Violation and Proposed Imposition of Civil Penalty should be imposed.

IV

In view of the foregoing and pursuant to section 234 of the Atomic Energy Act of 1954, as amended (Act), 42 U.S.C. 2282, and 10 CFR 2.205, *it is hereby ordered that:*

The licensee pay a civil penalty in the amount of Two Thousand Four Hundred Sixteen Dollars and Sixty-Seven Cents ($2,416.67) within 30 days of the date of this Order, by check, draft, or money order, payable to the Treasurer of the United States and mailed to the Director, Office of Enforcement, U.S. Nuclear Regulatory Commission, ATTN: Document Control Desk, Washington, DC 20555.

The licensee may request a hearing within 30 days of the date of this Order. A request for a hearing should be clearly marked as a "Request for an Enforcement Hearing" and shall be addressed to the Director, Office of Enforcement, U.S. Nuclear Regulatory Commission, ATTN: Document Control Desk, Washington, DC 20555, with a copy of the Regional Administrator, Region II, 101 Marietta St., NW., Suite 2900, Atlanta, GA 30323.

If a hearing is requested, the Commission will issue an Order designating the time and place of the hearing. If the licensee fails to request a hearing within 30 days of the date of this Order, the provisions of this Order shall be effective without further proceedings. If payment has not been made by that time, the matter may be referred to the Attorney General for collection.

In the event the licensee requests a hearing as provided above, the issues to be considered at such hearing shall be:

(a) Whether the licensee was in violation of the Commission's requirements as set forth in the Notice of Violation and Proposed Imposition of Civil Penalty referenced in Section II above as amended in the Appendix to this Order and

(b) Whether, on the basis of such violation, this Order shall be sustained.

For the Nuclear Regulatory Commission.

James Lieberman,

Director, Office of Enforcement.

Dated at Bethesda, Maryland, this 16th day of December 1987.

Appendix—Evaluations and Conclusions

On September 11, 1987, a Notice of Violation and Proposed Imposition of Civil Penalty (Notice) was issued for violations identified during a routine NRC inspection. Tidewater Memorial Hospital responded to the Notice on October 7, 1987. The licensee denied the occurrences of violations, A.1, A.2, A.3, A.4, A.7, and A.8 and affirmed the occurrence of the remaining violations. The licensee also requested remission or mitigation of the proposed civil penalty amount. The NRC's evaluation and conclusion for the violations which were contested and denied by Tidewater Memorial Hospital are as follows:

Restatement of Violation A.1

License Condition 17 requires the licensee to possess and use licensed material in accordance with statements, representations, and procedures contained in its license application dated January 23, 1979, letter dated July 24, 1984, and Model As Low As Reasonably Achievable (ALARA) Program dated July 27, 1984, including any enclosures.

Item 7(1) of the license application, Medical Isotopes Committee (Committee Administrative Duties and Frequency), requires the Medical Isotopes Committee to review the entire Radiation Safety Program at least annually to determine that all activities are being conducted safely and in accordance with the Nuclear Regulatory Commission/State Regulations and the conditions of the respective radioactive material licenses.

Contrary to the above, between July 27, 1984 and June 17, 1987, the Medical Isotopes Committee did not review the Radiation Safety Program.

Summary of Licensee's Response

The licensee contends that their consultant, Dr. Dean Broga, visits the hospital on a semiannual basis and that Dr. Broga's visits include a review of exposure levels in restricted and unrestricted areas, personnel exposures, postings, quality asurance programs, handling procedures, usage an storage, and all protocols followed by the Nuclear Medicine Department. The licensee also states that Dr. Broga's findings are discussed at the Radiation Safety Committee meetings and also sent to the Radiation Safety Officer in written form. The licensee asserts that Dr. Broga's semiannual review more than meets the requirements of License Condition 17, Item 7(1).

NRC Evaluation of Licensee's Response

License Condition 17, Item 7(1), requires the *Medical Isotopes Committee* (also known as the Radiation Safety Committee (RSC)) to review the entire Radiation Safety Progrm at least annually. Dr. Broga's semiannual survey report is the product of an individual outside consultant and does not constitute an annual review of the Radiation Safety Program by the Medical Isotopes Committee. Medical Isotopes Committee minutes reviewed between July 27, 1984 and June 17, 1987 did not record any annsul review of the Radiation Safety Program. Also, no formal review of the program, independent of the Medical Isotope Committee quarterly meetings, as performed by members of the Medical Isotopes Committee, acting as a majority of a quorum. In addition, if the RSC has actually performed an adequate formal annual review of the Radiation Safety Progam, in lieu of relying solely on a consultant's semiannual review, many of the sixteen examples of violations proposed in the September 11, 1987 Notice could have been avoided or would have been licensee-identified. The licensee's affirmation of ten of these examples also indicates minimal involvement by the RSC in managing the Radiation Safety Program. Because no formal annual review of the entire Radiation Safety Program was performed by the Medical Isotopes Committee members, violation A.1 remains as stated.

Restatement of Violation A.2

License Condition 17 requires the licensee to possess and use licensed material in accordance with statements, representations, and procedures contained in its license application dated January 23, 1979, letter dated July 27, 1984, and Model As Low As Reasonably Achievable (ALARA) Program dated July 27, 1984, including any enclosures.

Item 3(a)(3) of the Model ALARA Program requires the Radiation Safety Officer (RSO) to perform a quarterly review of records of radiation levels in unrestricted and restricted areas to determine that they were at ALARA levels during the previous quarter.

Contrary to the above, between July 27, 1984 and February 8, 1985, between July 24, 1985 and January 31, 1986; between January 31, 1986 and July 24, 1986, between July 24, 1986 and March 16, 1987, the RSO did not perform a quarterly review of records of radiation levels in restricted areas. Additionally, between July 27, 1984 and June 17, 1987, the RSO did not perform a quarterly review of records of radiation levels in unrstricted areas.

Summary of Licensee's Response

The licensee contends that the exact implication of the three ALARA violations as referenced in violations A.2, A.3, and A.4 is unclear. The licensee states that they review quarterly exposure records at all RSC meetings to ensure compliance with ALARA levels. With the exception of the Radiologist (who serves as the the RSO), the licensee rarely has any monitored individual who approaches the ALARA Level I limits. The licensee states that Dr. Broga's (outside consultant) survey includes levels in restricted and unrestricted areas. The nuclear medicine technologist who performs the weekly exposure surveys is also a member of the RSC and is responsible for reporting any unusual situations to the Committe. The licensee contends that Dr. Broga's review includes ways to limit exposure, and that Tidewater Memorial Hospital does not have individuals receiving significant exposures as a function of their routine job responsibilities. The licensee explains that, if anything, its only mistake was its failure to document is efforts in a manner consistent with the inspector's expectations. The licensee further explains that it plans to amend its license application to more accurately reflect its program. Also, the license lists the dates of all RSC meetings held between July 27, 1984 and April 28, 1987.

NRC Evaluation of Licensee's Response

Dr. Broga's review of radiation levels in restricted areas was performed approximately semiannually. Dr. Broga's review was comprised of a contamination and exposure survey of restricted areas. The results were compiled into a "Nuclear Medicine Survey Report" and mailed to Dr. Lagundino, the licensee's Radiologist and RSO. The results of the report were also discussed, but not documented at the Radiation Safety Committee Meeting that coincided with Dr. Broga's visit. As stated in violation A.2, the RSO was required to perform a *quarterly* review of records of radiation levels in unrestricted areas. The dates when Dr. Broga performed his contamintion and exposure surveys (July 27, 1984; February 18, 1985; July 24, 1985; January 31, 1986; July 24, 1986; and March 16, 1987) did not constitute a quarterly frequency.

Dr. Broga's review of radiation levels did not include contamination or exposure survey results of unrestricted areas (hallways, adjacent rooms, etc.). All of Dr. Broga's swipes and exposure survey measurements were collected from points within the restricted areas (hot lab and injection/imaging areas).

The weekly surveys of unrestricted areas conducted by the nuclear medicine technologist did not constitute a quarterly review of radiation levels in unrestricted and restricted areas by the RSO, Dr. Lagundino. Under these circumstances, violaton A.2 was correct as stated.

Restatement of Violation A.3

License Condition 17 requires the licensee to possess and use licensed material in accordance with statements, representations, and procedures contained in its license application dated January 23, 1979, letter dated July 27, 1984, and Model As Low As Reasonably Achievable (ALARA) Program dated July 27, 1984, including any enclosures.

Item 3(a)(1) of the model ALARA Program states that the Radiation Safety Officer (RSO) will perform an annual review of the Radiation Safety Program for adherence to ALARA concepts.

Contrary to the above, between July 27, 1984 and June 17, 1987, the RSO did not perform an annual review of the Radiation Safety Program.

Summary of Licensee's Response

The licensee addresses violation A.3 in the "Summary of Licensee's Response" for violation A.2. The licensee states that quarterly exposure records are reviewed at all RSC meetings in order to ensure compliance to ALARA levels and that rarely does anyone approach ALARA Level I limits except for their Radiologist (RSO). The licensee also contends that Dr. Broga's review includes ways to limit exposure, and that the license does not have individuals receiving significant exposures as a function of their routine job responsibilities.

NRC Evalaution of Licensee's Response

The NRC staff maintains that the licensee's RSO did not perform any annual evaluation or review of the Radiation Safety Program for adherence to ALARA concepts. Such a review would have involved an annual evaluation of all individual occupational external exposure records for the four preceding quarters. The review also would have involved a review of specific procedures for reducing exposures (individual and collective) to as low as is reasonably achievable. Particular attention would have directed towards any individuals who exceeded the licensee's Investigation Levels I and II.

Item 6(b) of the July 27, 1984 Model ALARA Program states that each quarterly exposure that equals or exceeds Investigation Level I shall be reviewed by the RSO. This program also states that the RSO shall report the results of the review at the first RSC meeting following the quarter when the exposure was recorded and that the RSC shall consider each such exposure in comparison with those of others performing similar tasks and shall record the review in the RSC minutes. The RSC meeting conducted on February 18, 1985 may have reviewed Level I, but contrary to the Model ALARA Program, no explanation, comparison, or review was recorded in the RSC minutes regarding Dr. Lagundino's exposure level. Dr. Lagundino's exposure should have been discussed and documented during the RSO's annual review of the Radiation Safety Program.

The licensee's documents show that Dr. Broga designates his review of the ALARA program by only a check mark placed under the category "yes" of the "Nuclear Medicine Survey Report" and associated "Radiation Protection Survey-Nuclear Medicine." The NRC staff contends that a check mark does not constitute an adequate record of a program review of the Radiation Safety Program for adherence to ALARA concepts.

VOL 52 ISS 246 DEC 23 1987 UMI

VOL 52 ISS 246 DEC 23 1987 UMI

Item 1.a of Model ALARA Program requires the management of Tidewater Memorial Hospital to establish an organization for development of an ALARA program, to include the RSC and RSO. The NRC staff views the lack of timely and complete ALARA reviews as a joint responsibility of the RSO and the RSC. In addition, if the RSO had actually performed an adequate formal annual review of the Radiation Safety Program, in lieu of relying solely on a consultant's semiannual review, many of the sixteen examples of violations proposed in the September 11, 1987 Notice could have been avoided or would have been licensee-identified. The licensee's affirmation of ten of these examples also indicates admission of minimal involvement by the RSO in managing the Radiation Safety Program. Therefore, violation A.3 remains as stated.

Restatement of Violation A.4

License Condition 17 requires the licensee to possess and use licensed material in accordance with statements, representations, and procedures contained in its license application dated January 23, 1979, letter dated July 27, 1984, and Model As Low As Reasonably Achievable (ALARA) Program dated July 27, 1984, including any enclosures.

Items 2(c)(2) and 3(a)(2) of the Model ALARA Program requires that the radiation Safety Officer (RSO) and Radiation Safety Committee (RSC) review at least quarterly the occupational radiation exposure of authorized users and workers to determine that their exposures are ALARA in accordance with the provisions of Section 6 (Establishment of Investigational Levels In Order to Monitor Individual Occupational External Radiation Exposures) of the Model ALARM program.

Contrary to the above, between July 24, 1985 and November 11, 1986, the RSO and RSC failed to perform quarterly reviews of occupational radiation exposures.

Summary of Licensee's Response

The licensee addressed violation A.4 in the "Summary of Licensee's Response" for violation A.2. The licensee states that it reviewed the quarterly exposure records at all RSC meetings in order to ensure compliance with ALARA levels. The licensee lists the dates of all RSC meetings held between July 24, 1985 and November 11, 1986.

NRC Evaluation of Licensee's Response

Based on subsequent information submitted to our office in letters dated June 18, July 15, and October 7, 1987, we have determined that the RSO and RSC had performed quarterly reviews of occupational radiation exposures during the quarterly RSC meetings. Therefore, based on this new information we agree that the provisions of Items 2(c)(2) and 3(a)(2) of the license application were not violated. Accordingly, violation A.4 has been withdrawn and our records will be adjusted accordingly.

Restatement of Violation A.7

License Condition 17 requires the licensee to possess and use licensed material in accordance with statements, representations, and procedures contained in its license application dated January 23, 1979, letter dated July 27, 1984, and Model As Low As Reasonably Achievable (ALARA) Program dated July 27, 1984, including any enclosures.

Item 11 of the license application, Facilities and Equipment, requires the radioisotope laboratory to be locked when the physician or technician is not in attendance.

Contrary to the above, between approximately May 1, 1987 and June 17, 1987, the radioisotope laboratory was not locked or secured when the physician or technician was not in attendance.

Summary of Licensee's Response

The licensee states that violations A.7, A.11, A.12, and A.14 stem from the relocation of their nuclear department. The licensee contends that it was unable to get immediate key control from the contractor when its nuclear medicine laboratory was moved, and this resulted in the violation. The licensee also claims that since it presently uses a radiopharmacy, it does not routinely possess doses in the radioisotope laboratory for after-hour use. The licensee further explains that the area was under the supervision of the nuclear medicine technologist during daytime hours and that after-hours the area is not open to the public and is under the scrutiny of security and the emergency room staff. The licensee concludes by stating that although it may not have been in strict compliance with this requirement, the steps taken were sufficient to guard against problems which the regulation is designed to prevent. The posting violations (A.11, A.12, and A.14) were affirmed.

NRC Evaluation of Licensee's Response

On June 17, 1987, at approximately 11:00 a.m., the NRC inspector arrived at Tidewater Memorial Hospital to perform a routine, unannounced inspection. Upon entry into the nuclear medicine department (hot lab and injection/imaging areas), the inspector was unable to locate the nuclear medicine technologist or any department individual for approximately 30 minutes. During this time, no physician or technician was in attendance in the nuclear medicine department. Also, the two access doors leading into the nuclear medicine department (injection/imaging area) and the hot lab door located within the department were not locked. Consequently, access into the nuclear medicine department was not controlled or restricted. Although the licensee claims that it does not routinely possess radiopharmaceutical single dose units for after-hours use, it does routinely possess radioactive materials (to include radiopharmaceuticals, contaminated single dose syringes collected for storage, and a cesium #350982A–07 sealed source used for dose calibrator tests) which must be secured at all times from unauthorized removal. Therefore, violation A.7 should remain as stated.

Restatement of violation A.8

License Condition 17 requires the licensee to possess and use licensed material in accordance with statements, representations, and procedures contained in its license application dated January 23, 1979, letter dated July 24, 1984, and Model As Low As Reasonably Achievable (ALARA) Program dated July 27, 1984, including any enclosures.

Item 12(3) of the license application, Radiation Safety Training for Radiation Workers, requires all individuals who work with radiation sources (including security, nursing, and housekeeping personnel) to receive periodic training at least annually in radiation safety.

Contrary to the above, between August 9, 1984 and January 31, 1986, the licensee did not instruct security, nursing, and housekeeping personnel in radiation safety.

Summary of Licensee's Response

The licensee states that Dr. Broga has routinely presented an overview of the license operation and short training programs during the meetings which he has attended and that many of these overviews and training programs were not documented. The licensee contends that, since they are a very small hospital, the members of the RSC are in daily contact with most of the hospital employees, especially any of those who have reason to be in and around the areas where radioactive material is used. Most training is done on a one-on-one basis when an employee begins employment. The licensee states that the violation is not one for which the licensee had been previously cited; and concludes by indicating that they have recently reviewed their training efforts in accordance with ALARA and are in the process of instituting a new system.

NRC Evaluation of Licensee's Response

At the time of the inspection, the Chief Radiologic Technologist stated that he had been responsible for coordinating most RSC meetings and training program schedules. The Chief Radiologic Technologist also stated that he had scheduled an in-service presentation on radiation safety to be conducted by Dr. Broga at the RSC meeting on February 18, 1985. This presentation was scheduled for maintenance, housekeeping, and nursing personnel, but only one nurse, who was an RSC member representative attended the presentation. During the RSC meeting held on January 31, 1986, maintenance, housekeeping, and nursing personnel attended an in-service presentation by Dr. Broga. However, no annual radiation safety training was provided for housekeeping and nursing personnel between at least August 9, 1984 and January 31, 1986. Also, no annual scheduling was proposed nor was training performed for any security personnel between August 9, 1984 and June 17, 1987. Items 3(b)(1) and (2) of the ALARA program, dated July 27, 1984, state that the RSO will schedule briefings and educational sessions to inform users, workers, and *ancillary personnel* of ALARA program efforts. Based on this information, violation A.8 remains as stated.

NRC Conclusion

After consideration of the October 7, 1987 response to the Notice of Violation and Proposed Imposition of Civil Penalty issued September 11, 1987, the NRC staff has concluded that sufficient basis was provided for the withdrawal of violation A.4, but that the remaining violations occurred as stated. The NRC staff agrees that the licensee has not had significant overexposures, contamination incidents, or other radiation mishaps. However, the evidence continues to support a management breakdown due to the total number of violations. Based on these violations, and in view of the magnitude of the noncompliances, the Severity Level III categorization and the majority of the proposed $2,500 civil penalty are warranted. Because the proposed civil penalty was assessed equally among the two violations and violation A.4 was one example of 15 in violation A and has been withdrawn, the proposed civil penalty amount has been reduced by 1/15th of 1/2 of the total ($83.33). Therefore, a civil penalty in the amount of $2,416.67 should be imposed.

[FR Doc. 87-29386 Filed 12-22-87; 8:45 am]
BILLING CODE 7590-01-M

[Docket Nos. 030-12570 and 030-12811; License Nos. 47-05322 and 47-05322-03, EA 87-74]

Order Imposing Civil Monetary Penalty; Wheeling Hospital, Inc., Wheeling, WV

I.

Wheeling Hospital, Inc. (licensee) is the holder of Materials License Nos. 47-05322-02 and 47-05322-03 issued by the Nuclear Regulatory Commission (NRC/Commission) on April 27, 1977 and July 22, 1977, respectively. The licenses authorize the licensee to employ the use of radioactive materials for diagnostic and therapeutic purposes for patients in accordance with the conditions specified therein.

II.

A routine unannounced inspection of the licensee's activities was conducted on April 29, 1987. The results of this inspection indicated that the licensee had not conducted its activities in full compliance with NRC requirements. A written Notice of Violation and Proposed Imposition of Civil Penalty was served upon the licensee by letter dated August 3, 1987. The Notice stated the nature of the violations, the provisions of the NRC requirements that the licensee had violated, and the amount of the civil penalty proposed for the violations. The licensee responded to the Notice of Violation and Proposed Imposition of Civil Penalty by letters dated August 5, 26, 27, and 28, and September 28, 1987.

III.

After consideration of the licensee's responses and the statements of fact, explanation, and argument for mitigation, the NRC staff has determined, as set forth in the Appendix to this Order, that violations A, B, C, and D.4 should be withdrawn and violations D.6, D.8, and G occurred as stated. Also, a portion of the proposed civil penalty for the violations designated in the Notice of Violation and Proposed Imposition of Civil Penalty as amended by the Appendix to this Order should be imposed.

IV.

In view of the foregoing and pursuant to section 234 of the Atomic Energy Act of 1954, as amended (Act), 42 U.S.C. 2282, and 10 CFR 2.205, it is hereby ordered that:

The Licensee pay a civil penalty in the amount of One Thousand Four Hundred Twenty-Nine Dollars ($1,429) within 30 days of the date of this Order, by check, draft, or money order, payable to the Treasurer of the United States and mailed to the Director, Office of Enforcement, U.S. Nuclear Regulatory Commission, ATTN: Document Control Desk, Washington, DC 20555.

The licensee may request a hearing within 30 days of the date of this Order. A request for a hearing should be clearly marked as a "Request for an Enforcement Hearing" and shall be addressed to the Director, Office of Enforcement, U.S. Nuclear Regulatory Commission, ATTN: Document Control Desk, Washington, DC 20555, with a copy to the Regional Administrator, U.S. Nuclear Regulatory Commission, Region II, 101 Marietta Street, NW., Suite 2900, Atlanta, GA 30323.

If a hearing is requested, the Commission will issue an Order designating the time and place of the hearing. If the licensee fails to request a hearing within 30 days of the date of this Order, the provisions of this Order shall be effective without further proceedings. If payment has not been made by that time, the matter may be referred to the Attorney General for collection.

In the event the licensee requests a hearing as provided above, the issues to be considered at such hearing shall be:

(a) Whether the licensee was in violation of the Commission's requirements as set forth in the Notice of Violation and Proposed Imposition of Civil Penalty referenced in Section II above as amended in the Appendix to this Order, and

(b) Whether, on the basis of such violations, this Order should be sustained.

For Nuclear Regulatory Commission.

James Lieberman,

Director, Office of Enforcement.

Dated at Bethesda, Maryland this 10th day of December 1987.

Appendix–Evaluation and Conclusion

By letters dated August 5 and 26, 1987, the licensee responded, in part and in full, respectively, to the Notice of Violation and Proposed Imposition of Civil Penalty dated August 3, 1987. In a

letter dated August 27, 1987, the licensee restated its response in part. In a letter dated August 28, 1987, the licensee submitted copies of records requested by the NRC on August 14, 1987; and in a letter dated September 28, 1987, the licensee submitted copies of records requested by the NRC on April 29 and September 24, 1987. In these responses, the licensee denied four violations and parts of a fifth, did not contest two violations and parts of a third, and requested reclassification of the overall Severity Level and civil penalty amount based on new information and apparent prior condonation by the NRC. Provided below are restatements of the violations, licensee responses, staff evaluations, and conclusions.

Restatement of Violation A

Licensee Condition 22(a) of License No. 47–05322–03 requires a visiting physician to receive prior written permission from the hospital's Administrator and its Medical Isotopes Committee before the physician is authorized to use licensed material for human use under the terms of this license.

Contrary to the above, the licensee did not issue written permission from the hospital's Administrator and its Medical Isotopes Committee prior to authorizing Dr. Sameer Rafla, a visiting physician from Brooklyn Methodist Hospital, to use licensed material for radiation therapy of patients from April 29, 1984 to April 29, 1987. This violation applies to License No. 47–05322–03 only.

Licensee's Response

The licensee contends that the physician was merely a part-time physician assisting an authorized user under 10 CFR 35.25 and was therefore not a visiting physician requiring written permission per License Condition 22(a). The license offers three exhibits as evidence of Courtesy Staff appointments for 1980–1981.

NRC Evaluation

At the time of the inspection on April 29, 1987 and through the Enforcement Conference on May 27, 1987, the licensee did not clearly dispute the violation; however, the licensee's response dated August 5, 1987 indicates that Dr. Rafla should have been considered as working under the supervision of Dr. Bonnesen in accordance with 10 CFR 35.25. Therefore, based on this new information we agree that the provisions of License Condition 22(a) would not have applied. Accordingly, violation A has been withdrawn. Our records will be revised accordingly.

Restatement of Violation B

10 CFR 35.27(a) (2) and (3) authorizes a licensee to permit any visiting medical authorized user to use licensed material for medical use under the terms of the licensee's license for sixty days each year if, among other things, the licensee possesses a copy of a medical use license issued by the Commission or an Agreement State or a permit issued by the Commission or Agreement State broad licensee either of which identifies the visiting medical user by name and specifies the procedures which the visiting user is authorized to perform.

Contrary to the above, on April 29, 1987, the licensee did not possess a copy of a license issued by the Commission or an Agreement State, or a permit issued by the Commission or Agreement State broad licensee that authorizes medical use by Dr. Sameer Rafla even though over the past three years Dr. Rafla worked at the licensee's facility two or three times per year while another physician was on vacation. This violation applies to License No. 47–05322–03 only.

Licensee's Response

The licensee responded that Dr. Rafla was supervised and therefore was not a visiting physician in the context of 10 CFR 35.27. Also, an authorized user on the licensee's staff reviewed Dr. Rafla's credentials prior to Dr. Rafla commencing work.

NRC Evaluation

The licensee is not required to possess a copy of Dr. Rafla's medical use license or permit if he was working under the supervision of an authorized user such as Dr. Bonnesen in accordance with 10 CFR 35.25. Therefore, based on our withdrawal of violation A, we withdraw violation B. Our records will be revised accordingly.

Restatement of Violation C

10 CFR 35.22(a)(4)(iv) requires a licensee's Radiation Safety Committee to maintain minutes of their meetings including a summary of deliberations and discussions.

10 CFR 35.22(b)(2) requires a licensee's Radiation Safety Committee to review, on the basis of safety and with regard to training and experience, and approve or disapprove any individual who is to be listed as a Teletherapy Physicist before submitting a license application or request for such amendment or renewal.

Contrary to the above, the licensee's Radiation Safety Committee did not review and document the training and experience of the Teletherapy Physicist, Mr. Virgil Yoder (Consultant), before submitting their license application for Amendment No. 8 on February 10, 1983. This violation applies to License No. 47–05322–03 only.

Licensee's Response

The licensee contends that the present 10 CFR 35.22(b)(2) requirement was not operative during the time period cited in violation C, nor was 10 CFR 35.27 (superseded text) operative prior to the hiring of their consulting Teletherapy Physicist. Additionally, the licensee states that Mr. Yoder's qualifications were reviewed in 1977.

NRC Evaluation

Violation C, issued on August 3, 1987, related to activities in February 1983. Due to an error, it cited 10 CFR 35.22 which did not go into effect until April 1, 1987. The NRC agrees that the violation was in error and we withdraw violation C. Our records will be revised accordingly.

Restatement of Violation D.4

License Condition 23 of License No. 47–05322–03, requires the licensee to possess and use licensed material described in items 6, 7, and 8 of this license in accordance with statements, representations, and procedures contained in the license application dated June 10, 1982.

Item 9(b)(2) of the license application dated June 10, 1982, requires the licensee to calibrate the primary beam calibration instruments every twenty-four (24) months.

Contrary to the above, the licensee did not calibrate the Victoreen R Meter Model 570 (Serial #2126) and Capintec Model 172–2 (Serial #607023) primary beam calibration instruments between February 20, 1969 and May 31, 1972, and between May 31, 1972 and June 5, 1985, intervals in excess of twenty-four (24) months. These violations apply to License No. 47–05322–03 only.

Licensee's Response

The licensee contends the following:

- The primary beam calibrations are performed by an outside consultant who uses his own instrument.
- The teletherapy license was issued on July 23, 1977. Therefore, there is no reason to calibrate the primary beam calibration instrument prior to that date.
- The Victoreen R Meter Model 570 primary beam calibration instrument was used prior to 1977 for the calibration of x-ray therapy equipment only. This instrument was not utilized for the annual calibration or monthly spot-check of the Co-60 teletherapy unit at anytime.
- The Capintec Model 172–2 was used for annual calibrations and monthly spot-checks between July 22, 1977 and July 1984. Since July 1984, a Capintec Model 192 has been utilized. Both instruments were controlled and maintained by Mr. Yoder when he performed these calibrations. These instruments have been calibrated every 24 months as required and the calibration reports are maintained by Mr. Yoder.
- Wayne Butler, Ph.D., performs no monthly spot-checks. He does confer with Mr. Yoder bi-weekly regarding patient treatments and chart checks.
- The Capintec Model 192 (Serial No. 46301442) was used for annual calibrations and monthly spot-checks in 1986 and 1987. The Capintec Model 192 (Serial No. 94C747) was used in 1984 and 1985. The Capintec Model 172–2 was used between 1977 and 1983.

NRC Evaluation

Although many of the licensee's arguments do not directly address this violation as stated, the staff agrees that the primary beam calibration instruments were not required to be calibrated prior to the 1977 teletherapy license issuance. Based upon the new information provided in the licensee responses, we are withdrawing violation D.4 since an outside party calibrated the instruments at intervals not in excess of twenty-four months. Our records will be revised accordingly.

Restatement of Violation D.6

License Condition 23 of License No. 47–05322–03 requires the licensee to possess and use licensed material described in items 6, 7, and 8 of this license in accordance with statements, representations, and procedures contained in the licensee application dated June 10, 1982.

License Condition 19 of License No. 47–05322–02 requires the licensee to conduct its program in accordance with the statements, representations, and procedures contained in the licensee's letter with updated application and attachments received March 25, 1982 (including ALARA program dated August 15, 1980, as an attachment).

Item 15, Enclosure No. III(a)(1) of the license application dated June 10, 1982 (License No. 47–05322–03), and Attachment E of the ALARA Program dated August 15, 1980, included with the updated application and attachments received March 25, 1982 (License No. 47–05322–02), requires the licensee's Radiation Safety Officer (RSO) to perform an annual review of the Radiation Safety Program for adherence to ALARA concepts.

Contrary to the above, the licensee's RSO did not perform an annual review of the Radiation Safety Program between June 13, 1984 and February 11, 1987, an interval in excess of one year. This violation applies to both License Nos. 47–05322–03 and 47–05322–02.

Licensee's Response

The licensee contends that the violation was licensee-identified and corrected on February 11, 1987, prior to the NRC inspection.

NRC Evaluation

NMA Medical Physics Services documented and reviewed with the licensee, in four separate consulting reports, the licensee's failure to perform an annual review of the Radiation Safety Program. In a NMA Medical Physics Services consulting report dated February 6, 1985, the consultant notified the licensee of the annual review due on March 14, 1985. Again in a consulting report dated May 1986, the consultant alerted the licensee of the required annual review. Then on September 17, 1986, NMA Medical Physics Services notified the licensee of their deficiency in conducting an annual review. The final notification by NMA Medical Physics Services of Wheeling Hospital's annual review deficiencies was documented in a consulting report dated February 4, 1987. The licensee responded by performing an annual review on February 11, 1987. Violation D.6 was correct as stated.

Restatement of Violation D.8

License Condition 19 of License No. 47–05322–02 requires the licensee to conduct its program in accordance with the statements, representations, and procedures contained in the licensee's letter with updated application and attachments received March 25, 1982 (including ALARA program dated August 15, 1980, as an attachment).

Item 7, Appendix B, of undated application and attachments received March 25, 1982, requires the Medical Isotopes Committee to meet not less than once in each calendar quarter.

Contrary to the above, the Medical Isotopes Committee did not meet between June 13, 1984 and May 22, 1985, and between May 22, 1985 and December 11, 1985, and between December 11, 1985 and November 13, 1986, all three intervals in excess of a calendar quarter. This violation applies to License No. 47–05322–02 only.

Licensee's Response

The licensee contends that these failures were licensee-identified and corrected in November 1986, prior to the NRC inspection.

NRC Evaluation

Dr. Moren, Ph.D., an outside Consulting Physicist for Wheeling Hospital, noted in an earlier consulting report which evaluated Wheeling Hospital's Nuclear Medicine Department that the Radiation Safety Committee (RCS) has not met since June 13, 1984. NMA Medical Physics Services documented the infrequency of RSC meetings in two separate consulting reports dated November 1984 and February 1985. The November 1984 consulting report alerted the licensee of a missed RSC meeting during the third calendar quarter of 1984. The February 1985 consulting report also alerted the licensee of a missed RSC meeting during the second calendar quarter of 1985. Also NMA Medical Physics Services indicated in a consulting report dated February 6, 1985 that the RSC had not performed an annual ALARA review of the hospital's Radiation Safety Program. Consequently, based on Dr. Moren's consulting report and NMA Medical Physics Services' consulting reports, Wheeling Hospital was aware of their frequency of missed RSC meetings since at least June 13, 1984. Violation D.8 was correct as stated.

Restatement of Violation G

10 CFR 35.406(a) requires the licensee to count the number of brachytherapy sources returned to the storage area to ensure all sources taken from the storage area have been returned.

Contrary to the above, the licensee did not count the number of brachytherapy sources returned to the storage area on April 13, 1987, after removal of the sources from a temporary implant patient located in room 201. This violation applies to License No. 47–05322–02 only.

Licensee's Response

The licensee contends that their "returned" entry or "the time and date of return" entry for April 13, 1987, on Enclosure 4 of their letter of August 5, 1987, conforms to the data elements required by 10 CFR 35.406(a).

NRC Evaluation

The NRC evaluation is based on 10 CFR 35.406(a) requiring the licensee to return the brachytherapy sources to the storage area and *count* the number returned to ensure that all sources taken from the storage area have been

VOL 52 ISS 246 DEC 23 1987 UMI

returned. The entry "returned" or the "time and date of return" entry does not constitute a count of the brachytherapy sources. Therefore, violation G remains as stated.

Conclusions

Based on the review of the partial response (August 5, 1987), the full response (August 28, 1987), and the partial response (August 27, 1987) by the licensee to the Notice of Violation and Proposed Civil Penalty issued on August 3, 1987, violations A, B, C, and D.4 have been withdrawn and violations D.6, D.8, and G have reaffirmed. The unresolved items described in Enclosure II to the letter, which appear to be in violation of NRC requirements, will be reviewed during future NRC inspections. The evidence continues to support a management breakdown due to the remaining violations and subsequent information revealing additional program deficiencies. Mitigation for violation D.6 and D.8 is inappropriate, notwithstanding the licensee's self-identification, in view of the opportunities available for self-identification and the knowledge the licensee had of the recurring conduct. We do note, as observed by the licensee, that some of the violations were not identified by the NRC in a previous inspection. NRC inspections are an audit. The inspector does not cover every aspect of a licensee's operation. The licensee has responsibility for full compliance not the NRC inspector. Based on these violations, and in view of the magnitude of the noncompliances, no mitigation of the Severity Level (III) is warranted. Based upon the withdrawal of violations A, B, and C, reduction in the civil penalty amount by $1071 is warranted. Therefore, a civil penalty in the amount of $1,429 should be imposed.

Enclosure II—Unresolved Items

A number of unresolved items are noted in reference to new information submitted in the licensee's responses. An unresolved item is defined as a matter for which NRC needs more information in order to determine compliance. Please be aware that these unresolved items will be reviewed during future NRC inspections. These unresolved items, along with the requirements which must be satisfied, are specified below:

- 10 CFR 35.406(b)(1) requires recording the names of individuals permitted to handle sources.
- 10 CFR 35.406(b)(2) requires the licensee to make a record of brachytherapy source use to include the number and activity of the sources in storage, after the *removal*, and the initials of the individual who removed the sources from storage.
- 10 CFR 35.406(b)(3) requires the licensee to make a record of the following:
  - Patient's name and room number
  - Number and activity of sources in storage after the *return* of the sources to storage

The documents submitted of the five cesium implants performed between April 10 and June 16, 1987 did not appear to contain the required information listed above.

On August 14, 1987 copies of Wheeling Hospital's records pertaining to Cesium-137 brachytherapy treatments subsequent to April 1, 1987 were requested. This information was requested in reference to the licensee's implementation of requirements as defined in 10 CFR 35.406(c) and 35.415(a)(4). In your letter dated August 28, 1987, no records of a brachytherapy implant survey were submitted to this Office regarding a Cesium-137 implant performed on April 10, 1987 (patient name: Penn, room 201). Since your letter of August 28, 1987 indicates that the "Cesium Room and Patient Survey Meter Readings" form had been created immediately following the April 29, 1987 NRC inspection in order to satisfy the requirements of 10 CFR 35.406(c) and 35.415(a)(4), it cannot be established whether the required surveys were conducted and whether records of the surveys had been kept. Your letter of August 28, 1987 indicates that all Cesium-137 brachytherapy treatments since April 29, 1987 had used the new form and all future treatments will continue to use this form.

10 CFR 35.415(a)(4) requires that records of surveys performed in contiguous restricted and unrestricted areas include the time of the survey. According to records submitted, the four implants performed between May 15 and June 16, 1987 do not indicate the time of the surveys. In order to assure compliance to 10 CFR 35.415, future brachytherapy surveys must include the time of the survey.

These unresolved items will be reviewed during a future NRC inspection at your facility.

PRESIDENTIAL COMMISSION ON THE HUMAN IMMUNODEFICIENCY VIRUS EPIDEMIC

Meeting

Notice is hereby given, pursuant to Pub. L. 92-463, that the Presidential Commission on the Human Immunodeficiency Virus Epidemic will hold a public meeting on Wednesday, Thursday, and Friday, January 13, 14, and 15 in Hearing Room B at the Interstate Commerce Commission Building, 12th Street and Constitution Avenue (Constitution Avenue entrance), NW., Washington, DC 20423, from 9:00 a.m. to 5:30 p.m. each day.

The three day meeting will consist of panel presentations and discussions outlining aspects of the HIV epidemic related to clinical patient care. Experts from Federal, State, and local levels, and from the private sector, will make pesentations addressing issues surrounding care of patients infected with HIV. Agenda items subject to change as priorities dictated.

Records shall be kept of all Commission proceedings and shall be available for public inspection at 655—15th Street NW., Washington, DC 20005. For further information, please call 376-2206.

Polly L. Gault,

Executive Director, Presidential Commission on the HIV Epidemic.

BILLING CODE 8010-01-M

[Release No. 34-25198; File No. SR-PHLX 87-35]

Self-Regulatory Organizations; Proposed Rule Change by the Philadelphia Stock Exchange, Inc., Relating to Principal Restrictions

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), notice is hereby given that on November 9, 1987, the Philadelphia Stock Exchange, Inc. filed with the Securities and Exchange Commission the proposed rule change as described in Items I, II and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Philadelphia Stock Exchange, Inc. ("PHLX" or the "Exchange") pursuant to Rule 19b-4, hereby proposes the following rule change: (italics indicates additions, brackets indicates deletions)

Obligations And Restrictions Applicable to Specialists And Registered Options Trader

Rule 1014. (a)-(d) No Change

(e) Except in accordance with paragraphs (c) and (d), no ROT shall:

(i) initiate an Exchange options transaction while on the Floor for any account in which he has an interest and execute as Floor Broker an off-floor order in options on the same underlying [security] *interest* during the same trading session, or

(ii) retain priority over an off-floor order while establishing or increasing a position for an account in which he has an interest while on the Floor of the Exchange.

(f) The provisions of the foregoing paragraphs (d) and (e) of this rule shall not apply to:

(i) any transaction by a registered specialist in an option in which he is so registered; or

(ii) any transaction, other than a transaction for an account in which an ROT has an interest, made with prior approval of a Floor Official to permit a member to contribute to the maintenance of a fair and orderly market in an option, or any purchase or sale to reverse any such transaction, or

(iii) any transaction to offset a transaction made in error.

. . . Commentary

.01-.16 No Change

.17 With respect to the prohibitions contained in paragraph (e), the daytime trading sessions on the Foreign Currency Options Floor during the hours of 8:00 a.m. and 2:30 p.m. are considered separate and distinct from the evening trading sessions on the Foreign Currency Options Floor during the hours of 7:00 p.m. and 11:00 p.m.

II. Self-Regulatory Organization's Statement Regarding the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The self-regulatory organization has prepared summaries, set forth in sections (A), (B), and (C) below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

The purpose of the proposed rule change is to clarify the meaning of the term "trading session" in light of the recently instituted evening trading hours on the Foreign Currency Options ("FCO") Floor. On September 16, 1987 the PHLX began trading foreign currency options during the hours of 7:00 p.m. and 11:00 p.m. on Sundays through Thursdays. These trading hours are in addition to the existing trading sessions on Monday through Friday during the hours of 8:00 a.m. and 2:30 p.m.

Under Rule 1014(e), an ROT is prohibited from acting both as a market maker and as a floor broker who executes off-floor orders in options on the same underlying security during the same trading session. The purpose of this provision is to avoid any risk that a market maker may trade ahead of a customer order or otherwise take advantage of a customer account in conducting proprietary trading activities. FCO Participants have asked the PHLX for clarification as to whether trading during the daytime hours of 8:00 a.m. and 2:30 p.m. and the evening hours of 7:00 p.m. and 11:00 p.m. on the same calendar day is considered trading during one session or two separate sessions.

PHLX has determined that although the evening and daytime segments are part of the same trading day, they are separate and distinct. For most purposes, the evening and daytime trading periods are treated by the Exchange as two segments of the same trading day. For purposes of Rule 1014(e), however, it would appear appropriate to treat each segment as a separate trading session. The current rule permits an ROT to act as a market maker on one trading day and a broker on the next. It is felt that, because the market may move substantially from one day to the next, the ability of an ROT to prefer himself over a customer, or to trade ahead of a customer order, is limited by prohibiting the ROT from acting in a dual capacity in the same session. This reasoning applies with equal force in considering the daytime and evening segments to be separate trading sessions. Accordingly, the rule change extends the separate session notion for purposes of Rule 1014(e) so that an ROT may act as a floor broker by day and market maker by night and vice versa.

Finally, Rule 1014(e)(i) has been amended to change the term underlying "security" to underlying "interest" to reflect the fact that the Exchange trades options on foreign currencies and stock indicies as well as on individual securities.

The proposed rule change is consistent with section 6(b)(5) of the Exchange Act in that it is designed to prevent fraudulent and manipulative acts and practices, and to protect investors and promote the public interest.

B. Self-Regulatory Organization's Statement on Burden on Competition

The PHLX does not believe that the proposed rule change will impose any inappropriate burden or competition. Indeed, the proposal may serve to promote market maker and broker competition on the floor of the Exchange.

C. Self-Regulatory Organization's Statement on Comment on the Proposed Rule Change Received from Members, Participants or Others

No written comments were either solicited or received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

PHLX has designated the proposed rule change as an interpretation of the meaning of an existing rule. Accordingly, the proposed rule change takes effect upon this filing pursuant to section 19(b)(3)(A)(ii).

IV. Solicitation

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street NW., Washington, DC 20549. Copies of such filing will also be

available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number in the caption above and should be submitted by January 13, 1988.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Jonathan G. Katz,

Secretary.

Dated: December 15, 1987.

[FR Doc. 87-29343 Filed 12-22-87; 8:45 am]

BILLING CODE 8010-01-M

[File No. 22-17891]

Application and Opportunity for Hearing; American Airlines, Inc.

December 16, 1987.

Notice is hereby given that American Airlines, Inc. (the "Company") has filed an application under clause (ii) of section 310(b)(1) of the Trust Indenture Act of 1939 (the "Act") for a finding by the Securities and Exchange Commission (the "Commission") that the trusteeship of Meridian Trust Company (the "Bank") under an indenture dated as of April 15, 1987 (the "April Indenture") between Company and Bank and the trusteeship of the Bank as successor trustee under an indenture dated as of December 1, 1986 (the "December 1986 Indenture") between Company and The Connecticut Bank and Trust Company, National Association ("Connecticut Bank"), as trustee, and under seven indentures dated as of December 1, 1987 (the "December 1987 Indentues") between Company and Bank each of which were heretofore qualified under the Act, is not so likely to involve a material conflict of interest as to make it necessary in the public interest or for the protection of investors to disqualify Bank from acting as trustee under any of these indentures.

Section 310(b) of the Act provides in part that if a trustee under an indenture qualified under the Act has or shall acquire any conflicting interest (as defined in the section), it shall within ninety days after ascertaining that it has such conflicting interest, either eliminate such conflicting interest or resign. Subsection (1) of this section provides, with certain exceptions stated therein, that a trustee under a qualified indenture shall be deemed to have a conflicting interest if such trustee is trustee under another indenture of the same obligor.

The Company alleges:

(1) Pursuant to the April Indenture, the Company has issued $10,406,000 aggregate principal amount of its Equipment Trust Certificates, Series C (the "April Certificates"). The Certificates were registered under the Securities Act of 1933 (the "1933 Act") and the April Indenture was qualified under the Act.

(2) Pursuant to the December 1986 Indenture, the Company has issued $35,112,000 aggregate principal amount of its Equipment Trust Certificates, Series A (the "December 1986 Certificates"). The Certificates were registered under the 1933 Act and the December Indenture was qualified under the Act.

(3) Connecticut Bank has advised the Company that, subject to the appointment of a successor trustee, it is resigning as trustee under the December 1986 Indenture. The Bank has advised it will accept the appointment, subject to a favorable determination by the Commission as requested in an application on file with the Commission, File No. 22-17125.

(4) Pursuant to the December 1987 Indentures, the Company will issue $106,800,000 aggregate principal amount of its Equipment Trust Certificates, (the "December 1987 Certificates"), Series D-J ("Series"), respectively. A Series will be issued under each December 1987 Indenture in the principal amount of $16,000,000 and $13,400,000, for Series D, E, F, G, J, and Series H and I, respectively. The Certificates were registered under the Securities Act of 1933 (the "1933 Act") and the Indentures were qualified under the Act.

(5) The Bank has advised it will accept the appointment, subject to a favorable determination by the Commission as requested in this Application.

(6) There is no default under the April Indenture, the December 1986 Indenture or the December 1987 Indentures.

(7) The Company's obligations with respect to the April Certificates, the December 1986 Certificates, and the December 1987 Certificates are and will be secured under separate indentures by separate security interests in separate and distinct property.

(8) Such differences as exist among the Indentures referred to herein and the respective obligations of the Company as obligor under the April Indenture, the December 1986 Indenture, and the December 1987 Indentures are not so likely to involve a material conflict of interest as to make it necessary in the public interest or for the protection of investors to disqualify the Bank from acting as Trustee under these Indentures.

The Company has waived notice of hearing, hearing and any and all rights to specify procedures under the Rules of Practice of the Commission in connection with this matter.

For a more detailed statement of the matters of fact and law asserted, all persons are referred to the application which is on file in the Offices of the Commission's Public Reference Section, File Number 22-17891, 450 Fifth Street, NW., Washington, DC 20549.

Notice is further given that any interested persons may, not later than January 8, 1988, request in writing that a hearing be held on such matter stating the nature of his interest, the reasons for such request and the issues of law or fact raised by such application which he desires to controvert, or he may request that he be notified if the Commission orders a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. At any time after said date, the Commission may issue an order granting the application, upon such terms and conditions as the Commission may deem necessary or appropriate in the public interest or for the protection of investors, unless a hearing is ordered by the Commission. For the Commission, by the Division of Corporation Finance, pursuant to delegated authority.

Jonathan G. Katz,

Secretary.

BILLING CODE 8010-01-M

[Release No. IC-16174; 812-6621]

Application; Merrill Lynch KECALP L.P. 1984 et al.

December 15, 1987.

AGENCY: Securities and Exchange Commission ("SEC").

ACTION: Notice of Application for Exemption under the Investment Company Act of 1940 ("the 1940 Act").

Applicants: Merrill Lynch KECALP L.P. 1984 (the "1984 Partnership"), Merrill Lynch KECALP L.P. 1986 (the "1986 Partnership") (together, the "Partnerships") and Merrill Lynch Interfunding Inc. ("MLIF").

Relevant 1940 Act Sections: Exemption requested under section 17(b) from the provisions of section 17(a).

Summary of Application: Applicants seek an order relating to the acquisition by the Partnerships to certain securities from an "affiliated person," as defined in the 1940 Act.

Filing Date: The application was filed on February 10, 1987, and amended on December 15, 1987.

Hearing or Notification of Hearing: If no hearing is ordered, the application will be granted. Any interested person may request a hearing on their application or ask to be notified if a hearing is ordered. Any requests must be received by the SEC by 5:30 p.m., on January 8, 1988. Request a hearing in writing, giving the nature of your interest, the reason for the request, and the issues you contest. Serve the Applicants with the request, either personally or by mail, and also send it to the Secretary of the SEC, along with proof of service by affidavit, or, for lawyers, by certificate. Request notification of the date of a hearing by writing to the Secretary of the SEC.

ADDRESSES: Secretary, SEC, 450 5th Street, NW., Washington 20549. The 1984 Partnership, the 1986 Partnership and MLIF, One Liberty Plaza, 165 Broadway, New York, New York 10080.

FOR FURTHER INFORMATION CONTACT: Staff Attorney Fran Pollack-Matz (202) 272-3024 or Special Counsel Karen L. Skidmore (202) 272-3023, Office of Investment Company Regulation.

SUPPLEMENTARY INFORMATION: Following is a summary of the application. The complete application is avilable for a free from either the SEC's Public Reference Branch in person or the SEC's commercial copier (800) 231-3282 (in Maryland (301) 258-4300).

Applicants' Representatives

1. The Partnerships, limited partnerships organized under the laws of Delaware, are non-diversified, closed-end investment companies of the management type under the 1940 Act. The investment objective of each Partnership is to seek long-term capital appreciation. Each of the Partnerships is an "employees' securities company," within the meaning of section 2(a)(13) of the 1940 Act, and operates in accordance with the terms of an exemptive order issued pursuant to section 6(b) of the 1940 Act in Investment Company Act Release No. 12363 (April 8, 1982) (the "KECALP Exemptive Order"). The general partner for each of the Partnership is KECALP Inc. ("KECALP"), a Delaware corporation and a wholly-owned subsidiary of Merrill Lynch & Co., Inc. ("ML&Co."). KECALP is responsible for managing and making investment decisions for the Partnerships. Previously, all investment made by the Partnerships had to be reviewed by an investment committee comprised of eleven of the fourteen members of KECALP's Board of Directors. That committee no longer exists, and investments are now approved by KECALP's Board of Directors. MLIF, a Delaware corporation, is an indirect subsidiary of ML&Co. that is engaged in commercial financing transactions.

Investment in Amstar

2. Amstar Corporation ("Amstar") is a diversified manufacturing corporation engaged in the refining of cane and beet sugar, as well as the production of premium quality electric tools, assorted industrial products and sophisticated electronics equipment. During 1986, Merrill Lynch Capital Markets ("MLCM"), an unicorporated group within Merrill Lynch, Pierce, Fenner & Smith Incorporated ("MLPF&S"), a principal subsidiary of ML&Co. that conducts its investment banking and underwriting activities, structured a leveraged buyout of Amstar Holdings, Inc. ("AHI"), together with AHI's management. As a result of the transactions involved with the leveraged buyout, AHI's securities were acquired by Sucrose Acquisition, Inc. ("Acquisition"), a wholly-owned subsidiary of Sucrose Holdings, Inc. ("Holdings"), a predecessor of Amstar, with AHI as the surviving entity.

3. Acquisition and Holdings were newly formed Delaware corporations which were organized solely for the purpose of effecting the leverage buyout. Amstar's equity securities are owned by members of Amstar's management, MLIF and various partnerships created by Merrill Lynch Capital Partners, Inc. ("MLCP"), a wholly-owned subsidiary of ML&Co. On a fully-diluted basis, MLIF's ownership of Amstar's common stock aggregated 5.01%. MLIF's purchase price per share of Amstar's Common stock was $10.00 ("Original Purchase Price"); the purchase occurred on November 21, 1986 ("Original Purchase Date"). No dividends have been declared on such common stock.

4. MLIF has agreed to sell to the 1986 Partnership 32,586 shares of the Amstar common stock it owns. This amount of shares represents 0.50% of Amstar's outstanding shares of common stock on a fully-diluted basis. The KECALP Board approved the investment on November 3, 1986. The purchase price to be paid by the 1986 Partnership to MLIF for the shares of common stock of Amstar proposed to be acquired by the 1986 Partnership will be the lower of (i) the value of the investment on the date it is acquired by the 1986 Partnership (as determined by the Board of Directors of KECALP) or (ii) the cost to MLIF of purchasing and holding the investment. The 1986 Partnership will not pay any carrying costs in respect of the period prior to the later of (1) the date of acquisition of the Amstar common stock by MLIF or (2) the date KECALP approved the 1986 Partnership's purchase of the proposed investment. With respect to clause (ii), such cost shall be the Original Purchase Price per share paid for the shares of Amstar common stock on the Original Acquisition Date plus carrying costs relating to such investment. For purposes of this transaction, carrying costs consist of interest charges computed at the lower of (i) the prime commercial lending rate charged by Citibank, N.A. during the period from the date KECALP approved the 1986 Partnership's purchase of the investment until the 1986 Partnership acquires the investment or (ii) the effective cost of borrowing by ML&Co. during such period. The effective cost of borrowings by ML&Co. is its actual "Average Cost of Funds," which it calculates on a monthly basis by dividing its consolidated financing expenses by the total amount of borrowings during this period.

Investment in CMI

5. Clinton Mills, Inc. ("Clinton Mills") is a leading manufacturer of unfinished woven fabrics, and markets a broad range of such fabrics for the apparel, home furnishings and industrial markets. During 1986, MLCM structured a leveraged buyout of Clinton Mills together with Clinton Mills' management. As a result of the transactions involved with the leveraged buyout, CMI Acquisition, Inc. ("Acquisition"), a newly-formed corporation and a wholly-owned subsidiary of CMI Holdings, Inc. ("CMI"), which also is a newly formed corporation to facilitate the leveraged buyout, acquired Clinton Mills' outstanding common stock through a merger transaction. CMI's common stock is owned by MLIF, certain members of Clinton Mills' management, Marine Midland National Corp., and various partnerships created by MLCP for the purpose of acquiring CMI. Following full implementation of the buyout, Clinton Mills has been merged into Acquisition. No dividends have been declared on the CMI common stock.

6. MLIF has agreed to sell to the 1986 Partnership up to 10,000 shares of the CMI common stock it owns. This amount of shares represents 0.50% of CMI's outstanding shares of common stock on a fully-diluted basis. The price paid for such shares was $10.00 per share ("Original Purchase Price") on December 30, 1986 ("Original Acquisition Date"). The KECALP Board approved the investment on December

15, 1986. The purchase price to be paid by the 1986 Partnership to MLIF for the shares of common stock of CMI proposed to be acquired by the 1986 Partnership will be the lower of: (i) The value of the investment on the date it is acquired by the 1986 Partnership (as determined by the Board of Directors of KECALP), or (ii) the cost to MLIF of purchasing and holding the investment. With respect to clause (ii), such cost shall be the Original Purchase Price per share paid for the shares of CMI common stock on the Original Acquisition Date, plus carrying costs relating to such investment. The 1986 Partnership will not pay any carrying costs in respect of the period prior to the later of: (1) The date of acquisition of the CMI common stock by MLIF, or (2) the date KECALP approved the 1986 Partnership's purchase of the proposed investment. For purposes of this transaction, carrying costs consist of interest charges computed at the lower of: (i) The prime commercial lending rate charged by Citibank, N.A. during the period from the date KECALP approved the 1986 Partnership's purchase of the investment until the 1986 Partnership acquires the investment, or (ii) the effective cost of borrowings by ML&Co. during such period. The effective cost of borrowings by ML&Co. is its actual "Average Cost of Funds," which it calculates on a monthly basis by dividing its consolidated financing expenses by the total amount of borrowings during this period.

Applicants' Legal Conclusions

1. As a result of affiliations, sales of securities on a principal basis by MLIF to the Partnerships are prohibited by section 17(a) and cannot be effected unless exemptive relief is obtained under section 17(b). The statutory standards with respect to the relief requested under section 17(b) are satisfied; relief is justified by both the terms of the transactions and the fact that the proposed investments are not otherwise available to the Partnerships. With respect to the terms of the transactions, the KECALP Board of Directors has reviewed the proposed investments in detail. The members of the KECALP Board of Directors are sophisticated and experienced in valuing securities and evaluating financial transactions generally. In this regard, KECALP considered all information deemed relevant, including the nature of the investments, the nature of the investments by affiliates of ML&Co. and the fairness of the purchase prices proposed to be paid by the Partnerships. The KECASL Board of Directors determined that the proposed investments by the Partnerships will not directly or indirectly benefit entities affiliated with ML&Co. or its subsidiaries which also acquired investments in Amstar and Clinton. Moreover, the KECALP Board approved the Partnerships' investments in Amstar and CMI after consideration of each of the factors set forth in section 17(b) of the 1940 Act.

2. In evaluating the terms of the transactions, the KECALP Board considered the fact that the proposed purchase prices to be paid by the Partnerships will include carrying costs incurred by an affiliated person (*i.e.*, MLIF) if the value of each investment at the times of acquisition by the Partnerships is more than the sum of the purchase price plus the affiliate's carrying costs. In approving purchase prices which may include carrying costs, KECALP's Board of Directors recognized that KECALP receives no compensation for serving as general partner of the Partnerships and that ML&Co. has incurred considerable expenses in organizing the Partnerships. The Partnerships believe that it is entirely appropriate for them to reimburse affiliates for carrying costs in a situation where affiliates purchased such investments as, in effect, its nominee and the Partnerships would have purchased such investments directly if it had not been deemed necessary to obtain the relief requested herein. In light of these factors, the KECALP Board believes it is wholly appropriate for the purchase price paid for portfolio investments to reflect carrying costs provided that the value of the investments at the time of acquisition exceeds the amount of the purchase price plus carrying costs. To deny reimbursement for carrying costs would result in a further and unwarranted loss to MLIF and provide a disincentive to act on behalf of the Partnerships in the future in transactions of this type.

3. The investments are not otherwise available for purchase by the Partnerships. The KECALP Board has approved such investments after review of a considerable number of possible investments for the Partnerships. The Partnerships' investment program will be prejudiced if they are not permitted to take the investments referred to in this application.

4. The Board of Directors of KECALP believes that the proposed investments are consistent with the rationale underlying the establishment of each of the Partnerships as an "employees' securities company." In the application for exemptive relief ultimately granted in the KECALP Exemptive Order, as well as in their prospectuses, it was indicated that ML&Co. and its affiliates would be involved in structuring, identifying and investing in many of the Partnerships' portfolio investments. The Partnerships thus submit that the relief requested herein is consistent with their purposes and its stated policies.

5. The Partnerships believe that the KECALP Exemptive Order provides relief to the Partnerships with respect to section 17(d) of the 1940 Act and Rule 17d–1 thereunder in connection with the transactions described therein.

Applicants Conditions

If the requested order is granted, Applicants agree to the following conditions:

1. The investments in Amstar and CMI will be acquired by the Partnerships in the manner and on the terms described above.

2. In connection with the deliberations and determinations by the Board of Directors of KECALP regarding the Partnerships' proposed Amstar and CMI transactions, appropriate record-keeping will be maintained and made available for inspection by the Commission in accordance with the KECALP Exemptive Order and the 1940 Act.

For the Commission, by the Division of Investment Management, under delegated authority.

Jonathan G. Katz,

Secretary.

BILLING CODE 8010–01–M

[Rel. No. IC–16175; 812–6708]

Application; ML Venture Partners I, L.P., et al.

December 15, 1987.

AGENCY: Securities and Exchange Commission ("SEC").

ACTION: Notice of Application for Exemption under the Investment Company Act of 1940 (the "1940 Act").

Applicants: ML Venture Partners I, L.P. ("MLVP I"), ML Venture Partners II, L.P. ("MLVP II," and together with MLVP I, the "Partnerships"), Merrill Lynch KECALP L.P. 1984 ("KECALP 1984") and Merrill Lynch KECALP L.P. 1986 ("KECALP 1986") (collectively, "Applicants").

Relevant 1940 Act Sections: Exemption requested under section 17(d) and Rule 17d–1 thereunder, and section 57(a)(4), approving certain transactions.

Summary of Application: Applicants seek an order relating to the joint acquisition of certain securities by the Applicants, which are "affiliated persons," as defined in the 1940 Act.

Filing Date: The application was filed on May 5, 1987 and amendments thereto were filed on December 2 and 15, 1987.

Hearing or Notification of Hearing: If no hearing is ordered, the application will be granted. Any interested person may request a hearing on this application, or ask to be notified if a hearing is ordered. Any requests must be received by the SEC by 5:30 p.m. on January 8, 1988. Request a hearing in writing, giving the nature of your interest, the reason for the request, and the issues you contest. Serve the Applicants with the request, either personally or by mail, and also send it to the Secretary of the SEC, along with proof of service by affidavit, or, for lawyers, by certificate. Request information of the date of a hearing by writing to the Secretary of the SEC.

ADDRESSES: Secretary, SEC, 450 5th Street, Washington, DC 20549. SUPPLEMENTARY INFORMATION: Following is a summary of the application; the complete application is available for a fee from either the SEC's Public Reference Branch in person or the SEC's commercial copier (800) 231–3282 (in Maryland (301) 252–4300).

Applicants' Representations

1. MLVP I, a limited partnership organized under the laws of Delaware in 1982, is a business development company under the 1940 Act. The investment objective of MLVP I is to seek long-term capital appreciation by making venture capital investments. MLVP I has five general partners, four of whom are individuals (the "MLVP I Individual General Partners"). In accordance with section 56(a) of the Act, a majority of the Individual General Partners are persons who are not "interested persons" of MLVP I within the meaning of section 2(a)(19) of the 1940 Act ("MLVP I Independent General Partners"). The managing general partner for MLVP I is Merrill Lynch Venture Capital Co., L.P. (the "MLVP I Managing General Partner"). The MLVP I Managing General Partner is responsible for identification and management of MLVP I's venture capital investments. The Management Company is the general partner of both the MLVP I Managing General Partner and the MLVP II Managing General Partner (as hereinafter defined) and is also the management company for both Partnerships. The Management Company is a registered investment adviser and is an indirect subsidiary of Merrill Lynch & Co., Inc. ("ML & Co."), a holding company which, through its subsidiaries, provides investment, financing, real estate, insurance and related services.

2. MLVP II is a business development company organized as a Delaware limited partnership in 1986. The investment objective of MLVP II is to seek long-term capital appreciation by making venture capital investments. The managing general partner of MLVP II, MLVPII Co., L.P. (the "MLVP II Managing General Partner"), will be responsible for MLVP II's venture capital investments, and is a registered investment adviser. The MLVP II Managing General Partner is a limited partnership controlled by its general partner, the Management Company, which will perform the management and administrative services necessary for the operation of MLVP II pursuant to a management agreement. The General Partners of MLVP II consist of the MLVP II Individual General Partners and the MLVP II Managing General Partner. The MLVP II Individual General Partners will include the MLVP II Independent General Partners and one General Partner who is an individual and who is an affiliated person of the MLVP II Managing General Partner and/or any individual who becomes a successor or additional Individual General Partner as provided in the MLVP II Partnership Agreement. Only individuals may serve as MLVP II Individual General Partners.

3. KECALP 1984 and KECALP 1986 (together, the "KECALP Partnerships"), limited partnerships organized under the laws of Delaware, are employees' securities companies as defined in section 2(a)(13) of the 1940 Act and registered as non-diversified, closed-end management investment companies. The investment objective of the KECALP Partnerships is to seek long-term capital appreciation. Under the terms of the KECALP Partnerships' offerings, as set forth in their Registration Statements, Units were offered exclusively to employees of ML & Co. and its subsidiaries, only if they received annualized compensation in respect of 1983 and 1985, respectively, equal to at least $75,000, and to non-employee directors of ML & Co. Each of the KECALP Partnerships operates in accordance with the terms of an exemptive order issued pursuant to section 6(b) of the 1940 Act in Investment Company Act Rel. No. 12363 (April 8, 1982) (the "KECALP Exemptive Order"). The general partner for KECALP is KECALP Inc. (the "KECALP General Partner"), a Delaware corporation and a wholly-owned subsidiary of ML & Co. The KECALP General Partner is responsible for managing and making investment decisions for KECALP.

4. DRS, a Delaware corporation organized in 1983, is engaged in the business of developing, manufacturing and marketing electronic laser printers. To the Applicants' knowledge, no stockholder of DRS is an affiliate or employee of ML & Co. or its affiliates, other than MLVP I and KECALP 1984. During March 1983, MLVP I acquired 250,000 shares of Series A Preferred Stock of DRS ("Series A"). In August 1984 and February 1985, MLVP I and KECALP 1984 acquired 178,500 shares and 12,120 shares, respectively, of Series B Preferred Stock of DRS ("Series B"). *See In The Matter of ML Venture Partners I, L.P.*, Investment Company Act Rel. Nos. 14350 (February 1, 1985) (order) and 14318 (January 11, 1985) (notice). In June 1986, MLVP I acquired a note from DRS in the amount of $458,630. The note was convertible into shares of Series C Preferred Stock of DRS ("Series C"). MLVP I also has entered into certain other lending arrangements with DRS involving $312,401, which amount was to be converted into shares of Series C.

5. At the time of the issuance of Series A and Series B Preferred Stock, it was contemplated that, over time, DRS would require additional financing and that the terms of such financing would be negotiated with the new participating institutional investors. Pursuant to the definitive stock purchase agreement dated as of May 28, 1987 (the "DRS Agreement"), DRS agreed, among other things, to reclassify issued and outstanding shares of Series A and Series B as Series C upon the first issuance of Series C. Pursuant to the terms of the DRS Agreement and in accordance with Delaware law, the closing occurred on May 28, 1987 after $4 million was committed to purchase shares of Series C (exclusive of MLVP II's investments, described below). The actual amount of the offering was $6.1 million. At the time of the closing, all of MLVP I's and KECALP 1984's holdings of Series A and Series B were converted automatically into shares of Series C.

VOL 52 ISS 246 DEC 23 1987 UMI

6. Neither ML & Co. nor any of its affiliates was involved in any manner in planning, initiating or structuring the DRS transaction and none of the investors in DRS other than the Applicants are affiliates of ML & Co. The Series C, when compared with the Series A and Series B, has identical rights and priority status with respect to DRS' common stock, with the exception of a reduction of the conversion ratio to convert the preferred stock into DRS common stock. The reductions in conversion ratio and in purchase price from $11.25 to 9.90 per share were agreed to by DRS and the holders of its outstanding securities; MLVP I and KELCALP 1984 were not in a position of control where either could have caused a different purchase price or conversion ratio. Both MLVP I and KELCALP 1984 represent: (a) That their consent to the terms of the issuance of Series C was not influenced by the fact that the Applicants who propose to acquire Series C are affiliated entities; and (b) that the terms of Series C were determined through arm's-length negotiations. Moreover, MCVP I and KELCALP 1984 believe that the financing was beneficial to DRS by providing additional funds required for the development of its business plan.

7. The investment opportunity in Series C was brought to the attention of the MLVP I Managing General Partner, the MLVP II Managing General Partner (together, the "Managing General Partners") and the KECALP General partner during January 1987. The MLVP II Managing General Partner and the KECALP Managing General Partner have evaluated the proposed investments in Series C ("DRS Stock") and independently determined to approve investments of up to $1.5 million (but not to exceed 25% of the total amount of DRS Stock made available), $50,000 and $200,000 for MLVP II, KECALP 1984 and KECALP 1986, respectively. The investment decisions by the MLVP II Managing General Partner and the KECALP General Partner were made solely on the basis of the respective investment objectives and policies of MLVP II, KECALP 1984 and KECALP 1986.

8. Pursuant to the DRS Agreement, KECALP 1984 and KECALP 1986 have conditionally agreed to purchase the shares of DRS Stock, while MLVP II has orally agreed to purchase the amounts of DRS Stock. MLVP I's note and other interests pursuant to its other lending arrangements with DRS were converted into the DRS Stock automatically upon its issuance. The purchase prices of the shares of DRS Stock proposed to be acquired by MLVP II, KECALP 1984 and KELCALP 1986 represent less than 1.4%, 1.3% and 2.8%, respectively, of such entities' original net proceeds. Similarly, the acquisition price of the shares of DRS Stock obtained by MLVP I represents less than 3.1% of MLVP I's original net proceeds. No dividends have been declared on the DRS Stock. The shares of DRS Stock proposed to be acquired by MLVP II, KECALP 1984 and KECALP 1986 will represent 11.0%, 0.4% and 1.5%, respectively, of such stock outstanding on a fully diluted basis. The shares of DRS Stock acquired by MLVP I represent 12.5% of such stock outstanding on a fully-diluted basis.

Legal Conclusions

1. Because of questions as to the applicability of sections 17(d) and 57(a)(4) of the Act, the Applicants determined to seek the relief requested. The DRS Agreement provides therefore that the KECALP Partnerships are not required to make payment to DRS for the shares of DRS Stock the KECALP Partnerships intend to acquire unless the Applicants receive the relief requested. The DRS Agreement further provides that if such orders have not been issued by the SEC before November 24, 1987, KECALP's obligations under the Agreement shall terminate. Although the KECALP Partnerships' obligations have now terminated, DRS has indicated that it is willing to honor the terms of the DRS Agreement with respect to the shares proposed to be acquired by the KECALP Partnerships. The terms of the KECALP Partnerships' purchases are the same as those of MLVP I and MLVP II in all other respects except the number of shares of the DRS Stock to be acquired.

2. Pursuant to the terms of the KECALP Exemptive Order, the KECALP Partnerships are permitted to engage in transactions in which certain affiliated persons of the KECALP Partnerships may also be participants. Specifically, the KECALP Partnerships may invest in (i) investment vehicles which are sponsored or managed by ML & Co. or its affiliates or (ii) investments in which a partnership described in clause (i) is a participant or plans to become a participant and which would not be prohibited investment except that ML & Co. or any of its subsidiaries, or one or more officers, directors or enployees of the KECALP General Partner, have a partnership interest in, or compensation arrangement with the partnership described in clause (i). To resolve any uncertainties concerning the transactions involving DRS Stock, however, and because the investments by the Partnerships in DRS Stock are otherwise prohibited by Section 57(a)(4) of the Act, the Applicants have determined to seek the relief requested.

3. The Managing General Partners of the Partnerships and the KECALP General Partner reviewed the proposed investments in DRS Stock. The Managing General Partners and the KECALP General Partner determined that such investments were consistent with the Applicants' investment objectives of seeking long-term capital appreciation. The Managing General Partners and the KECALP General Partner also determined that the investments in DRS Stock would not disadvantage any one of the Applicants in making such investments, maintaining its investment positions or disposing of such positions. The MLVP I Independent General partners and the MLVP II Independent General Partners (together, the "Independent General Partners") also made such a determination. In reaching such determinations, the Managing General Partners, the Independent General Partners and the KECALP General partner considered several factors, including the difference in the amount proposed to be acquired by each of the Applicants. It was recognized that the terms of the purchases by the Applicants would be the same in terms of the price paid per share of stock. With respect to the different number of shares of DRS Stock to be acquired, however, it was recognized that MLVP II and each KECALP Partnership is at a different point in its investment program and has different amounts of assets available for investment. It was also recognized that MLVP I's acquisition of DRS Stock was related to the amounts of the DRS notes that it had acquired previously. The Applicants believe that such circumstances do not make any one Applicant's proposed acquisition of DRS Stock any more or less advantageous than another Applicant's; to the extent that the investments prove to be successful, each of the Applicants will profit equally in proportion to its respective investment. Accordingly, the terms of the proposed investments are not unfair or less advantageous to any of the Applicants, but rather are the result of business considerations. Thus, it is submitted that the transactions would be consistent with the provisions, policies and purposes of the Act.

4. In both the KECALP Exemptive Order and the KECALP Partnerships' prospectuses, it was indicated that affiliates of ML & Co. would be involved in identifying and investing in many of the KECALP Partnerships' portfolio investments. The prospectuses of the Partnerships indicated that the Partnerships may be coinvestors in portfolio companies with affiliates of management. The Applicants thus submit that the relief requested herein is consistent with the purposes of the KECALP Partnerships and the Partnerships, their stated policies and the disclosure made to prospective investors. The Applicants also believe that proposed investments are in the best interest of each of the Applicants to the extent that the investments are not otherwise available to them.

5. On the basis of their evaluations of the investments in DRS, the Managing General Partners and the KECALP General Partner have determined that the acquisition of shares of DRS Stock would be consistent with the provisions, policies and purposes of the Act. Accordingly, on the basis of such determinations and the information set forth above, the Applicants request that relief be granted pursuant to Rule 17d–1 permitting the acquisition of such securities on the terms described in the application.

For the Commission, by the Division of Investment Management, under delegated authority.

Jonathan G. Katz,

Secretary.

3. MLVPII Co., L.P. (the "MLVP II Managing General Partner") is the managing general partner of MLVP II and will be responsible for its venture capital investments. The MLVP II Managing General Partner is a limited partnership controlled by its general partner, the Management Company, which will perform the management and administrative services necessary for the operation of MLVP II pursuant to a management agreement.

4. An order exempting MLVP II and the Management Company (the "MLVP II Order") from certain provisions of the 1940 Act was issued in Investment Co. Act Rel. No. 15,652 (March 30, 1987). That order exempted MLVP II and the Management Company from the provisions of section 57(a) of the Act, thus permitting the Management Company to acquire certain venture capital investments, such as the investments in Everex and CADG proposed herein, on behalf of MLVP II during the MLVP II public offering period as if the MLVP II Managing General Partner were negotiating for MLVP II to make the acquisition directly. The terms of the MLVP II Order required that such initial investments would be acquired substantially on the terms set forth in the application described herein.

5. KECALP, a limited partnership organized under the laws of Delaware, is a non-diversified, closed-end

investment company of the management type under the 1940 Act. The investment objective of KECALP is to seek long-term capital appreciation. KECALP is an "employees' securities company," within the meaning of section 2(a)(13) of the 1940 Act, and operates in accordance with the terms of an exemptive order issued pursuant to section 6(b) of the 1940 Act in Investment Company Act Release No. 12363 (April 8, 1982) (the "KECALP Exemptive Order"). The general partner for KECALP is KECALP Inc. (the "KECALP General Partner"), a Delaware corporation and a wholly-owned subsidiary of ML&Co. The KECALP General Partner is responsible for managing and making investment decisions for KECALP.

Investment in Everex

6. Everex Systems, Inc. ("Everex"), located in Fremont, California, was founded in 1983. Everex develops and markets board-level enchancement products for IBM and IBM compatible personal computers. The investment opportunity in Series B Convertible Preferred Stock of Everex was brought to the attention of the MLVP I Managing General Partner and the MLVP II Managing General Partner (together, the "Managing General Partners") during September 1986. The Managing General Partners evaluated the proposed investments and determined to approve investments of $750,000 for each of the Partnerships. The shares of Series B Convertible Preferred Stock proposed to be purchased by each Partnership represent 1% of the common stock of Everex on a fully-diluted basis. The Partnerships' investments in Everex stock could not be made concurrently, however, without the relief requested in the application. Accordingly, the Management Company agreed to purchase the aggregate of 375,000 shares on behalf of the Partnerships and to sell such shares to them at the price determined as described below following receipt of the relief requested in the application.

7. The purchase price to be paid by each of the Partnerships to the Management Company for the shares of Series B Convertible Preferred Stock of Everex proposed to be acquired by the Partnerships will be the lower of (i) the value of the investment on the dates each of the Partnerships acquires the stock (as determined by the Partnerships' Independent General Partners) or (ii) the cost to the Management Company of purchasing and holding the investment. With respect to clause (ii), such cost shall be the original purchase price of $4.00 per share paid by the Management Company for the shares of Series B Convertible Preferred Stock on December 10, 1986, plus carrying costs related to such investments, as separately determined for each of the Partnerships. MLVP II will pay no carrying costs in respect of the period prior to January 12, 1987, the date MLVP II's Independent General Partners approved the investment, subject only to (i) the completion of MLVP II's public offering and (ii) determination of the price to be paid by MLVP II as described above. MLVP I will pay no carrying costs in respect of the period prior to December 10, 1986, the acquisition date of the purchase by the Management Company, which was subsequent to the authorization of the investment by the Independent General Partners of MLVP I. For purposes of these transactions, carrying costs consist of interest charges computed at the lower of (i) the prime commercial lending rate charged by Citibank, N.A. during the period for which carrying costs are being paid or (ii) the effective cost of borrowings by ML&Co. during such period. The effective cost of borrowings by ML&Co. is its actual "Average Cost of Funds," which it calculates on a monthly basis by dividing its consolidated financing expenses by the total amount of borrowings during the period.

Investment in CADG

8. Computer-Aided Design Group ("CADG"), a California corporation organized in 1978, provides facility management systems to major corporations, governments, and institutions. The investment opportunity in Series C Preferred Stock of CADG was brought to the attention of the MLVP II Managing General Partner and the KECALP General Partner during June 1986. The MLVP II Managing General Partner and the KECALP General Partner have evaluated the proposed investments in the CADG stock and independently determined to approve investments of $700,000 and $150,000 for MLVP II and KECALP, respectively. The shares of Series C Preferred Stock proposed to be purchased by MLVP II and KECALP represent 10% and 2%, respectively, of such stock outstanding on a fully-diluted basis. Because the foregoing investments may not be made concurrently by MLVP II and KECALP without the relief requested in the application, the Management Company has agreed that it will make the proposed investments in CADG stock on behalf of MLVP II and KECALP and sell such CADG stock to them following the granting of the relief requested in the application.

9. The purchase price to be paid by MLVP II and KECALP to the Management Company for the shares of Series C Preferred Stock of CADG proposed to be acquired by MLVP II and KECALP will be the lower of: (i) The value of the investment on the dates each of MLVP II and KECALP acquires the stock (as determined by the MLVP II Independent General Partners and the KECALP General Partner, respectively), or (ii) the cost to the Management Company of purchasing and holding the investment. With respect to clause (ii), such cost shall be the original purchase price of $1.13 per share paid by the Management Company for the shares of CADG Series C Preferred Stock on February 6, 1987, plus carrying costs related to such investments as separately determined for each of MLVP II and KECALP. KECALP will pay no carrying costs in respect of the period prior to the later of (i) the date the Management Company acquired the proposed investments or (ii) the date the KECALP General Partner approved KECALP's purchase of the proposed investment. MLVP II will pay no carrying costs in respect of the period prior to March 30, 1987, the date the MLVP II order was issued, which was subsequent to the date (February 13, 1987) MLVP II's Independent General Partners were notified of the investment and given the opportunity to object to such acquisition by the Management Company on behalf of MLVP II. Also, on March 30, 1987, the MLVP II Independent General Partners approved of the acquisition of such investment, subject only to: (i) The completion of MLVP II's public offering, and (ii) determination of the price to be paid by MLVP II for CADG stock as described above. For purposes of these transactions, carrying costs consist of interest charges computed at the lower of: (i) The prime commercial lending rate charged by Citibank, N.A. during the period for which carrying costs are being paid, or (ii) the effective cost of borrowings by ML&Co. during such period. The effective cost of borrowings by ML&Co. is its actual "Average Cost of Funds," which it calculates on a monthly basis by dividing its consolidated financing expenses by the total amount of borrowings during the period.

Applicants' Legal Conclusions

1. Relief under sections 17(b) and 57(c) of the 1940 Act is justified by both the terms of the transactions and the fact that the proposed investments are not otherwise available to the Partnerships and KECALP. With respect to the terms of the transactions, the KECALP General Partner (on behalf of KECALP) and the Managing General Partners (on behalf of the Partnerships) have reviewed the proposed investments in detail. The members of the Board of Directors of the KECALP General Partner and the Managing General Partners are sophisticated and experienced in valuing securities and evaluating financial transactions generally. In this regard, the members of the Board of Directors of the KECALP General Partner and the Managing General Partners considered all information deemed relevant, including the nature of the investments, the nature of the investments by affiliates of ML&Co. in Everex and CADG, if any, and the fairness of the purchase prices proposed to be paid by the Partnerships and KECALP. The KECALP General Partner and the Managing General Partners determined that the proposed investments by the Partnerships and KECALP will not directly or indirectly benefit entities affiliated with ML&Co. Moreover, the investments in CADG and Everex were approved after consideration of each of the factors set forth in sections 17(b) and 57(c) of the 1940 Act.

2. In evaluating the terms of the transactions, both the KECALP General Partner and the Partnerships' Independent General Partners considered the fact that the proposed purchase prices to be paid by the Partnerships and KECALP will include carrying costs incurred by an affiliated person (i.e., the Management Company) if the value of the investments at the time of acquisition by the Partnerships and KECALP is more than the sum of the purchase price of each plus the affiliate's carrying costs. In approving a purchase price which may include carrying costs, the Board of the KECALP General Partner recognized that the KECALP General Partner receives no compensation for serving as general partner of KECALP and that ML&Co. has incurred considerable expenses in organizing KECALP. KECALP and the Partnerships believe that it is entirely appropriate for them to reimburse affiliates for carrying costs in a situation where an affiliate purchased an investment as, in effect, their nominee and KECALP and the Partnerships would have purchased such investments directly if it had not been deemed necessary to obtain the relief requested in the application. In light of these factors, the Managing General Partners and the KECALP General Partner believe it is wholly appropriate for the purchase price paid for portfolio investments to reflect carrying costs provided that the values of the investments at the times of acquisition exceed the amounts of the purchase prices plus carrying costs. To deny reimbursement for carrying costs would result in a further and unwarranted loss to the Management Company and provide a disincentive to act on behalf of the Partnerships and KECALP in the future.

3. The investments are not otherwise available for purchase by the Partnerships and KECALP. The Managing General Partners and the KECALP General Partner have approved such investments after review of a considerable number of possible investments for the Partnerships and KECALP. The Partnerships and KECALP thus submit that their respective investment programs will be prejudiced if they are not permitted to make the investments referred to in the application.

4. The KECALP General Partner believes that the proposed investment in CADG Series C Preferred Stock is consistent with the rationale underlying the establishment of KECALP as an "employees' securities company." In the application for exemptive relief ultimately granted in the KECALP Exemptive Order, as well as in KECALP's prospectus, it was indicated that ML&Co. and its affiliates would be involved in structuring, identifying and investing in many of KECALP's portfolio investments. Similarly, the proposed transactions in CADG stock and Everex Series B Convertible Preferred Stock are consistent with the Partnerships' investment objectives and the kinds of transactions in which it was contemplated the Partnerships would participate. The Partnerships and KECALP thus submit that the relief requested pursuant to sections 17(b) and 57(c) of the 1940 Act is consistent with the purposes of the Partnerships and KECALP and their respective stated policies.

5. With respect to the relief requested pursuant to Rule 17d–1 under the 1940 Act, the Managing General Partners of the Partnerships and the KECALP General Partner reviewed the proposed investments in Everex and CADG stock and determined that such investments were consistent with the Partnerships' and KECALP's investment objectives of seeking long-term capital appreciation. The Managing General Partners and the KECALP General Partner also determined that the investments in Everex and CADG Stock would not disadvantage either of the Partnerships or KECALP in making such investments, maintaining its investment positions or disposing of such positions. The Independent General Partners of MLVP I also made such determination with respect to the purchase of Everex Stock, and the Independent General Partners of MLVP II have made such determinations with respect to the Everex or CADG stock. In reaching such determinations, the Managing General Partners, the Independent General Partners and the KECALP General Partner considered several factors, including the difference in the amount proposed to be invested by each of the Partnerships and KECALP. It was recognized that the terms of the purchases by both Partnerships, with respect to the Everex stock, and by MLVP II and KECALP, with respect to the CADG Stock would be the same in terms of the price paid per share of stock. With respect to the different number of shares of CADG Stock, it was recognized that MLVP II and KECALP are each at different points in their investment programs and have different amounts of assets available for investment. MLVP II and KECALP believe that this factor does not make MLVP II's proposed investment in CADG stock any more or less advantageous than KECALP's investment; to the extent that the investments prove to be successful, MLVP II and KECALP will profit equally in proportion to their respective investments. Accordingly, the terms of the proposed investments are not unfair or less advantageous to MLVP II or to KECALP, but rather are the result of business considerations.

Similarly, the terms of the Partnerships' proposed investments in Everex stock, pursuant to which each Partnership will purchase the same amount of shares, are not unfair or less advantageous to either Partnership. Thus, it is submitted that the transactions would be consistent with the provisions, policies and purposes of the Act.

6. In both the KECALP Exemptive Order and KECALP's prospectus, it was indicated that affiliates of ML & Co. would be involved in identifying and investing in many of KECALP's portfolio investments. The prospectuses of the Partnerships indicated that the Partnerships may be co-investors in portfolio companies with affiliates of management. The Partnerships and KECALP thus submit that the relief requested herein is consistent with the purposes of KECALP and the Partnerships, their stated policies and the disclosure made to prospective investors. The Applicants also believe that proposed investments are in the

VOL 52 ISS 246 DEC 23 1987 UMI

best interest of KECALP and the Partnerships to the extent that the investments are not otherwise available to them.

Conditions

1. The investments in Everex and CADG will be acquired by the Partnerships in the manner and on the terms described above.

2. In connection with the deliberations and determinations by the Board of Directors of KECALP regarding the Partnerships' proposed Everex and CADG transactions, appropriate record-keeping will be maintained and made available for inspection by the Commission in accordance with the KECALP Exemptive Order and the 1940 Act.

For the Commission, by the Division of Investment Management, under delegated authority.

Jonathan G. Katz,

Secretary.

[FR Doc. 87-29340 Filed 12-22-87; 8:45 am]

BILLING CODE 8010-01-M

[Rel. No. IC-16176; (812-6821)]

Application; Prudential-Bache Global Fund, Inc. et al.

Date: December 17, 1987.

AGENCY: Securities and Exchange Commission ("SEC").

ACTION: Notice of application for amendment of an existing order under the Investment Company Act of 1940 ("1940 Act").

Applicants: Prudential-Bache Global Fund, Inc. ("Global Fund"), Prudential-Bache Government Plus Fund, Inc. ("Government Plus Fund"), Prudential-Bache Securities Inc. ("Prudential-Bache"), Prudential Mutual Fund Management, Inc. ("PMF") and Prudential Mutual Fund Distributors, Inc. ("PMFD").

Relevant 1940 Act Sections: Exemption requested pursuant to section 6(c) from sections 2(a)(32), 2(a)(35), 22(c) and 22(d) and Rule 22c-1 thereunder.

Summary of Application: Applicants seek an order, pursuant to section 6(c) of the 1940 Act, amending an existing exemptive order (Investment Company Act Rel. No. 14615, July 1, 1985, as amended on September 12, 1985, Investment Company Act Rel. No. 14718, "Existing Order"). The proposed amendment would exempt the Global Fund, the Government Plus Fund and any other Exempted Fund, as defined below (collectively, the "Exempted Funds"), from the provisions of sections 2(a)(32), 2(a)(35), 22(c) and 22(d) of the 1940 Act and Rule 22c-1 thereunder, to the extent necessary, to permit the Exempted Funds to waive a contingent deferred sales Load ("CDSL") under certain circumstances in addition to those allowed by the Existing Order.

Filing Dates: The application was filed on August 10, 1987, and amended on November 3 and December 15, 1987.

Hearing or Notification of a Hearing: If no hearing is ordered, the requested exemption will be granted. Any interested person may request a hearing on this application; or ask to be notified if a hearing is ordered. Any request must be received by the SEC by 5:30 p.m. on January 8, 1988. Request a hearing in writing, giving the nature of your interest, the reason for the request, and the issues you contest. Serve the Applicant with the request either personally or by mail, and also send it to the Secretary of the SEC, along with proof of service by affidavit, or, in the case of an attorney-at-law, by certificate. Request notification of the date of a hearing by writing to the Secretary of the SEC.

ADDRESSES: Secretary, SEC, 450 5th Street NW., Washington, DC 20549; Applicants, One Seaport Plaza, New York, New York 10292.

FOR FURTHER INFORMATION CONTACT: Thomas Mira, Staff Attorney (202) 272-3033, or Brion Thompson, Special Counsel (202) 272-3016 (Office of Investment Company Regulation).

SUPPLEMENTARY INFORMATION: Following is a summary of the application: the complete application is available for a fee from either the SEC's Public Reference Branch in person or the SEC's Commercial Copier (800) 231-3282 (in Maryland (301) 258-4300).

Applicants' Representations

1. The Existing Order exempts the Global Fund and the Government Plus Fund (collectively, the "Funds") and any other existing or future registered mutual fund for which Prudential-Bache serves as manager or administrator and distributor, and which is sold substantially on the same basis as the Funds, from the provisions of sections 2(a)(32), 2(a)(35), 22(c) and 22(d) of the 1940 Act and Rule 22c-1 thereunder, to the extent necessary, to permit the assessment (and waiver and reduction in certain cases) of a CDSL on certain redemptions of their shares. Currently, the Funds' investment adviser is The Prudential Insurance Company of America. The Funds' administrator was formerly Prudential-Bache, but is currently PMF, an affiliate of Prudential-Bache. The distributor of the Funds' shares is Prudential-Bache. It is contemplated that PMFD, also an affiliate of Prudential-Bache, may become the distributor of the Funds. The Applicants respectfully request that the Existing Order be amended, as described below, to apply to the Funds and any other existing or future registered mutual fund for which Prudential-Bache or PMF serves as manager or administrator, and Prudential-Bache or PMFD serves as distributor, and which is sold on substantially the same basis as the Funds (collectively, the "Exempted Funds").

2. Applicants propose that the CDSL be waived by the Exempted Funds, in addition to those waivers already permitted by the Existing Order, in the following situations: (1) In cases of death or disability (as defined in section 72(m)(7) of the Internal Revenue Code ("Code") when the decedent or disabled person is either an individual stockholder or owns the shares as a joint tenant with right of survivorship and the redemption is made within one year of the death or initial determination of disability, (2) any redemption made in connection with a profit sharing or stock bonus plan to which section 402(a)(8) of the Code applies, upon "hardship" (as defined below) of the employee, or (3) any redemption which might occur as a result of the execution of a qualified domestic relations order as defined by section 414(p) of the Code. The term "hardship" shall be defined as an immediate and heavy financial need occurring in the personal affairs of an employee. The Exempted Funds' administrator or manager will retain the right to review a plan's determination that a hardship exists and may request such documentation as it deems necessary to make such determination.

Applicants' Legal Conclusion

Applicants submit that the proposed waivers of the CDSL are consistent with all provisions of the 1940 Act and are fair and equitable and in the best interests of the stockholders and of the public, in that, in each situation in which the CDSL would be waived, the redeeming stockholder is a member of a class of stockholders which is favored under the tax laws.

Applicants' Conditions

Applicants consent to the following conditions with respect to requested order:

1. The Exempted Funds will comply with the provisions of Rule 12b-1 under the 1940 Act both currently and as that Rule may be modified in the future.

2. The Exempted Funds will comply with the provisions of Rule 22d-1 under the 1940 Act.

For the SEC, by the Division of Investment Management, pursuant to delegated authority.

Jonathan G. Katz,

Secretary.

BILLING CODE 8010-01-M

[(Rel. No. IC-16177 (812-6822)]

Application for Amendment of an Existing Order; Prudential-Bache Government Plus Fund II et al.

December 16, 1987.

AGENCY: Securities and Exchange Commission ("SEC").

ACTION: Notice of application for amended order under the Investment Company Act of 1940 ("1940 Act").

Applicants: Prudential-Bache Goverment Plus Fund II ("Fund"), Prudential-Bache Securities Inc. ("Prudential-Bache"), Prudential Mutual Fund Management, Inc. ("PMF") and Prudential Mutual Fund Distributors, Inc. ("PMFD").

Relevant 1940 Act Sections: Exemption requested pursuant to section 6(c) from sections 2(a)(32), 2(a)(35), 22(c) and 22(d) and Rule 22c-1.

Summary of Application: Applicants seek an order, pursuant to section 6(c) of the 1940 Act, amending an existing exemptive order (Investment Company Act Rel. No. 15419, November 14, 1986, "Existing Order"). The amended order would exempt the Fund and any other "Exempted Fund", as defined below (collectively, "Exempted Funds"), from sections 2(a)(32), 2(a)(35), 22(c) and 22(d) of the 1940 Act and Rule 22c-1 thereunder, to the extent necessary, to permit the Exempted Funds to waive a contingent deferred sales load ("CDSL") under certain circumstances in addition to those allowed by the Existing Order.

Filing Dates: The application was filed on August 10, 1987, and amended on December 15, 1987.

Hearing or Notification of a Hearing: If no hearing is ordered, the requested exemption will be granted. Any interested person may request a hearing on this application or ask to be notified if a hearing is ordered. Any request must be received by the SEC by 5:30 p.m. on January 8, 1988. Request a hearing in writing, giving the nature of your interest, the reason for the request, and the issues you contest. Serve the Applicants with the request either personally or by mail, and also send it to the Secretary of the SEC, along with proof of service by affidavit, or, in the case of an attorney-at-law, by certificate. Request notification of the date of the hearing by writing to the Secretary of the SEC.

ADDRESSES: Secretary, SEC, 450 5th Street NW., Washington, DC 20549; Applicants, c/o One Seaport Plaza, New York, New York 10292.

FOR FURTHER INFORMATION CONTACT: Thomas Mira, Staff Attorney (202) 272-3033, or Brion R. Thompson, Special Counsel (202) 272-3016 (Office of Investment Company Regulation).

SUPPLEMENTARY INFORMATION: Following is a summary of the application: the complete application is available for a fee from either the SEC's Public Reference Branch in person or the SEC's Commercial Copier (800) 231-3282 (in Maryland (301) 258-4300).

Applicants' Representations

1. The Existing Order exempts the Fund, and any other existing or future registered mutual fund for which Prudential-Bache serves as the primary distributor and the shares of which are issued and sold on a basis similar to shares of the Fund, from the provisions of sections 2(a)(32), 2(a)(35), 22(c) and 22(d) of the 1940 Act and Rule 22c-1 thereunder, to the extent necessary, to permit the assessment (and waiver and reduction in certain cases) of a CDSL on certain redemptions of its shares. Currently, the Fund's investment adviser is The Prudential Insurance Company of America. The Fund's administrator was formerly Prudential-Bache, but is currently PMF, an affiliate of Prudential-Bache. The distributor of the Fund's shares is Prudential-Bache. It is contemplated that PMFD, also an affiliate of Prudential-Bache, may become the distributor of the Fund. Therefore, the Applicants respectfully request that the Existing Order be amended as described below, to apply to the Fund and any other existing or future registered mutual fund for which Prudential-Bache or PMF serves as manager or administrator, and Prudential-Bache or PMFD serves as distributor, and the shares of which are issued and sold on a basis similar to shares of the Fund ("Exempted Funds").

2. Applicants propose that the CDSL be waived by the Exempted Funds, in addition to those waivers already permitted under the Existing Order, for any redemption: (1) Made in connection with a profit sharing or stock bonus plan to which section 402(a)(8) of the Internal Revenue Code ("Code") applies, upon "hardship" (as defined below) of the employee, or (2) which might occur as a result of the execution of a qualified domestic relations order as defined by section 414(p) of the Code. The term "hardship" shall be defined as an immediate and heavy financial need occurring in the personal affairs of an employee. The Exempted Funds' administrator will retain the right to review a plan's determination that a hardship exists and may request such documentation as it deems necessary to make such determination.

Applicants' Legal Conclusion

Applicants submit that the proposed waivers of the CDSL are consistent with all provisions of the 1940 Act and are fair and equitable and in the best interests of the shareholders and of the public, in that, in each situation in which the CDSL would be waived, the redeeming shareholder is a member of a class which is favored under the tax laws.

Applicants' Conditions

Applicants consent to the following conditions with respect to the requested exemptive relief:

1. The Exempted Funds will comply with Rule 12b-1 under the 1940 Act both currently and as that Rule may be modified in the future.

2. The Exempted Funds will comply with the provisions of Rule 22d-1 under the 1940 Act.

For the SEC, by the Division of Investment Management, pursuant to delegated authority.

Jonathan G. Katz,

Secretary.

UNITED STATES INSTITUTE OF PEACE

Procedures for Review of Grant Applications

This announcement succeeds the **Federal Register** announcements of July 16, 1986 (51 FR 25784) (*Interim Procedures for Grant Applications*), and December 10, 1986 (51 FR 44564) (*Notice in Grant Application Review and Voting*). It is effective upon publication in the **Federal Register**. The United States Institute of Peace invites public comment and emphasizes that this announcement provides procedures that are subject to modification from time to time as experience and further consideration warrant. Significant changes will be published in the **Federal Register.**

The announcement identifies eligible recipients for grants; the subject-matter scope for which grants may be issued, including areas of special interest to the United States Institute of Peace; and the procedures the Institute will follow to receive, evaluate, and act upon grant applications. It also explains how grant application forms may be obtained.

Introduction

The United States Institute of Peace is an independent, nonprofit corporation established by Act of Congress (Pub. L. 98-525) in October 1984. It was created to * * *

> serve the people and the Government through the widest possible range of education and training, basic and applied research opportunities, and peace information services on the means to promote international peace and the resolution of conflicts among the nations and peoples of the world without recourse to violence
>
> *[United States Institute of Peace Act, Section 1702(b)]*

The United States Institute of Peace is funded entirely by federal appropriations. The Institute is prohibited from receiving gifts, contributions, and grants from foreign governments or agencies and from private individuals or organizations. The Institute is governed by a fifteen-member Board of Directors, including four *ex officio* members from federal service, and eleven individuals appointed from outside federal service by the President of the United States and confirmed by the United States Senate. The Board held its first meeting on February 25 and 26, 1986, and since has met approximately once a month.

The Grants Program; Eligibility and Subject-Matter

Eligible Grant Recipients

The Institute may award grants to nonprofit institutions, official public institutions, and individuals (whether or not they are associated with an institution). The Institute is required to pay in grants or contracts at least one-fourth of its annual appropriations to nonprofit or official public institutions, which include:

- Institutions of postsecondary, community, secondary, and elementary education (including combinations of such institutions) * * *
- Public and private educational, training, or research institutions (including the American Federation of Labor—the Congress of Industrial Organizations) and libraries, and * * *
- Public departments and agencies (including State and territorial departments of education and commerce).

[United States Institute of Peace Act, Section 1705(c)]

The Institute may obligate through grants and contracts more than twenty-five percent of its annual appropriations to nonprofits or official public institutions. The twenty-five percent requirement also applies to appropriate funds from any prior fiscal year that have been transferred to the Endowment of the United States Institute of Peace.

Indirect Costs

The Institute does not favor applying the public monies entrusted to it to costs not directly related to any project being funded. Applicants are advised to explain both the necessity for such indirect costs in their proposal and to describe effects made to reduce or eliminate them.

Subject-Matter Scope of Grants

The Institute does not take positions on policy issues pending before Congress or other domestic or international bodies and does not mediate particular international disputes. Therefore, the Institute will not fund grant proposals of a partisan political nature or proposals that would inject the grantee or the Institute into the policy processes of the United States government or any foreign government or international organization. In addition, in accord with the United States Institute of Peace Act, section 1709(b), the Institute will not use political tests or political qualifications in selecting or monitoring any grantee.

In implementing its research, education and training, and public information mandates, the broad purposes for which the Institute invites and will consider grants are:

(1) To carry out basic and applied research, particularly of an interdisciplinary or multidisciplinary nature, on the cause of war and other international conflicts, on the ways in which conflicts have been or can be prevented, contained, or terminated, and on the condition and character of peace where it obtains among nations and peoples;

(2) To educate students, including graduate and post-graduate students, and the general public on questions of international peace and conflict resolution, including peace and conflict resolution theories, methods, techniques, programs, and systems and the experience of the United States and other nations in resolving conflicts with justice and dignity and without violence;

(3) To conduct training, symposia, and continuing education programs for practitioners, policymakers, policy implementers, and citizens and noncitizens that will develop their skills in international peace and conflict resolution;

(4) To make international peace and conflict resolution research, education, and training more available and useful to persons in government, private enterprise, and voluntary associations, including the creation of handbooks and other practical materials;

(5) To examine the resolution of conflict between free trade unions and Communist-dominated organizations in the context of the global struggle for the protection of human rights; and,

(6) To assist the Institute in its publication, clearinghouse, and other information services programs.

Priority Subject Areas for Grants

Mindful of its obligation to expend taxpayer funds with great care, Institute is conducting a review of past and ongoing research in international peace and conflict management, and related fields, in order to identify gaps and subjects that warrant additional consideration.

The Institute seeks to obtain the maximum benefits from its grantmaking program for research, education and training, and public information activities. The Board of Directors has determined that encouraging a concerted focus on specific identified subjects—which will be changed from time to time to reflect new priorities—will increase the Institute's effectiveness. It has identified several areas for priority consideration in the immediate future. The Board emphasizes, however, that applicants should feel free to submit proposals dealing with other aspects of the Institute's mandate. They, too, will receive careful attention.

The subjects of special interest to the Institute at present time are:

- Research on the relationship between adherence to international human rights standards and international peace.
- Research on perceptions of peace across political systems and ideologies, including the comparative status of peace movements and their impact under different political systems, and comparative assessment and survey of the teaching of peace.
- Research on negotiations, including lessons from negotiations between the United States and the Soviet Union, lessons from negotiations between democratic and nondemocratic systems, and general lessons in the area of negotiation.
- Research on the relationship between domestic political systems and the aggressive use of force.
- Research on strengthening the non-use-of-force provisions of the United Nations Charter, including the effectiveness of the United Nations and other international institutions in dealing with low intensity and covert forms of aggression.
- Research on the mediation of political change.
- Developing curricula and materials for the study of international peace and conflict resolution from high school through post-graduate programs.
- Developing curricula and materials for negotiation, mediation, and conciliation theory, teaching, and training.
- Assisting media programming, including research and the development of materials particularly for television and radio, that will bring information about issues of international peace and conflict resolution to the broader public.

Grants Program Procedures

Grant Proposals

Every proposal for a grant from the Institute must be made on an Application Form (USIP Form 10A) and may include attachments as needed. It is particularly important that the eight pages of the Application Form be filled out completely and with care. Some members of the Institute's Board of Directors may see no more of the application than the Application Form. Applicants must, therefore, report the basic elements of their proposals clearly and succinctly therein.

Every proposal must be submitted in four typed copies. The Application Form may be obtained from the Institute at the address given below. In addition to the information required in the Application Form, a proposal may be as detailed as the applicant desires.

Project directors from colleges, universities, official public institutions, and nonprofit organizations should be sure to consult with grants officials of their institutions in preparing project budgets. Buget categories included in Application Form 10A are intended for general use. Accordingly, the terminology may not correspond well with usages employed at any given institution, and the use thereof may cause misunderstandings among the applicant, the Institute, and his institution. Applicants should feel free to alter budget terminology to suit, provided that the terms used are defined in the detailed budget description which must be attached.

Review Process

The Institute's staff will examine every proposal for eligibility and completeness. Questions on either will be referred to the applicant. Staff responses on eligibility and completeness will not be considered part of the formal review process, but the Institute's President will inform the Board of Directors of any applicant determined by the Institute's staff not to qualify on grounds of ineligibility and of any proposal that is incomplete and has not within a reasonable period of time been made complete. After staff examination, the President will send all eligible and complete applications to the Board of Directors for review.

Each member of the Board of Directors will receive a copy of the applicant's eight-page Application Form. In addition, each application will be assigned to a committee of the Board for initial review, and each member of that committee will receive copies of the Application Form and all attachments submitted by the applicant. Any Board member not on the committee to which the application has been assigned may request to receive a full application (i.e., Form 10A plus all attachments) at any time.

Upon receipt of applications for review at any given meeting of the Board of Directors, each member will notify the Institute's Ethics Officer of his recusal from review and action on any application involving a conflict of interest or the appearance of a conflict of interest. (For additional information on recusal, see the last paragraph of this announcement).

In reviewing applications, each member of the Board committee to which those applications have been assigned will divide them into two categories: *P* (applications for possible award) and *N* (noncompetitive applications). The ratings will be communicated to the Institute's Director of Grant Programs, who will create a composite list giving ratings for each application. This list will be communicated to all Board members prior to Board committee meetings.

All applications receiving a *P* rating from any committee member will be reviewed and acted upon in committee. In addition, any Board member not on that committee may request that an application be discussed in committee. Applications falling fully into the *N* category (i.e., not receiving a *P* rating from any committee member and not requested for discussion by a Board member not on the committee) will not be discussed in committee and will be regarded as recommended for rejection by the full Board. In the course of committee discussion or at any time prior to making recommendations to the full Board, the committee may decide to review and act upon an application originally receiving a full *N* rating.

All applications not falling fully into the *N* category will be discussed by the full Board in plenary session. *N*-rated applications will be reported to the full Board as rejected, but may be reviewed if a Board member so requests. All applications, irrespective of their initial ratings or committee recommendation, will be voted upon by the full Board of Directors.

Outside review of applications may be sought during any part of the review and action process, at the committee and full Board levels. Any Board member, whether on the initial review committee or otherwise, may request outside review of an application. In each instance of outside review, the Institute staff will seek at least two reviewers, one a specialist in the field relevant to the particular project proposed in the application (or as close to it as possible) and one from an outside field.

In evaluating grant applications, central concerns will include: (1) The significance of the project to the Institute's mandate and the subject areas of special interest identified by the Board of Directors and listed above; (2) evidence that the project will not simply duplicate existing knowledge or programs; (3) the likelihood that the project will make a significant contribution to the field in scholarship and knowledge; and (4) the usefulness of the proposed product in fulfilling the Institute's mandate. The Institute is particularly interested in proposals that envision a specific product of enduring value.

Conflict of Interest and Recusal

Institute Directors, officers, and employees will recuse themselves from the consideration process with respect to any application for a grant with which they have a conflict of interest or which might reasonably present the appearance of a conflict of interest. All recusals will be reported to the Institute's Ethics Officer. Directors, officers, or employees of the Institute who have reason to believe they may have a potential conflict of interest regarding any proposal upon which they are called to act shall bring the situation to the attention of the Ethics Officer for guidance. Nothing in this paragraph shall be read as diminishing in any way the conflict of interest provisions contained in the United States Institute of Peace Act, including section 1706(g).

Application Forms are available from United State Institute of Peace, 1550 M Street, NW., Suite 700, Washington, DC 20005–1708, (202) 457–1700.

Contact: Dr. Kenneth M. Jensen. Telephone: (202) 457–1700.

Dated: December 14, 1987.

Samuel W. Lewis,

President, United States Institute of Peace.

Sunshine Act Meetings

Federal Register
Vol. 52, No. 246
Wednesday, December 23, 1987

This section of the FEDERAL REGISTER contains notices of meetings published under the "Government in the Sunshine Act" (Pub. L. 94-409) 5 U.S.C. 552b(e)(3).

UNITED STATES INTERNATIONAL TRADE COMMISSION

TIME AND DATE: Wednesday, January 6, 1988 at 3:00 p.m.

PLACE: Room 117, 701 E Street, NW, Washington, DC 20436.

STATUS: Open to the public.

MATTERS TO BE CONSIDERED:

1. Agenda
2. Minutes
3. Ratifications
4. Petitions and Complaints:
   Certain Plastic Light Duty Screw Anchors (Docket Number 1426).
5. Any items left over from previous agenda.

CONTACT PERSON FOR MORE INFORMATION: Kennth R. Mason, Secretary, (202) 523–0161.

Kenneth R. Mason,

Secretary.

December 16, 1987.

BILLING CODE 7020–02–M

POSTAL SERVICE BOARD OF GOVERNORS

Vote to Close Meeting

By telephone vote a majority of the Board members voted to close to public observation a meeting of the Board scheduled for January 4, 1988. The meeting will be held at U.S. Postal Service headquarters, 475 L'Enfant Plaza, SW., Washington, DC. The meeting will concern consideration of a major capital investment project.

The meeting is expected to be attended by the following persons: Governors Griesemer, Hall, McConnell, Nevin, Pace, Peters, Ryan and Setrakian; Postmaster General Tisch; Deputy Postmaster General Coughlin; Secretary for the Board Harris; and General Counsel Cox.

The Board of Governors has determined that, pursuant to section 552b(c)(9)(B) of Title 5, United States Code, and § 7.3(i) of Title 39, Code of Federal Regulations, the discussion of these matters is exempt from the open meeting requirement of the Government in the Sunshine Act (5 U.S.C. 552b(b)), because it is likely to disclose information, the premature disclosure of which would likely frustrate implementation of proposed procurement actions.

In accordance with section 552b(f)(1) of Title 5, United States Code, and § 7.6(a) of Title 39, Code of Federal Regulations, the General Counsel of the United States Postal Service has certified that in his opinion the meeting may properly be closed to public observation, pursuant to section 552b(c)(9)(B) of Title 5, United States Code, and § 7.3(i) of Title 39, Code of Federal Regulations.

Requests for information about the meeting should be addressed to the Secretary for the Board, David F. Harris, at (202) 268–4800.

David F. Harris,

Secretary.

[FR Doc. 87–29516 Filed 12–21–87; 3:29 pm]

BILLING CODE 7710–12–M

POSTAL SERVICE BOARD OF GOVERNORS

The Board of Governors of the United States Postal Service, pursuant to its Bylaws (39 CFR 7.5) and the Government in the Sunshine Act (5 U.S.C. 552b), hereby gives notice that it intends to hold a meeting at 1:00 p.m. on Monday, January 4, 1988, in Washington, DC, and at 8:30 a.m. on Tuesday, January 5, 1988, in the Benjamin Franklin Room, U.S. Postal Service

Headquarters, 475 L'Enfant Plaza, SW., Washington, DC. As indicated in the following paragraph, the January 4 meeting is closed to the public. The January 5 meeting is open to the public. The Board expects to discuss the matters stated in the agenda which is set forth below. Requests for information about the meeting should be addressed to the Secretary of the Board, David F. Harris, at (202) 268–4800.

The Board voted in accordance with the provisions of the Government in the Sunshine Act to close to public observation its meeting scheduled for January 4, 1988, to consider a major capital investment project.

Agenda

Monday Session

January 4, 1988—1:00 p.m. (Closed)

1. Capital Investment:
—South Tampa Bay, FL, Mail Processing Center.

Tuesday Session

January 5, 1988—8:30 a.m. (Open)

1. Minutes of the Previous Meeting, December 7–8, 1987.
2. Remarks of the Postmaster General.
3. Election of Chairman and Vice Chairman.
4. Appointment of Audit Committee Members by Chairman.
5. Annual Report on Open Meeting Compliance.
6. Annual Report of the Postmaster General.
7. Status Report on CSRS/FERS.
8. Tentative Agenda for February 1–2, 1988, meeting in Washington, DC.

David F. Harris,

Secretary.

Department of Education

Pell Grant Program; Deadline Dates for Receipt of Applications, Reports, and Other Documents for the 1987-88 Award Year; Notice

BEST COPY AVAILABLE

VOL 52 ISS 246 DEC 23 1987 UMI

DEPARTMENT OF EDUCATION

Pell Grant Program; Deadline Dates for Receipt of Applications, Reports, and Other Documents for the 1987–88 Award Year

AGENCY: Department of Education.

ACTION: Notice.

SUMMARY: The Secretary announces the deadline dates for the receipt of documents from persons applying for financial assistance under, and from institutions participating in, the Pell Grant Program during the 1987–88 award year.

SUPPLEMENTARY INFORMATION: The purpose of the Pell Grant Program is to assist students in the continuation of their training and education at the postsecondary level by providing financial aid to help pay for their educational costs. Authority for the Pell Grant Program is contained in section 411 of the Higher Education Act of 1965, as amended (20 U.S.C. 1070a). The regulations for the Pell Grant Program are codified in 34 CFR Part 690.

I. Applications for Determination of Expected Family Contribution—Table I

As a requirement for receiving a Pell Grant, each applicant is responsible for submitting to an institution of higher education, a valid Student Aid Report (SAR) that states the amount of the student's expected family contribution (referred to on the SAR as the "SAI" [student aid index]) and the information used in calculating that amount. Therefore, each applicant must first submit to an agency listed in Table I of this notice his or her application for determining the expected family contribution. That application—referred to in this notice as the original application—must be submitted on one of the forms shown in Table I and be received by the designated agency at the agency's address shown in Table I no later than the deadline date, May 2, 1988, shown in Table I.

It should be noted that an application sent to the Federal Student Aid Programs must be received at the U.S. Postal facility indicated in the table. Individuals at the processing center are not authorized to personally accept hand delivered documents.

(Approved by the Office of Management and Budget under these OMB Control Numbers—Application: 1840–0110; Special Condition Application: 1840–0111)

TABLE 1.—DEADLINE DATE FOR RECEIPT OF APPLICATION FORMS FOR DETERMINING EXPECTED FAMILY CONTRIBUTION: MAY 2, 1988

(34 CFR 690.12)

II. Other Documents—Table II

Once an applicant has filed his or her original application, additional information may be necessary. In some cases the agency receiving the original application (the processing agency) may request the information. In other cases, the applicant is responsible for initiating a request that additional or alternative information be considered.

The type of information and the forms to be used to report that information are listed in Table II of this notice. Each category designates an address to which the specified information or request must be sent, and the deadline date by which that information or request must be received at that address. The applicant must submit to the Federal Student Aid Programs, any changes that he or she wants to be reflected on his or her SAR. The following explains each category:

Correction Application—If an original application lacks sufficient information for it to be processed, the Secretary will send a correct application to the applicant. In addition, if an applicant has misreported his or her dependency status on the original application or his or her dependency status subsequently changes from the status reported on the original application, other than changes that are the result of a change in marital status, the applicant has the responsibility for requesting a correction application. The correction application may be obtained from the Federal processing agency, financial aid administrator, or Educational Opportunity Center counselors or by writing to Federal Student Aid Programs, P.O. Box 84, Washington, D.C. 20044. The correction application must be returned to the address listed in Table II and received at that address no later than the deadline date, July 29, 1988, shown in Table II.

Student Aid Report (SAR)

- *Correction/Verification of Information Requested by the Secretary*—If the Secretary returns an SAR to an applicant for correction or verification of correct information, the applicant must correct or verify the information and return the SAR to the appropriate address listed in Table II. The SAR must be received at that address no later than the deadline date, July 29, 1988, shown in Table II. A student attending an institution participating in the Pell Grant Electronic Data Exchange must submit that SAR, with the information corrected or verified, to the institution by July 29, 1988.
- *Correction of Inaccurate Information*—If the SAR reflects information that was inaccurate when the application was signed, the applicant must correct that information on the SAR and send the SAR to the address listed in Table II. The SAR must be received no later than the July 29, 1988 deadline date shown in Table II. A student attending an institution participating in the Pell Grant Electronic Data Exchange must submit that SAR, with the information corrected, to the institution by July 29, 1988.
- *Recomputation of Student Aid Index*—An applicant may request on the SAR, that the Secretary recompute his or her student aid index, if—(1) The student believes a clerical or arithmetic error has occurred or (2) The student or his or her family has suffered a loss of or damage to assets resulting from a natural disaster in an area that has been declared a national disaster area by the President of the United States. The applicant must send the SAR to the address listed in Table II. The SAR must be received no later than the July 29, 1988 deadline date. A student attending an institution participating in the Pell Grant Electronic Data Exchange must submit a request for recomputation to the institution by July 29, 1988.
- *Request for Duplicate SAR*—If an applicant wishes to receive a duplicate SAR, the applicant may write to one of the addresses listed in Table II, or call one of the phone numbers listed in Table II. A written request must be received at either address no later than the July 29, 1988 deadline date. All telephone requests must also be made no later than July 29, 1988. It should be noted that a written request sent to the Iowa City application processing center must be received at the U.S. Postal facility indicated in Table II. Individuals at that site are not authorized to personally accept hand delivered documents.

(Approved by the Office of Management and Budget under OMB Control Number 1840–0132)

TABLE II.—DEADLINE DATES FOR RECEIPT OF OTHER DOCUMENTS: JULY 29, 1988

Type of form/information	Address for submission
Correction Application:	
Application for Federal Student Aid correction application.	Federal Student Aid Programs, P.O. Box 4160, Iowa City, IA 52244.
Student Aid Report (SAR)	
Correction/Verification of Information Requested by the Secretary: Request for verification of corrected information.	Federal Student Aid Programs, P.O. Box 4126, Iowa City, IA 52244.
Correction of Inaccurate Information (except address correction): Request for correction of inaccurate information.	Federal Student Aid Programs, P.O. Box 4103, Iowa City, IA 52244.
Request for Correction of Address.	Federal Student Aid Programs, P.O. Box 4127, Iowa City, IA 52244.
Recomputation of Student Aid Index: Request for recomputation of a student aid index because of (1) clerical or arithmetic errors or (2) loss of or damage to assets in Presidentially-declared national disaster area.	Federal Student Aid Programs, P.O Box 4103, Iowa City, IA 52244.
Request for Duplicate SAR: Request in writing or request by phone.	Federal Student Aid Programs, P.O. Box 4164, Iowa City, IA 52244. (319) 337–3738 or Federal Student Aid Programs, P.O. Box 84, Washington, DC 20044. (301) 984–4070.

[34 CFR 690.14, 690.39, 690.48]

Note.—Although the Pell application processing site will accept and process corrections through July 29, 1988, this does not extend the deadline by which the student must submit his or her valid SAR to the institution's financial aid office. If the student does not submit a valid SAR to the financial aid office, showing that he or she is eligible, by his or her last date of enrollment or June 30, 1988, whichever is earlier, he or she will not be eligible for a Pell Grant payment.

III. Verification Procedures and Deadline Dates

The information provided on an application and included on an SAR may be subject to verification. In that case, in order to receive a Pell Grant award for the 1987–88 award year, the applicant—and his or her parents, if applicable—must submit the necessary verification documents in accordance with the following procedures. The documents must be received no later than the deadline dates specified below. These dates do not conflict with nor supersede the deadline dates specified in Tables I and II of this notice.

Verification of Information on Application. If an applicant is selected to have the information on his or her application verified under the verification procedures set forth in Subpart E of the Student Assistance General Provisions, he or she must submit the requested documents as specified below. The deadline date for completing the verification process is the earlier of 60 days from the applicant's last date of enrollment in the case of an applciant who leaves school because of graduation, completion of an academic term, or withdrawal, or September 1, 1988. A student who will still be enrolled in a course of study in the 1987–88 award year after September 1, 1988, must submit the requested documents by September 1, 1988.

This process is complete when the applicant has:

(1) Submitted all requested verification documents to his or her institution;

(2) Made all necessary corrections on Part 2 of the SAR;

(3) Signed and submitted the corrected Part 2 to the SAR to the Department of Education's processing center at the address indicated in the lower left hand corner on the back of Part 2 of the SAR—the same address indicated under the first four categories shown in Table II—by the deadline date listed for these categories in Table II; and

(4) Submitted to the institution the corrected/reprocessed SAR received from the Department of Education's processing center. (34 CFR 668.60)

IV. Institutional Payment Summary (IPS)—Table III

An institution participating in the Pell Grant Program is required to provide the Secretary with an Institutional Payment Summary (IPS) and Part 3 of the SARs (Payment Documents) by the deadline dates established in Table III. This material should be sent to the following address, in the manner described below: Pell Grant Program, P.O. Box 1400. Merrifield, Virginia 22116–1400.

- Each institution must submit an IPS either with Student Payment Documents or with SAR Data Tapes reflecting the information contained on Part 3 of the SAR.
- An institution may submit an IPS without a batch of Payment Documents or SAR Data Tape, only under one of these circumstances:

(1) The institution has no Pell recipients, or

(2) The institution has no new Pell recipients or payment data changes to submit within a given reporting period for previously reported students.

An institution must submit two signed institutional Payment Summaries. Photocopies of the IPS may be submitted provided that each copy contains the original handwritten signature of the institutional administrator officially responsible for the accuracy and completeness of the IPS. Although an institution may make a submission as often as necessary during each of the required reporting periods shown in Table III, it must make *at least one* submission within each of those periods, even if it submits only an IPS under the conditions noted above. Submissions must be made no later than the deadline data for each reporting period noted in Table III.

An institution participating in the Pell Grant Electronic Data Exchange must either:

(1) Submit the documents or data tapes to the above address in the manner describd above; or

(2) Provide to the Pell Grant Central Disbursement System a properly certified and acceptable electronic payment data submission via the Pell Grant Electronic Data Exchange. This submission must be made at least once during each of the stated periods.

TABLE III.—DEADLINE DATES FOR RECEIPT OF INSTITUTIONAL PAYMENT SUMMARY (IPS) DOCUMENTS

Reporting periods	Closing date
Institutions with a 1986–87 Pell Grant Authorization of $750,000 or more:	
July 1, 1987 thru Oct. 15, 1987	Oct. 15, 1987
Oct. 16, 1987 thru Dec. 15, 1987	Dec. 15, 1987
Dec. 16, 1987 thru Feb. 15, 1988	Feb. 15, 1988
Feb. 16, 1988 thru April 15, 1988	April 15, 1988
April 16, 1988 thru June 15, 1988	June 15, 1988
June 16, 1988 thru Aug. 15, 1988	Aug. 15, 1988
Institutions with a 1986–87 Pell Grant Authorization under $750,000:	
July 1, 1987 thru Dec. 15, 1987	Dec. 15, 1987
Dec. 16, 1987 thru April 15, 1988	April 15, 1988
April 16, 1988 thru Aug. 15, 1988	Aug. 15, 1988

(34 CFR 690.83)

(Approved by the Office of Management and Budget under OMB Control Number IPS Form 1840–0540)

Failure of an institution to comply with these requirements may result in the initiation of a proceeding to fine, suspend, limit, or terminate the institution in accordance with Subpart G of the Student Assistance General Provisions regulations in 34 CFR Part 668.

V. Submission to the Secretary of Student Aid Reports by Institutions

As noted above, Table III requires an institution to submit at least one IPS (and SAR Payment Documents, if applicable) within each of the required reporting periods. However, because 34 CFR 690.83 requires an institution to submit 1987–88 SAR Payment Documents to the Secretary of Education by December 31, 1988, an institution with additional IPS's and Payment Documents may submit them until the end of the year.

Institutions will not be permitted to adjust their Pell Grant accounts after December 31, 1988 for award year 1987–88 or any award years prior to 1987–88 except under the circumstances listed below. This deadline has been established to permit an orderly closing of accounts from previous years.

- Adjustments are required by a program review of the institution's records by an official or employee of the Department of Education.
- Adjustments are required by an audit conducted under the requirements of 34 CFR 690.84.
- The institution is required to adjust a student's award because of a court order.
- The institution discovers that a student has been overpaid.
- Verification cases referred to the Department where the student has only received partial payment or no payment, and verification cannot be completed in time to meet the December 31, deadline.

Note.—This means that an institution will not be allowed to adjust its accounts for any underpayment it discovers after December 31 *unless* the case meets one or more of the conditions described above. If an institution discovers an underpayment, and submits to the Secretary 1987–88 Payment Documents or SAR's for years prior to 1987–88, no adjustment will be made; that is, the institution will not receive additional Pell Grant funds. If it appears that an adjustment must be made because of the above circumstances, the institution should contact an area desk representative at (202) 732–3795.

Application Forms and Information

Student aid application forms, correction application forms, and information brochures may be obtained through college and university financial aid administrators, Educational Opportunity Center counselors, or by writing to: Federal Student Aid Programs, P.O. Box 84, Washington, DC 20044.

Applicable Regulations

The regulations applicable to this program are the Pell Grant Program regulations in 34 CFR Part 690 and the Student Assistance General Provisions regulations in 34 CFR Part 668.

DEPARTMENT OF TRANSPORTATION

41 CFR Part 12-60

48 CFR Ch. 63

Contract Appeals Board; Rules of Procedure

[Docket 45353]

AGENCY: Department of Transportation, Board of Contract Appeals.

ACTION: Interim final rule.

SUMMARY: The Department of Transportation (DOT) Board of Contract Appeals issues revisions to its rules of procedure, which will govern proceedings before the Board in contract appeals and related matters.

EFFECTIVE DATE: This interim final rule is effective upon date of publication in the Federal Register. Comments must be received on or before February 2, 1988.

ADDRESS: Submit written comments, preferably in duplicate, to OST Docket Clerk, Docket Number 45353, Room 4107, Office of the Secretary, Department of Transportation, 400 Seventh Street SW., Washington, DC 20590. All comments received will be available for examination at the above address between 9:00 am and 5:00 pm, EST Monday through Friday, except legal holidays. Those desiring notification of receipt of comments must include a self-addressed, stamped postcard.

FOR FURTHER INFORMATION CONTACT: Roger Martino, Chief, Procurement Management Division, Office of Acquisition and Grant Management, M-62, 400 Seventh Street SW., Washington, DC 20590; (202) 366-4271. This is not a toll-free number. Office hours are from 9:00 to 5:00 pm, EST Monday through Friday, except legal holidays.

SUPPLEMENTARY INFORMATION: This chapter of 48 CFR is added to set forth the functions and procedures of the DOT Board of Contract Appeals, established pursuant to Pub. L. 95-563, the Contract Disputes Act of 1978. Except for the deletion of Rule 30 (6302-30), there are no changes to the Rules as they have been in effect since 1979.

This rule is issued under delegated authority under 49 CFR Part 1.59(q).

List of Subjects in 48 CFR Chapter 63

Government procurement.

Dated: December 9, 1987.

Jon H. Seymour,

Assistant Secretary for Administration.

1. A new Chapter 63 is added to 48 CFR to read:

CHAPTER 63—DEPARTMENT OF TRANSPORTATION BOARD OF CONTRACT APPEALS

2. 41 CFR Part 12-60 is transferred to 48 CFR Chapter 63 as Parts 6301 and 6302 and revised to read as follows:

CHAPTER 63—DEPARTMENT OF TRANSPORTATION BOARD OF CONTRACT APPEALS

PART 6301—BOARD OF CONTRACT APPEALS

Sec.

6301.0 Foreword.
6301.1 Scope of part.
6301.2 Qualifications of members.
6301.3 Jurisdiction and authority of the Board and its members.
6301.4 Ex Parte communications.
6301.5 Contract appeals procedures (general).
6301.6 Effective date.

Authority: Contract Disputes Act of 1978 (41 U.S.C. 600, *et seq.*).

6301.0 Foreword.

A Department of Transportation Board of Contract Appeals has been established pursuant to Pub. L. 95-563. The Secretary appoints the members of the Board and designates the Chair and Vice-Chair of the Board.

6301.1 Scope of part.

(a) *Scope.* This part prescribes the functions and procedures of the Department of Transportation Board of Contract Appeals and provides for the appointment of a Chair, a Vice-Chair, and Members of the Board, and sets forth their duties.

(b) *Definitions.* For the purposes of this part—

"Administrative Judge" means a member of the Board selected and appointed to serve pursuant to the Contract Disputes Act of 1978;

"Appellant" means the contractor who appeals;

"Board" means the Department of Transportation Board of Contract Appeals;

"Contracting officer" means the Government's contracting officer whose decision is appealed, or the successor contracting officer;

"Parties" means the appellant and the contracting officer, and

"Secretary" means the Secretary of Transportation.

6301.2 Qualifications of members.

Each member of the Board must be a qualified attorney who is admitted to practice before the highest court of a State or the District of Columbia. Members of the Board are selected and appointed to serve in the same manner as administrative law judges appointed pursuant to section 3105 of Title 5 of the United States Code, with the additional requirement that each member shall have had not fewer than five years experience in public contract law.

6301.3 Jurisdiction and authority of the Board and its members.

(a) The Board hears and decides:

(1) Appeals from decisions made by contracting officers relating to contracts of the Department of Transportation and its constituent administrations;

(2) Appeals from decisions of contracting officers relating to contracts of any other executive agency when such agency or the Administrator for Federal Procurement Policy has designated the Board to decide the appeal;

(3) Matters within jurisdiction of the Board in accordance with the provisions of the Contract Disputes Act, 41 U.S.C. 606 et seq.; and

(4) Other matters as directed by the Secretary which are not inconsistent with statutory duties.

In each case, the Board shall make a final decision which is impartial, fair, and just to the parties and is supported by the record of the case and the law. The Administrative Judge assigned to hear an appeal has authority to act for the Board in all matters with respect to such appeal. Included in such authority is the authority to sign subpoenas and the power to authorize the Recorder of the Board to issue subpoenas pursuant to section 11 of the Contract Disputes Act of 1978. (41 U.S.C. 610)

(b) An Administrative Judge may not act for the Board or participate in a decision if that Judge has participated directly in any aspect of the award or administration of the contract involved.

(c) Except for appeals considered under the expedited small claims or accelerated procedures, appeals are assigned to a panel of three Administrative Judges of the Board. The decision of a majority of the panel shall constitute the decision of the Board.

6301.4 Ex Parte communications.

Ex parte communications, that is, written or oral communications with the Board by or for one party only without notice to the other, are not permitted. No member of the Board or of the Board's staff shall consider, nor shall any person directly or indirectly involved in an appeal submit to the Board or to the Board's staff, off-the-record, any evidence, explanation, analysis, or advice, whether written or oral, regarding any matter at issue in an appeal. This provision does not apply to consultation between Board members nor to ex parte communications concerning the Board's administrative functions or procedures.

6301.5 Contract appeals procedures (general).

(a) It is the intent of these rules to provide for the just and inexpensive determination of appeals without unnecessary delay. It is the objective of the Board's preliminary procedures to encourage full disclosure of relevant and material facts, and to discourage surprise. Each specified time limitation is a maximum, and should not be fully used if the action described can be accomplished in a shorter period. The Board may extend any time limitation for good cause and in accordance with legal precedent.

(b) Ordinarily, the appellant has the burden of proof.

(c) The rules of procedure at 6302 shall govern the procedures in all contract disputes appealed to the Board.

6301.6 Effective date.

This chapter shall apply to all appeals relating to contracts entered into on or after March 1, 1979, and upon the contractor's election of Contract Disputes Act procedures, to appeals relating to earlier contracts with respect to claims pending before the contracting officer on March 1, 1979, or initiated thereafter.

PART 6302—RULES OF PROCEDURE

Sec.

6302.1 How to appeal a contracting officer's decision (Rule 1).
6302.2 Contents of notice of appeal (Rule 2).
6302.3 Docketing of appeals (Rule 3).
6302.4 Preparation, contents, organization, forwarding, and status of appeal file (Rule 4).
6302.5 Service of documents (Rule 5).
6302.6 Computation and extension of time limits (Rule 6).
6302.7 Motions (Rule 7).
6302.8 Appellant's election of procedures (Rule 8).
6302.9 The SMALL CLAIMS (EXPEDITED) procedure (Rule 9).
6302.10 The ACCELERATED procedure (Rule 10).
6302.11 Submission of appeal without a hearing (Rule 11).
6302.12 Regular procedure (Rule 12).
6302.13 Pleadings (Rule 13).
6302.14 Amendments of pleadings or record (Rule 14).
6302.15 Prehearing briefs (Rule 15).
6302.16 Prehearing conference (Rule 16).
6302.17 The record of the appeal (Rule 17).
6302.18 Discovery—depositions (Rule 18).
6302.19 Interrogatories to parties, admission of facts, and inspection of documents (Rule 19).
6302.20 Time and place of hearing (Rule 20).
6302.21 Notice of hearing (Rule 21).
6302.22 Unexcused absence of a party (Rule 22).
6302.23 Nature of hearings (Rule 23).
6302.24 Subpoenas (Rule 24).
6302.25 Copies of papers (Rule 25).
6302.26 Posthearing briefs (Rule 26).
6302.27 Transcript of proceedings (Rule 27).
6302.28 Withdrawal of exhibits (Rule 28).
6302.29 Representation of the parties (Rule 29).
6302.30 Reserved (Rule 30).
6302.31 Settlement (Rule 31).
6302.32 Decisions (Rule 32).
6302.33 Motion for reconsideration (Rule 33).
6302.34 Dismissal for lack of jurisdiction (Rule 34).
6302.35 Dismissal without prejudice (Rule 35).
6302.36 Dismissal for failure to prosecute or defend (Rule 36).
6302.37 Sanctions (Rule 37).
6302.38 Remand from court (Rule 38).

Authority: Contract Disputes Act of 1978 (41 U.S.C. 600, et seq.).

6302.1 How to appeal a contracting officer's decision (Rule 1).

(a) Notice of an appeal shall be in writing and mailed or otherwise furnished to the Board within 90 days from the date of receipt of a contracting officer's decision. A copy of the notice shall be furnished to the contracting officer from whose decision the appeal is taken.

(b) Where the contractor has submitted a claim of $50,000 or less to the contracting officer and has requested a written decision within 60 days from receipt of the request, and the contracting officer has not done so, the contractor may file a notice of appeal as provided in paragraph (a) of this section citing the failure of the contracting officer to issue a decision.

(c) Where the contractor has submitted a claim in excess of $50,000 to the contracting officer and the contracting officer has failed to issue a decision within a reasonable time, the contractor may file a notice of appeal as provided in paragraph (a) of this section, citing the failure to issue a decision.

(d) Upon docketing of appeals filed pursuant to paragraph (b) or (c) of this section, the Board, at its option, may stay further proceedings pending issuance of a final decision by the contracting officer within the time fixed by the Board or order the appeal to proceed without the contracting officer's decision.

6302.2 Contents of notice of appeal (Rule 2).

A notice of appeal must indicate that an appeal is intended and identify the contract number, the administration, bureau, or office concerned with the dispute, the decision from which the appeal is taken, and the amount in dispute, if known. The notice of appeal shall be signed by the appellant, or by an officer of an appellant corporation or member of an appellant firm, or by an appellant's authorized representative or attorney.

6302.3 Docketing of appeals (Rule 3).

Following receipt by the Board of the original notice of appeal, the appellant and the contracting officer are promptly notified of its receipt and docketing by the Board, and the Board furnishes a copy of these rules to the appellant.

6302.4 Preparation, contents, organization, forwarding, and status of appeal file (Rule 4).

(a) *Duties of contracting officer.* Within 30 days after receipt of notice that an appeal has been docketed, the contracting officer shall assemble and transmit to the Board, with a copy to the appellant and the Government attorney, an appeal file consisting of all documents pertinent of the appeal, including:

(1) The contracting officer's decision and finding of fact from which the appeal is taken;

(2) The contract, including pertinent specifications, modifications, plans, and drawings;

(3) All correspondence between the parties pertinent to the appeal, including the letters of claim in response to which the decision was issued;

(4) Transcripts of any testimony taken during the course of proceedings, and affidavits or statements of an witnesses on the matter in dispute made prior to the filing of the notice of appeal with the Board; and

(5) Any additional information considered pertinent.

(b) *Duties of the appellant.* Within 30 days after receipt of a copy of the appeal file assembled by the contracting officer, the appellant may supplement the file by transmitting to the Board any additional documents which it considers pertinent to the appeal and shall furnish two copies of such documents to the Government attorney.

(c) *Organization of appeal file.* Documents in the appeal file may be originals or legible facsimiles or authenticated copies, and shall be arranged in chronological order where practicable, numbered sequentially, tabbed, and indexed to identify the contents of the file. The contracting officer's final decision and the contract shall be conveniently placed in the file for ready reference.

(d) *Lengthy documents.* The Board may waive the requirement of furnishing to the other party copies of bulky, lengthy, or out-of-size documents in the

appeal file when a party has shown that doing so would impose an undue burden. At the time a party files with the Board a document as to which such a waiver has been granted, the other party shall be notified that the document or a copy is available for inspection at the offices of the Board or of the party filing the document.

(e) *Status documents in appeal file.* Documents contained in the appeal file are, without further action by the parties, a part of the record upon which the Board renders its decision, unless a party objects to the consideration of a particular document at or before the hearing or, if there is no hearing on the appeal, before closing the record. If objection to a document is made, the Board rules upon its admissibility into the record as evidence in accordance with Rules 17 and 23.

6302.5 Service of documents (Rule 5).

A copy of every written communication submitted to the Board shall be sent to every party to the dispute. Such communications shall be sent by delivering in person or by mailing, properly addressed with postage prepaid, to the opposing party or, where the party is represented by counsel, to its counsel. Each communication with the Board shall be accompanied by a statement, signed by the originating party, saying when, how, and to whom a copy was sent.

6302.6 Computation and extension of time limits (Rule 6).

(a) *Computation.* Except as otherwise provided by law, in computing any period of time prescribed by these rules, or by any order of the Board, the day of the event from which the designated period of time begins to run is not included, but the last day of the period is included unless it is a Saturday, Sunday, or a legal holiday, in which case the period runs to the end of the next business day.

(b) *Extensions.* All requests for extensions of time shall be submitted to the Board in writing and shall state good cause for the request.

6302.7 Motions (Rule 7).

(a) Motions are made by filing an original and two copies, together with any supporting papers, with the Board. Motions may also be made upon the record, in the presence of the other party, at a prehearing conference or a hearing. The Board considers any timely motion:

(1) For extensions of time (Rule 6) or to cure defaults;

(2) To require that a pleading be made more definite and certain, or for leave to amend a pleading (Rule 14);

(3) To dismiss for lack of jurisdiction (Rule 34); to dismiss for failure to prosecute (Rule 38); or to grant summary relief because a pleading does not raise a justifiable issue;

(4) For discovery, for interrogatories to a party, or for the taking of depositions (Rules 18 and 19);

(5) To reopen a hearing; or to reconsider a decision (Rule 33), or

(6) For any other appropriate order.

(b) The Board may, on its own motion, initiate any such action by notice to the parties. Unless a longer time is allowed by the Board, a party who receives a motion shall file any answering material within 20 days after the date of receipt. The Board makes an order on each motion that is appropriate and just to the parties, and upon conditions that will promote efficiency in disposing of the appeal.

(c) The Board may permit oral hearing or argument on motions, and may require the presentation of briefs.

6302.8 Appellant's election of procedures (Rule 8).

(a) In every appeal the appellant is required to elect one of the following procedures:

(1) A hearing under the Board's regular procedure (Rule 12);

(2) A hearing under the SMALL CLAIMS (EXPEDITED) procedure, if applicable (Rule 9);

(3) A hearing under the Board's ACCELERATED procedure, if applicable (Rule 10), or

(4) Submission on the written record or without a hearing (Rule 11). Also see Rule 11 with respect to the Government's right to waive a hearing.

(b) The SMALL CLAIMS (EXPEDITED) procedure is available where the amount in dispute is $10,000 or less (Rule 9). The ACCELERATED procedure is available where the amount in dispute is $50,000 or less (Rule 10). In deciding whether the SMALL CLAIMS (EXPEDITED) or ACCELERATED procedure is applicable to an appeal, any question regarding the amount in dispute shall be determined by the Board.

(c) The appellant's election of one of the above procedures shall be made in writing within 30 days after receipt of the appeal file unless such period is extended by the Board for good cause shown. The election may not be withdrawn except with permission of the Board and for good cause shown.

6302.9 The SMALL CLAIMS (EXPEDITED) procedure (Rule 9).

(a) The SMALL CLAIMS (EXPEDITED) procedure provides for simplified rules of procedure to facilitate the decision of an appeal, whenever possible, within 120 days from the date such procedure is elected.

(b) Promptly upon receipt of an appellant's election of the SMALL CLAIMS (EXPEDITED) procedure, the assigned Administrative Judge shall take the following actions, if feasible, in an informal meeting or a telephone conference with both parties:

(1) Identify and simplify the issues in dispute;

(2) Establish a simplified procedure appropriate to the particular appeal;

(3) Determine whether the appellant desires a hearing and, if so, fix a time and place for the hearing; and

(4) Establish a schedule for the expedited resolution of the appeal.

(c) The subpoena power set forth in Rule 24 is available for use under the SMALL CLAIMS (EXPEDITED) procedure.

(d) The filing of pleadings, motions, discovery proceedings or prehearing procedures will be permitted only to the extent consistent with the requirement of conducting the hearing at the scheduled time and place or, if no hearing is scheduled, of closing the record at an early time so as to permit a decision of the appeal within the 120-day time limit. The Board, in its discretion, may impose shortened time periods for any actions required or permitted under these rules, necessary to enable the Board to decide the appeal within the 120-day time limit, allowing whatever time, up to 30 days, that the Board considers necessary for the preparation of the decision after closing the record and the filing of briefs, if any.

(e) Decisions in appeals considered under the SMALL CLAIMS (EXPEDITED) procedure are rendered by a single Administrative Judge. Written decisions of appeals considered under this procedure are short and contain only summary findings of fact and conclusions. If there has been a hearing on the appeal, the presiding Administrative Judge may, in his or her discretion, hear closing oral arguments of the parties and then render an oral decision on the appeal. Such decision will include summary findings of fact and conclusions. Whenever such an oral decision is rendered, the Board subsequently furnishes the parties with a written transcript of the oral decision for record and payment purposes and to commence the time period for the filing of a motion for reconsideration under Rule 33.

(f) Decisions of the Board under the SMALL CLAIMS (EXPEDITED) procedure shall have no value as precedent. Except in cases of fraud, decisions rendered under the SMALL CLAIMS (EXPEDITED) procedure may not be appealed by either party.

6302.10 The ACCELERATED procedure (Rule 10).

(a) The ACCELERATED procedure makes available a procedure where the appeal is resolved, whenever possible, within 180 days from the date such procedure is elected.

(b) Promptly upon receipt of appellant's election of the ACCELERATED procedure, the assigned Administrative Judge shall take the following actions, if feasible, in an informal meeting or a telephone conference with both parties:

(1) Identify and simplify the issues in dispute;

(2) Establish a simplified procedure appropriate to the particular appeal;

(3) Determine whether a hearing is desired and, if so, fix a time and place for a hearing; and

(4) Establish a schedule for the accelerated resolution of the appeal.

(c) The subpoena power set forth in Rule 24 is available for use under the ACCELERATED procedure.

(d) The filing of pleadings, motions, discovery proceedings or prehearing procedures will be permitted only to the extent consistent with the requirement of conducting the hearing at the scheduled time and place or, if no hearing is scheduled, the closing of the record at an early time so as to permit decision of the appeal with the 180-day limit. The Board, in its discretion, may impose shortened time periods for any actions required or permitted under these rules, necessary to enable the Board to decide the appeal within the 180-day limit, allowing whatever time, up to 30 days, that the Board considers necessary for the preparation of the decision after closing the record and the filing of briefs, if any.

(e) Decisions in appeals considered under the ACCELERATED procedure are rendered by a single Administrative Judge, subject to the concurrence of the Vice-Chair or another assigned Administrative Judge. In the event of an even division on an appeal, the Chair participates in the decision of the appeal. Written decisions of appeals considered under this procedure are short and contain only summary findings of fact and conclusions. In cases where the amount in dispute is $10,000 or less and there has been a hearing under the ACCELERATED procedure the presiding Administrative Judge may, in his or her discretion, hear closing oral arguments of the parties and then render an oral decision on the appeal. Such decision will include summary findings of fact and conclusions. Whenever such an oral decision is rendered the Board subsequently furnishes the parties with a written transcript of the oral decision for record and payment purposes and to commence the time period for the filing of a motion for reconsideration under Rule 33.

(f) Decisions of the Board under the ACCELERATED procedure are published and have precedential value. Such decisions may be appealed by either party.

6302.11 Submission of appeal without a hearing (Rule 11).

Either party may elect to waive a hearing and to submit its case upon the record before the Board pursuant to Rule 17. Submission of a case without hearing does not relieve a party from the necessity of proving the facts supporting that party's allegation or defenses. Affidavits, depositions, admissions, answers to interrogatories, and stipulations may be employed to supplement other documentary evidence in the Board record. The Board may permit such submission to be supplemented by oral argument (transcribed if requested) and by briefs in accordance with Rule 20.

6302.12 Regular procedure (Rule 12).

Under the regular procedure the parties are required to file pleadings with the Board (Rule 13). The regular procedure affords the parties an opportunity to make full use of prehearing and discovery procedures. Hearings under the regular procedure are conducted in the same manner as before courts of the United States in non-jury trials.

6302.13 Pleadings (Rule 13).

(a) *Complaint.* Under the regular procedure the appellant, within 30 days after receipt of the appeal file, shall file with the Board an original and two copies of a complaint setting forth simple, concise, and direct statements of each of its claims, alleging the basis, with appropriate reference to contract provisions, for each claim, and the dollar amount claimed. This pleading shall fulfill the generally recognized requirements of a complaint, although no particular form is required. If the complaint is not filed within 30 days and, in the opinion of the Board, the issues before the Board are sufficiently defined, the appellant's claim and notice of appeal may be deemed to be its complaint, and the parties are so notified.

(b) *Answer.* Within 30 days from receipt of said complaint or a Rule 13(a) notice from the Board, the Government shall file with the Board an original and two copies of an answer, setting forth simple, concise, and direct statements of the Government's defense to each claim asserted by appellant. This pleading shall fulfill the generally recognized requirements of an answer and shall set forth any affirmative defenses as appropriate. Should the answer not be filed within 30 days, the Board may, in its discretion, enter a general denial on behalf of the Government, and the parties are so notified.

6302.14 Amendments of pleadings or record (Rule 14).

(a) *Pleadings.* The Board upon its own initiative or upon application by a party may, in its discretion, order a party to make a more definite statement of the complaint or answer, or to reply to an answer. The application for such an order suspends the time for responsive pleading. The Board may, in its discretion and within the proper scope of the appeal, permit either party to amend its pleadings upon conditions just to both parties.

(b) *Record.* When an issue within the proper scope of the appeal, but not raised by the pleadings, is tried by consent of the parties or by permission of the Board, the issue is treated in all respects as if it had been raised. A motion to amend the pleadings to conform to the proof may be made but is not required. If evidence is objected to at a hearing on the ground that it is not within an issue raised by the pleadings, it may be admitted in evidence, but the objecting party may be granted a continuance if necessary to enable him to meet such evidence.

6302.15 Prehearing briefs (Rule 15).

The Board may, in its discretion, require the parties to submit prehearing briefs in any case in which a hearing has been elected under the regular procedure. (Rule 8(a)(1)). If the Board does not ask for briefs, either party may, upon notice to the other party, furnish a prehearing brief to the Board. In any case where a prehearing brief is submitted, it shall be furnished so as to be received by the Board at least 15 days prior to the date set for hearing, and a copy shall be furnished simultaneously to the other party.

VOL 52 ISS 246 DEC 23 1987 UMI

VOL 52 ISS 246 DEC 23 1987 UMI

6302.16 Prehearing conference (Rule 16).

(a) Whether the case is to be submitted on the written record or be heard under any hearing procedure, the Board, upon its own initiative or upon the application of any party, may call upon the parties to appear before the Board for a conference to consider:

(1) The simplification, clarification, or severing of the issues;

(2) The possibility of obtaining stipulations, admissions, agreements on documents, understandings on matters already of record, or similar agreements which will avoid unnecessary proof;

(3) The limitation of the number of expert witnesses and the avoidance of similar cumulative evidence;

(4) The possibility of agreement disposing of all or any of the issues in dispute, and

(5) Such other matters as may aid in the disposition of the appeal. The result of the conference is set forth in an appropriate memorandum or order which becomes part of the record.

(b) In addition to the procedures provided in paragraph (a) of this section, the Board may direct any party whose claim is based in whole or in part on books of account or other records to furnish to the other party a statement showing the items and figures intended to be proved, with adequate reference to the books and records from which such figures were taken, and to make all such books and records available for examination by the other party. The Board may also direct any party to whom such a statement of items and figures has been submitted (1) to make an examination of such books or records or waive challenge of the accuracy of the statement submitted as reflecting the contents of such books and records; and (2) to furnish the submitting party a schedule or schedules showing the results of such examination, with specific references to the books and records from which such figures were taken, where the examining party's results and figures are different from those contained in the statement submitted.

6302.17 The record of the appeal (Rule 17).

(a) *Contents.* The record upon which the Board's decision is rendered consists of the appeal file, (Rule 4) and, if filed, the pleadings, prehearing conference memoranda or orders, prehearing briefs, depositions and interrogatories and answers to interrogatories received in evidence, admissions, stipulations, transcripts of hearings, hearing exhibits, post-hearing briefs, and documents which the Board has specifically made a part of the record. The record is available for inspection at the offices of the Board at all reasonable times.

(b) *Time of closing the record.* Except as the Board, in its discretion, may otherwise order, no proof is received in evidence after completion of the hearing of the appeal or, in cases submitted on the record, after notification by the Board that the case is ready for decision.

(c) *Weight of the evidence.* The weight to be attached to any evidence of record rests within the sound discretion of the Board. The Board may require any party to submit additional evidence on any matter relevant to the appeal.

6302.18 Discovery-depositions (Rule 18).

(a) *General policy and protective orders.* The parties are encouraged to engage in voluntary discovery procedures. In connection with any deposition or other discovery procedure, the Board may make any order which justice requires to protect a party or person from annoyance, embarrassment, oppression, undue burden or expense. Such orders may include limitations on the scope, method, time and place for discovery, or provisions for protecting the secrecy of confidential information or documents.

(b) *Obtaining a deposition.* After an appeal has been docketed, the Board upon application of any party and for good cause shown, may order the taking of testimony of any person by deposition upon oral examination or written interrogatories before any officer authorized to administer oaths at the place of examination, for use as evidence or for purposes of discovery. The application for such order shall specify whether the purpose of the deposition is for discovery or for use as evidence.

(c) *Orders on depositions.* The time, place, and manner of taking depositions are as mutually agreed upon by the parties, or failing such agreement, as ordered by the Board.

(d) *Use of evidence.* No testimony taken by deposition is considered as part of the evidence in the hearing of an appeal unless and until such testimony is offered and received in evidence at the hearing. Testimony by deposition is not ordinarily received in evidence if the deponent is present and can testify at the hearing. However, any deposition may be used to contradict or impeach the testimony of a witness at the hearing. In cases submitted on the record, the Board, in its discretion, may receive depositions as evidence to supplement the record.

(e) *Expenses.* Each party bears its own expenses associated with discovery, unless, in the discretion of the Board, the expenses are apportioned otherwise.

(f) *Subpoenas.* Where appropriate, any party may request that a subpoena be issued under the provisions of Rule 24.

6302.19 Interrogatories to parties, admission of facts, and inspection of documents (Rule 19).

(a) *Interrogatories to parties.* After an appeal has been filed with the Board, a party may serve on the other party written interrogatories to be answered separately in writing, signed under oath, and returned within 30 days of receipt by the answering party. Within 30 days after service the answering party may object to any interrogatory and the Board determines the extent to which the interrogatory is permitted.

(b) *Admission of facts.* After an appeal has been filed with the Board, a party may serve upon the other party a written request for the admission of specified facts. If the request is to admit the genuineness of any document or the truth of any facts stated in a document, a copy of such document shall be served with the request. Within 30 days after receipt of the request, the party served shall answer each requested admission of facts or file objections thereto in writing. The factual propositions set out in the request are deemed admitted, if the answering party, willfully and without good cause, fails to respond to the request for admissions.

(c) *Production and inspection of documents.* After an appeal has been filed with the Board, a party may serve upon the other party a written request to produce and permit the inspection and copying or photographing of any designated documents, not privileged, regarding any matter which is relevant to the appeal.

(d) Any discovery under this rule shall be subject to the provisions of Rule 18(a) with respect to general policy and protective orders.

6302.20 Time and place of hearing (Rule 20).

Hearings will be held at such places determined by the Board to best serve the interests of the parties and the Board. Hearings will be scheduled at the discretion of the Board with due consideration to the regular order of appeals, the requirements for accelerated or expedited procedures and other pertinent factors. On request of any party and for good cause, the Board, may, in its discretion, change the date of hearing.

6302.21 Notice of hearing (Rule 21).

The parties are given at least 15 days notice of the time and place set for hearing. In scheduling hearings, the Board gives due regard to the desires of the parties and the requirement for the just and inexpensive determination of appeals without unnecessary delay. Notices of hearings shall be promptly acknowledged by the parties.

6302.22 Unexcused absence of a party (Rule 22).

The unexcused absence of a party at the time and place set for hearing is not an occasion for delay. In the event of such absence, the presiding Administrative Judge may order the hearing to proceed or, in his or her discretion, may invoke the provisions of Rule 36.

6302.23 Nature of hearings (Rule 23).

(a) Hearings are as informal as may be reasonable and appropriate under the circumstances. At the hearing the parties may offer such relevant evidence as they deem appropriate and as would be admissible under the Federal Rules of Evidence, subject, however, to the sound discretion of the presiding Administrative Judge in supervising the extent and manner of presenting the evidence. In general, admissibility is governed by relevancy and materiality. Copies of documents, affidavits, or other evidence not ordinarily admissible under judicial rules or evidence, may be admitted in the discretion of the presiding Administrative Judge. The weight to be attached to evidence presented in any particular form is within the discretion of the Board, taking into consideration all the circumstances of the particular case. Stipulations of fact agreed upon by the parties may be used as evidence at the hearing. The parties may stipulate the testimony that would be given by a witness if the witness were present. In any case, the Board may require evidence in addition to that offered by the parties.

(b) Witnesses before the Board are examined orally under oath or affirmation, unless the facts are stipulated, or the Board otherwise orders.

6302.24 Subpoenas (Rule 24).

(a) *General.* Every subpoena shall state the name of the Board and the title of the appeal and shall command each person to whom it is directed to attend and give testimony, and, if appropriate, to produce books, papers, documents, or tangible things, at a time and place therein specified. Subpoenas (including those calling for the production of documentary evidence) are signed by an Administrative Judge or by the Recorder of the Board but otherwise left blank when furnished to the party requesting the subpoena. The party to whom the subpoena is issued shall fill it in before service.

(b) *Subpoenas for attendance at hearing.* At the request of any party, subpoenas for the attendance of witnesses at a hearing are issued. A subpoena requiring the attendance of a witness at a hearing may be served at any place within 100 miles of the place of hearing specified in the subpoena; but the Board, upon proper application and for good cause shown by the requesting party, may authorize the service of a subpoena at any other place.

(c) *Subpoenas for production of documentary evidence.* A subpoena, in addition to requiring attendance to testify, may also command any person to whom it is directed to produce books, papers, documents, or tangible things designated therein. A subpoena calling for such production shall show the general relevance and reasonable scope of the evidence sought.

(d) *Subpoenas for taking depositions.* Subpoenas in aid of depositions (including those for the production of books, papers, documents, or tangible things) may be issued by the Recorder of the Board upon a showing that the parties have agreed to, or the Board has ordered, the taking of depositions under Rule 18. The service of subpoenas in aid of depositions shall be limited to the city or county wherein the witness resides or is employed or transacts business in person. If a subpoena is desired at other locations, a specific ruling of the Board is required.

(e) *Request to quash or modify.* Upon written request by a person under subpoena or by a party, made within 10 days after service but in any event not later than the time specified in the subpoena for compliance, the Board may (1) quash or modify the subpoena if it is unreasonable and oppressive or for other good cause shown, or (2) require the person in whose behalf the subpoena was issued to advance the reasonable costs of producing subpoenaed books and papers. Where circumstances require, the Board may act upon such a request at any time after a copy has been served upon the opposing party.

(f) *Foreign country.* A subpoena directed to a witness in a foreign country shall issue under the circumstances and in the manner, and be served as provided in 28 U.S.C. 1781–1784.

(g) *Service.* A subpoena may be served by a United States Marshal or a deputy, or by any person not a party who is not less than 18 years of age. Service of a subpoena upon a person named therein shall be made by tendering the subpoena to that person with the fees for one day's attendance and the mileage allowed by law (28 U.S.C. 1821). When the subpoena is issued on behalf of the United States or an officer or agency of the United States, fees and mileage need not be tendered.

(h) *Fees.* The party at whose instance a subpoena is issued shall be responsible for the payment of witness fees and mileage, as well as the fees and mileage of the officer who serves the subpoena. The failure to make payment of such charges on demand may be deemed by the Board as a sufficient ground for striking the testimony of the witness and the books, papers, documents, or tangible things produced.

(i) *Contumacy or refusal to obey a subpoena.* In case of contumacy or refusal to obey a subpoena by a person who resides, is found, or transacts business within the jurisdiction of a United States District Court, the Board will apply to the court through the Attorney General of the United States for an order requiring the person to appear before the Board or a member thereof to give testimony or produce evidence or both. Any failure of any such person to obey the order of the court may be punished by the court as a contempt thereof.

6302.25 Copies of papers (Rule 25).

When books, records, papers, or documents have been received in evidence, a true copy or any material or relevant part may be substituted during or at the conclusion of the hearing.

6302.26 Posthearing briefs (Rule 26).

Posthearing briefs may be submitted upon such terms as may be agreed upon by the parties and the presiding Administrative Judge at the conclusion of the hearing.

6302.27 Transcript of proceedings (Rule 27).

Testimony and argument at hearings are reported verbatim, unless the Board otherwise orders. Transcripts or copies of the proceedings are supplied to the parties and others at such rates as may be fixed by the Board.

6302.28 Withdrawal of exhibits (Rule 28).

After a decision has become final, the Board, in its discretion, upon request

and after notice to the other party, may direct or permit the withdrawal of all or part of original exhibits. The substitution of true copies of exhibits or photographs of physical objects may be required by the Board as a condition of withdrawal.

6302.29 Representation of the parties (Rule 29).

(a) *The Appellant.* An individual appellant may appear before the Board in person, a corporation by an officer, a partnership or joint venture by a member, or any of these by an attorney-at-law admitted to practice before the highest court of the District of Columbia or any state, commonwealth, or territory of the United States. An attorney representing an appellant shall file a written notice of appearance with the Board.

(b) *The Government.* Government counsel may, in accordance with their authority, represent the interest of the Government before the Board. They shall file notices of appearance with the Board.

6302.30 [Reserved] (Rule 30).

6302.31 Settlement (Rule 31).

A dispute may be settled at any time before the Board renders its decision by the appellant filing a written notice withdrawing the appeal or by written stipulation of the parties settling the dispute. Proceedings may be suspended while the parties are considering settlement.

6302.32 Decisions (Rule 32).

Decisions of the Board are rendered in writing. Copies are forwarded simultaneously to both parties. The rules of the Board and all final orders and decisions are open for public inspection at the offices of the Board in Washington, DC. Decisions of the Board are made solely upon the record, as described in Rule 17.

6302.33 Motion for reconsideration (Rule 33).

A motion for reconsideration shall set forth specifically the grounds relied upon to sustain the motion and shall be *mailed or otherwise furnished* within 30 days from the date of receipt of a copy of the Board's decision.

6302.34 Dismissal for lack of jurisdiction (Rule 34).

Any motion addressed to the jurisdiction of the Board shall be promptly filed. A hearing on the motion may be afforded on application of either party. The Board has the right at any time on its own motion to raise the issue of its jurisdiction to proceed with a particular case and do so by an appropriate order, affording the parties an opportunity to be heard.

6302.35 Dismissal without prejudice (Rule 35).

When the Board is unable to proceed with disposition of an appeal for reasons not within its control, such appeal is placed in a suspense status. In any case where such suspension has continued, or it appears that it may continue for a period in excess of one year, the Board may dismiss the appeal without prejudice to its restoration to the Board's docket when the cause of suspension has been eliminated. Unless either party or the Board acts to reinstate any appeal so dismissed within three years from the date of dismissal, the dismissal is automatically converted to a dismissal with prejudice without further action by the parties or the Board.

6302.36 Dismissal for failure to prosecute or defend (Rule 36).

Whenever a record discloses the failure of any party to file documents required by these rules, respond to notices or correspondence from the Board, comply with orders of the Board, or otherwise indicates a party's intention not to continue the prosecution or defense of an appeal, the Board may issue an order requiring the offending party to show cause why the appeal should not be dismissed or granted, as appropriate.

6302.37 Sanctions (Rule 37).

If any party fails or refuses to obey an order issued by the Board, the Board may make such order in regard to the failure as it considers necessary to the just and expeditious conduct of the appeal, including dismissal with prejudice.

6302.38 Remand from court (Rule 38).
